Gray addresses MIT issues

By Burt S. Kaliski

David H. Solomon, chairman of the MIT Corporation, made his first address to the faculty, and President Pernambuc Gray '44, discussed current MIT issues at this议题's first meeting of the faculty Wednesday.

Gray commented on the Institute's budget, the nuclear testing referendum which will appear on the ballot, and the Solomon Amendment requiring students to register for the draft, a federal financial aid restriction.

"The Institute's budget deficit for 1982-83, at about $2 million, was smaller than expected," Gray said. "The decrease was the result of "close attention to cost control and budget control across the Institute," he said.

Gray predicted a deficit for 1983-84 of about $1.3 million, but said the budget may balance if MIT receives sufficient research funding.

MIT's friend-of-the-court brief filed with the Massachusetts Supreme Judicial Court, which claimed unconstitutional a proposal to ban the use of nuclear testing, is "most," Gray said, in light of the city council's decision Monday to place the referendum on the Cambridge ballot this fall.

"The little restriction that forbids testing and evaluation of nuclear weapons or components, should the referendum pass, he said, the proposal, by prohibiting evaluation of weapons, "imposes constraints on free speech which is contrary to the essence of the First Amendment," he said.

Gray said the Solomon Amendment, "is bad public policy, discrimination in stature, couples things which ought not be coupled," and places upon students the responsibility of policing the distribution of federal aid.

"Although the regulation applies only to male students, "the Department of Education, in its wisdom, wrote the regulation for all students," Gray explained. "If you think it's silly for us, think about Wellesley," he joked.

MIT may decide to put forth its opinion on the role when the US Supreme Court reviews the constitutionality of the regulation next month, Gray said.

"It is at least bad public policy, but it is the law," he said. "MIT will do what the law says." (Please turn to page 19)

ODSA staffer may have conflict of interest

By John J. Ying

The promotion of Andrew M. Eisenmann '75, acting director of the Student Art Association (ASA), toDean's Office staff assistant this year created a possible conflict of interest between his responsibilities as the head of a student organization and as an employee of the MIT administration.

All student activity leaders on campus have a voice in the Association of Student Activities (ASA). That body is responsible for recognizing new student groups and allocating office space and bulletin boards to them.

Eisenmann's immediate superior, Stephen D. Eisenman, assistant dean for student affairs and Eisenman's immediate superior in the Dean's Office, said Eisenman "should not be going to ASA meetings this year." "The AAA for all intents and purposes does not exist," he said, and Eisenman's attendance at past ASA meetings "only seems to be a full-time job," Eisenman said.

"I think this country has a problem with the basics of exercise leadership in this hemisphere," Hart said. He proposed "an alliance for democracy in Central America.

"Exercising leadership means first insisting on human rights." (Please turn to page 10)
Union to vote on contract

By Diane ben-Aaron
MIT Dining Service employees represented by Local 26 of the Hotel Restaurant and Institutional Employees and Bartenders Union will soon meet to vote on a two-year contract offered them by the Institute, according to Dominic Bozzotto, president and business manager of the union.

About 85 MIT employees are members of his union, Bozzotto said, and a vote has been delayed by difficulty in scheduling a meeting at which to cast ballots.

"On September 16, we reached an agreement between Local 26 and MIT to submit our final offer in writing," said James J. Culliton, assistant to the vice-president and director of personnel for MIT. Culliton said he expected a vote "sometime next week."

"The final offer is very different from the original offer [MIT] made," Bozzotto said. He identified pay raises and medical-insurance packages as the main issues on which the two sides fail to agree. "The question is whether the difference is enough to strike over," he said.

"We have feelings out to the maintenance workers' union to see if they'll support us if we strike," Bozzotto explained. "But there's no way to know whether they really will or not until it happens." Bozzotto said the union hopes for community and student support in any strike.

The union's previous contract expired July 1, but has been extended from meeting to meeting for the duration of the negotiations. "For any contract we agreed on, the wage increase would be retroactive to July 1," said Bozzotto.

