

A student is served dinner in McCormick dining hall, which may change to an a la carte system under proposals currently being considered. (Photo by Jonathan Cohen)

Seniors rate DSA Office

By Stephanie Pollack

Seniors who have worked closely with the Office of the Dean for Student Affairs (DSA) have rated its performance as uneven, but all have expressed concern with a lack of communication between the DSA and students.

Jon Hakala '81, Undergraduate Association President (UAP) in 1979-80, said that "The Administration does not seem to be interested in meaningful participation in decisions that affect policy." "I don't think that [Dean for Student Affairs Shirley McBay] has developed the communications network that the office needs to do a good job," said Nick Adams '81, former Undergraduate Association Vice President. Former UA Finance Board Vice-chairman Raj Tahil '81 commented that the Dean's Office had "a distorted perception that people should come to them."

Tahil suggested that McBay "go out and press the flesh." "Key members of the DSA need to be seen in dormitories and fraternities a lot more often,"

Hakala added.

Jeff Solof '81, Co-ordinator of the 1980 Residence/Orientation Week, and Chuck Markham '81, last year's UAP, noted that the different sections of the Dean's Office had varying success with soliciting student input. Solof said that the Undergraduate Academic Support Office (UASO) receives "a lot of input from the students who walk in the door." Both Solof and Markham mentioned the success of the residence section in obtaining and using student opinion. Solof cited the president's lunches sponsored by the residence section, while Markham commended Associate Dean for Residence Robert Sherwood for his conference at Endicott House at which students helped to develop the DSA's recommendation for smaller class size.

Evaluations of McBay's performance during her first year were sympathetic, but also mixed. Hakala called McBay "an extraordinarily talented person," adding that "it is unfortunate that the selection process that led to her appointment was botched as

badly as it was." Tahil cited McBay's previous position at the National Science Foundation, noting that "she carried some baggage from Washington; the assets were word processors and priorities, but it is bad that students have to lobby her." Tahil expressed concern that the need for such lobbying would cause friction since some students would have an inside track and others might not be aware that they had to lobby McBay.

The performances of the sections of the Dean's Office have been uneven. The residence section, Student Assistance Services (SAS), Undergraduate Academic Support Office (UASO) and Steve

Dining Service plans changes

By Laura Farhie

Two major changes could occur in the MIT Dining System in compliance with suggestions made by the Committee on Campus Dining in their October 1979 Report.

A consulting firm has been hired to suggest renovations for Walker Memorial's dining hall, and the dormitory dining halls may switch from the "points" system to an a la carte system. Lobdell, however, will not be renovated, as the Report had strongly recommended.

"Our first priority is that we have students participating in the Commons program [in the east campus dormitories] under the least desirable conditions," declared Gene Brammer, Director of Housing and Food Services. Edward Leonard, the General Manager of Food Services explained, "It's an awkward situation, combining commons and a la carte." He described the lunch lines as "five to ten minutes long." One East Campus freshman commented, "That's nothing. During the weekend after five, the lines at Pritchett are a half hour to an hour." Another East Campus freshman described the sociability of Walker Dining Hall: "It's like eating at Lobdell." George Hartwell, the Assistant Director of Housing and Food Services, described the Kosher Kitchen in the basement as "small and inadequately ventilated."

The consulting firm, Goddy and Clancy, in conjunction with the MIT Planning Office, is "pulling out of the archives" ideas for renovating Walker that have accumulated over the years, according to Hartwell. After the consulting firm makes suggestions, a client team composed of administrators and students will review the suggestions and decide a course of action.

The residents on the east side of campus were also very vocal in their criticisms of the food at Walker. An East Campus freshman who used to work for the Walker Dining Service said that while the meat delivered to Walker looks "adequate," the actual meat dishes have "small quantities of meat with 50 percent fat." A freshman who currently works for the Walker Dining Service noted that the food is "cooked in vats." Another East Campus freshman said, "Things are hidden under opaque sauces so you can't see what you're getting" and "after they cooked the bacon I could still tie square knots with it." Brammer said that "a problem with large eating operations" is that not everyone will be satisfied with the food.

Conflict of interest policy OK

By Tony Zamparutti

The Institute's present system for investigating faculty member's conflicts of interest has been given a passing grade by Walter Rosenblith, Institute Professor and former Provost: "If I had to give it a grade I'd say it's passing.

I wouldn't give it an A-plus. . . . Department heads sometimes hesitate to push their colleagues."

Faculty members must annually report all aspects of their outside professional activities, such as consulting work or membership on a corporation's board of directors, to the heads of their departments for review of possible conflict of interest with their work at MIT. Institute policy suggests that outside activities be limited to an average of one day a week of a professor's time.

Provost Francis Low said, "There are bound to be situations of conflicting interests. I think by and large [the system for checking such conflicts] is pretty good."

Faculty and staff reports on outside work are due before the summer. Department heads can refer cases involving possible conflicts of interest for consultation to the faculty Committee on Outside Professional Activities.

This committee reviews all cases that are referred to it and advises faculty members on possi-

Suicide "myths" cleared

By Gordon Hunter

As a result of two suicides of registered MIT students this academic year, the first cases in over three years, the subject of suicide has recently received greater attention from the MIT community.

The subject of suicide is "steeped in myth," explained Psychiatrist-in-Chief Merton Kahne, of the MIT Medical Department. "It is a myth that there is a simply characterizable person [who is considering suicide]," he continued, ". . . it is a risky business to try to stereotype [a suicidal person]."

Kahne compared statistics concerning suicides to a "rubbery yard stick." "Numbers don't impress me," he said, "it is the circumstances that lead to these ideas" that are important. He added, however, that "one suicide is

too many."

"The academic world is under a great deal of strain, especially for funding," Kahne said. ". . . [but] I doubt it's worse here [at MIT] than elsewhere." He cited the large turnover in the community as another source of strain. "To learn life among strangers is a difficult thing," he explained.

"Social isolation increases a person's vulnerability to one's worst fears," Kahne said. "Supportive friends are crucial. . . it is not a large number of relationships but meaningful relationships" that are important, he emphasized.

"Just the function of talking to a peer is worth a lot, especially if a person is unhappy or even depressed," said Barry Cheskin '82, co-ordinator of Nightline. He stressed that Nightline is not only a suicide line, but an informational

service or just a friendly ear. Nightline personnel, he explained, are not professionally trained, but they do have weekly meetings with professionals on a variety of subjects. He added that Nightline will offer callers referral to professionals when appropriate.

