City ballot will have nuke ban question

By Harold Stern
Seven MIT undergraduates have told the Student Financial Aid Office they refuse to register for the draft, and 170 students...

Edgerton print is stolen

By Butt S. Kalilah
Vandals broke into the new EG&G Building (Building 34) late Thursday night or early Friday morning and stole a large, framed print of the famous bulle
day morning and notified Campus Police, according to Chief James Oliveri. The print was last seen in the first-floor lecture hall, room 34-101, Thursday afternoon.
The vandals also damaged the revolving door at the Vassar Street entrance to the building, and moved, but did not damage, an audio-visual control unit attached to the podium in the lecture hall, Oliveri said.
Although construction is not yet complete, MIT is already using the building and is responsible for it, he said.
Campus Police is "making an effort" to recover the lost picture, Oliveri said. The Edgerton prints were newly made and specially framed for the lecture hall.
Edgerton's company, EG&G, donated nearly $5 million for construction of the building to be used by the Electrical Engineering and Computer Science department.
The vandals wrote in the basement of the building the word "tamb," a phrase similar to "tambourine," according to Campus Buildings 13 and 10, Oliveri said.
"Hackers," probably MIT students, were responsible for the theft and vandalism, he said.
Some hackers "do it in a controlled fashion," Oliveri said, "but unfortunately... some spoil it for others.
Campus Police also reported a 50-pound raccoon seen in the lobby of Building 22 yesterday morning. The animal ran into Building 19 and was later seen in the library.

Many jobs for student employees

By Andrew Bein
There is currently a plentiful supply of both on-campus and off-campus jobs, about 200 is all, available to MIT students, according to Jace D. Smith, director of student employment.
The Student Employment Office, part of the Student Financial Aid Office, lists the jobs for the available as of Thursday.
Technical jobs, usually dealing with computer programming, have openings off campus, and 10 on campus.
The Student Financial Aid Office provides 65 hours of student employment per week, Smith said.
Smith, formerly assistant director of student employment, succeeded Lucy M. V. Dinin as director of student employment two years ago. The office now has 26 clerical jobs.

The MIT Libraries increased overdue book fines to 10 cents per day, said Lucker. "Most of the academic libraries in the area have increased the fines to this level," he said.
A tech survey, however, shows books are most frequently taken from several libraries in the area. The Boston Public Library charges five cents per day; Boston University charges 15 cents per day; and Wellesley College charges five cents per day.
Harvard University charges a fine of $5 for materials returned after the due date. About two weeks later, the fine increases to $5 with a second mailing, and the university uses a system similar to Harvard's, with comparable fees.
"It's an avoidable cost," Lucker noted, explaining that people returning books on time will benefit from the increases.
Faculty members and students alike will be charged the overdue fines, Lucker said.

By Ron Norman
The MIT Libraries increased fines and fees by up to 100 percent July 1 to pay for administrative and maintenance costs. The library also introduced an audio-visual control unit at

Tech photo by Michael Reiter
MIT's quarterback, Dave Broecker G. slips by Stonehill's Kevin Kishardt to score the Engineers new touchdown last Saturday.

The Tech will hold an open meeting Sunday for all members of the Institute community interested in participating in MIT's oldest and largest campus newspaper.
The Tech has openings for news, arts and sports writers, columnists, caricaturists, cartoonists, opinion columnists, graphic artists, cartoonists, production workers, photographers and advertising staff.
The meeting will commence at 6:00 p.m. in The Tech's offices in the Student Center, room W2-403. Pizza and refreshments will be served. Current staff members unable to attend should contact their departmental editors before Sunday.
Lectures

The Cambridge Institute for the Arts and Sciences announces its Fall Lecture Series. First speaker, Dr. Steven Benton, "Holography and 3-D Imagery." Lecture ($4) 8pm, Fri., Sept. 2; Workshop ($5) 10:30-1 Sat. Sept. 24. Future speakers: Roe Adams (Computer Games), Ernst Haas (Photography), Stan Vanderbeek (Video), others.

