Gray meets with
Bush on aid cuts

By Jay Glass

Student financial aid cuts proposed in President Reagan's fiscal 1983 budget may be changed by Congressional action, according to Senator Paul E. Gray '54.

"It appears that the Congress is not inclined to let the budget proposals meet the President's [Reagan's] expectations," said Gray, speaking to a group of 70 graduating seniors and MIT alumni at an Alumni Association dinner in Gray's home.

Gray spoke with Massachusetts Senators Edward Kennedy and Paul Tsongas; several Congressmen; Presidential Science Adviser Robert S. Cooper, Director of Defense Advanced Research Project Agency (DARPA); and Vice-President George Bush in Washington last summer, according to Assistant to the President Walter L. Milne, who accompanied Gray. Among the issues discussed were federal constraints on academic freedom and the proposed student aid cuts, said Milne.

Commenting on the proposal, Gray said "I feel the way you do when your thesis proposal is two weeks overdue and two problem sets and a term paper are due. Sometimes I feel they should change the name of the office from President to Chief Lobby-fling," joked Gray.

Gray talked about the proposed aid cuts with everyone except Cooper, said Milne. "The Senator [Kennedy] and Dr. Gray talked about how we're trying to hold the line at no further aid cuts, said Katherine Higgins, a staff assistant to Senator Kennedy. "It looks like we will be successful, in our committee at least, in holding the line against cuts in any aid program. We have bipartisan support," continued Higgins.

"Senator Kennedy is the ranking minority member of the [Finance] tare and page 9

Grad house rents may rise

By Max Halperin

The Administration Housing Group, policy and planning committee, has proposed a substantial increase in graduate and married student rents.

The plan would increase rents to 90 percent of market value over a period of three years for single students and six years for married students. The administration proposed a 9.3 percent rent increase for Tang Hall, a 13.5 percent increase for Astoby and Eastgate, and 16.2 percent rent increase for Eastgate and Westgate. The Academic Council will consider the proposal on Tuesday, said Walter L. Milne, Assistant to the President.

According to the Administration Housing Group's proposal, the purpose of the rent increase is "to increase the availability of resources for graduate student housing," according to 17 percent of the student rent, the [Finance] tare and page 9

Draft registrant list no longer for public

By Stuart Gitlow

The Cambridge City Council decided Monday to remove the list of local draft registrants which had been hanging in the City Clerk's Office since the new draft registration began in 1980, according to Joseph Connarton, Cambridge City Clerk.

The council adopted a resolution co-sponsored by Cambridge Councilors Frank D'Urso and Sandra Graham; the list was removed on Tuesday morning. 

"Aiming for consideration of the long-term process of run down of government support," said Connarton, "the council decided on the opportunity to find friends and neighbors, and turn them in." Segal contended, "This is a case of the city of Cambridge saying 'forget it' to the government. "We're not going to take direction from the government."

Connarton confirmed this information and added, "It is my understanding that the local Post Offices still have the lists available."

AWOL's official position is that the registrant list was "maintained in order to give residents the opportunity to find friends and neighbors, and turn them in."

Segal said, "This business of promoting informants and publicizing dirty laundry was an invasion of privacy."
EC residents propose kitchens for dorms

(Continued from page 1) considered the possible health and sanitation problems. They've thought a lot of things through," said Sherwood. One of the students argued, "The administrators there seemed pretty interested," said Senior House President Stuart Brorson '83.

Further meetings between the student group and Dining Program administrators await the architectural firm's report, due in two weeks, said Watson. The firm's recommendations, together with the students' proposal, will probably be considered by the Academic Council. The Council will recommend one of the dining approaches to the MIT Corporation for final approval.

No matter which dining approach is selected, the kitchen and serving equipment in Walker must be overhauled or replaced, said Sherwood. "It will probably be necessary to do something in Walker, no matter what approach is adopted— the question is, what happens besides some sort of Walker renovation?"

Sherwood stressed that no change in West Campus dining options was envisioned. "The east side of campus has been under a temporary arrangement for two years— there's a unique situation, due to the age and the external nature of Walker," he said. "Any policy changes regarding the east campus won't change what we're committed to in west side dining," said Sherwood.

