Students to vote for/against Queen

By Stephanie Pollack

As part of the voting for Homecoming Queen which begins Tuesday, students will have the opportunity to vote for or against the entire contest, according to Skip Bulter ’82, chairman of the Undergraduate Association Social Council.

This compromise between opponents and proponents of the Homecoming Queen contest was reached at an open forum attended by approximately 100 students Tuesday evening. Although the compromise is a workable one, Bulter noted, “It takes into consideration the considerable work done by those who would like to have a Homecoming Queen and shows consideration to those who wouldn’t like to have one at all.”

The ballot will include their approval or disapproval of the ballot. Each student will also contain a list of the names of all Homecoming Queen nominees, including the Ugliest Man on Campus (UMOC), according to Jim Olivo ’82, Homecoming Queen coordinator.

If the majority of students voting indicate disapproval, Olivo continued, no Queen will be elected and Homecoming Weekend will proceed in the same manner as two years ago, when UMOC was crowned Homecoming Queen. If students favor holding the contest, the seven

Students report spying by foreign government agents

By Ivy Fong

Graduate students from Taiwan at MIT have reported alleged spying by agents of their government, in a "very political situation," according to some of their victims of political persecution.

"[Foreign students] might be apprehensive another one, [but] it's very difficult to pin-point," declared Eugene R. Chamberlain, International Students' Advisor and Associate Dean, International Affairs. "There have been specific incidences of alleged spying, but MIT," continued Chamberlain, "But these are not provable facts."

According to one student, "After the mysterious death of a Carnegie-Mellon University assistant professor, a rumored visit to his native Taiwan, there have been many spies."

Numerous MIT graduate students, who are largely distributed around the Chemical Engineering Department on September 7, apparently accusing a graduate student in the department of being a spy. Although the validity of the letter is controversial, Chemical Engineering Department Head James C. Wei ’54 contends that there "may be a security problem.

"It is a sensitive issue because the rights of students are involved, especially those of the innocent," remarked Wei.

Sources also claim that the alleged spies are not really spies, but people who clandestinely observe the conduct and morals of others, and report back to the government. The problem of political pressure on foreign students is also a national one — several Iranian students in Tenessee were arrested after an incident last month involving suspects of the Ayatollah Ruhollah Khomenei.

Dr. Louis B. Menand Jd, Special Assistant to the Provost, commented yesterday that he had not heard of any recent allegations of spying, though a policy set by then-President Jerome B. Wyman and then-Chancellor Paul E. Gray ’54 "flexibly" leaves open the question of whether or not MIT will address such letters.

"Any person present in the United States as an agent for a foreign government must register with the United States Department of State and sanctions are imposed for the failure to do so. Information concerning spying activities will be referred to the Department of State," continued the letter to the MIT community dated March 18, 1976.

The letter arose from alleged reports that a student taking photographs at an open forum at MIT on February 6, 1976 was performing some surveillance function for the Taiwanese government, which, in a detailed report by Menand in May of the same year, referred to no further evidence to support Menand’s report did, however, claim that the government of Taiwan may operate a nationwide surveillance system to monitor Taiwanese students in the U.S.

Lost goals blamed for Sadat’s death

By Jay Glass

Tuesday's assassination of Egyptian President Anwar el-Sadat is one indication of growing Arab dissatisfaction with secular states, according to MIT professor and Middle East history specialist Phillip Khoury. Sadat was assassinated by members of a small, fundamentalist Islamic group with strong military ties, according to as-yet unidentified Egyptian authorities. Sadat died shortly after the group's ambush, which came during a military review commemorating Egypt's 1973 war with Israel.

Observers in Egypt report little of the open, widespread mourning noticed after the death of Sadat's predecessor, General Abdel Nasser, in 1970. "There could be only two reasons for this," commented Khoury. "Either the street security is too tight that no one dares go out," he said, "or most Egyptians weren't as attached to Sadat as we in the United States are to Nasser."

"The prestige he brought as a world figure was a source of pride for Egyptians," said Khoury, who spent a year in Egypt as a graduate student, "but Sadat may have spent too much time on peace-making and too little on bootstrapping Egypt's economy."

Generally, Khoury indicated, the secular Arab state that was established after the end of colonial rule made claims of future peace and prosperity that led their people to unreasonable expectations. Increasing unrest in the Arab world, including Sadat's assassination, is fomented "basically because the state systems haven't met their claims," commented Khoury.

"People who have studied the region [the Middle East] were not surprised" at the news of Sadat's death, said Khoury. He expressed a belief that Sadat may have received intelligence that some sort of trouble was imminent: "The key question is that Sadat arrested 1200 people last week — why, if he didn't know something was coming?"

Sadat's apparent successor as Egypt's President will be Vice President Hosni Mubarak, who was named President unanimously by Egypt's Parliament on Wednesday. Mubarak will take office following expected popular approval in a nationwide referendum next Tuesday.

"He's really an unknown quantity — more so than Sadat at the time of Nasser's death," said Khoury. Khoury expected Mubarak to take control of Egypt's government smoothly.