Kahne said that people under stress "don't have to go to an expert." He added that the social resources in the MIT community are greater than in most. Associate Dean for Student Affairs Robert Randolph said, "the real fear is that there is someone out there who really thinks no one cares what they do to themselves."

Randolph affirmed, "We are committed to the notion that we're in business to prevent suicide." He said that often a person in distress can be helped by just finding out that others have had and dealt with similar problems. Just thinking about suicide is not abnormal, he said, however "the problem arises if they think they will act on it."

"Most people are ambivalent about most things," explained Special Assistant to the President Mary Rowe. People considering suicide often alternate between being suicidal and feeling shame for being suicidal, she observed.

Page 5.

Commons changes not made

(continued from page 1)

"Lobdell needs a tremendous amount of renovation," said Associate Dean for Student Affairs Robert Sherwood. However, he added that money for Lobdell's renovation "may never become available." Sherwood explained that "it was an overdecision that Walker should supersede from Lobdell." Anita Walton, Coordinator of the Dining and Residence Programs, said "Walker is a more serious problem." At present, there is "not an active Commons Committee for Lobdell," according to Sherwood. He said that the

managers there unsuccessfully attempted to form one.

At a recent Dining Advisory Board Meeting, the main subject was that the students on the West Side of campus wanted a la carte as well as commons "points." The Baker Commons Committee specifically requested this in a letter to Brammer. This was also proposed at an earlier meeting of the future residents of 500 Memorial Drive. Brammer said that there is a "physical system problem" in implementing both a la carte and commons meals in these places. He remarked, "I don't see how we can do it." He

explained that some students want a la carte, while others want commons, and "I am not sure what message I heard that day."

"Both commons and a la carte in East Campus is not working as well as it should," commented Walton. She said that this controversy has "more priority" because it will affect the students who live on the West Side of campus this September. "Hopefully, the Dining Advisory Board will make the decisions for us," remarked Walton. "Whatever system [a la carte or commons] is put in 500 Memorial Drive will be put in other places."

Press stresses innovation

By Michael Shimazu

"One-third of economic growth is directly ascribable to technological advances," asserted Frank Press, Institute Professor in the Department of Earth and Planetary Sciences, in a lecture given in the Wiesner Forum Series in Burton Dining Hall Tuesday.

Press, the President-elect of the National Academy of Sciences (NAS), predicted what he called "a second industrial revolution," particularly in electronics and composite materials industries, and stressed the need for increased productivity to bolster the American economy.

In the near future, "we're going to face serious problems with respect to high technology competition with other industrialized democracies," he fears. "Research and development in this country is a real partnership between government and industry," he added, calling for government support of basic research and technological development as a means to increase US productivity.

However, "Most people in Washington don't appreciate the issues of science and technology," according to Press. In addition, he says, "Managers of industrial enterprise in this country don't know very much about the technologies of the companies they manage."

Commenting on the present Administration, Press said, "While the Reagan budget is a severe one, basic core hard sciences have been left relatively untouched." He observed that the Administration is "still unclear about the government's role in research and development."

Press contrasted American industrial management with Japanese industrial management. Since technological development in Japan is financed on a long-term basis by banks supported by the Japanese government, companies there plan long-term investment strategies. However, because American companies must be responsive to their stockholders'

Institute Professor Frank Press (*The Tech* file photo)

demands for short-term returns, says Press, they are unable to plan similar strategies.

"The uncertainty of government regulation is a major impediment to the development of new products," Press noted. "Regulations have to be evaluated to see if they have a sound scientific basis," he continued.

Press expressed "shock," however, at some of the Reagan Administration's attitudes on regulation. The present Administration holds "a primitive view of the government role in regulation," he commented.

Press also called on the US government to encourage technological development in developing nations. "Technological assistance is good politics, good economics, it is something we do well, and it is something that other countries respect," he said. "We have to be concerned about the poorest countries... helping them get on with economic development," he stressed.

Press, former Science Advisor to President Carter, assumes the presidency of the NAS on July 1. Until then, he said, "I'd like to just be teaching."

College food plans compared, rated

By Kenneth Snow

A survey of students at five universities on the East Coast showed that students are not as dissatisfied with their dining programs as MIT students are. However, students at other schools also have less freedom in their meal program choice.

At Rensselaer Polytechnic Institute, the dining program is mandatory for all freshmen. Upperclassmen have the option of rejecting the meal plan. According to Jon Kessler, an RPI student, "the food isn't great, but people tolerate it."

Dinner costs approximately \$4.00, lunch is \$3.25, and breakfast is \$2.50. Kessler noted that there is an a la carte dining area in the RPI student center and many students buy their meals there.

Yale University has a mandatory unlimited 21-meal plan for all students living on campus. One student remarked that "the food is pretty good. The nice aspect is everyone eats dinner and everyone knows you. You don't need a card." Room and Board at Yale last year was approximately \$2900.

Dartmouth also has a mandatory unlimited meal plan for freshmen. All freshmen are required to pay for 14 or 21 meals per week. One student remarked she felt that "the food is very good for institutional food, although sometimes it is very awful."

Dinner costs about \$4.00, lunch is \$3.75 and breakfast is \$3.25. Students do feel that there is too much starch served and upperclassmen refer to the added weight that freshmen put on during their first year at school as "the spare layer."

All students living on campus at Harvard are required to be on a 21-meal plan. This costs about \$1500 per year. As one student said, "people complain a lot about it, but people always complain about something. Relative to other places it isn't terrible."

Any student at Boston University living in a dormitory is required to take 21 meals at a cost of \$35 each week. The meal program is unlimited. However, students do not feel that it is the best food. As one student said, "Warren Towers serves about 1400 to 1500 people each night. When you serve that number of people, the food is not going to be the greatest."

Lack of communication plagues DSA

(continued from page 1)

Immerman, business advisor to the independent living groups, received consistent praise. The dining and student activities sections were rated as the weakest in the Dean's Office.

Hakala called the dining section a farce, charging that "the process which sets commons policy clearly has a predetermined

outcome." Adams said that the Dean's Office was "not using [Coordinator of Dining and Residence] Anita Walton's talents," and asked rhetorically "what does Anita Walton do?"

The student activities section is "one of the weakest sections," according to Hakala. Markham said that the section "needs a shot in the arm. [Associate Dean

Robert] Holden has been around a long time; that's not necessarily bad, but the section needs a new assistant dean who is supportive without being smothering." Tahil concluded that "the structure and mandate of the student activities section needs to be reviewed if [the Dean's Office] wants a vigorous student activities program."