Should kitchens be chosen, the Dining Program office expects to lend aid to cooking students. Student-run kitchens would provide "lots of opportunities for workshops and seminars on shopping, student menu planning, nutrition, and other things," said Watson.

Graham to talk at Kresge

By Sam Cable

Christian evangelist Dr. Billy Graham will give a lecture in Kresge auditorium on the evening of April 28, according to Dr. Al- las Beeber, campus coordinator for Campus Crusade for Christ at MIT.

Graham's visit to MIT is part of a New England crusade April 12 to May 6, said Beeber. Graham will visit Harvard, Dartmouth, Yale, Northeastern, Amherst, and the University of Massachusetts as well as MIT. (continued on page 12)
Nation

The Environmental Protection Agency has approved the use of parathion by the Drug Enforcement Administration for eradication of marijuana crops. Individual states will make the final decision on the matter. The EPA has expressed concern about possible adverse health effects on potential smokers.

Surgeon General's report hits smoking — Dr. C. Everett Koop, Surgeon General, declared "Cigarette smoking is clearly identified as the chief preventable cause of death in our society." A new report from his office named additional cancers linked to smoking. The Tobacco Institute, an organization representing cigarette-manufacturers, claimed that "the question is still open."

Haig fears refugee flood — The United States could be faced with a high influx of refugees if revolutions in El Salvador and other Central American nations were not stopped. Secretary of State Alexander M. Haig Jr. told the nation's governors. Haig said that major economic aid is needed for the Caribbean region.

Williams testifies — Wayne B. Williams, accused of killing two children in last year's Atlanta child murders, claimed: "I'm innocent, and that's all there is to it." Williams told questioning prosecutors, "I'm about as guilty as you are."

Amish must pay tax — The US Supreme Court unanimously ruled that an Amish farming must pay Social Security taxes for his workers, even though he is opposed to taxation on religious grounds. Chief Justice Warren E. Burger wrote: "Because the broad public interest in maintaining a sound tax system is of such high order, religious belief in conflict with the payment of taxes affords no basis for raising the tax."

WABC musicradio will switch to all-talk format — "AM is finished for music," said the ABC official after WABC in New York announced it would switch from top forty contemporary music to a talk and news format. The station, the most popular in the country during the 1960's, has lost much of its audience to FM radio. The new format is expected to begin April 1. Dan Ingram, who has been a WABC disc jockey for over 20 years, and Ron Lundy, his sidekick since they both worked at St. Louis' WLAB in the late 1950's, will leave the flagship for ABC Enterprises, a new Superradio network, and a full-format adult contemporary broadcast.

Politics as usual?

Ronald Reagan's first year as President, coupled with the course of public policy he has decided to pursue, has reshaped the structure of contemporary American politics. Reagan has promised a re-creation of the New Deal tradition of labor and internationalist free traders—the Democratic Party has fallen from a position of electoral supremacy to one of official opposition in the legislative chambers. In the past several months, however, as the Administration's quixotic budgetary policy, continued support from and concessions to ultraregressive religious proponents, and its novel approach to foreign affairs, have become apparent to former unquestioning supporters as well as to always-cautious foes, several seeming paradoxes have appeared.

Who would have thought before Reagan took office that:

- Democratic and Republican Congressional leaders together would lobby business leaders or ordain the necessity of making Reagan accept an alternative budget proposal for fiscal year 1983. The Administration has suggested that savings for domestic programs, Social Security, food stamps, and other similar goals—be slashed, while taxes are also cut and the defense budget is increased. Even the Administration has predicted that the budget deficit for fiscal year 1983 will approach 100 billion dollars, the largest ever. Both liberal Democrats, who judge Reagan's decision to cut social spending to be inexcusable, and conservative Republicans, who consider deficits to be repugnant, have joined to tell the President that his budget is unacceptable. The honeymoon is over; legislators from both parties have indicated that this year's fiasco will not pass unchallenged.

