Mondale encourages R and D

By Bob Host

Addressing a capacity crowd in Kresge Auditorium, Vice President Walter F. Mondale outlined plans for a $600 million research and development program to "revitalize American industry." Last week, Mondale met in Washington with a number of university presidents, including Paul Gray '54, "to begin designing the ways in which that initial $600 million should be used." The results of that meeting will "help us assemble a package we will send to the Congress early next year," Mondale noted. He added, "We want to lay the groundwork for a long-term national commitment to our research centers."

Mondale cited three areas in which the problems of revitalization are most critical: people, tools, and help in meeting national needs. Of the first, the Vice President mentioned need for researchers at universities, observing that "as the number of faculty openings that declined, as fellowships have declined in value and even disappeared, career patterns have tilted too consistently away from the academy."

When he mentioned the second problem, tools, Mondale was startled by the audience's laughter. However, he quickly recovered and declared, "It is time for us to make our equipment catch up with our minds."

The Vice President pointed out that "universities and industry must cooperate as never before if industry is to be modernized and revitalized. "Benefits will flow in both directions," he added. "If we need an example of university research changing the economic face of a region for the better, we need look no further than the relationship between knowledge and the Route 128 belt."

Although acknowledging that he is "no technical expert," Mondale cited a few advantages American productivity "will continue to enjoy in the world:"

- scientific, technological, and educational leadership "will be easy of the world;"
- "the power of knowledge and military defenses, uniquely combined with natural resources, and human resources that "are the most highly trained and best paid on earth."

Mondale closed the formal portion of his address by repeating part of the commitment address delivered by American political scientist Ralph Bunche at the University of California, and then adding a plea "to ensure that our learning served the ends of the educated heart."

(Linda Hall in page 3)

Gray outlines concerns of his administration

By Steven Solnick

President Paul Gray will outline the top priorities of his administration in his Inaugural Address, to be delivered about noon today in Killian Court. Gray gave a preview of what those priorities and goals would be earlier in the week. He said his speech would stress three major areas of special importance to him and his administration.

He will emphasize the following:

- The human environment of the Institute.
- The pace, coherence and intellectual substance. He reminded his audience that improved engineering techniques have allowed oil companies to retrieve oil from wells previously considered dry.
- When queried on the Iraq-Iran crisis, Lovelind proposed that, as long as Saudi Arabia continues to pump and other countries stop cutting production, America can sustain the war for a short time. Public fear could pose problems, however, he noted.

Lovelind sees a "tremendous potential" in America with regard to unexplored resources and energy.

At MIT, Lovelind seems to be in the driving seat for science and engineering. He has promoted a new wave of students and teachers, and has been able to attract a large influx of students from the East to the West. He is also an expert in the social and political implications of scientific research.

Lovelind's big achievement is his ability to integrate the social and political aspects of science and engineering into the MIT environment. This is going at too fast a pace. Weisner created the Program in Science, Technology, and Society (STS) to address concerns about the social impact of scientific development.

Gray remained non-committal about the role STS would play in his administration. "I am not thinking about just one program. There is no discontinuity between his thinking about this goal and that of Weisner."

On the subject of pace, Gray said he would be asking, "Do we have the speed control up too high?" While he said his address would shy away from an answer to this question, he said it was clear he felt "The whole Institute is going at too fast a pace. We ought to rethink that and slow it down."

The question of pace is under consideration as the Institute was conducted briefly by the Committee on Educational Policy last year and may be the subject of a faculty study process. Gray indicated that such a review would address both his concerns about pace and about curriculum reform. He said that curriculum reform would be a necessary method of incorporating his concerns about the social dimensions of science into the MIT education.

"You can only change the pace by persuasion," Gray said. "It can only be changed by increments and not by Presidential edict."

Gray said he hoped to improve the human environment of the Institute. He cited a greater divergence of interests inside the Institute. (

Worldwatch

Iraq-Iran conflict causes worry

By Richard Seltz

While a concerned, oil-hungry world watches, the conflict between Iraq and Iran continues to escalate, as fighting expands out into the Persian Gulf. The two countries have a long history of uneasy feelings. The treaty providing for joint administration of the Shatt al Arab waterway signed in 1975 by Iraqi President Saddam Hussein and the crowned Shah of Iran was a shaky one at best. Few observers were surprised, then, when Hussein abrogated the treaty, declaring his intent to take back the land "unassigned" by Iran.