Adams said that "residence is doing great" and praised Immerman for its efforts to make sure that "the houses are safe." Hakala, Markham, and Tahil echoed the praise for Immerman. Tahil also commended the international students section, noting that students can always "walk in and feel welcome." Markham cited the human relations group as one program with SAS which is especially effective. UASO is "perhaps the strongest area," according to Hakala, and Solof noted that "the UASO is moving in the right direction," toward becoming an "academic clearinghouse and support place for the whole community."

Dept. heads must report conflicts to committee

(continued from page 1)

ble conflicts. "It's sort of a passive committee," noted Stanley Backer '41, Mechanical Engineering professor and committee member.

The committee addresses an average of three inquiries a year. Institute policies are intentionally vague, and the committee considers every case "on its merit," according to Hermann Haus '54, Electrical Engineering professor and chairman of the committee.

"We do get involved in disciplinary cases, [but] we are not the ones [who] discipline," commented Haus. "Such cases are kept very highly confidential," he added.

Faculty members are encouraged to get involved in outside activities because "very often the outside activities very much add to a faculty member's knowledge of an area," said Rosenblith.

news roundup

World

US closes Libyan mission — The United States ordered Libya to close its diplomatic mission in Washington Wednesday and ordered all Libyan diplomats to leave within five working days. The State Department cited "a wide range of Libyan provocations and misconduct, including support for international terrorism." Colonel Qaddafi, who seized power in Libya in 1969, has supported revolutionary groups in many countries, given asylum to terrorists, and purchased approximately \$12 billion in arms from the Soviet Union. The US embassy in Tripoli, Libya, was burned in December 1979 by a pro-Iranian mob. Many Libyan exiles in Western Europe have been assassinated in the past year, although Qaddafi's government has denied responsibility.

US envoy to discuss arms aid to Guatemala — The Reagan Administration will send General Vernon Walters, an advisor to Secretary of State Alexander Haig, to Guatemala next week to discuss resuming arms aid. The Carter Administration ended its military aid to Guatemala in 1977, as a reaction to that country's abuses of human rights, and withdrew the American ambassador last year. The State Department claimed that there are about 2,000 "Cuban-supported Marxist guerrillas" in Guatemala and that the previous Carter policies had "clearly failed." Amnesty International claimed that over 3,000 have been killed in Guatemala since 1979 by government agents and right-wing death squads.

OPEC leaders call for oil price freeze — Ministers of the Organization of Petroleum Exporting Countries have recommended a freeze on oil prices "because it is not justifiable to ask anyone to reduce his price," said Oil Minister Mana Said Oteiba of the United Arab Emirates. Oteiba urged fellow members of OPEC to hold current prices but oppose pressure for a price cut, even though there is a continuing glut on the world oil market.

Nation

House defeats liberal budget proposals — The House of Representatives rejected two alternative budgets for fiscal year 1982 in a prelude to accepting Reagan's \$689 billion budget. A proposal to reduce military spending and increase funding for social programs, sponsored by the Congressional Black Caucus, was defeated by a vote of 356 to 9. A plan to increase money for social programs and to defer a tax cut until 1983 was rejected 303 to 119.

Air Force jet explodes over Maryland — Twenty-one persons died in the crash of an Air Force C135-A, which exploded at 10:51am Wednesday at an altitude of 29,000 feet. The cause of the explosion is under investigation. The plane was equipped with special tracking equipment to detect missiles and satellites, and was on a training mission. The wreckage landed in a rye field near Walkersville, Maryland.

Local

Massachusetts House rejects Boston bail-out plan — The state Legislature voted yesterday 119 to 32 against a plan that would allow the mayor up to \$44 million in borrowed funds. The proposed bill would have authorized the mayor to borrow \$24 million in ten-year notes to pay court-ordered property tax abatements and the amount necessary to deal with an "educational emergency."

Council approves budget plan — The Boston City Council accepted a proposal Wednesday by Mayor Kevin H. White to allow \$9.4 million in state reimbursements to aid the city's current fiscal crisis. With \$1.5 million each to the police and fire departments and \$6.4 million to the School Department, White suspended the layoff of 400 police officers and firefighters, reopened the police and fire stations in south Boston, and allowed the operation of public schools for about five more days.

Don Law sued for monopolizing Boston — The Don Law Agency has had a \$6.2 million anti-trust suit filed against it by Providence concert promoter Frank Russo, charging monopolization of concerts at the Boston Garden and Cape Cod Collisium. Russo claims Law's groups has controlled 117 of 121 concerts held at these arenas since 1977, and that the Boston Garden, Cape Cod Collisium, and Boston Opera House have refused to deal with him because of their exclusive arrangements with the Don Law Agency.

Sports

Rockets tie Celtics in NBA — The Houston Rockets defeated the Boston Celtics last night 92-90 at the Boston Garden to even their best-of-seven National Basketball Association Championship Series 1-1. Boston won the first game Tuesday night 98-95. In related news, Celtic forward Cedric Maxwell was fined \$2500 for shoving a fan whose remarks he apparently found offensive after being knocked into the stands during Game 6 of the Eastern Conference finals at the Philadelphia Spectrum.

Tony Zamparutti and Robert W. Leishman

Weather

Sunny today, but there is a good chance for a cool sea-breeze. Temperatures along the coast will be near 50 this afternoon, near 60 well inland. Lows tonight in the middle 40's. Winds will shift to southerly tomorrow and be quite strong, but highs will be near 70 under mostly sunny skies. Showers Saturday night or Sunday. Mild overnight with lows near 50. Rain 0 percent today, 20 percent Saturday, 40 percent Saturday night through Sunday.

Dining: uncommonly blatant lies

Last year's promise that Dining Service would soon be improved as recommended in the Report of the Committee on Campus Dining has proved as true as the myth that all university food services serve terrible food and charge high prices for it.

The myth, dispelled by successful dining programs at Yale University and Dartmouth College, among other universities, appears to be the basis of food service planning at MIT. Many students accepted last year's report, with its controversial call for a return to mandatory commons, in good faith. Most realized that the other recommended improvements were added only to garner support, but assumed that the promises would be kept, even if reluctantly.

A year of jawboning has proved these grudging promises to be outright lies. Since the Administration will have a captive audience for its meal plans in another three years, when the new plan is fully implemented, there is no reason to believe that the needed changes will ever be made if they are not made soon.