- Jane Fonda and Barry Goldwater of Arizona would appear on the same stage, as they did last Monday night, in a paean to patriotism. Fonda delivered a short monologue declaring, "It's all right to wave the flag." Malny other other patriotic. Fonda delivered a short monologue declaring, "It's all right to wave the flag." Malny other

- the President of the "land of the free and the home of the brave," at a time of domestic recession accompanied by a policy of fiscal restraint, would propose to send 350 million dollars to the Caribbean. Reagan's Caribbean Aid Bill was designed by an Assistant Secretary of State to be televised sometime next month. 

- the President of the "land of the free and the home of the brave," at a time of domestic recession accompanied by a policy of fiscal restraint, would propose to send 350 million dollars to the Caribbean. Reagan's Caribbean Aid Bill was designed by an Assistant Secretary of State to be televised sometime next month.

It may indeed be true that politics makes strange bedfellows, but these incidents do not indicate that a pattern different from politics as usual is occurring. Reagan's victory conclusively destroyed the old New Deal alliance, but no new long-term political coalition has replaced the predecessor.

By Mark Templer

Ronald Reagan has spent his political career decrieing waste, fraud, and abuse in government programs. His Administration has repeatedly cited anecdotal evidence of inefficiency in defense. It has argued, correctly, that U.S. military superiority, temporarily weakened, must be restored. Likewise, it has confronted defects by asserting, "It's all right to wave the flag." Malny other

There can be little doubt that there is waste in military spending. Even David Stockman has observed, "I think there's a kind of swamp of people you have to go through..." If you take the top 10 to 20 to 30 billion dollars worth of Defense Department waste that can be ferreted out if you really push hard.

For starters, Congress should ask whether it is appropriate to spend 4.5 billion dollars next year on the MX missile, a first-strike nuclear weapon that will only bring the world closer to Armageddon. Additional savings could result from reexamination of the B-1 bomber, the 1983 budget contains 5 billion dollars for this expensive plane that will be obsolete by the time it is completed.

For starters, Congress should ask whether it is appropriate to spend 4.5 billion dollars next year on the MX missile, a first-strike nuclear weapon that will only bring the world closer to Armageddon. Additional savings could result from reexamination of the B-1 bomber, the 1983 budget contains 5 billion dollars for this expensive plane that will be obsolete by the time it is completed.

The U.S. economy compared to international standards is definitely average, given the decay of the American military. The U.S. armed forces must be upgraded, throwing money at the Pentagon will not improve military readiness and decrease national security any more than pouring resources into new military technology. The government cannot afford to be profligate with taxpayer dollars in times of huge budget deficits. The military budget must be scrutinized for possible savings.

The budget deficit for fiscal year 1983 will approach 100 billion dollars, the largest ever. Both liberal Democrats, who judge Reagan's decision to cut social spending to be inexcusable, and conservative Republicans, who consider deficits to be repugnant, have joined to tell the President that his budget is unacceptable. The honeymoon is over; legislators from both parties have indicated that this year's fiasco will not pass unchallenged.

Defense budget is wasteful

By Mark Templer

Ronald Reagan has spent his political career decrieing waste, fraud, and abuse in government programs. His Administration has repeatedly cited anecdotal evidence of inefficiency in defense. It has argued, correctly, that U.S. military superiority, temporarily weakened, must be restored. Likewise, it has confronted defects by asserting, "It's all right to wave the flag." Malny other

...and "It's a very difficult situation" were his obviously well rehearsed equivalents. When asked outright if he thought the U.S. economy would recover even if the government were to adopt his ideas, he replied, "...well I'm an intellectual pessimist and an emotional optimist..." His paraphrase of that statement implies, "If I rely on my intellectual to guide me then I don't think my ideas will work, but if I rely on hope that they will work then they will." What the hell is that supposed to mean?

While I was glad to see that Thourow didn't fall into the trap of endless criticism of Stockman, so many pop media economists do, he still implied that Stockman wasn't doing his job. But when a fellow Professor asked "What do we want (Washington) should turn to improve things." Thourow concurred that Washington could ac...
Science funds paced (Continued from page 1)

research, would receive a two percent increase in basic research funding. The budget for NH's other areas, such as clinical programs, would be increased four percent.

The number of research training financed by NSF and NIH is being cut. From 970 in fiscal 1982 to a proposed 890 in 1983

NASA's budget would increase 12 percent, with the space shuttle the major beneficiary. The space telescope and the Jupiter-orbiting Galileo satellite are also funded.

