Crime prevention fair planned

By Laura Farhie

Against a backdrop of concern centered on campus crime, the MIT Campus Police (CP) will sponsor a crime prevention fair on October 21 and 22.

This first large-scale effort to educate the MIT community about crime prevention will be held in Lobby 7.

The drug information exhibit is expected to draw the attention of a large number of students according to the fair's organizer, Sergeant Anne Glavin. The exhibit consists of a "giant size," colorful, lighted display of pictures and information on frequently-abused drugs. Accompanying the display will be pamphlets on recent drugs and alcohol research. "We're not going to say 'Don't take drugs,'" noted Glavin, "We want to educate students.

Because of recent crimes which have occurred on or near campus, another booth Glavin expects to be popular among students is "Self-Protection: Safety on Streets." This exhibit will feature five panels discussing self protection and rape prevention, "Take a Bite out of Crime" campaign brochures, copies of the Campus Police escort map, and "Hate to do the do you are raped" cards. Shell alarms will be on display and will be sold for $3.00 each.

A 35-minute slide show with soundtrack entitled, "The MIT Campus Police and Crime Prevention on Campus" will make its debut during the Crime Prevention Fair. Written and produced by Glavin and photographed by Emergency Medical Technician William Cahill, the film took one year to complete.

"Any living group interested in seeing the slide show after the fair can contact us," offered Glavin. She said that after showing the film to a dormitory, a Campus Police Officer can be present "to open up to any questions or discussion.

Three films, will be shown twice each day by Educational Video Resources. The film, "Mugging: You Can Protect Yourself!" Glavin labeled "terrific, because it gives practical rather than complicated advice." Glavin said that the film, "Rape: A Preventive Inquiry" is effective in that it is used in all of the CP's rape-prevention programs; however, some might find it controversial because convicted rapists and women who were raped were interviewed.

The third film to be shown, "Cardiopulmonary Resuscitation!" Glavin said is "great if you are not a CPR expert in.

"There will be two CPR demonstrations morning and afternoon and Red Cross information on where to sign up for CPR and first aid classes.

The bicycle security and safety exhibit will feature displays of Cidedel and Kryptonite bike locks and a "display of bolts cutters used by thieves to cut locks, as well as examples of poor locks." According to Glavin, MIT Campus Police Department bike registration will also be available.

Another booth dealing with the prevention of auto theft has a Massachusetts Crime Watch Auto Thieft Quiz. There will be various auto theft information flyers, such as "How to Wire a Kill Switch." A dent puller, a tool used to "pop" ignitions will be on display.

Other exhibits include Operations Identification and Massachusetts Crime Watch, Home and Apartment Security, Office

Student takes own life

By Steven L. Holschuch

Kenneth A. Hamilton '83 took his life on September 30, the Dean's Office announced last week.

The incident is the first suicide of a registered student in almost three years.

Hamilton, a former News Editor for The Tech, entered MIT with the Class of 1981. He resided himself in his Somerville apartment, leaving no note behind.

Associate Dean for Student Affairs Robert Randolph, head of the counseling section of the Dean's Office, said that Hamilton had been seeking aid there and with the Medical Department.

"The ultimate conclusion is that the aid wasn't enough, " Randolph said, "but why this was so hard to say. It's a very difficult situation."

Randolph said Hamilton had "many friends" and was close to the Hillel Society and added that, "ultimately, he felt very alone.

continued. He expressed doubt that the U. S. would actually use its nuclear umbrella to defend Western Europe, because it would expose our own cities to retaliation.

Clark devoted a large part of his talk to evaluation of his opponents. Ronald Reagan, he said, "wants an expansion of government in all areas." While Reagan originally espoused the superiority of a free market over a government-regulated economy, Clark said, "it is interesting to see how Reagan's free market position has deteriorated," on the issue of federal aid to New York City.

"Reagan would have us in an endless race for military superiority, Clark claimed, saying that the Soviet Union has turned the rest of the world against itself and is not likely to accept an inferior position.

"Jimmy Carter's four years in office have permanently disqualified him from consideration," Clark said. He told the crowd that the American Embassy in Iran had warned Carter that there would be an attempt to seize the embassy if the Shah was admitted to the U.S., but that Carter refused to act on this warning. Speaking to a crowd which included IAPC members, Clark stated that "I am for the impeachment theory," he concluded, "I'm into the impeachment theory.

Clark had kinder words for John Anderson. His candidacy (Given page to page 7)

Student takes own life

Hilton had taken more than a year off from MIT. He lived at East Campus and moved to Bexley last year before moving off campus. He was majoring in computer science at the time of this death.

In addition to serving as News Editor, Hamilton was elected as a Contributing Editor of The Tech. He had also worked for the MIT News Office.

by Chris Kuwary

"Free market, civil liberties, and Peace," is a short the play of Clark, the Presidential nominee of the Libertarian Party, who addressed the MIT community here last Thursday night.