The list of suggestions which have been forgotten is long and discouraging. Commons prices are up, despite a continuing subsidy and promises that the mandatory system would decrease costs. While east campus students are currently subject to the "least desirable conditions" in Walker Memorial Dining Hall, renovations will undoubtedly be long in coming since a consulting firm has just been hired to study remodeling plans. The case is even grimmer at Lobdell, where no changes are contemplated.

Students are understandably upset. Criticisms range from an east campus resident's complaint about finding "half a grasshopper in my salad" to a former UAP's charge that the dining program is a farce. Meanwhile, Co-ordinator of Dining and Residence Programs Anita Walton insists that freshman are happy because many students have somehow rid themselves of points which they have no choice but to use.

Any increased socialization which comes as a benefit of mandatory commons will be achieved if the program is required only of freshmen. Commons should revert to being voluntary for upperclassmen, which would then force quality by creating competition with home cooking and restaurants. If the program as it is currently designed fails this test, so be it. It is ridiculous to subsidize a loser forever.

For a useful visit by the committee

The MIT Corporation Visiting Committee on Student Affairs faces a formidable task. Formulating a report on student concerns in a two-day period so close to final examinations will require conscientious effort by the Dean's Office and students as well as the committee members.

Members should look beyond the issues raised by the self-assessment prepared by the Dean's Office and keep an ear attuned to voiced student concerns. An examination of the effectiveness of the recent Dean's Office reorganization and the solicitation and use of student opinion, for example, could help address important problems without fatally reducing the focus on undergraduate academic support services.

Due to inadequate publicity for tonight's meeting, there may not be overwhelming student response at the open forum. However, this prospect should not prevent the committee from probing student concerns by listening carefully to student leaders and those who do choose to air their complaints.

It is especially important that committee members recognize the potentially non-representative nature of the student reception. Rather than generalize from a few outspoken individuals, members should seriously attempt to garner a wide cross-section of student concerns. The committee might even consider spending some time visiting living groups to obtain first-hand student impressions.

Through intensive, independent examination of the role of the Dean's Office, and with the cooperation of concerned students, the Visiting Committee can truly make a valuable and timely contribution to MIT's undergraduate environment.

feedback

Comic on religion insensitive

To the Editor:

The appearance of Geoff Baskir's comic in your May 5th edition, which attempts to make fun of Christian evangelicals, is a sad commentary on the level of sensitivity to religious issues on our campus. Mr. Baskir evidently finds religious zeal so amusing that he allows himself to turn his satirical shotgun on all serious Christians. I would not allow members of my own religious community to be so maligned, and I cannot ignore with indifference such a crude attempt at

humor at the expense of others.

Like many members of the MIT community, I resent the unwelcome intrusion of missionaries who, motivated by love, would convert me to their unique religious posture, without granting me the integrity of my own religious experience. But creating such stereotypes as Mr. Baskir would have us laugh at hardly serves the needs of a community such as ours, which is now struggling more with midnight vandals and bigots of every stripe than with too much religion.

Come on, folks; satire is fine, but let's temper it with human sensitivity and editorial responsibility.

Rabbi Daniel R. Shevitz
Hillel Director and Jewish
Chaplain

Editor's note: The Tech regrets any offense that the comic may have caused members of the MIT community

Editorials, which are marked as such and printed in a distinctive format, represent the official opinion of *The Tech*. They are written by the Editorial Board, which consists of the chairman, editor-in-chief, managing editor, and news editors.

Columns are usually written by members of *The Tech* staff and represent the opinion of the author only, not necessarily that of the rest of the staff.

Letters to the Editor are written by members of the MIT community and represent the opinion of the writer.

The Tech will attempt to publish all letters received, and will consider columns or stories. All submissions should be typed, preferably triple spaced, on a 57-character line. Unsigned letters will not be printed. Authors' names will be withheld upon request.

Homosexuality is an acquired habit

To the Editor:

The following is my opinion and not that of any organization with which I am affiliated.

One of the few topics that recurs in letters to *The Tech* is that of homosexuality. Not only do I offer an opinion not yet represented in *The Tech*, I also sign my name to it.

I believe that nearly every adult has asked himself or herself the question "Am I gay?" I am sure they have also asked, "Should I go to college?" and "Do I plan to get married someday?" These questions are turning points, and each person has the free agency to choose their answer. Specifically, I believe that gay people are not forced into their sexual orientation by any physiological or psychological mandate.

It is my opinion that gay people are simply those who have decided to be gay, or who have allowed their minds to dwell on the possibility of being gay, and when confronted with chances, experiment with homosexuality. They get involved deeper and deeper until homosexuality becomes a habit. And like any habit, it can be broken.

I do not believe "gay people are born that way." I believe human beings are naturally heterosexual, but that they are capable of forming the habit of thought and action which we call homosexuality.

If the reader is gay, then I challenge him or her to objectively analyze their history of thought and action to see if it does not basically agree with what I have stated.

New company to supply caps, gowns

By Lawrence Choi

Cottrell and Leonard, which supplied caps and gowns for MIT graduates last year amid labor disputes with its employees, has a new owner, E.R. Moore Inc. Moore will supply caps and gowns to MIT graduates this year.

Last spring 90 workers at Cottrell's factory in New Jersey complained about poor working conditions and low salaries and, with the help of the International Ladies Garment Workers Union (ILGWU), demanded a new contract from the company.

The cap and gown firm was the target of a nationwide boycott effort last year as a result of charges of unfair labor practices against Cottrell and Leonard by the ILGWU. Since Cottrell and Leonard supplied caps and gowns for MIT and Harvard commencement ceremonies through the Coop, the Coop offered students and faculty an alternative cap and gown in April.

Cottrell, faced with additional pressures from the city ordinance committee to improve its working conditions, decided to sell the company rather than investing more capital in the factory to improve working conditions. The company was bought by E.R. Moore, a division of Beatrice, Inc., one of the nation's largest food corporations. Moore soon closed down the factory in New Jersey and set up a new factory.

Mike Winston, executive director for the ILGWU branch in New Jersey, said that there are no labor complaints against E.R. Moore Inc.

Suicide support outlined

(continued from page 1)

Rowe also identified a difference between people suffering from an acute crisis and those suffering through a long term struggle. For an acute crisis, she noted that immediate prevention is the goal. Kahne explained that while "there is no recipe, no canned speech, no reliable algorithm," generally this immediate aid involves helping the sufferer to "recognize and talk about their pain," to realize that "help is available and life is worthwhile."