(See next page for conclusion)
**SADAT FORSAW TROUBLE**

(Continued from page 1)

"Mubarak was the individual with the most influence in Egypt outside of Sadat," Khoury said. "It's indicative of his strength that both the opposition and his own party agreed unanimously on his nomination (for President)."

With the death of their nationalistic, the Egyptian-Israeli peace negotiations signed at Camp David may be endangered. To reassure Israel and other nations as to the intentions of the new government, Presidential nominee Mubarak declared Wednesday that Egypt "will honor its treaties and commitments." Khoury was pessimistic about the prospects of fulfilling the treaty, "I think that the [Sadat and Israeli] Joint Minister [Begin] knew it was already doomed. I think the US government also knew it, but the won't admit it." "Sadat also considered terms for a lasting peace to include the Palestinian question," said Khoury.

Khoury expects foreign affairs to occupy a position secondary to economic issues on the new Egyptian government. "They are concerned about what happens to the Palestinians - but they have to think of themselves first."
news roundup

World

Israel promises to keep to terms of treaty. — The Israeli government announced Wednesday that it intends to follow the provisions of its peace treaty with Egypt, despite the assassination of Egyptian President Anwar el-Sadat. "If the peace continues, the Sinai withdrawal will continue," noted Israeli Foreign Minister Yitzhak Shamir. The withdrawal from the Sinai Peninsula is scheduled to be complete in April 1982.

US leaders to attend Sadat’s funeral. — The official American delegation to the funeral of Anwar el-Sadat will include Jimmy and Rosalynn Carter, Gerald R. Ford, Richard M. Nixon, Alexander M. Haig Jr., Henry A. Kissinger, Caspar W. Weinberger, Jeannette K. Kapnick, and 13 others. Following recommendations from the Secret Service, President Ronald W. Reagan will not attend for security reasons. Sadat will be buried Saturday next to the Tomb of the Unknown Soldier in Cairo.

Commonwealth condemns South Africa. — The Commonwealth, the free association of sovereign states who recognize Queen Elizabeth II as the head of their respective organization, expressed "deep concern" over South Africa's continuing refusal to recognize Namibia as a free and independent nation. The members also alluded to a concern that President Ronald W. Reagan was unsympathetic toward the Namibian issue, citing that he was striking up a warmer relationship with the South African government. The Commonwealth, which includes Great Britain, Canada, Australia, New Zealand, and 27 third world nations, met in Melbourne, Australia this week.

Nation

Senate approves AT&T decontrol. — By a vote of 90 to 4, the Senate passed a bill Wednesday which would allow the American Telephone and Telegraph Company (AT&T) to expand into areas unrelated to telecommunications, such as data processing and information services. AT&T is currently restricted from operating in areas other than telecommunications by the Communications Act of 1934, which granted AT&T its monopoly.

Soap opera viewing may be hazardous to your health. — Frequent watching of daytime television serials may cause the soap opera addict to adopt reckless health habits, according to a 10-year study released this week by the University of Philadelphia. The report, published in the New England Journal of Medicine, said that soap opera may lead audiences to believe that "if any problem arises, the doctor will surely solve it." Common sense may cause viewers to let their health-care habits go by.

Local

Admitted rapists receive suspended sentences. — Despite a recommendation of 10-year sentences by Norfolk County district attorney William Delahanty, Judge Herbert Abrams suspended the sentences of five men who pled guilty to raping a Whitman, Mass., woman in January 1980. "I consider it a serious charge," commented Delahanty. "I was comfortable with the 10-year sentence, but suspending a sentence is the prerogative of the court," he added.

State trooper, three others indicted in marijuana theft. — An indictment handed down Wednesday from a Barnstable County grand jury in Yarmouth, Mass., connected four persons, including a Massachusetts State Police officer, with the theft of $1.3 million worth of marijuana. According to the State Police, 50 bales, or 3500 pounds, of marijuana were stolen on September 25 from a storage room of the State Police station in South Yarmouth, Mass. One suspect surrendered to the police on Wednesday, but the other three are still at large.

Somerville woman awarded $2.75 million. — The Middlesex Superior Court has awarded the largest settlement in Massachusetts history to Donnie Snow of Somerville, Mass. In her suit against her dentist, Dr. Melvin Yavner of Brooklione, Mass., Snow alleged that she nearly died from an infection contracted while having a wisdom tooth pulled by Yavner in April 1972. Yavner is appealing the court's decision.

Weather

Below normal temperatures will continue in New England through the weekend. Partly to mostly sunny skies today with northwest winds and highs near 60. Clear and cold tonight with lows near 42. Tomorrow, winds will be light and variable with sunny skies and highs in the upper 50's. Winds becoming onshore by Saturday evening and lows will be near 50. Becoming partly cloudy for Sunday with a threat of rain by late in the day. Highs near 60.

We are an equal opportunity employer M/F/H.