Speaking to a crowd which almost filled Room 26-100, Clark exhorted the audience to "break the monopoly of the two-party system." He said that the administration has offered as the "same old state programs for 30 years, and the economy and society are falling apart around these programs."

A view that government is not "benign," Clark explained, emerged in this country during the Vietnam War and was exacerbated by the Watergate scandal. "This feeling that the government is against us is backed up by the fact that the government is not in our interest, leaving no note.

"The money lost to the rest of the world against itself and is not likely to accept an inferior position.

"Jimmy Carter's four years in office have permanently disqualified him from consideration," Clark said. He told the crowd that the American Embassy in Iran had warned Carter that there would be an attempt to seize the embassy if the Shah was admitted to the U.S., but that Carter refused to act on this warning. Speaking to a crowd which included IAPC members, Clark stated that "I am for the impeachment theory," he concluded, "I'm into the impeachment theory.

In addition to serving as News Editor, Hamilton was elected as a Contributing Editor of The Tech. He had also worked for the MIT News Office.
Clark comments on his opposition (Continued from page 1)

shows the massive desire of the American people for an alter-
native," he said. Although Clark
called Anderson a "mere ar-
telizable" candidate,
then of the others, he said
that a vote for Anderson would
be "a vote of endorsement for
the establishment." Those who are
associated with the establish-
ment, he said, should vote for the
Libertarians.
Clark advocates the repeal of all victimless crime laws. He is in
favor of legalized abortions, say-
ing "You should not make
anything criminal unless it is
clearly and irreversibly wrong."
He supports the Equal Rights

calling against the draft, which he called
"against American tradition and
against the rights of individuals."

Announcements

Seniors who wish to apply for
graduate study in the Department
of Electrical Engineering and
Computer Science during 1981 are
urged to apply by November 1.
Applications may be picked up in
Rooms 38-444 and 3-108.

NOTICE to international students
who have registered since
January, 1980: those who have
wishes who would like to be in-
vited to be guests of the MIT
Women's League for X
Women's Day, please contact
Professor Louis Menand
immediately.

Rally at Boston Commons Oct. 19
Parkman's Bandstand site of the
Commons rally will run in con-
junction with Action for Soviet
Jewry in support of the
Yelistratous, a refusnik family,
or Prisoners of Conscience,
and for those oppressed in the
Soviet Union.

Speakers at the rally will in-
clude Congressman Robert
Drinan; Professor Alan
Dershowitz of Harvard Law
School; N. E. coordinator of
Amnesty International, Joshua
Rubenstein; Rabbi Albert
Abramowitz of Brandeis Univer-
sity; and Boris Katz, an emigrant from the
Soviet Union. At 3pm-3:30pm.

MIT Amnesty International
Human Rights Group is sponsor-
ing a vigil on Sunday Oct. 19,
Mother's Day in Argentina, 2-
year Holyoke Center, Harvard
Square. The vigil is to show
solidarity with the mothers of
Piazza de Mayo in their demand
from the Argentine government
for information about their disap-
ppeared loved ones. We will have
booths, general information and
petitions. Come by, support
human rights, and help these
courageous women.

We're The Energy Systems
Company.
Helping to develop the
world's energy resources.
Extracting them, pumping
them, conserving them, and
cleaning up after them.

At C-E, we are always
looking for new sources of energy.
Your energy can help.

We're The Energy Systems
Company.

At C-E, you could become
involved with some of the most
exciting and most advanced
equipment for energy engineering
programs underway today:
The leading standardized
nuclear steam supply system.
Efficient utility scrubbers that
remove SO2 from stack gases.
Drums and tubing systems that
operate at depths of up to
6,000 feet. Wellheads that
control working gas pressures
up to 15,000 psi. And other
products too numerous to
talk about here.

You'll have the opportunity
of putting your engineering
schooling and experience to
work, utilizing and sharpening
the other skills you already have,
and branching into new areas.

We're a $2.33 billion com-
pany that's been supplying
equipment, technology and
research to energy industries
for over 65 years. Approxi-
mately 46,000 employees are
engaged in the United States
and around the world.

World

Iranian PM to visit US — Mohammed Najib, the Prime Minister of Iran, is expected to arrive in the United States today. He is coming to appear before the United Nations, although he also has an invitation from President Carter to come to the White House. “We have no expectation of any sort of offer from Iran; we're not optimistic,” said a State Department spokesman.

England’s Callaghan quits — Former British Prime Minister James Callaghan resigned his position as leader of Britain's opposition Labor Party Wednesday. The move is expected to lead to a bitter power struggle between the party's left- and right-wing factions. Former chancellor of the exchequer Denis Healey is the favored candidate to replace Callaghan.