"It is not as if people considering suicide are irrational," Kahne said, "their reasons are quite formidable . . . In the last analysis, the person has to handle the difficulty." He added, "I take seriously anyone who says they are considering suicide." The perception that a person is just looking for attention does not confer any "illegitimacy" to his threats, he said. This idea "is pure nonsense — dangerous nonsense."

Some have killed themselves over what others feel is trivial." He prescribed, "If they're looking for attention, pay attention. Find out why they have to go to that extreme."

Kahne, Randolph, and Rowe all mentioned that long-term treatment includes establishing personal relations and support networks. Kahne said that suicidal people will sometimes "drop out of usual patterns . . . and social networks," or else "increase their activity in [a] frantic" manner. Randolph described three possible symptoms as "someone exhibiting a marked change in behavior, . . . someone who has become very withdrawn," or a person who is "very despondent over something at home, at school, or in their love life."

Chief James Olivieri of the MIT Campus Police (CP) said that his organization has a "close relationship with other support services." He explained that when a call is received on a serious problem of any kind, the CP "gathers the support needed to do the job" and then uses established procedures to deal with the situation. He emphasized that the CP maintains a "low silhouette" while responding in a way to "avoid embarrassment" to those involved, and "not to amplify the situation."

After responding, Olivieri said that the CP informs all concerned parties of the situation and the present status. He described this "network" as important to avoid any unnecessary complications. Randolph added that this network is also important to ensure that there is an appropriate continuation of attention by the support services so that "no one drops the ball."

Randolph explained that often troubled people come to him because of the activities of third persons. Sometimes a third person will urge a friend to seek help, occasionally accompanying them, according to Kahne. Randolph said that the Dean's Office will often invite someone on the basis of a third person's concerns. "We're not above interjecting ourselves into a situation," he affirmed. Olivieri also said that the CP has even gone off campus to respond to urgent calls.

Rowe explained that "depressed people often invoke anger or frustration" in other people, but that "innocent bystanders often will work very hard to prevent the evil deeds of others." "You can't always know in advance . . . [how] enormous the emotional stress" is within yourself or within someone else, according to Kahne, and "that is what makes it so scary to people."

Eleven to attend Pugwash

By Tom Lored

Eleven MIT students will be among the 77 graduate and undergraduate students from around the world who will participate in the annual International Student Pugwash Conference on "Moral Dilemmas of Technology and Democracy." This year's conference will meet from June 15-21 at Yale University Law School.

The Student Pugwash Conference is an offshoot of the annual Pugwash Conference in which scientists, educators, and humanists participate. The conference has its origins in the 1950's in a meeting held in Pugwash, Nova Scotia. The conference, attended by eminent scientists including Bertrand Russell and Albert Einstein, produced

the Pugwash Declaration: It is the duty of all humanity, but especially scientists, to examine and attempt to reconcile the moral dilemmas of technology in general, but particularly in relation to the operation of a democratic state. Conferences based on this theme have since been held annually.

Physics Professor Bernard T. Feld, one of the faculty participants and chairman of the Executive Committee Council of the International Pugwash Conferences on Science and World Affairs, was unavailable for comment yesterday.

This year's conference is the third specifically organized for students. The student participants are selected on the basis of academic performance, essays

written for application, and a paper or paper outline related to the conference theme written and submitted by the student.

Student attendees will discuss their papers in morning discussion groups consisting of students (please turn to page 6)

Derek Bok warns of commercial links

By Nicholas Rowe

Harvard President Derek Bok expressed concern over the dangers of university links to commercial enterprises in an annual report to the Harvard Board of Overseers on April 24.

Bok referred to issues that were raised late last year, when Harvard was trying to support a genetic engineering firm to assist Harvard professors and scientists in developing commercially lucrative products. Public criticism followed and Harvard dropped the controversial plan.

"These opportunities were tempting," Bok said, "especially when we appear to be poised on the edge of a vast biochemical revolution. Indeed, the prospects seemed all but irresistible to us when we initiated discussions last year to explore the possibility of helping create a new commercial venture . . . However, we slowly came to realize that the path to success would be marked by every kind of snare and pitfall."

Bok also referred to a probable conflict of interest between academic and commercial commitments. He added that these conflicts may raise risks that are "harder to control." Bok explained some specific dangers. University administrators might view a scientist's business potential as more important than his contribution to academics. Decisions on employment and raises in salary might be influenced by commercial capabilities. Professors might begin to neglect their academic duties as more time would be spent with their business ventures; potential profit from these ventures could lower intellectual values of an educational institution if administrators wanted to go into partnership with the money makers.

Bok also said that he "was worried about the possibility that professors could involve graduate students in commercial work not related to the intellectual development of the student," but he added that "he was not aware of any significant problems existing."

Special Assistant to the MIT Provost Dr. Louis Menand expressed total agreement with Bok's concerns. He said that Bok "set parameters around academic enterprise to protect its integrity." He also added that graduate students should not work for their academic superiors off-campus.

SUMMER SPECIAL

Typewriter Cleaning & Storage

Going away for the summer? Why not leave your typewriter at the Coop for a complete servicing. We will safely store your typewriter at no extra charge when we can clean your machine.

	regular price	summer price
Manual Portable Typewriters		
Job 3 — Chemically clean, oil and adjust; new ribbon.	34.00	31.00
Job 4 — Chemically clean, oil, adjust; new platen and feed rolls; new ribbon.	52.00	47.00
Electric Portable Typewriters		
Manual Carriage Return		
Job 3 — Chemically clean, oil and adjust; new ribbon.	41.00	37.00
Job 4 — Chemically clean, oil, adjust; new platen and feed rolls, new belts; new ribbon.	69.00	62.00
Electric Portable Typewriters		
Automatic Carriage Return		
Job 3 — Chemically clean, oil and adjust; new ribbon.	45.00	41.00
Job 4 — Chemically clean, oil, adjust; new platen and feed rolls, new belts; new ribbon.	74.00	67.00

MAJOR REPAIRS & PARTS AT ADDITIONAL COST

Our Typewriter cleaning Method . . .

MANUAL PORTABLES — We begin by removing all rubber parts such as platen feed rolls, feet head rests, etc. We remove all cover plates so that typewriter mechanism is completely exposed.

ELECTRIC PORTABLES — We remove the motor, switch and wiring, belts and power roll in addition to above. Then the machine is given chemical immersion and an oil bath before hand cleaning and readjusted.

THE FINAL STEP — Your machine is reassembled and goes through the normal sequence of adjustments. The parts that need heavy lubrication are greased. Now your machine is really clean and in perfect working operating.