De Monchaux was concerned about the proposed space shuttle, noting that much of the increase in engineering funding is earmarked for applied research. "Our biggest concern is what (the shifts) will do to basic research," he said, adding that decreased basic research would "damage both future applied research and current educational capabilities of future researchers."

The School of Engineering itself, said Quivey, would not be "seriously harmed." "There has been a shift in Engineering for several years toward the private sector," he said, "and the theory that a broad base of support in both the public and private sectors is necessary for top-notch education will pay off."

Humanities funds cut (Continued from page 1)

(NSF) funds social sciences, which are budgeted in the same category as economics. The Reagan Administration would cut both one percent. Few programs would be dropped entirely; instead they would receive smaller grants.

The MIT program hardest hit may be Linguistics, said Hanham. A number of student training grants, funded by the National Institute for Mental Health, a number of NIH, will expire this year. If NIH's budget is cut, the grants may be eliminated. The Institute is considering proposals for projects funded according to Hanham. SOD is interested in computer languages research.

The chief problem for MIT, said Hanham, will be the proposed student financial aid cuts. He declined to predict long-term results if the cuts take effect, but noted that even without financial aid, students try to avoid MIT because an Institute degree is valuable in the job market.

Financial aid cuts are also a major concern for Dean of Arts and Planning John de Monchaux. Besides eliminating graduate student loans, the proposed 1983 budget would reduce the Work Study program and would eliminate an intern program noted by the Department of Housing and Urban Development.

Humanities funds cut (Continued from page 1)

The Administration's withdrawal from what Reagan sees as private concerns would affect projects funded by agencies such as HUD, DOE, and the Health and Human Services Department.

The schools are short-term, and when they expire, there may not be successors.

De Monchaux was also concerned that the job prospects for graduates, especially in the Urban Studies and Planning department, may worsen if current trends continue. Currently many graduates of the department take government jobs, others go into academia. If the Administration's cuts do not affect professional education, both agencies and universities may cut back hiring.

If you want to be an engineer or computing star, see your placement office today.

Lockheed-California Company will conduct interviews on campus, MARCH 4. A film presentation on Lockheed's SR-71 "Blackbird" will be given that evening at 7:00 P.M. in Room 4-159. See your placement office for details.
Productivity has declined in US

By Tony Zamparutti

The United States economy is dying a "death by a thousand cuts" and there are no easy solutions to our economic problems, Lester C. Thurow, Economics Professor, warned a packed audience in 10-250 Tuesday evening.

The decline in productivity is a major manifestation of American economic problems, Thurow claimed in his lecture entitled "Restoring American Productivity," and sponsored by The Office of the Dean for Student Affairs and the Lecture Series Committee.

"We need to do terribly painful things," said Thurow.

"To achieve an increase in productivity and ensure economic recovery we will require a "thousand bandages," said Thurow, because no one solution is enough. After many years of supremacy, Americans have become complacent about economic problems. "We have slow economic rot," explained Thurow. "I think the best thing we've got going for us are the Japanese... We need a Japanese Sputnik" to energize American action.

When asked if the United States could recover from what he considered the beginning of a long-term decline, Thurow replied: "I'm an intellectual pessimist and an emotional optimist. If you ask me that question on an intellectual level, we will not pull it out. If you ask that on an emotional level, we might."

"What we do not really understand yet is that we have been passed by other countries" in productivity and economic health, he noted.

Thurow listed a number of reasons why America's productivity is falling, such as the movement of workers from industry to service jobs and the need for additional business investment.

Too many Americans work in management, law, and other service areas, claimed Thurow. In Japan, there is one manager or supervisor for every 200 assembly line workers. In the United States, there is one for every ten workers.

Americans do not save enough of their incomes, and industry does not invest enough capital, Thurow said. Investment needs to rise to 30 percent of the gross national product for a proper recovery. "That is precisely where Reaganomics will fail," noted Thurow.

"This [change] is not going to be done in Washington... It has to be the individual level," said Thurow. "We all want to hear a solution... As long as the leader of the country says we've got an easy way out, people are going to listen," until his way is proven ineffective.