Nation

Santa subject of suit — Michigan department store employee, dressed as Santa Claus, stood up in the middle of the store and announced a woman of stealing forty dollars. Subsequent investigation proved the woman innocent. She has now filed suit against the employee and the store, claiming that the four-year-old incident has “irreparably harmed” the good name of Old St. Nick.

Mary Tyler Moore's son dead — Richard Meeker, the only child of actress Mary Tyler Moore, shot and killed himself with a shotgun late Tuesday in Los Angeles. Police have not yet determined whether or not the death was an accident or suicide. Meeker was apparently loading and unloading the shotgun when it went off and struck him in the head, a police detective reported.

Andersen gives up on bank loans — Independent presidential candidate John Anderson abandoned efforts to obtain ten million dollars in loans from banks in an effort to boost his campaign in the middle of the store and announced a woman of stealing forty dollars. Subsequent investigation proved the woman innocent. She has now filed suit against the employee and the store, claiming that the four-year-old incident has “irreparably harmed” the good name of Old St. Nick.

Local

carter motorcade blocked — President Carter’s appearance in Boston Wednesday was held up by striking police and firefigters. About 1900 workers blocked the exit of the Summer tunnel leading from front an Air-

port to downtown Boston. Boston police closed the outbound Callahan Tunnel, which the motorcade proceeded through in the direction opposite to normal traffic. The remainder of Carter’s visit was unevent-

Sports

Phillies go two up — The Philadelphia Phillies defeated the Kansas City Royals 6-4 Wednesday night in the second game of the 1980 World Series. The Phillies now need only two victories in the remaining five games scheduled to win their first world championship ever. The series shifts to Kansas City tonight for the third game.

Weather

Warm weather returns to New England this weekend. Partly to mostly sunny today with southerly winds. Highs near 72. There is a chance of a widely-scattered light shower during the morning. Pvt tonight, mild temperatures in the middle 50’s. Increasing cloudsiness on Saturday with showers and thundershowers beginning during the afternoon or evening. Warm again, with highs near 73. There is the potential for a good deal of badly-needed rainfall overnight Saturday. Lows in the 60’s, Sunday will be cooler with mostly sunny skies. Highs in the 60’s, lows in the upper 40’s. Chance of rain 30 percent today, 40 percent Saturday, 40 percent Sunday.

FRIDAY OCTOBER 17, 1980 THE TECH PAGE 3
As a candidate ... this man would be against capital punishment, for social reforms, opposed to the arms race, in favor of the ERA and therefore unacceptable to the Moral Majority ...
It is, of course, possible that the water temperature was turned down for reasons other than energy conservation. Perhaps it was an honest error — someone thought the thermostat was Celsius, and so set it to 40 degrees. Everyone makes silly mistakes with units now and then. Maybe there’s a problem of supply and demand, especially with overcrowding. In a fit of inanity on a recent weekend, the water was only slightly warmer. The five most dangerous words in the English language. Some have suggested more diabolical plots. It is only mildly difficult to imagine some institute official snickering at the more thought of a student going into thermal shock while trying to wake up for a nine o’clock test.

Truly paranoid minds have suggested an even more sinister motive: the effective requirement of daily cold showers may be thought of as analogous to the military’s use of saltpeter in soldiers’ food; the plot has undoubtedly been coked the Institute anti-screw.

You consider the usual state of the Green Line at rush hour. I always turn off lights when I’m leaving a room, and sometimes while staying in one. I rarely use my electric blow dryer.

I’m even willing to go for saving energy in the shower. There are insensitive attachments that can be purchased for showerheads which decrease the water flow. I might even consider turning the water off while lathering up. It didn’t involve a serious risk of pneumonia and/or permanent soap encrustation. And I’m certain that the “shower with a friend” concept would go over well at MIT.

The Root-Tilden Program is designed to provide a unique educational opportunity for the student committed to the use of his or her professional talents in the service of the public. Complementing the normal law curriculum, the Program offers its members the opportunity to observe and support the work of lawyers committed to practice in the interest of the public. Grades and LSAT scores are not the principal criteria used in selection of Root-Tilden Scholars; primary attention is paid to the candidate’s demonstrated commitment to, and capacity for, public service. Each scholarship covers two-thirds full tuition for one year and is renewable based upon satisfactory academic performance and participation in Program activities and internships. The scholarship is awarded without regard to financial need, but additional aid over and above the tuition award may be granted, either on a loan or part-loan, part-grant basis, upon a demonstration of need. See Dean Susan Haigh Houpt, 7-102.

Some of the best ideas at Wang were born in the Fifties.

- Systems Software Development
- Hardware Development
- Software Support
- Technical Writing

If you’re looking for a high technology company, you’ve found the one that gives you unlimited opportunities right from the start.