GET AQUAINTED WITH US

On Thursday, October 15, 7:30-9:30PM, Room 4-153, we'll be conducting a seminar. Mr. Christian Young, Sr., Vice President will be on hand to tell you more about a technical consulting career with BOOZ· ALLEN & HAMILTON. Join us for some interesting talk and refreshments.
Editorial

Lower pace, but not opportunities

Editor’s Note: This is the second of three editorials discussing the recommendations of the Pace and Programs Subcommittee of the Committee on Educational Policy.

Freshman year should be a time to explore oneself, the Institute, and the basic sciences without fear of overloading by taking too many courses or worrying too much about grades. The Pace and Programs Subcommittee of the Committee on Educational Policy has made two recommendations intended to help freshmen begin their year a reality, but one suggestion falls short and the other goes too far.

The subcommittee’s proposal to issue a fresh-man year load limit is sound, particularly for students who plan to enter or be admitted at the end of each term overstep the bounds of pragmatism and threaten to create even more tension for freshmen. Although the grade reports will be for internal use only, many multiple pressures for their releases will develop.

Once word of the grade reports gets out, companies and graduate schools may request freshmen to release them or request that the Institute release them for them. In addition, new rules would have to be formulated to prevent misuse of the reports by MIT departments—undergraduate and graduate.

Such rules would be too difficult to develop and enforce that making the change would not be worthwhile. While this proposal should be rejected, the subcommittee’s recommendation to set a normal freshman course load should be adopted, albeit with some changes designed to allow more flexibility.

The first thing to realize is that lowering the freshman credit limit will not necessarily slow the pace of individual study or result in more dedicated students learning more subjects. In fact, reducing the freshman load may exacerbate the pace problem.

An overemphasis on the current freshman credit limit has led to the limit rather than viewing it as a maximum. As noted in the subcommittee report, freshmen should be better informed of what a normal class load is, while the existence of an actual limit should be downplayed.

No matter what is defined as a normal class load—four and only four—and the limit will inevitably be capable of doing more. The subcommittee cites the desire to double major or graduate in three years as one cause of freshmen’s reluctance to request freshman grades. While this is wrong, either with either of these practices. Some students will continue to choose these alternatives, and they need an escape clause.

Freshmen should be able to take more than the normal course load—up to the equivalent of the current unit limit—with only the written permission of their advisors. Freshmen should also be able to refuse to take additional courses to the undergraduate Academic Support Office. In the rush to reduce the pace for freshmen year, the subcommittee should overlook their demands for whom more than a normal load is not overloading.

Ergo doesn’t represent students

Editor’s Note: Ergo was given an opportunity to reply to this letter and declined.

To the Editor:

I used to think that nothing could be worse than listening to a lecturer in 10-250 or 26-100 without a newspaper to prevent me from dozing off. Recently, I’ve found that there is something worse. I was rushing off to class one morning like a good little nerd when I saw the usual stack of Ergo in my laps. I grabbed one, and I felt myself developing a class in class, I reached for the paper. Much to my dismay, I discovered that I had picked up Ergo. It has been awhile since I last actually read an Ergo. There’s something about its appearance that says: “Leave me alone. Pick up last week’s Tech or Link instead.” I guess that’s why I see so many Ergo’s in their original stacks.

What is it about Ergo that would object to? Well, it’s not really the viewpoint, or lack of it, that upsets me. According to their opinion section, Ergo doesn’t represent MIT students. Ergo doesn’t represent MIT students. Ergo doesn’t represent MIT students. Ergo doesn’t represent MIT students.

Perhaps it’s the waste of paper that upsets me. According to their circulation statistics, they print more than 5000 of those “campus voice of reason” sheets. I figure that roughly 80-85 get read (a liberal estimate), 400-450 get used as umbrellas (a conservative estimate), and another hundred or so are used for miscellaneous purposes (such as lining one’s parrot cage). This leaves well over 4000 Ergo’s dragging in our hallways each week.

Another impression that bothers me about Ergo’s existence is the impression of MIT students it gives to the students at Harvard, BU, and Wellesley, where it is also distributed. I remember meeting a Harvard student who asked me something like, “A lot of MIT students are pretty conservative aren’t they?” When I asked him what gave him that idea, he replied that he had seen a few copies of Ergo. I explained to him that nobody here reads it, unless they want a couple of good laughs or an instant cure for insomnia. The fact that the paper is published twice a week, and is distributed only to students, should be enough to make the students of MIT think twice before they ask us for a copy of Ergo.

Perhaps I’m off base here, but I think that Ergo doesn’t represent the MIT student body. After all, who reads it? People who want to read a group of jugglers or a sample of MIT’s students. Ergo doesn’t represent the MIT student body. I think that the people who should be represented are the people who do care. The people who are concerned about this campus and represent the opinion of the writer, not just the viewpoint of the MIT student body. Several letters to the editor have appeared in favor of the philosophy that people should be exposed to a variety of opinions. Certainly, alternatives to The Tech are desirable. I believe that the Tech does a good job in this capacity.

The students here can usually relate in some respect to the articles these two papers contain. It seems to me that the views expressed by Ergo would be better left to the propaganda of the “Young Libertarians” or the Ayn Rand Fan Club.