TECHNIQUE
the yearbook of MIT
W20.451 x3-2980
Today marks the debut of a weekly feature about independent, punk, import, and non-mainstream music. Although this slot will usually be devoted to reviews, occasional biographies or interviews will appear about musicians of particular interest. This week’s feature combines biography with review and discusses an important and (ignorantly) unheralded band: Siouxsie and the Banshees.

Once Upon a Time/The Singles, Siouxsie and the Banshees on PVC Records.

On September 20, 1976, Siouxsie and the Banshees played their first gig at the 100 Club Punk Festival in London, supporting Sex Pistols, Clash, and the Subway Sect. Siouxsie (then just plain Suzie) was backed by guitarist Marco (now with Adam and the Ants), drummer Sid Vicious (previous to his stint as Sex Pistols bassist), and bassist Steve Severin (then Steve Hervy). After one evening’s worth of rehearsal, the Banshees tore through a twenty-minute medley that included “Suede Shoes” and ended with The Lord’s Prayer.

Soon afterward the Sex Pistols became infamous for launching into a swirling fiend while being interviewed on national TV. The cause for their outrage was the interviewers’ attempt to get a Pistols fan to say something controversial. That typical fan was Siouxsie—chosen because of her striking appearance. These two spontaneous appearances brought Siouxsie and the Banshees into the public eye, a position they have occupied ever since. In England. Here in the States, the Banshees suffered in obscurity, known only to the growing body of punks and weirdos. The band’s first two albums, The Scream, (voted Best Debut Album of 1978 in the UK) and Ju Ju Hands, were available only as imports (on Polydor Records), and received minimal airplay despite the presence of some excellent singles. The situation changed last year, however, when the Banshees made their first tour of America, an event which prompted PVC Records to release the two most recent Siouxsie albums (Kaleidoscope and Julia).

The most recent release, Once Upon a Time/The Singles, is that rarest of creatures—the “greatest hits” compilation that is also a “best” of collection. (“Greatest hits” is arguable—none of these singles have ever seen the light of an American chart, though they have all sold exceptionally well in Britain.) Collections of this sort serve two purposes: they are perfect introductions to a band’s music, and they provide a means of assessing the band’s progress and maturity.

The Singles is organized chronologically, with the group’s punk phase represented by side one and the art phase represented by side two; the sides also represent the first two albums, which were released in a Void,“ showed the band struggling too hard to maintain a harsh intensity, at the same time suffering from hastily produced material. However, the Banshees still sounded like no one else—except the early Banshees.

In 1979 McKay and Morris departed, and were replaced by guitarist John McGeough (from Magazine and Visage) and drummer Budgie (arguably the finest art/punk drummer). With the new lineup the Banshees recorded the pioneering Kaleidoscope and entered the realm of art-rock. The singles show the potential of a revitalized band—Siouxsie’s famous banshee wail was more controlled, her vocals more assured yet retaining their early power. McGeough’s effect on the music was drastic—keyboards were added to the sound palate, the arrangements became more experimental. Listen to “Christine”—the bass carries the chord sequence and McGeough adds accents on acoustic guitar.

Nothing from Kaleidoscope could prepare the listener for the trio of singles from the most recent album, Julo. This disc, which was included on almost every “year’s best” list, is the work of a mature, innovative group. “Isold” (originally a bonus single included with the album) is Siouxsie’s first overtly political statement: “Now hidden in disguise—cheap wrapping of lies/Keep your heart alive with a song from inside/Even though we’re all alone...” “Arabian Knights” is more meditative, with a plaintive vocal and lovely treated guitar work. The tour de force remains “Spellbound,” a piece that recondenses all the rage and intensity of the early Banshees. The song’s tense, electric buildup creates a feeling of supernatural power that is reinforced by Siouxsie’s hollow vocal and mysterious lyric.

Once Upon a Time/The Singles is highly recommended to those curious about the Banshees and to the long-time fan who might have missed some of the (now unavailable) landmark singles. Siouxsie and the Banshees managed to survive the collapse of the punk culture, maintaining their piercing convictions and innovative musical descriptions of the outerreal. They are now in the position to become musical innovators.