Coming as it did on the heels of about ten months of border clashes between the two nations, Hussein's statement was tantamount to a declaration of war. Indeed, Tehran radio announced early this week that "all waterways near the Iranian shores are declared war zones," and Iraq's Defense Minister, General Adana Kaiserleh, said: "Whether it has been declared or not, it is, in fact, war.

Both countries have been following the same basic strategy: go for the oil fields. Iraq's first major offensive into Iran was to bomb Ashahan, site of one of the world's largest oil refineries. Iran, in turn, has been mounting attacks on the capital city of Baghdad and a petrochemical complex near Baneh, the Iraqi oil terminal for the Persian Gulf.

Earlier in the week, President Carter said the US would not intervene in the conflict, and called upon the USSR and all other nations to do the same. Similarly, Moscow has refused Iraq requests for additional arms and denied an Iranian request to cut off all Iraqi aid, saying they will remain neutral in the conflict.

With the repeated attacks on the oil fields, both nations have cut off their oil exports, and concern has grown. The effect of the cutoff will probably not be fully felt for a couple of weeks as there is presently a glut on the international oil market, but prices in the spot market, where uncontracted oil is sold, have already started to rise in response to this latest development.

In addition, concern has started to escalate into action on the part of the US. As Iran has threatened to blockade the narrow Strait of Hormuz, Carter has consulted with other nations and the military on ways of preventing such a closure. Roughly 60 percent of the world's oil passes through the Strait, which Iran said it will close if any outside nations interfere in the conflict. For the time being, then, the world can do little more than talk, and wait.

MIT's economic situation will be an undercurrent

(Continued from page 1)

Gray said the Institute "studied through with a surplus this year." He said next year's projected deficit of $1 million could still be eliminated if MIT is successful in negotiations currently underway with the government over the precise composition of research overhead. MIT is attempting to include a greater share of library costs and equipment depreciation under the "overhead" umbrella.

Discussing the impression he hoped the Inauguration events would give to observers, he cited the week's three symposia as being typical of "the life of the place -- the intellectual substance."

He said he felt they showed more than any other activity during the week, that "MIT was working on the future, and making the future."
World

Atomic fuel sale approved — Following seven hours of debate, the Senate approved the Administration's proposed sale of enriched uranium fuel to India, by a 48-46 margin. While the House had disapproved of the sale last week, both chambers had to vote against the sale for it to be stopped. The vote is seen as a major victory for Carter, preventing an embarrassing reversal of foreign policy in the midst of his re-election campaign.

Israeli ouster attempt denied — Arab diplomats denied reports Wednesday that the Islamic foreign ministers had decided to push for the expulsion of Israel from the United Nations following their meeting in Fez, Morocco. A spokesman said that the report was "premature" and a final decision would have to await further consultations among the ministers in New York. Said the spokesman, "We're not interested in making yet another move against Israel and not succeeding."

Nation

Renault takes over AMC — Renault, the French Government-owned auto maker, will become the principal owner of the American Motors Corporation, under a $200 million agreement announced today. AMC had sought the arrangement to avoid the possible financial collapse of its auto-making operations. The current AMC management will remain even though the French corporation has purchased 46 percent of the American company's outstanding stock. Future plans for AMC include the production of French- and American-designed cars and the marketing of imported Renault cars built in France.

Dope used to generate electricity— Florida Power and Light will be burning the marijuana seized by the United States Customs Service in an experimental program designed to provide savings for the utility and dispose of the confiscated drugs. The Customs service has had problems in the past with burning the "dope" as it burns so fiercely that conventional incinerators have been damaged.

By Richard Sage

Weather

Rain this morning, ending by afternoon. Becoming partly sunny with highs in the upper 60's. Clear and cool tonight, lows in the upper 80's. For Saturday and Sunday, mostly sunny and pleasant. Highs in the mid to upper 60's, lows near 50. Chomed of rain 90 percent this morning, decreasing to 20 percent tonight through Sunday. Meanwhile, tropical storm Hermine continues to move off the Mexican coast near Vera Cruz. It is no threat to the United States.