And now I must retire to pursue my individual happiness. I think I’ll shower some freshmen. Kevin Hazel ’82

Editorials, which are marked as such and printed in a distinctive format, represent the official opinion of The Tech. The Tech is written by the Editorial Board, which consists of the chairman, editor-in-chief, managing editor, and news editors.

Columns are usually written by members of The Tech staff and represent the opinion of the columnists. Sometimes, however, an outside contributor will be asked to write a special column.

Letters to the Editor are written by members of the MIT community and represent the opinion of the writer. The Tech will attempt to publish all letters received, and will consider columns or stories. All submissions should be typed, preferably triple spaced, on a 57-character line. Unsigned letters will not be printed. Authors’ names will be withheld upon request.
Furor reigns: Will there be a Homecoming Queen? H. Court would inspire pride

To the Editor:

The MIT Homecoming Weekend would include a Homecoming Queen contest, made up of high spirited people from all over campus. I would focus attention on the good things we have in common at MIT, and against pride in ourselves as a school.

Strain objections have been raised against a Homecoming court, claiming it is intrinsically sexist in that it would go for a beauty contest and be a place for everyone else to for an envious for a beauty contest, to end by putting some pretty princess on a royal throne. However, it's not quite that simple. Without an Homecoming Queen, pedestal, her sole purp for the student body to express themselves, to allow the whole, however, is pretty radical. This seems to be changing, and may we look forward to a Queen for the better.

To the coming long and spr year-end for the last two years were campus wide events which made all of us feel well. This year the Social Council is trying to expand these events (please tune to follow).

Carl Fryt (not ostensibly representing the Social Council) complained to our students with, “Sure it’s sexist. Sexism’s the enemy.” But, as someone who has spent a life trying to encourage the opposite, I think it’s obvious that this is not the case. Why not a woman? We would like to have a Homecoming Queen. It’s fairly obvious that if you have a Homecoming Queen, the honor of the game is given to the person who is going to be queen. I would like to ask those people who run for the position: “Why not a woman?”

I believe we can have a “real” Homecoming Queen. If this election has any substance to it, then the student body of over 4000 people should have some acknowledgment. The election should be fair, and not be decided by who has the most friends. We would like to address each of these concerns.

In the past, Homecoming Queen contests have been based on the criteria of all social, physical, and academic qualities. However, the main purpose of having a Homecoming Queen is to provide a symbol of unity for the students. If this is not the case, then we should consider whether having a Homecoming Queen is worth the effort.

Kint Foss ’83

Resist social elitism: give UMC crown

To the Editor:

I would like to add my voice to the debate regarding the social elitism of Homecoming Queen contest. I would recommend giving the UMC the crown.

We have in common at MIT, and from all over campus, would made up of high spirited people that go to school. We have in common at MIT, and from all over campus, would made up of high spirited people that go to school. We have in common at MIT, and from all over campus, would made up of high spirited people that go to school. We have in common at MIT, and from all over campus, would made up of high spirited people that go to school.

I would like to ask those people who run for the position: “Why not a woman?”

If this is not the case, then we should consider whether having a Homecoming Queen is worth the effort.

Kint Foss ’83

Only purpose of Homecoming Queen is to have fun

To the Editor:

There must be something basically wrong with this place. Tuesday I attended the UA Social Council’s open forum to discuss the proposed idea of electing a Homecoming Queen. The crowd that turned out (men and female in this case — or place) I expected that many of the views presented would have been to some extent presented. I did not realize how outraged I would really be by the time I left.

Ms. Huntington ’84

Feminists: UMC is OMPC

To the Editor:

These feminists totally betraying the Institute’s decision to have a Homecoming Queen. We women have yet to petition for the title of UMC to be changed to UMC of the Past. I think that it means that, with all their liberated attitudes, very few of MIT’s women would even consider admitting themselves ugly enough to fit for their own group.

Christopher Noren ’84

Let me address the main focus of this controversy. Why should we have a Homecoming Queen? The hope of the Social Council is that the Homecoming Queen can help provide a focus for the students. However, it appears that some women feel that we should not have a Homecoming Queen because no one else will then us. I would like to ask those people who run for the position: “Why not a woman?”

I believe we can have a “real” Homecoming Queen. If this election has any substance to it, then the student body of over 4000 people should have some acknowledgment. The election should be fair, and not be decided by who has the most friends. We would like to address each of these concerns.

Kint Foss ’83

UMOC is fine, it is in a typical MIT hack that goes to charity, but things have their place. It seems to me that UMC celebrate beauty once in a while. It seems to me that UMC celebrate beauty once in a while. It seems to me that UMC celebrate beauty once in a while. It seems to me that UMC celebrate beauty once in a while.

Kurt Foss ’83

Dedicate game to a symbol of beauty

To the Editor:

The Social Council has been facing a problem in that a few of UMC’s “need” want to prevent football players from running for Homecoming Queen. On Tuesday, October 9, the football team will be playing Assumption College in its third annual Homecoming game. This game is important to us, because it is to be held. I would like to ask those people who run for the position: “Why not a woman?”