By Heather Presnall

"This is the third time representatives of the Unification Church have tried to make the MIT campus their headquarters," said Randolph, Associate Dean for Student Affairs. "They have been asked by the Dean's office not to contact students or solicit students on MIT property, that if they contact students elsewhere that they not ask them about membership in the Church. When they have been found making contact on the Student Center, they have been asked to leave by the Campus Police.

A recent decision handed down by the United States District Court held MIT's policy of forbidding soliciting on Institute property without prior permission from the Dean for Student Affairs office. The Unification Church's campus-outreach organization, the Collegiate Association for the Research of Principles (CARP), has been subject to much attention from the Institute administration since last fall.

Commenting on the Unification Church representatives' distribution of their newspaper, The World Student Times, in Lobby 7 and the Student Center, Randolph contended, "We obviously can't stop that. The Scientologists do the same thing. Our office does not patrol out here. If there are more complaints made to the Dean's office in the last two weeks by students who were approached in the Student Center, the Campus Police has been called three times to remove soliciting CARP members.

"They've shown up sporadically for one- or two-day efforts, usually at this time of year. But this time it seems to be a more permanent presence," commented Campus Police Chief James T. Olivier. In keeping with Institute policy, the Campus Police has asked the CARP members to leave MIT property, and informed them that they may operate from the public areas such as the Massachusetts Avenue sidewalk.

"There's no friction; they understand and move off. We always smile at them." Olivier explained how the Cambridge District Court's decision on the Coop trespassing case would affect future policy toward the CARP members' appearances in Lobby 7 and the Student Center. "We will inform them with a trespass notice the second time. Once we've verbally given them that trespass notice, further violations will place them in the position of being subject to arrest." Olivier indicated that upon future contact, the offending CARP member(s) would be given trespass notice.

Since the controversy springs from CARP's status as a non-student group, CARP members stationed in the BU Student Center discussed that status. "We have one MIT student, a freshman; he entered the Church last month," explained one of the CARP spokespersons. They were adamant about their current position relative to MIT's policies, and denied having tried to gain recognition as an official student activity, their lack of student support making that status unattainable. If the group were to become a student activity or if an MIT student was discovered soliciting for CARP, "He would be asked if he had screened his effort through the DSA office. The DSA helps to determine the use of space at MIT, who may solicit, etcetera. It's a matter of judicial control," explained Olivier.

Although there is currently one student member of the Unification Church on campus, there was another who graduated in December, J. Andrew Combs. Neither of these students have engaged in the kind of public leafletting carried out by the non-MIT CARP members. Combs, a nuclear engineering graduate student who was for several years the only member of the Unification Church at MIT, gave talks on "The Divine Principle of Rev. Sun Myung Moon" as an IAP activity two years ago. According to his office notes, he was not active in recruitment on campus at other times.

This year, according to Randolph, members of the CARP group "were going to IAP meetings and contacting people at these meetings," suggesting that they continue their conversations over lunch or dinner. Olivier also recalled that the CARP members had been "reported in the buildings and dining halls, not handing out papers, but talking to people," and commented that the Campus Police has no authority to prevent the Church representatives from approaching MIT students verbally, unless an approached student complains that he or she is being disturbed.

When the party is BYOB (Bring Your Own Brush), you find out who your friends are.

Friends aren't hard to find when you're out to share a good time. But the crowd sure thins out when there's work to do. And the ones who stick around deserve something special. Tonight, let it be Löwenbräu.

Löwenbräu. Here's to good friends.
If you want someone to help you stop smoking cigarettes, contact your American Cancer Society.
The MIT varsity rifle team had a long weekend of shooting at Norwich Academy in Vermont. The Engineers shot in the New England College Rifle League finals on Friday. The team scored a 2113 out of a possible 2400 and was led by Cliff Eskey '85 with a 561, followed by Greg Buliavac '83 with a 549 and Bob Cooley '85 with a 525. Other shooters at the match were Adrian Wang '85 and Danny Orange '85.

MIT's score—the high for the year—was bested by scores posted by Dartmouth, Coast Guard, and UMaine, and topped scores with a record of 7-10, good enough for fourth place in the league.