The Omicron Chapter of Phi Sigma Kappa Congratulates Brother Paul Gray on his inauguration as President of MIT

Now you can have your teeth cleaned as often as you like!

Smiles is New England's first teeth cleaning company. We've made it easy, affordable and enjoyable to get your teeth professionally cleaned.

Dentist in attendance all the time. When you visit Smiles, you see a hygienist who is specially trained to clean your teeth carefully and thoroughly. Of course, a dentist is available if you wish a full (but optional) consultation.

Smiles, S17
That's all it Costs for a single cleaning. Or you can select an annual prevention plan of several visits and save even more.

Come in today — and give yourself a beautiful smile.

For an appointment brochure or further information just call us at 492-4855
Mondale’s message

It seemed almost the case of the prophylactic father. Vice-President Walter Mondale’s Monday morning was a strong overtone to the elitist of the American university system. After abandoning them in the electric atmosphere of the 1970s, Mondale told the “centers of excellence” that the Federal Government was again willing—eagot to take them under its protective wing.

And even more important, Mondale attempted to entice the University cream of the crop back into amicable partnership with the government by pledging a can of red tape and renewed attention to matters of academic freedom.

The effect on the docile crowd of 1,200 was minimal. Even Mondale’s political address—its 19-50 years old—was an anomaly. It was, for the first time, as far as history goes, Mondale that MIT was where he wanted to come.

The idea in the address was also straightforward. When Jimmy Carter pledged $600 million for basic research as part of his economic revitalization package, two weeks ago, much speculation was ignited in academic circles. Details of the plan were not formulated but at least $100 million was dedicated to requirning research labs. But since most of the educators found the aid would be spread too thinly.

The $600 million dollar program was spurred by an Administration study of 24 major university research labs prepared by the National Science Foundation. The report—questioned the University of the United States was in danger of losing its “competitive advantage” if it did not provide untrammeled research funds to purchase equipment and give them more flexibility in using those funds. The report was circulated widely in the White House and its recommendations were championed by Mondale.

The MIT administration was particularly pleased by Mondale’s support for non-investiture in the internal affairs of universities. Feared of this meddling has been growing of late in the educational community as quests of bureaucratic red-tape become increasingly annoying. Also, last week’s jailing of a university professor in the South for refusing to disclose his tenure input into a tenure dispute only heightened university distrust of government.

Mondale’s speech was pithy and straightforward to the concrete and vacuum of his technologically oriented audience. Coda for this actually belong to Frank Press, who, it is widely assumed, wrote most of the speech. Press was also instrumental in convincing Mondale that MIT was where he wanted to come.

Well, yesterday morning, it became apparent that Press was getting his way (or at least writing convincing speeches). Mondale cited the last point was important for MIT administrators, and was one of which had been little discussed before. The Federal Government is obviously concerned about the competitiveness of American universities with sufficient funds to purchase equipment and give them an edge in the research forefront research universities, that is, to the cream of the crop back into incestuous partnership with the government by pledging a cut in red tape and renewed attention to matters of academic freedom.

School pride is a requirement for class presidents. It is fitting that we examine just what is school pride for the MIT student, as the institute inaugurates its fourteenth President today.

You feel school pride when you meet a linguistics student from Yugoslavia outside 5-150 and staring him out of America and says she is ‘at MIT because,’ ‘MIT is just so big. It’s famous.’ This merely happened.

Four years ago, William Lasser, Editor-in-Chief of The Tech, wrote: “For the MIT student, school pride does not come in the form of football victories or homecoming dances. Instead, MIT students develop a satisfaction in their own survival. Life is no breeze here, but if you can make it, you can be proud of it.”

Some things have changed since the days of William Lasser. In 1977, MIT had neither a football team nor a homecoming. Now it has both. Life is not the same here, but if you can make it, you can be proud of it. The MIT student is probably more interested in science than in football.

Four years ago, the Ugliest Man on Campus was a 25-year-old MIT student. Now it is famous.” This real- ly happened.

Many students have only a vague appreciation of MIT’s unique qualities. They do not come in the form of football victories or homecoming dances. Instead, MIT students develop a satisfaction in their own survival. Life is no breeze here, but if you can make it, you can be proud of it. School pride is a requirement for class presidents.