I believe we can have a “real” Homecoming Queen. If this election has any substance to it, then the student body of over 4000 people should have some acknowledgment. The election should be fair, and not be decided by who has the most friends. We would like to address each of these concerns.

HQ contest not a joke: don’t elect male Homecoming Queen

To the Editor:
The election of a Homecoming Queen, or any beauty contest, as many people at MIT seem to think. Rather, it is an attempt at instilling a serious school spirit in the student body of MIT. The fact that the Homecoming Queen need be a woman is not as important as the fact that the queen must be a man. When we elect the UMOC as Homecoming Queen, we turn any mistake the event might have produced into a joke. It is not good for the football team to win if its so-called fans can’t take its roles as supporter of the school spirit seriously.

Moreover, if we refuse to elect a queen merely to avoid playing the old mold of the typical American college woman, we make a grave mistake and sacrifice an important aspect of college life. The queen is not simply a person to be gawked at; she fulfills a vital, necessary role, of which she can be proud. And if any woman here wouldn’t feel pride in such a position, she need only refuse any nominations she might receive. The election of a Homecoming Queen is not a display of sexism; it is a display of serious school spirit, something MIT has long been lacking and sorely needs.

Francis Maksiewicz ‘85
John Lang ‘85

Recognition should please women; let’s also elect a Homecoming King

To the Editor:
We would like to respond to the letter to the editor of October 6 concerning the subject of Homecoming Queen. Although we do not disagree with the statement that “Women come to MIT to be able to participate on an equal basis with men in the male-dominated society,” we feel that the 30 people signing the letter have lost their sense of proportion and fun. We think that rather than feeling threatened by this “ritual,” the women at MIT should be happy that they are finally recognized as being women. We have heard too many disparaging remarks concerning the women at MIT, and we are pleased that people are finally realizing that this school is not just composed of men and ugly women. It is also encouraging that we, as a school, are finally beginning to shed our anti-social image. As a measure against possible charges of sexism we suggest that a Homecoming King also be elected. We like the turn that MIT is taking toward a more “normal” college-like place. Having a Homecoming with all the attendant activities is certainly very much a part of this change. We, therefore, heartily endorse the idea of a Homecoming King (and Queen).

Suzanne von Rosenberg ‘83
and six others

HQ toes are not spirited

(continued from page 5)

sucesses by having more events during Homecoming weekend. They have lost of encouragement from those of us who look forward to having good Homecoming. It’s too bad they stumbled onto the wrong idea of Homecoming court. It’s been said they should scrap it to save the rest of the weekend. Instead, the Social Council is going to have preliminary voting for court members as originally planned, and on the same ballots poll student opinion on Homecoming court to see if we will have it at all.

This is a good compromise. While deciding whether to have a Homecoming court, we would remind the student body that the institution of “Homecoming court” will become only what we make of it. If we duplicate traditions considered sexist and harmful, we will do little good and the practice of Homecoming court will die quickly.

If, however, we make Homecoming court a collection of spirit leaders from the entire community, then the court would become the focus for a greater school-wide enthusiasm throughout Homecoming weekend. Consciousness of and pride in the student body as a whole might be easier to accept.

A Homecoming court is not a practical requirement. They don’t hire bands or deal with caterers. Rather, they should be a symbol of unity for the whole school. Their function would be to lead by example. We have heard of Homecoming kings and queens, or if there even is one, it is not as important as the group itself. The king or queen would only matter as a representative of the group. Perhaps this would be clarified if the court picked its own king or queen or both.

This is not the traditional role of Homecoming figureheads, and the more traditional role of sex symbol is what offends people. For those offended by the possibility of a Homecoming queen in the traditional model, think on this: Homecoming court to see if we will have it at all. The election of a Homecoming King is not a display of sexism; it is a display of serious school spirit, something MIT has long been lacking and sorely needs.

Michael L. Brody ‘82

Wait, you guys, the Molson party is tomorrow night.
Foreign grad students concerned about privacy

(Continued from page 1)

Almost all students who currently report suspicious surveill- lance or have heard rumors of such activities commented that there was not much they could do because of the sensitive nature of the problem. One Taiwanese student said she had heard of one student who spoke with "the vice president of MIT," Vice President and Dean of the Graduate School.

Vote to be 10/14, 15, 16

(Continued from page 1)

MIT students receiving the highest number of votes will be named the Homecoming court. Olivo noted that the purpose of the change in voting procedure was to allow the Social Committee to "accurately assess students' feelings on the matter and proceed appropriately."

Many of the comments at the Tuesday forum focused on whether or not the contest was sexist. Kinta Foss '83 claimed that "over my six women on a pedestal is degrading." This view was countered by that of Karl Hirschman '82, who noted that "sexism has been around a long time and it's here to stay." Suzanne Hirschman '82 noted that the controversy over sexism was "making people feel very bad about what can be a very positive experience."

Butler and Olivo explained to those attending the forum that entrants were not restricted to women. "Any MIT student can run," Butler emphasized.