Off-Campus

Rabbi Dan Shevitz, Hillel director and Jewish chaplain at MIT, will be teaching a course on "The Talmudic Roots of Jewish Mysticism" as part of the Continuing Education Program at Hebrew College in Brookline. Rabbi Shevitz, who has taught at the Jewish Theological Seminary and at Emmanuel College, Cambridge, MA 02139. (The next edition will be available in early 1984, at which time you are invited to order a copy.)

City puts nuclear ban in hands of residents

The MIT Union of Jewish Students offers radio communications assistance to any MIT event free of charge. If you or your group are interested, contact Richard D. Thomas, room 2W-401, or call 354-8262 for details.

The 23rd edition of Serials in the MIT Libraries is now available. This microfiche listing (published semiannually) of approximately 20,000 titles includes information on holdings, dates, call numbers, and title changes. The 23rd edition contains 675 new titles (484 alterations). Prepayment is required. The price is $10.00; for MIT staff and students, $3.00. To order send check payable to Massachusetts Institute of Technology, to: Office of the Director, Serials in the MIT Libraries, Cambridge, MA 02139. (The next edition will be available in early Spring 1984, at which time you will be notified.)

The MIT U.H.F. Repeater Association offers radio communications assistance to any MIT event free of charge. If you or your group are interested, contact Richard D. Thomas, room 2W-401, or call 354-8262 for details.

"They will start making new weapons," Vellucci said, "the Russians will start making new weapons. I vote to place the petition on the ballot," he said.

"Let's not make the debate something it's not," said Councilor David E. Sullivan '74. "The issue is whether the city council is going to do its duty and put the proposal on the ballot," Sullivan voted to put the petition on the ballot.

Announcements

The MIT European Club announces an orientation meeting in the Faculty Club Penthouse, building E32 (Massachusetts Institute of Technology), on Thursday, September 22 at 6pm. Refreshments will be provided.

The Tech Tuesday, September 20, 1983

Marcos foe resigns from assembly — Filipino opposition leader Salvador H. Laurel, head of a 12-party coalition, resigned from the National Assembly, charging that the "raffish government" of President Ferdinand Marcos has been ineffectual in dealing with corruption, land distribution and other national needs. Laurel also accused the government of complicity in the Aug. 23 assassination of opposition leader Benigno S. Aquino and questioned the credibility of a five-member commission appointed by Marcos to investigate the killing.

Soviets cancel Gromyko visit to United Nations — Kremlin officials cancelled the annual visit of Foreign Minister Andrei A. Gromyko to the United Nations General Assembly and accused the United States of violating "generally recognized international norms" by refusing to ensure his safe passage. The Soviet news agency Tass said a Soviet delegation would attend the meeting without Gromyko. The Soviet action is a response to a refusal by the governors of New York and New Jersey to allow Gromyko's plane to land at governor's airports in an effort to gain control of a key position in the Shouf Mountains.

Lebanese fighting escalates — The Lebanese civil war widened as Syrian-backed Moslem Druse militia opened a new front against the Lebanese Army. Druse guerrilla fighters attacked Druse positions in an effort to gain control of a key position in the Shouf Mountains above Beirut, and thereby split the Druse forces. Libyan leader Col. Muammar Khadafy has put his troops at the disposal of the Druse and the Syrians and Yasser Arafat, leader of the Palestine Liberation Organization, confirmed that PLO guerrillas are fighting alongside the Druse in the mountains.

Nation

SAT scores hold steady — The average combined score of the nation's high school seniors on the Scholastic Aptitude Test was the same as last year's, strengthening hopes that SAT scores hold steady.

Local

Cardinal Medeiros dies after heart operation — Humberto Cardinal Medeiros, the archbishop of Boston, died of a heart attack in 1970 and was a staunch opponent of liberal Aptitude Test was the same as last year's, strengthening hopes that SAT scores hold steady.

Weather

Here today, gone tomorrow — The mercury may climb to record heights today as the temperature approaches 90 degrees under mostly sunny skies. Breezy tonight with a low in the upper 60s. Showers, and maybe some thunderstorms, move into the area tomorrow, with a high near 80 degrees. Those showers should bring cooler weather for the rest of the week.