The other day, I was sitting in Marty’s room. He is the Editor-in-Chief of The Tech for the time when they are travelling in a foreign country, such as Yugoslavia, and a person they meet says, “MIT, I’ve heard of that.”

Mitchell Brook ’81

INSTITUTE COMMITTEES WITH UNDERGRADUATE SUPPORT

FALL 1980

This supplement contains information about the fall UA Nominations Committee (NOMCOMM) hearings for Institute Committees. These Committees play an important role at MIT. All of the student positions on these Committees are open to nomination this year. Listed below are the Institute Committees with Undergraduate Support. Committee hearings for nomination in the fall will be held October 5, 1980 and Committee hearings for nomination in the spring will be held February 28, 1981. This supplement describes the Committee hearings for the fall only—information on the spring Committee hearings will be published at a later date.

Listed below are other Institute Committees with Undergraduate Support. Information about all of the Committees is available from the Nominations Committee at the UA Office. The Nominations Committee keeps committee minutes, student representative reports, and other Committee information. In this supplement you will find a description of each of the Committees on the fall hearing schedule, the number of student positions on each Committee, and the people to contact for more information: the Chairperson and the students. You will also find a discussion of the myths about Institute Committees and, on the back page, information on how to become a committee member if you are interested in a Committee at the fall hearings.

COMMITTEE DESCRIPTIONS

ADVISORY COMMITTEE ON SHAREHOLDER RESPONSIBILITY

This committee reviews shareholder proposals under consideration by corporations in which MIT holds shares of stock, and makes recommendations to the Corporation as it should cast its proxy.

Chairperson:
D. Reid Weedon, Jr.
3-221
Corporation Member
Student member (1)
Contact:
Therese A. Prisby '81

ADVISORY COMMITTEE TO EDUCATIONAL VIDEO RESOURCES

This Committee will advise the Provost and the Director of Educational Video Resources on policy matters concerning the use of television in educational programs and in other activities on campus.

Chairperson:
Robert J. Hulsizer
3-375
Student member (1)
Contact:
Neal Lippman '82

ALUMNI ASSOCIATION COMMITTEE

The committee's activities center around strengthening alumni involvement with the Institute.

Chairperson:
Claude Brenner
c/o Bonnie Jones
10-115
Student members (2)

Student members (2)
Contact:
Mitchell Brook '81
ex officio, President Class of 1981

COMMITTEE ON CURRICULA

The committee's activities center on the implementation of the General Institute requirements and course curricula. They include:
1. considering proposals for changes in the institute requirements, and making suitable recommendations to the faculty,
2. acting with power on proposals for Science Distribution and laboratory subjects,
3. acting with power on requests from individual students for exceptions to the General Institute requirements,
4. acting with power on proposals for changes in subjects of instruction,
5. acting with power on proposals for new curricula and changes in existing curricula, and
6. reviewing reports by departments on individual student's programs which include major departures from an approved curriculum, and summaries of all minor departures.

Chairperson:
Richard Yamamoto

Michael Tinell '83

COMMITTEE ON INTERNATIONAL INSTITUTE COMMITMENTS

The committee shall review the scale and nature of MIT's international contractual commitments for education and/or research or service (whether at MIT or abroad) and report to the faculty. The committee shall stand ready on request to consult with the administration or faculty initiators of projects that involve such international institutional commitments. The committee shall make a final report at the end of its term. This report shall include a recommendation as to the committee's continuation on a permanent basis.

Chairperson:
Eugene R. Chamberlain
3-107
x3-3795

Student member (1)
Contact:
Helene Kauder '82

COMMITTEE ON THE LIBRARY SYSTEM

The committee shall formulate policy for the administration of the Library System, consistent with the objectives of the Institute. It shall review budget allocations as prepared by the Director of Libraries. It shall foster the effective operation of the Library Advisory Committee, which shall be appointed for each of the libraries and reading rooms, and shall seek the advice of the advisory committees on matters of policy where appropriate.

Chairperson:
William Siebert
36-625
x3-3716

COMMITTEE ON UNDERGRADUATE ADMISSIONS AND FINANCIAL AID

The committee is responsible for formulating and reviewing policies on admission of all undergraduate students (including college transfers but not students applying for readmission) and on financial aid to students, including undergraduate scholarships, loans, and student employment. The committee shall also exercise prior review of MIT publications and formal statements directed toward the prospective undergraduate student.