Students at the forum presented the Social Committee with petitions circulated by Senior House and the Association of Women Students. Between 200 and 300 students signed petitions calling for the elimination of the contest or the installation of UMOC as Homecoming Queen. While some students felt that the disagreement over the contest could produce a split between the dormitories and fraternities, Olivo dismissed this possibility. He noted that the Social Council Executive Member from Burton House has "polished positive comments from the constiuents."

MIT undergraduate and graduate students are eligible to vote for Homecoming Queen. If the contest is held, the seven members of the Court selected in the initial balloting will be re-quired to answer two questions posed by the Social Committee. The candidates' responses will be publicized, and the final vote will be held on Friday of Homecoming Weekend, according to Olivo. Final voting will be preferential.

Butler said that the "forum was healthy." He added that "no one who has a new event can be forced to participate." According to Butler, "there are no set traditions for Homecoming," and the Social Council has devoted "the best possible effort" to planning the weekend.

Kenneth R. Waldigher '83 was in California yesterday and could not be reached for comment. Vice President Constantine B. Simonides '57 noted, "The Institution is very much concerned about the privacy of the MIT community... including international students."

"MIT is an international institution," he continued. "We have a great deal from... international students." Concerning the related problem of "the export of technology," Simonides reported that the content of "all our programs are open... There is no classified work on campus." He did, however, mention that certain research at the Lincoln Laboratory, an affiliate of MIT, is classified and proper precautions are taken.

Dr. Richard Cytet, president of Carnegie-Mellon University, warned last month against the in- timidation of foreign students by agents of foreign governments on US universities. "All those from any country who reporting on other members of their country are part of the culture [should be warned] as such activities are illegal [or American campuses]." declared Cytet.

E-Systems continues the tradition of the world's great problem solvers.

Maxwell's electromagnetic field theory led to huge practical scientific advances. His light theory led to his own development of one of the first color photos and the kinetic theory of gases.

Scientists and engineers at E-Systems are carrying on in the tradition of Maxwell's genius. Today, they are solving some of the world's toughest problems in electronically steered phased array antennas, electromagnetic scattering and solar ray concentration, using his findings as tools.

E-Systems is maintaining a reputation for designing and building communications, data, antenna, intelligence and reconnaissance systems that are often the first-of-a-kind in the world.

For a reprint of the Maxwell illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah or Virginia, write: Lloyd K. Lauderdale, V.P.-Research and Engineering, E-Systems, Corporate Headquarters, P.O. Box 226030, Dallas, Texas 75266.

Among young New York artists as her abstract subject matter, that through its represented work with the human figure, either in subject or form: the artists exhibit notes explain. The exhibit treats the has been pulled together by guest curator the Hayden Gallery through November 8, advertising, focus on a particular part of the colour art, that this underlying transition is made fragmented physical presence, or - with this movement of making the same effect: Sherman also offers some large colour photos that produce the same effect: Richard Prince's sets of photos, taken from the colour photos that are critical.

Smith calls this "legible" art, art in which the music world. The problem with this record, indeed with the Lyres, is that their music may be too much fun to be widely popular. Most of the same people who embraced DMZ and similar bands in 1977 have now turned to minimalist new wave. That has its merits too, but once in a while it's great to just be able to have fun and dance to some great tunes.

The Lyres adhere strictly to their musical roots, and this may prove an impediment to their future career. Before going on to record albums they will probably have to expand their range a bit. Good though this EP is, it can't compare to the same music live. Those who are not familiar with the Lyres are advised to check them out at a local club. Then, buy the record to enjoy these same songs in the comfort of your own home. It's a good bet you'll be dancing in front of your stereo.

**Body Language at Hayden?!
**

**This Is Not A Sex Ad**

The current exhibit, Body Language, at the Hayden Gallery through November 8, has been pulled together by guest curator Robertson Smith, and deals with "fashion among young New York artists" as her exhibit notes explain. The exhibit treats the physicality of current artistic expression, either in subject or form: the artists represented work with the human figure, with an idea of corporeality, of fragmented physical presence, or - with abstract subject matter, that through its powerful embodiment suggests the physicality and humanity of the artist.

Body Language is arranged in such a way that this underlying transition is made clear: the progression is from photograph to painting "collage" - body language is a set of nonverbal signals that are all clear messages, and thus the exhibit is aptly titled. Smith calls this "legible" art, art in which the artistic process and the artist himself are critical.

Several artists are of particular note. Richard Prince's sets of photos, taken from advertising, focus on a particular part of the human body seen under stereotypical conditions and highly fragmented. Untitled film stills by Cindy Sherman isolate the human figure in mysterious, alienating surroundings, snapshots from some incomprehensible and complex story. Sherman also offers some large colour photos that produce the same effect; however, isolated as they may be, these figures will suggest force and perseverance. In one of the colour photos, a brooding woman holding a glass of whiskey is illuminated half by daylight and half by the orange room glow of a storefront display; the environment she is captured in is so bizarre that her humanness — the body language that establishes that humanness — is assonant.