To the Editor:
I've been robbed; they say I'm likely to blame myself and they're right. Why did I go to The Coop Saturday afternoon and ignore the pang that ripped through me when I left my backpack like a good little girl on the bookshelf? My parents are of no great interest but my backpack is essential. I wear it like a kangaroo's pouch. And having it disappear is more than I can bear silently.

The only solution to blaming myself is to blame someone else. So I'll blame The Coop. I shop there even though they are over-priced, because I don't know any other place to get what I need for school. And I just casually assumed that the procedure of placing one's possessions in the public domain was regular and therefore non-fatal. But I was wrong. My theory is being modified by more nonsense, such as law. The Coop has so far accepted no responsibility for my loss. Maybe the Coop has so far accepted no responsibility for my loss. Maybe before the solar system collapses the Coop will protest property when it takes it. In the meantime I'll have to assume that anything I expose on the shelves has a significant probability of disappearing.

Challenges LSC claim

To the Editor:

On Tuesday, Sept. 13, I resigned from my position on the Executive Committee of LSC. One of the major reasons for my resignation was my displeasure with the way the Classics Movie Series was handled for the fall term. In a slide presented to the audience at the registration day movie, the chairman publicized his statement from earlier this summer that "no qualified person could be found" to hold the position of Classics Director, the person responsible for choosing and running the series of classics films. The absurdity of this claim is obvious when one considers the fact that one of the four candidates for the position had successfully held that very same position just one year earlier.

The MIT administration has entrusted LSC with a monopoly and the privilege to provide a diverse entertainment program to the MIT community. In view of LSC's mishandling of the Classics Series, we must begin to wonder whether LSC is able to handle the responsibilities which it has assumed.

Editorials, marked as such and printed in a distinctive format, represent the official opinion of The Tech. They are written by the Editorial Board, which consists of the chairman, editor in chief, managing editor, executive editor, and news editors. Columns are usually written by members of The Tech staff and represent the opinion of the author, and not necessarily that of the newspaper. Letters to the Editor are written by members of the MIT community and represent the opinion of the writer. All submissions should be typed, double spaced, on a 57-character line and bear the author's signatures. Unsigned letters will not be printed, but author's names may be withheld upon request. The Tech reserves the right to edit or condense all letters.

Opinion

Hef's Sexodarlings exposed

(Continued from page 4)

Editors at Playboy have no moral qualms, Wetter said. 'They just made it a deal. If we're lucky, we won't have to face the moral issues.' Wetter added. 'We just focus on the science of it. You concentrate on the wins. You say to yourself: 'Well, this is neat. It works!'

There is a dark side to the Playboy empire, however. 'We remember Dorothy Stratton, the playmate who got killed.' Wetter added. 'Well, what nobody outside Playboy knows is that Hef ordered it.' Stratton was Hef's favorite playmate of all time. He built her a fire hose house with a speciaI library on the top floor. Stratton repaid Hef's generosity by inviting university students from many countries to sleep with her. The rumors about for- eign graduate students living in Stratton's fifth floor library were true. 'When Hef found out,' Wetter said, 'he had her killed.'

These people at Playboy are unlike most of us. They are not terrorized by the beautiful wom- en who run our social lives. In fact, they like them, can fool with them, can do them and undo them, can make them play soft- ball on the field orhardtball on the sofa.

And I thought of that all the pornography magazines in America right now. When you can't find the cabled seat; by the flashligh under the covers or by the unhesi- ant bulb in the bathroom, a whole country of teenage boys is learning what it means to be a woman. And what it means to be a woman is not from Hugh Hefner. All Playboy has to do is just wait for these kids to get up the nerve to find out what the girls of the At- lantic Coast Conference really look like.

E-Systems continues the tradition of the world's greatest problem solvers.

Unquestionably, Leonardo da Vinci possessed one of the world's greatest minds. Not only renowned as a painter and sculp- tor, da Vinci also applied his exceptional talent. To the me- chanics of flight mechanics as the basis for major modifications to aircraft, expanding cartography to encompass highly sophisticated guidance and com- mand and control systems, and designed and built a sys- tem that greatly expands man's ability to study the universe. Today, scientists and engi- neers at E-Systems continue the tradition by expanding the applica- tion of advanced technology. E-Systems uses the principles of flight mechanics as the basis for major modifications to aircraft, expanding cartography to encompass highly...
Davies was called, not chosen

Chosen People, Dave Davies on Warner Bros.