OFFICE TYPEWRITERS & ROYAL PORTABLE ELECTRICS EXCLUDED

TYPEWRITER REPAIRS: 492-1000, ext. 339

Students to discuss moral dilemmas

(continued from page 5)

and conference faculty who share an interest in one of several topic areas including biomedical technology and health care, computers and society, energy, the economy and the environment, weapons and world peace, and the regulation of science and technology. Afternoon sessions will include addresses from faculty followed by an open discussion.

William Ramsey, a senior majoring in Political Science and Electrical Engineering, will discuss a paper he wrote that treats

the tradeoffs between national security and free research, using cryptography as a case study. Of the topics to be discussed this summer, Ramsey remarked, "These are issues that are going to be important as political issues, as issues in a democracy."

Sandra Landau, a graduate student in applied mathematics, hopes to teach after receiving her degree. She became interested in the conference because she said she feels that "there is much more to teaching and research than a commitment to narrow research

interests." Landau's paper discusses the problems caused by confusing mathematical and computer models with reality and creating policy based on such models.

Landau feels that the influence of the conference will stem from its long term effects on the individual participants. Ramsey feels that the influence of the conference will be hard to measure, remarking that the conference "plants a germ, creates a network of contacts that sometime later may make a big difference."

notes

Announcements

Students who will not be at their home addresses during the summer, or who will not be registered for the Summer Term at MIT should complete a **Summer Term Address form** to ensure receipt of their Fall Term Pre-billing Material Packet.

* * * *

June Degree Candidates should make immediate payment of past due fees at the Bursar's-Students Account Office, Room E19-215 to avoid jeopardizing conferral of their degrees.

* * * *

To **June Degree Candidates:** prepaid postcards received with May notice *must be returned immediately* to E19-335 to indicate whether diplomas are to be mailed, called for in person, or if June Attendance is planned.

* * * *

Faculty and staff members are still needed to serve as **Freshman Advisors** for next year. Please contact the Undergraduate Academic Support Office, Room 7-103, x3-6771, if interested.

* * * *

The **Hobby Shop** will be cleaned and reorganized beginning June 10th. All materials and projects must be claimed before that date or else they will be discarded.

* * * *

The National Audubon Society Expedition Institute will award **scholarships** to students interested in the subjects of outdoor education or environmental studies. Application forms may be obtained before July 31, 1981 by writing to the Institute at 950 Third Avenue, New York, NY, 10022.

* * * *

The **MASSPIRG public service internship program** is announcing the internship for the summer and fall of 1981. MASSPIRG's theme for these two sessions is "Citizens Count!" The program includes: Professional Supervision, Structured Learning, Citizen Action Seminars, and Career Advising. For more information, contact Elizabeth Reed in the Career Planning and Placement Office, x3-4733.

Meetings

There will be a get-together for all current and prospective **Associate Advisors** on Thursday, May 14, from 4-6pm in the West Lounge of the Student Center to talk about the role of the Associate Advisor in advising freshmen and plans for next year.

If you are interested in serving as an associate advisor next year stop by the UASO, Room 7-103, for more information.

Conferences

A conference on **Labor, Safe Energy and Full Employment** will be held at the Forum, Kennedy School of Government, 79 Boylston Street, Cambridge, on

May 16 at 9:30am. The conference will consist of two panel discussions and several workshops, and will discuss problems pertaining to nuclear energy from an economic, labor, health and safety perspective.

The conference is sponsored by the Committee for a Labor Conference on Safe Energy and Full Employment and by the Institute of Politics. It is free and open to the public.

Medical School Applicants

We have placed hundreds of students into the best English and Spanish foreign medical schools... including St. George's University in Grenada, world's highest ECFMG average speaking school. Personal, professional, effective since 1975. Pay only on acceptance.

Call or write for our 1981 Bulletin describing how we can help you obtain a quality medical education.

Protest and Conflict

Photo Essay By Kevin Osborn

Approximately 50,000 people gathered near the Lincoln Memorial last Sunday before marching to the Pentagon to protest US intervention in El Salvador. The gathering was uneventful. Leaflets were distributed and newspapers representing various ideologies were solicited. Old friends met and people of diverse backgrounds mingled. Trade union members, liberals, communists, and militant groups all came together to protest the same government policy.

The March began resolutely but not too loudly ...

Diverse groups competed for attention at the Pentagon

Including 500 Moonies who tried to disrupt the demonstration with a counter-demonstration of their own. Violence between the two groups threatened to erupt. Protest security quickly surrounded the Moonies, to separate the two groups.

A policeman came up to the leaders of the counter-demonstration and asked them to leave before anything serious happened. The Unification Church media representative whispered something to the officer and showed him some papers. The Officer said "Oh!" and backed off. Later I saw the Moonie demonstrators loading their van in a restricted Pentagon parking lot right next to the building. Hmmm.

Bopping Around Planet Earth

Duran Duran
Planet Earth/Late Bar
Planet Earth (Night Version)

EMI Records
This is what British dance music should sound like: tight playing, interesting lyrics, close harmonies, a solid disco beat (mandatory) and lots of sequenced synthesizers. Duran Duran (named after the character in Barbarella) have arrived at the perfect mixture of these elements in their current hit "Planet Earth," my pick for the Best Hook of the Year Award. The "Night Version" of the tune is a longer disco mix with a heavier bottom, horn section, and lot of synthesized strings; "Late Bar" is shorter, bouncier, and funkier. This is a perfect single — play it 'til the grooves wear out, and dance to it 'til your feet wear out.

U2
I Will Follow
Out of Control

Island Records
The A side of this single is the same version of "I Will Follow" that appears on the album, but "Out of Control" that appears on live at U2's March 6 appearance at the Paradise. This version accurately captures the high energy level of a U2 concert and proves that they can sound just as good live as on vinyl. If you've been toying with the idea of seeing their upcoming show at the metro (March 29), buy this single — you'll be convinced to follow.

Someone and the Somebodies
Workin' in a Coal Mine/We Were Only Kidding
Only Extazy/Mombo Sombos

EMI Records
By now, you may have gotten the idea that I like this band (this is their third mention on these pages), but now you have a chance to hear some of the tunes that converted me to a fanatic. The Somebodies have released a four-song EP containing: Alan Toussaint's "Workin' in a Coal Mine" that's propelled by Tristram Lozaw's trebly bass and Jane Coe's manic drumming — this tune will set anyone twitching about spasmodically; "We Were Only Kidding" presents the Somebodies' funky side and features Rob Davis' synth-driven, wailing guitar. "Only Extazy" is the ultimate trance-and-synth tune, replete with echoey guitars and synthesizer fills, but it's the chorus and the modal twelve-string guitar chording that makes "Extazy" the EP's best cut. (courtesy of Michael Glickman) that shows in and out with an important statement from a band destined to be The Next Big Thing.