Wang

We’re working to create the office of the future, with a complete line of small business computers, terminal equipment, and the world’s leading word processing systems. And for the past five years, we’ve been one of the fastest growing companies in the world.

But don’t just come to Wang because we’re big. Come to Wang because we’re small. Small enough to value the people behind our products as much as the products themselves. And small enough to remember that a good idea doesn’t always come from the top. And there’s plenty of room for you and Wang to grow together.

At Wang, high technology is our business. But our best ideas are you.

Contact your placement office for specific recruitment dates or send your resume to: Mary Ann Lyons, Supervisor of College Relations, Wang Laboratories, Inc., Dept. Of, One Industrial Avenue, Lowell, MA 01851.

WANG
Making the world more productive.
Applications are now being accepted for the annual Harry S. Truman Scholarships. The scholarships are awarded on the basis of merit to current sophomores who possess outstanding potential for leadership in government. Students following courses of study in history, political science, public administration, economics, and finance, and international relations should especially be encouraged to apply.

The awards are made to one student from each state and, in addition, up to 26 scholarships may be awarded at large. Each scholarship covers tuition, fees, books, and room and board to a maximum of $5,000 annually, and is renewable for the senior year and for up to two years of graduate study.

Any student wishing to be considered should contact Dr. Louis Menand, Room 3-234, Ext. 3-7752, by today.

The Fannie and John Hertz Foundation awards graduate fellowships to students of outstanding potential in the applied physical sciences. The fellowships may be used at one of 15 institutions, including M.I.T. Applicants must be US citizens or have documented proof of intent to acquire it. The proposed field of graduate study must be concerned with applications of the physical sciences to human problems, broadly construed. High previous scholastic performance is expected of all applicants, including at least an A average during the last two years of undergraduate work. Contact the Graduate School Office, Room 3-136, for further information. Application deadline: Nov. 15, 1980.

E-Systems continues the tradition of the world’s great problem solvers.

Maxwell’s electromagnetic field theory led to huge practical scientific advances. His light theory led to his own development of one of the first color photos and the kinetic theory of gasses. Scientists and engineers at E-Systems are carrying on in the tradition of Maxwell’s genius. Today, they are solving some of the world’s toughest problems in electronically steered phased array antennas, electromagnetic scattering and solar ray concentration, using his findings as tools. E-Systems is maintaining a reputation for designing and building communications, data, antenna, intelligence and reconnaissance systems that are often the first-of-a-kind in the world.

For a reprint of Maxwell illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah or Virginia, write: Lloyd K. Lauderdale, V.P.-Research and Engineering, E-Systems, Corporate Headquarters, P.O. Box 226030, Dallas, Texas 75266.

The problem solvers.

Doing it right requires the proper tools, opportunities, and support. 
At Honeywell, we offer all this and more — because we're continually advancing our leadership in nearly every major segment of the electronics, computer and automated control fields. We need talented individuals with ambitious professional goals and the dedication to pursue them. 
If your objectives and qualifications match ours, we'd like a chance to discuss your opportunities for building a career with Honeywell. 

**ELECTRO-OPTICS CENTER – LEXINGTON, MA** 
Located in Lexington, MA, the Electro-Optics Center is involved in the development of electro-optical systems that include mercury cadmium telluride detectors and detector arrays, infrared reconnaissance sets and forward-looking infrared radar systems. 
Primary needs are for BS and MSEE and Physics candidates as well as PhD Physicists (solid state) and Material Scientists.

**PROCESS MANAGEMENT SYSTEMS DIVISION – PHOENIX, AZ** 
Located in Phoenix, the Process Management Systems Division is involved in research, design, development and manufacture of computer systems for management of large industrial complexes and electric utilities. The division provides systems which give it a leadership role in the vital area of energy management. 
Primary needs are for BS/MSEE, Computer Science and Physics candidates for systems, electronic and software engineering positions. 

**SMALL SYSTEMS AND TERMINALS DIVISION – BELLERICA, MA** 
Located in the Boston area, the Small Systems and Terminals Division (SS&TD), manufactures and supports the growing family of Level 6 minicomputer systems, intelligent terminals and peripherals for worldwide distribution. Positions in all areas of computer design and development, engineering, manufacturing, and programming are available for individuals with BS and MS degrees in EE and Computer Science. 
In addition, positions are available in the Advanced Engineering and Manufacturing Management Program. Each of these are three-year job-rotation programs leading to the attainment of a Master's degree and technical leadership position in engineering or manufacturing.

Our representatives will be interviewing on campus October 31st. Check with your placement office to verify recruiting dates and to sign on our schedule. Ask for a copy of our brochure, or write to Ernie von Heimburg, Corporate Manager, University Relations, HONEYWELL INC., Honeywell Plaza, Minneapolis, MN 55408.