Ken Goodman's work (epitomized) begins the move toward the physicality of form: blothy, bold black and white oil on canvas figures are exhibited here. Very in keeping with the exhibit theme is the work of David Salle. Salle mixes two styles — a detailed, "shaped-out" mode and a sketch form, superimposing the latter on the form. The result is a painting which suggests a conscious and unconscious level — what body language is all about. There is a strange appeal to Richard Bosman's quartet of gory heads, physical in their form and content. The piece is thickly applied, suggesting the nightmareishness of some of Van Gogh's work, and the images are of decapitation, torture and flames.

Julian Schrabel's two works bring the exhibit to a close, the most physical works of all: "Buried Alive," a oil on canvas overlaid with strips of wool blanket, and "Voltaire" is a large, intriguing piece composed of goggy oil paint and broken crockery on wood.

There will be a second show, also part of Body Language looking at figure-related sculpture opening on November 20. The gallery is open 10 to 4 daily, and 6 to 9 Wednesday evenings.

UAP strives to honor promises

(Continued from page 2)
ask if I could go to one of their meetings. I don't see any reason why they wouldn't let me go; they're interested in student input.

On the issue of the Whitehead Institute, DeRubeis plans to ask the General Assembly (GA) to decide upon any stance the UA may take. "We're going to bring this up at the next GA meeting (October 22), which just happens to be before the next faculty meeting," he said. "It wasn't on last night's agenda because I knew the meeting would run long." He added, "If the students have some opinion for or against it, we'll make a recommendation at the faculty meeting."

"When I attended the last faculty meeting," DeRubeis continued, "a lot of professors who were speaking up against the Whitehead Institute were concerned for the undergraduate students benefit from all this — if there is any at all." 

Cyclist injured by three MIT freshmen

By Stuart Gitlow

A bicyclist on a Memorial Drive sidewalk was injured Friday when three freshmen sprayed water at him from a dormitory window. According to the Campus Police, the man was struck in the shoulder by what he believed to be a small rock, and then sprayed with water from a fourth floor window. The man looked up and fell from his bicycle, incurring a serious thumb injury and a knee gash.

One of the freshmen involved said, "We had already hit a jogger; he had laughed and egged us on. Then one guy came along on his bike; we shot him but never saw him fall. We thought it was a harmless hack; it didn't turn out that way. I'm sorry that it happened."

Shortly after the assault was reported to the dormitory house desk, the Campus Police arrived to aid the Housemaster in finding those who were responsible for the prank. The wounded man was escorted by a Campus Police officer to the MIT infirmary for a knee gash.

The freshmen had been armed with marisols, sections of surgical tubing which, when filled with water, shoot farther than a fully charged water fire extinguisher. One of the freshmen involved added, "We apologized to [the man we hit]. It was really an unfortunate circumstance that got carried away."

The bicyclist, though sore, decided not to press charges against the three freshmen. He explained his tolerance by saying that he had once been senior tutor at a Harvard dormitory, and had seen such incidents previously.

"We saw Dean Sherwood and decided that what went on there would stay private," said one of the freshmen. Dean Robert A. Sherwood, Associate Dean for Student Affairs, commented, "Freshmen Shower Night, though it may start out in good spirits and is considered to be a tradition, invariably results in either injuries or damage to property, and most importantly, violation of students' rights, who ended up being victims against their will."

Attention grads with an M.S. or B.S. in EE, CS or CSE.

FAIRCILD Automatic Test Equipment in San Jose, CA, Presents Questions You Shouldn't Ask in Your Next Job Interview:

1. Do you know a good cure for a hangover?
2. Can I list my cat as a reference?
3. How can I get an easy job like yours?

Here's a couple questions you should ask us:

1. Which company is the pace-setter in test systems technology?
2. Which company has exciting career opportunities for new grads with an interest in hardware and/or software?

The answer to both questions is Fairchild Automatic Test Equipment in San Jose.

The Homecoming Ball, a Homecoming Queen, and a live band with the group Images will be held on the Saturday night of Homecoming Weekend in duPont Gymnasium. Between band sets, "early in the evening" there will be a pep rally, according to the Vice Chancellor of the MIT Social Council, Angie Liao '82. Beer, punch, and coke will be provided; admission will be $2.

The Homecoming Weekend will actually begin on the Thursday evening of Homecoming Weekend with a drinkoff for the upperclassmen and graduate students and an ice cream orgy for the freshmen and sophomores. The class which finishes its four rounds of the three-keg drinking contest between the upperclassmen and graduate students and the group Images will be the winner. "The two losing classes will split the cost for the beer," explained Olivo. The Homecoming Queen will be crowned Saturday afternoon.

The MIT Social Council has budgeted $8000 for the Semi-formal. The council has been "actively seeking an opportunity employer." Raychem, 300 Constitution Drive, Menlo Park, CA 94025. An equal opportunity employer.

A pep rally put on by the MIT Cheerleaders near the football stands. The Homecoming events are a prelude to MIT's Homecoming football game against Assumption College on Sunday, October 23. Other Homecoming events include a drink-off, an ice cream orgy, a Friday afternoon pep rally, and an ice cream orgy, a pre-game road race and DKE alley rally.