David Shaw

Liberal Arts Activities at MIT!

Someone shifted a pre-print blue copy of this year's *Rune* (An MIT Journal of Arts and Letters to the neophytes) in our direction for the scrutiny of the arts page's critical eye. Happily, I can report a good measure of success and can honestly urge you to obtain a copy which, while not flawless, will give you a nice idea of what that portion of the MIT community that doesn't communicate solely through numbers is up to.

The big problem with *6Rune* is the problem that plagues all college-level literary magazines, but it's a slippery problem to elucidate. It's kind of the "I'm-nineteen-and-young-and-in-love-and-YOU-want-to-hear-about-it" difficulty. It's hard to be more precise: let's just say that university-age poets and writers, especially when they aren't constantly encouraged to hone their product and match it against others', tend to write with a familiar, heartbroken tone, a nostalgia that presumes too much, a heavily influenced and weighty naivete that, sincere in execution, is trite in print.

Fortunately, the *Rune* editorial board has accepted contributions from a broad spectrum of Institute associates, and this has a tempering effect. If you can overlook some laboured sonnet writing, egregious elegies to young love (the enlightening experience of sleeping with someone makes a poor excuse for poetry, although college literary magazines everywhere abound with these cameos), and some Writing Workshop attempts to Capture That Poignant Moment, there are some worthwhile pieces.

High praise should go first to Polly Doyle (a Museum School graduate and wife of Professor Aaron Fleisher) who has contributed a pair of beautiful woodcuts: "While We Live, Let us Live" and "Marriage Series, No. 8." Of the other artwork, Toby Atlas's monoprint, "Island Strata," Jeff Menoher's untitled line drawing, and Lincoln Ross's untitled charcoal figure drawing are all impressive. Vin Grabill's Audio Poem hints at, but does not explore, possibilities. Similarly a series of photographs, "Light Environment," by Beth Galston, is intriguing as an idea, but rather flat as presented. The graphics are nicely spaced throughout the journal.

While I read all the material carefully, it's impossible to consider everything. Skipping the e.e. cummings ripoff and some really painful saunterings into "complex image building" (wherein the chief objective seems to be amassing adjectives), I've singled out some works for praise or at least positive criticism. "Song of the Morano Girl" by Marie Karin, has a lovely rhythm. Karin's prose piece, "Excerpt From: A Trip to China" is an imaginatively rich travelogue, a slice of Paris:

Isle St. Louis: and a welcoming sunny cafe, poor streets where poets lived, wrote, breathed; Baudelaire, Apollinaires, arms intertwining and our love melting, firing: clean linen dressed, corduroy trousers, magic scarves ...

Amy Luttinger has contributed a subtle (untitled) poem with a deceptively simple surface and a reaching hesitancy in its very form. In addition to his artwork, Lincoln Ross offers two reasonable poems and one of the better prose contributions, "Kate"; this piece is admirably straightforward and without the laboured affectation that mars almost all the other prose (eg: "Magda" by Carol Jean Papineau). Even more skill is demonstrated by Karen Goodall, a published poet and Faculty Resident of New House; her poems are marvelously cadenced — the quiet "Stones, Kona, 1973" with its clean imagery, and "Thunder":

yet men have turned to me and made for themselves a silver fish they swim into my mouth and pull out wildly colored alphabets they have not learned that i write with my hair

(excerpt)

"the tao's revenge" by Lawrence Powell is a nice near-miss — I hope the author can harness his genuine passion more effectively in further efforts; the poem is promising, but disintegrates under a catalogue of juvenile "formative influences" and words like "whilst" and "hence". Possibly my favourite entry, "Clay," by Peter Cerrato is a prose piece with a poetry of its own; "Clay" just escapes preciousness thanks to its gutsy, bold feel. Someone should make a video of it.

Ellen Sebring of the Center for Advanced Visual Studies, offers a real stylistic departure in "The Theft," which is a stripped-down snapshot set of impressions, and quite effective.

Some things in *6Rune* are definitely worth your time. Use a little judicious suppression as you read (I can't resist slagging off the really horrible "John Coltrane Epitaph" as a premier example of suppressible material), but do get yourself a copy.

Sheena

Inside Scoop!

MUSIC

The MIT Symphony Orchestra performs Saturday May 9 — a prelude at 7:45 of Steve Reich's "Octet" and, at 8:30pm, works by J. S. Bach, Debussy, and a Mussorgsky/Ravel piece, "Pictures at an Exhibition."

John Cale, significant Welsh artist, associate of the Velvet Underground, etc., etc., will also appear at the Channel, along with Pastiche on May 9.

The **GoGo's**, an all-girl group from LA, will appear at the Channel, 25 Necco Street in Boston, on May 8, along with the Taxi Boys.

At the Boston Film/Video Foundation, on Sunday May 10 at 4pm, catch local avant-gardiste **Daved Hild** (yup, Daved) performing his original work "You're In The Doghouse Now"; Hild will be joined by **Birdsongs of the Mesozoic**, an amalgam of local musicians.

The **New Models** and the **Spikes** are at the Underground, 1110 Comm Ave, on Saturday, May 9.

Jonathan Swift's presents **Roomful of Blues** on Friday May 8. The Cambridge pub is located at 30 Boylston Street in Harvard Square.

At the Paradise, 967 Comm Ave, on Saturday May 9, the **Fabulous Thunderbirds** will make an appearance. This band is making a bit of a stir in the rockabilly/50's music resurgence.

The MIT Choral Society, conducted by John Oliver, will perform Haydn's **Creation** at the Sacred Heart Church, 6th Street, East Cambridge. Tickets are \$4 to \$6, but free to MIT students.

Electric Friday, a concert of Electronic music, will be presented by the New England Conservatory Electronic Music Studio at 8pm on May 8, 31 Gainsborough Street, Boston. The program features works of Robert Nieske, Lori Hadda, Heather Wright, and others.

ART

Sculptor **Anthony Caro's** bronze works will be exhibited at the Marcus Krakow Gallery, 7 Newbury Street, beginning on May 10.