Stardust Memories: Art for Art's Sake?

Stardust Memories, United Artists, Rare PG. Now playing at the Sack Paris, Boston. Stardust Memories is Woody Allen's latest and greatest and is a masterpiece. In this pseudo-autobiographical film, Woody plays Sandy Bates, a popular comedian and scriptwriter who again send him to appear at a film culture weekend at the Stardust Hotel in New England. Between screenings, Sandy discip- lines were after war of Marie's-eyed fans calling him a "genius," volunteering to act for him, needing his approval on their scripts, and begging him to appear at their fund-raising banquets and lecture. One girl even asked him to sing a song for her (he does). All the while, he is harboring a deep-seated concern that his pictures are too immoral and wondering how he can make a point to get people to laugh when there is so much suffering in the rest of the world.

Back's only other concern for the weekend is his greatest interest and weakness, beautiful women. The three key females areוכי ex-mistress Dorie (Charlotte Rampling), visited through flash-backs to her earlier filmmaker days; Joel (Marie-Christine Barrault), a sexy French blonde whom Sandy is courting for marriage; and Daisy (Jessica Harper), the wayward-haired fan who reminds him of Dorie.

The principals carry their roles well, though the women are too much overshadowed by Allen and are not allow ed to develop and interact as much as they should. Jessica Harper is the only one of the three to have previously worked with Allen (Love and Death, Then, Allen has departed so much

Ordinary People: bright, entertaining

Ordinary People directed by Robert Red ford, starring Donald Sutherland, Mary Tyler Moore, Bebe Neuwirth by Alvin Sargent, based on the novel by JudithGuest. A Paramount Picture, now playing at the Sack Chel.

Ordinary People, Robert Redford's second directorial effort proves that he is not just another pretty face. He has shown considerable skill for a new director, and has made a movie that he can be proud of.

The film is a sensitive portrayal of a family in the aftermath of a tragedy. Calvin (Donald Sutherland) and Mary Tyler Moore) are a happily married couple until two sons are involved in a boating accident. The older son, Buck dies, and the younger son, Conrad (Timothy Hutton), overcome with guilt, later at- tends suicide. The film is about the affect on the parents of the suicide and, perhaps, about the change in the parents relationship with each other.

The film's cutting is superb. Mary Tyler Moore's greatest role in Ordinary People. Mary Richards close roles for so long that many don't believe she can play any others. Surprisingly, in Ordinary People, she departs completely from this typecasting, and with great success. Beth Jarett is the least likable (and most inter-

My first encounter with Banchetto Musica came in a 1960s Britain where various high-street orchestral versions were still in vogue. It sounded nice, but Banchetto's performance last Friday served as final confirmation that it was wrong. I concluded that spritzy-thick treatments performed on a symphonic scale were not only not reflective of the Baroque era, but an emasculation of its glory, and that the clean sounds of Banchetto were right.

The performance encompassed both periods of concerto minimalism, and of magisterial grandeur, the nature of the latter gaining power precisely because of the omission of unwarranted Baroque violin and oboe playing was particularly fine, but the performance was unfortunately somewhat marred by painfully poor sounds emanating from the so-called "natural" horns. I appreciate the desire to use authentic instruments, but if this is to be done, a necessary pre-requisite is to find individuals capable of playing them.

It sounded nice, but Banchetto's performance last Friday served as final confirmation that it was wrong. I concluded that spritzy-thick treatments performed on a symphonic scale were not only not reflective of the Baroque era, but an emasculation of its glory, and that the clean sounds of Banchetto were right.

The performance encompassed both periods of concerto minimalism, and of magisterial grandeur, the nature of the latter gaining power precisely because of the omission of unwarranted Baroque violin and oboe playing was particularly fine, but the performance was unfortunately somewhat marred by painfully poor sounds emanating from the so-called "natural" horns. I appreciate the desire to use authentic instruments, but if this is to be done, a necessary pre-requisite is to find individuals capable of playing them.

Banchetto Musica began their night with a program of works by Handel, J.S. Bach and Purcell on October 10 in the Town Hall.

My first encounter with Banchetto Musica came in a 1960s Britain where various high-street orchestral versions were still in vogue. It sounded nice, but Banchetto's performance last Friday served as final confirmation that it was wrong. I concluded that spritzy-thick treatments performed on a symphonic scale were not only not reflective of the Baroque era, but an emasculation of its glory, and that the clean sounds of Banchetto were right.