The squad also shot in the NRA Collegiate sectionals in air rifle and small bore held over the weekend. Eskey captured the gold with a career-high 377 out of 400. Captain Greg Buliavac followed with a 355. Felixa Goldenberg '85, after having shot for only four weeks prior to the competition, gave the team a pleasant surprise by shooting a 318. Bob Cooley followed closely with a 313. The air rifle squad finished second out of five teams.

In the small bore sectionals, Eskey again copped the gold with a score of 237 out of 240. Captain Greg Buliavac followed with a 221. Bob Cooley followed closely with a 213. The air rifle squad finished second out of five teams.

In the small bore sectionals, Eskey again copped the gold with a score of 237 out of 240. Captain Greg Buliavac followed with a 221. Bob Cooley followed closely with a 213. The air rifle squad finished second out of five teams.

E-Systems continues the tradition of the world's great problem solvers.

Even given the benefit of historical perspective, it is difficult to fully comprehend the enormous contributions to man's knowledge made by Sir Isaac Newton. His Philosophiae Naturalis Principia Mathematica is termed by many authorities to be one of the most important single works in the history of modern science. His studies of light are the foundation of physical optics and his laws of motion provided a quantitative description of all principal phenomena in our solar system.

Today, scientists and engineers at E-Systems employ Newtonian principles to develop products and systems for satellite communications, exploring space and the development of solar energy, systems which are the first of a kind. E-Systems engineers are recognized worldwide for their ability to solve problems in the areas of antennas, communications, data acquisition, processing, storage and retrieval systems and other systems applications for intelligence and reconnaissance.

For a reprint of the Newton illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah, and Virginia, write: Dr. Lloyd K. Lauderdale, Vice President Research and Engineering, E-Systems, Inc., Corporate Headquarters, P.O. Box 226030, Dallas, Texas 75266.

**Thinkin’ warm thoughts on a wintry night...**

A few thoughts as the long winter season winds down.

The indoor track team deserves a lot of praise for its best season ever. Coach Gordon Kelly’s group is obviously talented and dedicated, and epitomizes the word “work.” Although guys like Martin Taylor and Paul Neve got a lot of the ink, the 10-0 record and showing in the New England Division III meet has to be attributed to effort all down the line. The squad’s performance proves that MIT athletics are not “losers.”

On the controversy with Tufts: just a case of simple human error. In the rush to provide participation points and fans with up-to-date info, an oversight was made. That same day, a similar error was made at the Big East track championships in Syracuse, New York when Villanova was credited with twice as many points as it should have in an event. The corrected score was Seton Hall 109, Villanova 108. The team found out about the error just as it was leaving the Carrier Dome, with the little trophy in hand.

My gut feeling on the issue: MIT has the stronger case. Whichever way the decision of the Games Committee turns out, the Tufts-MIT track rivalry has become one of the best in New England, and to let a dispute over two points spoil it would be a shame.

On the ice: Who needs Wayne Gretzky? MIT has one of its own in Tom Michalek. The grad student from Dearborn, Michigan, who was the captain of Notre Dame’s varsity hockey team, has 43 goals in 14 games in leading the Beavers to a 10-4 record. Watching Michalek play is like watching a man play among boys.

Dame’s varsity hockey team, has seen its seven in a row Wednesday night, the victim being Nichols by a score of 5-2. Five different players scored for MIT, with sophomore Paul Dinnaple and Harvey Stenger each contributing a goal and two assists. MIT broke open a 2-2 game with three tallies in the final minute of play. MIT closes the season at home tonight against the University of Rochester. Game time is 7pm.

**Fencing** — Both men’s and women’s squads rebounded from losses this weekend at the expense of Brown. Tuesday in Providence, the men’s team conquered the Bears by a 14-9 score, and the women won easily, the count being 12-4. The pair of teams had matches at Southeastern Massachusetts last night, and the women traveled to New York to face Fairleigh-Dickinson tomorrow.

Also, Tuesday night, the women’s basketball team ended its season on a losing note, falling 69-45 to Babson. Events this weekend featuring MIT teams include the New England track championships at Boston University, intercollegiate pistol sectional here at MIT Saturday morning, and the New England women’s swim championships through Sunday at UMass-Boston.