An international exhibit runs now through May 16 at the Gallery East, 24 East Street in Boston. The Gallery is now presenting works of **Hellewell** (US), **Rutman** (Germany), and **Varon** (Peru).

MOVIES

Singin' in the Rain, Friday, May 8 at 7:30pm in 10-250.

Return of the Tall Blond Man With One Black Shoe, Saturday, May 9, at 7 and 9:30pm in 26-100.

Man of La Mancha, Sunday, May 10, at 6:30 and 9:30pm in 26-100.

Steps, an acclaimed documentary about friendship by Boston filmmaker Eric Neudel, will show on May 8, 9, 10, and 11 with "Bo Diddley Meets the Young Adults" and "The Little Prince of Rock" at the Off the Wall Cinema, 15 Pearl Street in Cambridge. Call the theatre for showtimes at 547-5255.

THEATRE

MIT Dramashop presents Pulitzer prize winner Sam Shepard's **Buried Child** and Handke's **Self-Accusation** (see our review one ish back) directed by David Wheeler, May 8 and 9 and 8pm in Kresge Little Theatre. For more information call 253-2877.

For more Shepard in the near future, Theatre Works, at 250 Stuart Street (Arlington T stop) will present **Tongues**, a theatrical event merging music and drama, and a collaborative effort between Joseph Chaikin (founder of the Open Theatre) and Shepard. Performances are Friday at 8pm Saturday at 7 and 10pm beginning May 15. Tickets are \$4 and \$5; call 426-6602 for more info.

The MIT Community Players are already announcing the opening of their spring production, **Woyzeck** by George Buchner. Performances are in Kresge Little Theatre on May 14 and 15 at 8pm. Tickets are \$3.

The Vector team, ready to go, just before the LeMans start. (Photo by Steve Young)

Cycling course treacherous

(continued from page 12)

According to Doug Unkrey, a member of the Vector staff.

Other entries were certainly impressive. From Hampshire College, Team Wiener: Two machines made of exotic composites, a team with Campagnola uniforms and no other than Eric Heiden, 1980 Olympic speed-skating champion and Tom Howard, national cycling champion, as riders. Heiden was slightly hurt on Saturday, but it was mainly lack of familiarity with the machines and a crash job on the bodies which kept Team Wiener from making any significant showing. Most innovative was Steve Ball's *Dragonfly*, a screaming hand and foot linear drive machine, which placed third. From England came a jovial team of backyard mechanics who won the first day's time trials, but blew a tire on the second day and had to drop out. They had an incredibly stable "tricycle" with two rear wheels, front wheel drive and steering.

The Fairgrounds was used because the previous site, the Ontario Motor Speedway was purchased by Chevron to make room for an industrial park and condominiums. The course conditions were horrendous. The surface of the dragstrip was covered with rubber, which had caked off in certain areas. The rest of the course had the surface quality of an old parking lot, and loose gravel caused several accidents. The Cal Poly San Luis Obispo entry *Phoenix* blew a tire at nearly 60 mph, rolled over, knocked off the plexiglas shell, and ejected one of the riders. Fortunately, he suffered only loss of skin on his left

side, no broken bones or severe cuts. He borrowed a bike and rode a mile to look for first aid. When Peter Boor, president of the International Human-Powered Vehicle Association (IHPVA) was asked, "Isn't it possible that in a crash of 50-60 mph, someone could be seriously injured?", his words were, "from what?" When the discussion turned to the riders hurt in the *Phoenix* his reply was, "If he had been wearing his safety straps . . ."

Boor's attitude expressed a cal-

lous disregard for the safety of the contestants. In view of the effort which goes into building these vehicles, it seems the teams deserve a decent place to compete (When queried about next year's location, Boor said, "same place"), instead of dealing with frustration.

Under the present organization, it is clear that the sport will suffer. This year's machines showed significant progress, but no world records are going to be set at Pomona.

IM Council tables football manager

By Eric R. Fleming and Nick Rowe

Selection of a football manager for next season was once again tabled at Wednesday's IM Council meeting.

Only one nomination (which was subsequently declined) was made at the meeting, as those interested but were not present could not be nominated. A series of phone calls to prospective candidates proved to be futile.

A meeting of the IM Executive Committee is scheduled for next Wednesday (May 13) afternoon, where it is hoped that a manager can be elected. Those interested in the position should contact Mike Colucci, Baker House, prior to next Wednesday's meeting.

Man-powered vehicles compete in California

By Bruno Mombrinie

Editor's Note: Bruno Mombrinie is a student in Mechanical Engineering who is working on a human-powered vehicle in conjunction with Profs. Woodie Flowers and David Wilson. Mombrinie traveled to California to view the championships for The Tech and the Dept. of Mechanical Engineering.

A few months ago in Stockton California, Fred Markham and Chris Springer, a pair of world-class bicyclists, eased their way into the seats of a three-wheeler. They took off on Interstate 5 and headed for Sacramento, some 42 miles away. As they passed a semi, one trucker noticed the two were pedaling their vehicle, and his buddy replied, "Yah, and do you know how fast that's goin'?" It was going 59 mph on the down grades and above 45 on the up grades. The trip took 49 minutes and 40 seconds, giving an average speed of 50.5 mph. Markham and Springer's three-wheeler is known as the *Vector*, the world's fastest human-powered vehicle, which set a record of 62.93 mph on May 3, 1980 at the Ontario Motor Speedway in California. The *Vector* team, led by record-setter Dave Gryllis, won its second straight title at the seventh annual Human-Powered Vehicle Speed Championships at the Los Angeles County Fairgrounds May 2 and 3.

The Friday night before the races, the four-man *Vector* crew was up until 2am, labeling the new single-man vehicle with sponsors' names, adjusting derailleurs and brakes, building up spare wheels, deciding what clusters to

use, etc. The basic design was developed two years ago; this year's singles speed champion and road race winner was built in the week before the races. Sold for \$10,000, the vehicle includes front wheel steering, hub brakes, 96-tooth chain gear, fiberglass body and a Lexan windshield. "It's supposed to weigh 51 pounds, but it's actually closer to 70," ac-

REFRESHER COURSE.

You've burned the midnight oil and cracked more books than you care to remember. The work is done. The papers are in. So now you take a refresher course. The subject: ice cold Dos Equis beer. The Uncommon Import. Study a frosty glass. You'll learn it has a

rich, amber color unlike any beer. Now test that big, bold flavor. You've got to admit, Dos Equis is in a class all by itself.

DOS EQUIS
 THE UNCOMMON IMPORT.
 Amber and Special Lager