Chairperson:
James Mar
33-307
x3-3426

Student members (2)

Dan Shapiro '81
Ingrid Rehse '82

COMMUNITY SERVICE FUND BOARD

The Community Service Fund provides financial assistance to MIT people who are engaged in volunteer community service and action projects. The Fund is managed by a Board of Trustees representing faculty, administration, students, Technology Matrons, Technology Wives, Lincoln Laboratory employees, trustees, and alumni.

The Board performs two key functions:
1. solicits contributions from all members of the Institute community, and additional donations and grants from outside sources, and
2. reviews proposals by Institute groups for the use of funds on MIT-related community service projects.

The committee this year will have four (4) student members:
1. member from APO
2. member from IPC
3. member from TCA
4. member-at-large nominated by NomComm.

Chairmen:
Gregory Smith
200-141
x3-5849
Peter Gil
ESS-414
x3-7167

Student members (4)

Douglas Page '81
Dora Gray '81

PRE-LAW ADVISORY BOARD

The council serves as a subcommittee of the Committee on Preprofessional Advising and Education. It is composed of a group of advisors specially selected on the basis of professional background and interest in legal education, and concerns itself primarily with the approach to involvement in legal education of MIT students.

Chairperson:
Dr. J.D. Nyholt
ESS-566
x3-5182

Administrative Assistant:
Susan Haupt
10-196
x3-4158

Student members (2)
Contact:
Mark Copman '81
Allan R. Kuchle '82
MYTHS ABOUT COMMITTEES AT MIT

Myth: I'm only a freshman. I can only get on a Committee if I'm an upperclassman.

OMCOMM considers students from all classes for most positions. In some cases, the Committee specifically needs a member of a certain class. For example, the Commencement Committee needs a senior and the Committee on Student Affairs needs one student from each of the four classes. In general, all positions are open to all undergraduates.

Myth: Student members of every Committee are full voting members. These Committees need your input. In fact, the Committee on Discipline will not hold a hearing on an undergraduate, unless two of its three undergraduate representatives are present. Student representatives are respected by the faculty, administration, and other students.

Myth: I won't be nominated for a Committee, I don't have any experience in MIT activities.

Some Committees require members to put a lot of time and effort into Committee work. These Committees meet often and involve a heavy time commitment. Some committees meet only once or twice a term and do not require much time and energy from its members. Each Committee is different. Most student representatives take an active role on Committees and find that their efforts are worth the time spent.

Myth: Committee work will take up too much time.

You can run for an office, but you can also become a student representative on an Institute Committee. Student representatives are nominated at NOMCOMM hearings at the beginning of each term.
Myth:
The Institute Committees aren't important.

Reality:
The Institute Committees are an important part of MIT. These committees are advisory committees, policy-making committees, or working committees for special projects or responsibilities. For example, some committees can:
- make recommendations on student academic performance,
- provide assistance to community service projects,
- review MIT's international commitments,
- formulate policies on admission and financial aid,
- and establish policies for IAP.

HOW YOU CAN BECOME A COMMITTEE MEMBER

The Nominations Committee will hold hearings on Saturday, October 4 for student nominations to each of the Institute Committees below. The student positions on these Committees are open to all undergraduates. At each hearing, the NOMCOMM will review each Committee, discuss current Committee business and responsibilities, and interview interested students. The NOMCOMM will nominate students in preference order. Nominations are submitted to the President's Office, for Presidential Committees, or to the Committee Chairperson, for all other committees.

Any undergraduate interested in becoming a member of any of the Institute Committees below should do the following:
1. Submit an application for nomination by 4pm, Friday, Oct. 3.
   Applications for nomination are available in the UA Office, W20-401. These applications ask for information on which the interviews will be based.
2. Attend the committee hearing, Saturday, Oct. 4. Hearings will begin promptly at their scheduled time.

The NOMCOMM is looking for enthusiastic, responsible students to become student representatives on the Committees. We ask that each representative become an active member of the committee and file regular reports to NOMCOMM to keep the student body informed of committee business.