If you are, for some reason, forced to think about the phrase "rock music," your mind will probably dredge up some dusty, archetypical image of blazing guitars, corny melodies, and dramatic drum rolls. This image mercifully stays in the backs of our minds most of the time, but it is kept alive by the likes of bubble-gum commercials, high school garage bands, and TV sitcoms featuring "typical teens." Dave Davies' latest solo album seems to slide neatly into this image, and doesn't suggest at any point the imagination or desire to rise above it.

It's sad that Davies' album evidences so little lyrical or musical originality. As lead guitarist for the Kinks, he has been an important and influential figure in rock since the early Sixties, and is a major inspiration for many of today's guitarists. Although he may be a skilled guitarist -- probably one of the most underrated in the business -- his songwriting abilities are inferior, and the album suffers for this.

Davies' guitar work is, as always, slick and fluid, and he conjures some lush textures in his mixes of acoustic and electric guitar and synthesizer. As the album progresses, however, it becomes evident that Davies is reluctant to take chances in musical content, production or arrangement. His songs reveal themselves as little more than forced and gratuitous chord progressions with melodies superimposed on top of them. Songs like "Charity," "Take One More Chance," and "Master of Decision" sound as if they were the result of a hurried jam session lacking in forethought or inspiration. The real crime, though, is that except for the odd embellishment here and there, Davies doesn't contribute a single guitar solo; the very thing that would liven up the proceedings.

Chosen People reaches its nadir in the lyrics department. It seems Dave has recently become interested in matters spiritual, but communicates none of his new insights to us in his singing, choosing instead to rely on banalities. In "Freedom Line," he cries, "Give us freedom. A call to the brave and the strong. To stand in the face of all wrong. And show the way." Or in "Charity," "With your house and your car. Yes I know who you are. Can you not hear the word that is plain. Trying to call to you..."

The album contains a full thirteen songs, not all of them are losers. There are a few good rockers, such as "Mean Disposition," "Danger Zone," and "Fire Burning." They are especially satisfying if you are of the opinion that the Kinks' music has been a little thin-blooded lately. A great many records today fall quickly into obscurity soon after they're released, destined for a quick trip to the discount rack and the cutout bins. As a member of one of the most accomplished bands in rock history, a Dave Davies solo album should be a special treat and an interesting departure in the continuing Kinks kronikles. Sadly, Chosen People falls -- most depressingly -- into the former category.

Steve Huntley

The Harvard Square Cinema also continues its International Directors' Festival with a pair of world premieres: French pianist Daniel Trifonoff's "Voix des Savants," featuring composer Louis Vierne, and French pianist Pierre Édouard's "Vive le Printemps!" The latter will be screened daily at 11 a.m. and 3 p.m. through September 20.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions – more powerful functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately than the TI-55-II because it’s preprogrammed to perform complex calculations – like definite integrals, linear regression and hyperbolas – at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included in the Calculator Decision-Making Sourcebook it makes the process of using the TI-55-II even simpler, and shows you how to use all the power of the calculator. Get to the answers faster.

Let a TI-55-II show you how.

Football club drops season opener 20-7

By Martin Dickau

Two long touchdown passes—one a 5-yard catch and a 57-yarder—and a ball-spotting judgment that left the Engineers one inch short of a crucial first down combined to give the visiting Stonehill Chieftains a 20-7 victory over MIT Saturday afternoon.

The low football clubs hosted to a standstill in the opening quarter, with the offensive edge going to MIT. The Engineers had an opportunity to get on the board first when Mike Thompson G recovered a Stonehill fumble on the Chieftains' 18-yard line.

MIT traded but a scant five yards in three plays and opted to try a field goal on the opening play of the second quarter. Graduate student Tom Plattings was wide, and the score remained knotted at 0.

Stonehill scored just slightly three minutes before the half when quarterback Chris Day connected with halfback Richard Fitzmaurice, wide open in the inexperienced MIIT secondary, on a 52-yard touchdown pass.