The performance encompassed both periods of concerto minimalism, and of magisterial grandeur, the nature of the latter gaining power precisely because of the omission of unwarranted Baroque violin and oboe playing was particularly fine, but the performance was unfortunately somewhat marred by painfully poor sounds emanating from the so-called "natural" horns. We're offered four of these fifties packages, each described more playfully than the next: Invaders, Exod, Protec, and the Cosmic Angels. All is not very present. However, the Cosmic Angels are quite potent. I've heard them already in a couple of these fifties packages, each described more playfully than the next: Invaders, Exod, Protec, and the Cosmic Angels. All is not very present. However, the Cosmic Angels are quite potent.

The Invaders started out as a nostalgia act, as a professional act, in the footsteps of the Vapours, but we've realized her looks, gourmandises, and a really forgettable sound. It's all like the other Invaders songs by Vapours, but we've

As a Fortune 500 company, our chosen market is accelerating. The outstanding rate of sales and earnings we are experiencing has resulted because the challenge of working with the future excites us.

Your tomorrow is at Harris today.

Harris today has a strong position in broad areas of communication and information handling technology. We are a well recognized leader in voice and video as well as data and graphics communication.

Here at Harris, you'll find a keen awareness that high technology results from the philosophy that people come first. Every plan, every concept, every solution comes from our own professional staff. It is obvious to us that our success in product development, distribution channels and financial resources is due to the enthusiastic effort of our people.
MASTERS OF SCIENCE
IN TRANSPORTATION AT MIT

The new Master of Science degree in Transportation is based on an interdisciplinary, intermodal approach to transportation. The program is accessible to students with a wide range of undergraduate degrees including engineering, the social sciences, architecture, management, planning and operations research. Students also participate as research assistants in a large variety of research projects focusing on the role of transportation in solving some of society’s basic problems such as energy, the environment, and economic development.

For more information on the program, please write to:

Electrical & Mechanical Engineering Graduates:

THINK
About Your Future!

We do - both yours and ours. Ford Aerospace & Communications Corporation, located in Palo Alto, California, has a broad capability in total space and terrestrial communication systems and services. This capability, developed over the past decade and a half, encompasses communication and meteorological satellites, earth stations, space vehicle communication equipment and instrumentation, command and control systems, operation of space vehicle control centers, software development and large computer networking projects.

What does this continued growth and expansion mean to you? Our success means an exciting, challenging and meaningful environment where your ideas and talents will be utilized to the fullest. It also means ample opportunity for career advancement and rewards to match in a true professional and highly technical state-of-the-art atmosphere.

ELECTRICAL ENGINEERING - Engineer or Associate Engineer. Areas of specialization include digital logic design, microprocessor applications, systems engineering, computer networking, communication systems, signal processing, data control and display, RF microwave, satellite systems, antenna systems, and analog and digital circuit design. BS, MS, PhD EE.

MECHANICAL ENGINEERING - Mechanical Engineer - Integration and test, spacecraft propulsion, composite materials, product design, electromechanical packaging, mass properties, lightweight aerospace structures. BS, MS, PhD ME.

How would you like to join us? Our representatives will be on campus FRIDAY, OCTOBER 17. Please sign up at the Placement Office or write to Professional Employment, 2592 Fabian Way, Palo Alto, CA 94306, Dept. BS-31. An equal opportunity employer men/women.

Ford
“Musing in Action,” also from the Comsat Angels, has a pulsing allure, and the balance between instrumentation and vocals is very sophisticated. The song twists nicely back on itself lyrically. Followers daring at the outset “I don’t want to be your baby / I don’t want to have to call for you” and ending by calling “Baby! Baby!” over and over into an empty space. Scary good.

“Waiting for a Miracle” is the only disappointing Comsat Angels selection, and paradoxically the title track of their own album, just released this month. Protes, from Belfast, are quite acceptable too, although not miraculous. They clearly understand their pop heritage, unlike the misguided Excel, who confuse rock and pop. Protes just played in Boston, and these selections are indeed representative of their work. Protes was formed in 1978 after the members went to see a Clash concert, but this snappy, uplifting stuff is an awfully strange response to the Clash circa 1979 Belfast. The only indication I had that they even had heard of the Clash is a bit of metallic, grating Mick Jones guitar on “All I Wanna Do,” but it’s a dead losing.

Pop overdose does this group in eventually; their working class lament “I Can’t Cope” sounds silly, like the Revillos trying to be serious or something. Their best effort — and it’s the tune that redeems Protes — is “A Place in Your Heart.” It’s shameless pop-anchored stuff, less quickly than the Boomtown Rats (the comparison is a little too obvious); maybe the Undertones if they ate less junk food and weren’t so funny. The Comsat Angels are the remarkable band of this presentation. They’re still a little unsure, but I mean to get a copy of their own LP, Waiting for a Miracle; they have some good ideas.
Friends wish you luck on a big exam. Good friends stick around to see how you did.