The semi-formal Homecoming Ball will be held on Friday night, October 21 at the Booiian Park Plaza Hotel, a room consisting of "two huge ballrooms together," according to the Coordinator of the Semi-formal, Jim Oliva, '82. There will be a swing band, a cash bar, and "free hors d'oeuvres and free champagne punch," said Olivo. The Homecoming Queen will be crowned Saturday afternoon.

The MIT Social Council has budgeted $8000 for the Semi-formal and has been "actively seeking an opportunity employer." Raychem, 300 Constitution Drive, Menlo Park, CA 94025. An equal opportunity employer.

New GA holds first meeting

By Sam Cagle

The GA (General Assembly), the legislative arm of the Undergraduate Association (UA), held its first meeting of the 1981-82 academic year last night. Steve Earl '83 and Steve Librente '83 were elected GA representatives to the UA Finance Board.

GA President John E. DeRubes '83 initiated informal discussion of future goals for the GA. Among goals suggested include increasing communication between dormitories and fraternity houses.

There will be a meeting of MIT Students Against Registration and the Draft (SARD) Wednesday, October 14, at 7pm in Room 8-105, open to anyone interested in information or support.

Judy Norsigian and Pamela Morgan from the Boston Women's Health Book Collective will speak about the book Our Bodies, Ourselves, on Tuesday, October 13, at 7:30pm in McCormick Hall's Green Living Room.

The Red Cross has announced a very serious shortage of Type O blood. All potential donors are encouraged to call (800) 342-8748 or to contact the Red Cross at 99 Brookline Avenue, 536-6000.

On October 16 and 17 (from noon to 6pm) a "Monopoly Tournament" will be held to benefit the National Kidney Foundation of Massachusetts, at the "Leisure Time and Trade Show" at the Commonwealth Place Exhibition Hall. For reservations, entry passes and information call the Kidney Foundation at 426-3366.

You've burned the midnight oil and cracked more books than you care to remember. The work is done. The papers are in. So now you take a refresher course. The subject: ice cold Dos Equis beer. The Uncommon Import. Study a frosty glass. You'll learn it has a rich, amber color unlike any beer. Now test that big, bold flavor. You've got to admit, Dos Equis is in a class all by itself.

**Advanced R&D Careers**

The atmosphere at Fairchild's Advanced Research and Development Laboratory in Palo Alto, California, is charged with new ideas, new developments and new expansions. The Advanced R&D Laboratory is the force that will push Fairchild into worldwide technical leadership. The opportunity for you to play an important role in that push is very real. Nearly half of all our new technical staff will be MS and PhD graduates like you from major universities throughout the world.

**On-Campus Interviews Oct. 15 & 16**

Fairchild is committed to taking over the leadership position on the frontiers of electronics technology. As a member of our Advanced Research team, you can make it happen. Make an appointment to meet with Fairchild’s R&D representative at your Career Planning and Placement Center. Or write to:

Judges blank MIT; 4th shutout in 1981
By Martin Dickau
The men’s soccer team continued to struggle this season as it dropped a 2-0 decision to Brandeis Tuesday afternoon. Thejudges are currently ranked second in New England among Division III schools. Meanwhile, MIT’s record drops to 1-4-1. MIT managed to hold its own against Brandeis in the first half of the game thanks to the work of goalie Bob Schaeffer ’83. Schaeffer played a very strong game for the Engineers, coming up with eighteen saves as the Brandeis offense kept him busy.
Brandeis managed to get two goals in the second half, however, and that was all it needed to win. Once again MIT was plagued by a lack of offensive punch, a problem that has been hurting the team all season. In the six games they have played this season, the Engineers have been out scored 17-4 and have been shut out four times, including their last two games.
MIT will have to solve their problems quickly, however, because they are now in the middle of a tough five-road game trip.

Tomorrow Tech will travel to Lowell, a Division II school. The Engineers will then visit two Division I teams — Boston College on October 14, and Holy Cross on October 16 — before finally returning home on Wednesday, October 21 for a game against Tufts.

Field Hockey — The team continued their slide as they dropped two games this past week. Last Monday, they were edged by Gordon 1-0, and on Wednesday were shutout 4-0. With a record of 2-6, the Engineers’ next match is on Monday, October 12 against Fitchburg at Steinhrenner Stadium at 1pm.

Sailing — Two MIT sailors have performed exceptionally well in the past few weeks. Ruth Hef- ferman ’83 finished tenth out of thirty-two entrants in the New England Women’s Single-handed Sailing Championships last Sunday. Sailing coach Sue Nelson said afterwards, “She did a terrific job. I was very pleased with her performance.”

This weekend, MIT will be hosting the NEISA Single-handed Championships for men. MIT will be represented by Penn Edmonds ’83. Edmonds finished second out of fifteen entrants in his division earlier this fall at the elimination competition held at the Coast Guard Academy in New London, CT.

Cross Country — While most MIT students will be taking a breather over this four day weekend, the men’s and women’s cross country team will be getting ready for the Greater Boston Championships on Sunday afternoon at Franklin Park. The men have competed in this event before, but for the women, this is their first year. Men’s coach Calvin West and women’s coach Christoper Lane are optimistic about this important event.