The union's previous contract expired July 1, but has been extended from meeting to meeting for the duration of the negotiations. "For any contract we agreed on, the wage increase would be retroactive to July 1," said Bozzotto.
news roundup

World
Soviet official calls pilots "trigger happy" — A Soviet official said Wednesday that the pilots who shot down the Korean Air Lines 747 were "trigger happy." The official, Viktor Linnyk, a political consul-tant in the Soviet Department of International Affairs, later retracted the remark, in which he cast doubt on the official Soviet position that the airliner was on a spying mission. Viktor Afanasyev, editor-in-chief of Pravda, criticized Soviet military leaders for waiting six days before admitting the plane was shot down.

Eleven die at an anti-government rally in Manila — Police battled over 500 rioters rallying against Philippine President Ferdinand Marcos in Manila Wednesday, leaving 11 dead and 247 wounded. The rioting, Madrid's worst in 18 years, was prompted by the assassination of Benigno Aquino, an opposition leader killed returning from the United States a month ago. President Reagan announced that he has no plans to cancel his scheduled trip to the Philippines in November.

Nation
The House of Representatives approves $3.5 billion job plan — The House of Representatives approved Wednesday a $3.5 billion program to provide jobs, repairing and maintaining public facilities, for 100,000 unemployed people. The bill is not expected to pass the Republican-controlled Senate.

Reagan defends the American delegate to the UN — President Reagan defended US delegate to the United Nations, Charles Liech-enstein, who suggested Monday that the United States would not object if the UN members wished to move the organization elsewhere. The remark, responding to Soviet assertions the United States failed in its duties as UN host, caused 24 Democratic congressmen to demand Liech-enstein's resignation.

Sports
Australia II obliterates Liberty — Australia II easily defeated the American yacht, Liberty, yesterday by 4 minutes and 8 seconds, tying the best-of-seven America's Cup finals at 3-3. The final and deciding race is scheduled for either today or tomorrow, depending on the weather.

Library fee hikes no small change

For the benefit of those new to the MIT community, I thought I might ease the transition from outside spectators to the high-tech ambula-
tional patterns prevalent at this venerable institution. A synopsis of current changes among students and faculty has long been needed. I hope this incomplete catalogue of standards will suffice.

Basics
To begin, one must always be in a hurry. If one has no reason to hurry, one must find reasons to stop abruptly in the middle of the Infinity Corridor and reverse direction without warning. When in a hurry -- preferably always -- it is necessary to dodge through crowds swinging one's backpack in wide arcs, colliding at least once per hall transit with walls or pedestrians. This activity should be pursued at a dead run around noon daily.

How to cross
When approaching corners, such as the one at the corner to Buildings 12 and 34, accelerate and cut to the inside. Plant the inside foot of your non-dominant leg in the corner section, and grab the wall with your dominant hand. This will maximize velocity as well as maintain the proper trajectory for post-

Impact with the person executing this maneuver from the other side is socially acceptable, and widely regarded as a great way to meet new friends at MIT.

Conversation while walking
It is essential that one's conversa-
don in the halls contain refer-
cences to computers and their pro-
grams, any mathematical oper-
ations performed in space, prob-
lem sets, and how much sleep one enjoyed the previous evening. Never discuss art, literature, social events, MIT sports, men, women, or the Doughnut Stand. For a change of pace, read an eight-hour-long computer print-

Parts of pedestrians should travel three or more abreast, en-

Changes in the Student Financial Aid Office (SFAO) must be applied for any reason. If the student has not applied for the loan, then after Oct. 1, 1983, the SFAO must inform the Department of Education and the lender that the Institute's certification of loan eligibility was invalid.

This may appear to be splitting hairs, but I believe it's important for SGP applicants not intending to graduate because they don't know they can't expect to circum-
vent the unfortunate fiscal conse-
quences of that decision. Whether
or you have already cashed a GSI check or hope to later,

But the Institute has already depos-
ited your GSL check to your ac-
count, so don't worry about your

Two reports another Coop theft

To the Editor:

We found it to be quite a coincidence that a letter regarding items stolen from the Coop was printed shortly after we suffered the same fate [Feedback, Sept. 20]. On Tuesday, Sept. 13, we went to the Coop to pick up a few items. Because rain was expected, we both brought along umbrellas.

Upon entering the Coop, we put our umbrellas on the shelf near the book department. At about 6:40 — the Coop was open until 7:00 that night — we left; it wasn’t until we reached East Campus that we both realized that we had forgotten our umbrellas.