The Opera Company of Boston is starting its 1980/81 season with an all-day opera fair on October 25. Starting at 9am, there will be performances of Bach's Coffee Cantata, Brahms' Liebeslieder Walzer, recitals by Donald Gramm and Brent Ellis, and chamber music. All is free. A supper will conclude the day at 7pm. Postcards and programs will be available for $1.00. The Opera Company of Boston will be performing Marschner's The Vampyre at 7pm on October 31, and at 4:30pm (raindate) on November 1. Members of the audience are advised to come appropriately equipped to deal with any contingency that might arise, bringing ample quantities of garlic and crosses. Tickets from St. Call 426-5300.

This week's LSC lineup:
The General (classic) Fri. at 7:30 in 10-250.
The Kids are Alright Fri. at 7 & 9:30 in 26-100.
Dr. No Sat. at 7 & 10 in 26-100.
Z Sun. at 6:30 & 9:30 in 26-100.

They say they were just hanging around killing time and by the way, "How did you do?"
You tell them a celebration is in order and that you're buying the beer. "Look," one of them says, "If you did that well, buy us something special." Tonight, let it be Löwenbräu.

Lowenbrau. Here's to good friends.

Q: Where do you find one of the world's largest energy research and development centers with career opportunities allowing you to get involved?

A: In Idaho, at EG&G...where your career will have enormous room to grow.

EG&G is the operating contractor for the Department of Energy's vast Idaho National Engineering Laboratory (INEL). The INEL covers about 900 square miles and employs some 7,000 people of whom roughly 4,000 hold degrees.

If your career plan include contributing to the development of alternative energy, EG&G Idaho, Inc. offers you a unique opportunity.

M.I.T. STUDENT CENTER
The following fellowships are being awarded by the American Association of University Women:

**Dissertation Fellowships:** Approximately 70 fellowships are available for women who will have completed all course requirements and examinations for the doctorate or the juris doctor by January 2, 1981 and whose degree will be conferred by the end of the fellowship year. Applicants must be citizens of the United States or hold permanent resident status. The period of award is the 12 months beginning July 1, 1980. Stipends range from $3,500-$7,000: the deadline is December 15, 1980.

**Postdoctoral Fellowships:** For postdoctoral research for women who hold the doctorate at the time of application. Applicants must be United States citizens or hold permanent resident status. Funds may not be used for research equipment, publication costs, travel grants, or tuition for further graduate work. The period of award is the 12 months beginning July 1, 1980. Stipends range from $5,500-$9,000: the deadline is December 15, 1980.

**For American Women in Selected Professions:** Three fellowships allow women in their final year of professional training in the fields of law, dentistry, medicine, veterinary medicine, and architecture or their tinyl. The period of award is the 2 years beginning September 1, 1981. Stipends range from $3,000-$7,000: the deadline is December 15, 1980.

**International Fellowships:** Approximately 50 fellowships are awarded for one year's graduate study at a United States institution for women who are citizens of countries other than the United States. (Six awards for advanced research in any country other than the United States is also available.) Stipends are limited to the cost of living according to need and place of study (average $5,000-$5,000). Travel and research costs are not covered. Awards are for one year beginning in September 1981. Details may be obtained by contacting Jeanne Torne, American Association of University Women, 3300 M Street, NW, Washington, DC 20007.

**United Kingdom Awards:** There will be a meeting of staff and people interested in working on the staff of BSA, the MIT School of Arts and Letters. All events are open and open to the public. For more information, call 495-2800.

**National Committee for United Nations Fellowships**: The John F. Kennedy School of Government at Harvard has announced their October fellowships. All events are free and open to the public. For more information, call 495-1460.

ADMIT ONE
sporting notices

There will be open swimming at Alumni Pool on Sundays beginning Oct. 19 and continuing until Dec. 14 from 1-3 pm. There will be no open swimming on Sunday, Nov. 30.

Undergraduates interested in joining the MIT ski team should meet Monday, Oct. 20 at 5:15 pm in the exercise room of DuPont Athletic Center. Practices, the season schedule, and training camps will be explained at the meeting.

Wrestling practice will be held at 5 pm daily in the wrestling room in the duPont Athletic Center. All interested students are cordially invited to attend.

This year's Octathon will be held from Nov. 10-16. The sports will be basketball, volleyball, water polo, hockey, ultimate frisbee, soccer, football, and softball. Each team will be allowed 15 players. There will be an entry fee of $45 per team. A $50 deposit is required for teams not affiliated with the IM council. Entry forms are due on Wednesday, Oct. 22 at 4:00 pm at the IM office. If there are questions or suggestions, Steve Arbekstein can be reached at x5-7377 or 494-0434. Messages can be left at x5-316.

The intramural hockey season will tentatively start on Sunday, Dec. 2 and run through the third week in March. All games will be played in the Intramural Office (W3-212B) no later than 4 pm on Wednesday, Oct. 22. Questions can be addressed to manager Richard Kotansky at x5-7288 or assistant manager Mike Colucci at x5-7288 or 494-1146.