Reactons to talk mixed

(Continued from page 1)

President Gray commented that Mondale’s speech addressed issues that are important at an institution such as MIT, while former MIT presidents Jerome Wiesner and Howard Johnson, who introduced the Vice President at the beginning of the speech, sensed a feeling of student interest in the Vice President. Wiesner noted that Mondale enjoyed speaking with students after the speech, while Johnson observed that the Vice President “would have liked to talk for another hour.” Veteran political observers from the national media did not seem to be overly enthusiastic about the speech, however, with the cameras seldom rolling and correspondents paying little attention.

“2 Maverick: $650 firm. Excellent mechanical condition. Has one serious dent in left rear fender. Swaps for this one major scrap heap in 1st class transportation. Power steering, power brakes, good gas mileage. 778-2274.”

“Wanted”

One ticket to Gene Roddenberry’s Star Trek Extravaganza on October 1st. Will overcompensate for ticket price. Please call Karen 738-2526.

For Sale: Motorcycle. Red, 1970 CB450K3 Honda, 43 hp, disc brakes, $200 or discuss. Tel. 354-4741 weekdays.

Executive Secretary

Secretary required for executive office of Major Travel Corporation. Paying $150/week, good telephone and organizational skills required. Shorthand experience desirable. Call Carol O’Brien 492-3375.

New queen size waterbed, never opened, 10 year warranty, walnut stained pine frame, deck, pedestal, mattress, safety liner, heater. Originally $330, NOW ONLY $199. 334-6226.

Typist needed: work study student preferred. Few hours every Monday and Thursday. Call The Tech, x3-1541.

radio radio radio

Editor's note: This is one of a series of articles describing aspects of the Boston new wave scene.

Some of the best radio shows in town are on the non-commercial college stations. Unfortunately, since these shows have rather complex schedules, it's sometimes hard to discover when they are on. I've compiled a partial listing of new wave shows on college stations. I highly recommend writing into these stations and asking for full program guides to get the full story. Program schedules change at the drop of a hat, so be prepared.

The Experimental Study Group still has a few openings for freshmen this term. If you are interested in an alternative to regular curriculum lectures, consider joining ESG. We offer a flexible, self-paced study program in math, physics, chemistry, and humanities subjects with plenty of staff and tutoring support available. For more info: call 2-612 before October 10th.

The Coop

congratulates
Paul E. Gray
on his appointment as President of M.I.T.
sports

MIT dropped a 3-1 volleyball match to Salem State in Dupont Wednesday. At the left, Linda Plano '82 serves, while below, Barbara Wesslund '84 spikes the ball into two Salem State blockers. Photos by Al O'Connor.

French cooking, American style.
Field Hockey — The field hockey team raised its record to 2-0 with a 3-1 victory over Nichols Wednesday. Goals were scored by Julie Neuringer '81, Susan Flint '81, and Elizabeth Anderson '84 in the team's home opener. The squad visits Colby today in a 4:15pm start.

Soccer — Coach Walt Alessi's soccer squad dropped a decision to Worcester Polytechnic Institute Tuesday, 4-0. WPI is third in New England in Division III. The soccer team takes on Trinity tomorrow at 11:30 on the road.

Volleyball — MIT lost its volleyball season opener Wednesday night to Salem State, three games to one. Salem State took the first two contests, 15-1 and 19-17, but the Engineers came back to win the third 15-12. Salem State rebounded in the fourth game to win 15-8, but coach Dave Castanon of MIT sees improvement for the team, adding that in a month the team will be better, after the players have played with each other for a while. The team competes today in the Salem State Tournament.

There will be an organizational meeting today for an intercollegiate bowling team at 4pm on the third floor of the Student Center. All interested parties are invited to attend.

There will be an athletic chairmen's affiliation workshop on Sunday, Sept. 28 and Monday, Sept. 29 at 7:30pm in 4-163. All new athletic chairmen must attend one of these meetings to be affiliated with the Intramural Council. If a chairman is merely renewing affiliation, attendance at the workshop is not necessary, but a new information card must be filled out at the IM office (W32-121) before Friday, Oct. 5 at 5pm.

The intramural tennis tournament will be held Oct. 11-12 and Oct. 18-19, with a singles and a doubles draw. Entry cards are due by 5pm on Friday, Oct. 3 in W32-121. Questions can be answered by Nick Schoewe '83, IM tennis manager, at 266-4796.