At 6:50, Jim called the Coop and talked to a young lady in the electronics department. She said that yes, she saw them, and that they would be behind the desk for us in the morning. The next day, Adam went to the Coop to pick up the umbrellas. Alas, the Coop had no idea to what he was referring.

The young lady in the electronics department said that she had forgotten to mention it to somebody, apparently assuming that someone had taken care of it for her. Nevertheless, between 6:50 and 7:00 that night, someone walked off with our umbrellas, and, if that is not the case, an even more upsetting possibility exists — that they were taken by an employee as he or she left the store, thinking that if it was left on the shelf then it had been forgotten, thus making it “fair game.”

A report was filled out for MIT Campus Police, at which time we learned that “this sort of thing happens a lot.” So, we are left with the fact that it is remarkably easy to walk away with something left on that shelf — even if the store is virtually empty, as it was that night.

Suggestions? A security guard could be posted, or the Coop could adopt a system whereby you could actually check your items — completed, perhaps, but “this sort of thing” is as widespread as we have been led to believe, then the end — security — certainly justifies the means.

Gained new perspective on prejudice at home

To the Editor:

I stepped off of a 747 onto African soil to spend a junior semester abroad in Kenya and Uganda. It was the first time in my life that I had been less than a minority. This situation was intimidating at times and I don’t think quite sure I ever really transcended it.

The differences between my culture and theirs was very real, and I found myself seeking out the company of my fellow Americans. As I did this I started to understand why minorities at MIT had a tendency to stick together. It’s natural human feeling to be with people who are like yourself and with whom you can truly communicate.

The problem I had with this feeling was that I could not really experience Africa until I broke my self-made bubble and ventured out into the unknown. It’s really hard to break down those barriers of race, culture, and education — sometimes it is impossible. However, I found that when my efforts were sincere I stepped off of a 747 onto Massachusetts Avenue when a car pulled up and hurled down insults. My efforts were sincere.

I remember coming back to the States and noticing a tremendous number of misperceptions and prejudices rife from the blatant to the very subtle. Recently, an interracial couple who are good friends of mine were walking down Massachusetts Avenue when a car pulled up and hurled a beer bottle and several racial slurs at them. Obviously, most prejudices are not overt, but sometimes it is impossible. However, I found that when my efforts were sincere and I stepped off of a 747 onto Massachusetts Avenue when a car pulled up and hurled down races. My efforts were sincere.

I remember coming back to the States and noticing a tremendous number of misperceptions and prejudices raving from the blatant to the very subtle. Recently, an interracial couple who are good friends of mine were walking down Massachusetts Avenue when a car pulled up and hurled a beer bottle and several racial slurs at them. Obviously, most prejudices are not overt, but sometimes it is impossible. However, I found that when my efforts were sincere and I stepped off of a 747 onto Massachusetts Avenue when a car pulled up and hurled down racial slurs at them. Clearly, most prejudices are not overt, but sometimes it is impossible. However, I found that when my efforts were sincere and I stepped off of a 747 onto Massachusetts Avenue when a car pulled up and hurled down racial slurs at them.

All of us at MIT have unlimited opportunities to learn what other people are all about, yet most of us rarely do. By not doing so, we are hindering ourselves from becoming loving human beings. I guess the problem is that remaining the way we are is very easy while changing ourselves always takes effort and is often very uncomfortable. To solve the problem of prejudice requires a fundamental change in our attitudes towards other human beings and a ceaseless effort by everyone. If this solution could be attained, I think most of our other problems would also be solved.

How much prejudice is there at MIT? I would be interested in finding out what other people felt about this issue.

Roy Steiner '85

The art final was a 6-foot painting. Your friends helped you pass with flying colors.

A deftly hurled splotch of magenta blended surreally with a cascade of vermilion, occasional suggestions of orange and cobalt, and what do you have? What else: “The Birth of the Universe.” It’s the painting that completed your art final, and frankly, you couldn’t have done it by yourself.

Afterwards, it’s time for a little down-to-earth gratitude. You owe them at least a few Löwenbräus, not to mention the laundry bill.