Frank Noon's kickoff was on the end zone three plays later with just 50 seconds remaining on the clock. MIT's Larry Moore G blocked the extra point attempt, but the visitors went into the locker room with a 13-0 lead.

The Engineers started the third quarter with a 28-yard kick-off return by Jim Bittman '85 to his own 40. MIT's defense toughened, however, and a Rich-ard Rice '85 sack had the visitors facing fourth and nine on the 43. The punt was a fake, and Day threw a 37-yard touchdown pass to Kisthardt. The extra point was good, and the home team was down 20-0.

The Engineers seemed to have another golden opportunity handed to them in the fourth quarter when Mike Anziano G pounced on a fumble on the Stonehill 36. MIT advanced to the five and, going on fourth and one, had the ball spotted one inch short of a first down, giving Stonehill possession.

MIT's only score came late in the final period. The Engineers began the drive on their own 40 and received some assistance when, Stonehill's Bill Pitts was called for defensive pass interference when Engineer quarterback Dave Broecker G tried a long bomb to Chris Adams '87. The play brought the ball to the Chieftains' 16, and Broecker car-ried the final yards on the next play.

The Engineers will be at Providence Saturday and at Harvard the following weekend before re-turning home October 8 to host WPI-Barston, the League's new entry.

Stonehill 20, MIT 7

---

Soccer — Halfback Bill Mayweather '86, with an assist from co-captain Mark Jennison '84, scored with only 19 seconds remaining to give MIT a 1-0 vic-tory at Nichols Saturday after-noon. Mike Schoen '87, in his first collegiate game, posted the shutout.

Tennis — The men's tennis team defeated Clark 6-3 Sunday to win the RFC Premier Invitational Classic. The Engineers downed Ober-onta 9-0 in the opening round and RPI 5-4 in Saturday's semi-finals to advance to meet Clark, which defeated Williams 5-4 in the other semifinal match.

The women's squad upset its record to 1-1 Saturday with a 7-2 shelling of visiting Assumption.

Field Hockey — The field hockey team opened its season with a 5-0 blanking of Wheelock College Thursday afternoon. Teresa Chi-ellaro '84 had two goals and Martha Beauregard '87 added one to give the Engineers a 3:0 half-time lead. Nancy Schuster '87 and Terry Fowearer '84 provided the other two tallies in the final sta-tus. The team went to Western New England Saturday morning and played to a scoreless tie, bringing MIT's record to 1-0-1. The squad hosted Pine Manor yesterday afternoon.

Sailing — The women's sailing team was busy this weekend, Marian Eustis '85, with crew Carol Whelt '87, and Ann Fitzmaurice '86, with crew Jolla Gesner '87, were low-point skippers in their respective divisions as MIT easily won the Wheaton Invita-tional Saturday. The Engineers also hosted the Man Lab's Trophy last weekend and finished sixth in the 18-team field. Michelle Bag-dad '84 saw her team finish tenth out of its division for MIT.

The men also had a busy weekend. One team placed third of the at the Penobscot Bay Open at Maine Maritime Saturday and Sunday. Another squad sixth of seven at the Brown Invitational Sunday. Saturday's Lune Trophy at Tufts was postponed due to lack of wind.

Water Polo — The water polo team began its season Saturday by posting a 3-1 showing at its own invitational tournament. The Engineers began with a 12-6 win over URI and followed up with a 16-9 thrashing of the Merchant Marine Academy. MIT then lost 36-24 despite a first-place finish by Ruth Hef-fernan '85. The Chieftains finished second on the day, posting a 3-1 showing at the Marine Academy.

Cross Country — The men's cross country team hosted RPI and WPI in the Engineer's Cup Saturday and came away with a 25-38-71 victory, marking the fourth time in six years that MIT has won the event. Terry McNatt '87 and Bill Mallet '86 finished sec-ond and third overall with times of 25:44 and 25:48, respectively. Ron Smith '84 was also among the top finishers, placing fifth in 26:16.

The women's team hosted RPI at Franklin Park Saturday and lost 26-24 despite a first-place finish by Sarah deLeon '85 and a third-place showing by Ruth Hal-ferman '85.