All people interested in trying out for a varsity or freshman squash team are invited to a brief informational meeting on Thursday, October 23, at 5 pm in W30-491.

Official Jeweler Class of 81 & 82
The Dieges & Clust representative will be in Lobby 10 to take ring orders and to handle any problems anyone may have with our ring, Wed. Oct. 22 from 10:30 to 12:30. Information & prices will be given at that time.

STROGBOW
DRIVING THE WEDGE BETWEEN
WINE AND BEER

French craft, American style.
Football — The Engineers currently sport a 3-1 record after a 16-15 come-from-behind win over New York Maritime last weekend. Quarterback Barry Jordan '83 threw for two touchdowns to Stu McKinnon '82 including the 23-yard game-winner. Kicker Willy Schwartz '82 hit on a 36-yard field goal in the first half, a second consecutive game in which he has scored from beyond the 35-yard line. A victory over Roger Williams College of Rhode Island in tomorrow’s 1:30 pm homecoming game would assure the Engineers of their first winning season since the turn of the century.

Cross country — Paced by Bob Collins '82 and captain Pat Hamilton '81, the harriers hold a 3-1 mark. Collins has finished first, second, and third in three races this fall, while Hamilton has finished second once and third twice. In the Greater Boston meet held on Tuesday, Hamilton finished 21st with a time of 31:34.4, while MIT placed sixth in the team standings. The team goes against Williams and Tufts in a triangular meet tomorrow.

Soccer — The Engineers raised their record to 2-5 with a 4-3 double overtime thriller against Lowell at Steinbrenner Stadium Saturday afternoon, overcoming a 2-0 halftime deficit. John Bulsa '83 and Jay Walsh '81 led the rally with Bulsa scoring twice and Walsh connecting once to tie the game at 3-3 at the end of regulation. The two Bay State natives teamed up in the second overtime to give MIT the winning goal, Walsh from Bulsa, with just 0.99 remaining. The team lost to Boston College Wednesday night, 4-0, and faces Holy Cross today at 3 pm in Steinbrenner Stadium.

Field hockey ties (Continued from page 20) of the enemy goal, and drilled it in past the helpless Fitchburg goalie at 18:00. Both teams had their chances, but no more goals were registered as the half saw Tech up 2-1.

The second half belonged entirely to Fitchburg, who controlled the play throughout the half. Time and again MIT had difficulty clearing the ball out of its own end, and when it did cross the center line, the Fitchburg defense was there, preventing Tech from getting into scoring range. The Engineer defense, which played well in the opening session, looked disorganized during the entire second half. Still, MIT hung on for most of the half, until with just 3:30 remaining Janine Robichaud found herself alone on the left side of the Engineer goal, and deflected in the equalizer. MIT could not break the tie, despite two last-minute corner opportunities. The tie was tough for the team to swallow, especially after holding on for so long. Yet, the goal of making the tournament has been achieved. The teams in the tournament are MIT, Tufts, Assumption, and Wheaton.

Volleyball — The volleyball team seems to have found the winning touch, having won five of its last six matches, including a 3-0 home win against Wellesley Tuesday night. Coach Dave Cantion notes that after five weeks, his
Field hockey
7-2-1

By Eric R. Fleming

Boistered by a win over Clark at home Saturday and a 2-2 tie at Fitchburg State Monday afternoon, the women's field hockey team received a berth in the MAIAW field hockey championships tomorrow at Westfield State. At 7-2-1, Debbie Clum's squad has surpassed the victory total of last year, when it finished 6-4-2.

The five-goal effort against Clark set a record for most goals by Tech field hockey, in only its fourth year of existence. The Engineers were never in any trouble on the cold, wet day as they dominated from the opening faceoff. MIT led 4-0 at the end of the first half, on the strength of goals by seniors Cindy Bedell, Julia Neuringer, and Karen Renaud '84, and junior Emmy Bedell. Liz Anderson '84 scored the last Tech tally late in the game, after coming close on several previous tries.

Monday's game with Fitchburg was the big game for the Engineers. A win would go a long way in placing MIT in the state tourney, while a loss would greatly diminish the team's chances. Neither team could gain an advantage early in the first half, though both squads had opportunities. Fitchburg broke the ice midway through the half, with Engineeneer Michelle Lemon '81 from the right wing. A minute later, Fitchburg followed up with another, this time on the left.

The visitors struck back quickly, as Neuringer drove home a rebound exactly one minute later. Fitchburg didn't waste time giving Tech the lead, as she took a beautiful pass from forward Michelle Lemon '81 from the right

Imagine yourself building a thermal imaging system that can see through darkness.