Löwenbräu. Here’s to good friends.
Supports LSC, showing of film

To the Editor:
I would like to express a view toward the issue of X-rated movies that I have not seen expressed yet. I would like to support the Lecture Series Committee's showing of the triple-X-rated movie, "Take-Off."

Everyone had the choice of whether to watch the movie or not. Although X-rated movies are not as readily accepted as other forms of entertainment, I feel that no one should have the right to decide what I choose to watch. LSC handled the issue very well, and I would particularly like to commend them on their foresight to post signs stating, "Please tell us if you feel you are being pressured into seeing this movie."

Taking measures such as that help to insure that people are going to see the movie under their own free will.

I do have some criticism on an important matter that I feel LSC overlooked. I did not see anyone checking identification to insure that everyone seeing the movie was of age. Despite the fact that it was a registration day movie for students, it is still important to obey the Motion Picture Association's rule of admittance to X-rated films.

I would also like to take this opportunity to react to D. B. Sweetser's letter, headlined "Host show at registration film" [Feedback, Sept. 16]. In his letter, Sweetser said that he was disappointed in Sigma Alpha Epsilon's standing of the other fraternities and the mass hatred reflected back toward them. I would like to suggest to Sweetser that it was not mass hatred being displayed, but rather a game that is played here at MIT to break the monotony of classes. I feel it had the equivalent impact as the familiar chant "L-S-C sucks." These chants are not intended to hurt others, but rather to provide a bit of comic relief.

As a whole, I feel that LSC handled the presentations very well. I do not feel that it is harmful to the community in that attendance was completely voluntary. Just as those opposed to X-rated movies have their right to express their opposition, those who would like to see them should have a right to see them.

**Take A Freshman To RUGGLES**

(It’s worth it!)

GOING OUT for pizza is a great way to build new friendships. Especially when the pizza is London's All-Cheddar Pizza — famously fresh, hot, and hearty.

Now, freshmen who present a valid I.D. upon ordering can be served regular size pizza (a $2.95 value) for only $2.02. And our baby prince pizza (a $1.75 value) for only $1.01. Guests too, anytime, ALL SEMESTER LONG.

So take a freshman to Ruggles. Or, if you're the freshman, invite somebody new. It could be the start of a beautiful relationship.

Union to decide on contract

(Continued from page 2) efloyees’ International Union, which represents maintenance and custodial workers, voted almost by a 2-to-1 margin Sept. 2 to accept MIT’s contract offer. “The vote is a comment in it- self,” said Francis Fanning, busi- ness agent for Local 254. Fanning added that a simple majority was all that was required to accept the contract.

Contracts for the MIT Research, Development, and Technical Employees’ Union and the Lincoln Laboratory security guards’ union expired July 1. The Research, Development, and Technical Employees’ Union held an all-day meeting with the MIT Personnel Office yesterday, while the guards’ union has re- jected MIT’s latest offer, accord- ing to Culliton. “Right now, we’ve only had a couple of meetings with the MIT Personnel Office and we’re at a standstill,” said John Kelly, a ne- gotiator for the Lincoln Labora- tory guards’ union. Kelly said the union was trying to persuade MIT to clarify ambiguous lan- guage in the contract, including a statement that MIT will cover “up to half” of medical costs.

The training and advancement program for the guards — in- cluding pay raises — and premi- um pay for certain positions are also at issue, Kelly said.

Before We Put You In Charge Of The World’s Most Sophisticated Nuclear Equipment, We Put You Through The World’s Most Sophisticated Nuclear Training.

- It takes more than 16 months of intensive training to become a fully qualified officer in the Navy. You begin with four months of leadership training. Then as a Navy officer you get a full year of graduate-level training unavailable anywhere else at any price.
- Navy training is based on more than 1900 reactor-years of experience. Right now the Navy operates over half the nuclear reactors in America. And the Navy’s nuclear equipment is the most sophisticated in the world. That’s why your Navy training is and must be the most sophisticated in the world.
- As an officer in the Nuclear Navy, you have decision-making authority immediately. You get important manage-

Navy Officers Get Responsibility Fast.
Koyaanisqatsi, a film by Godfrey Reggio, music by Philip Glass, cinematography by Ron Fricke, a Francis Ford Coppola presentation, now playing at the Sack Charles and Harvard Square theaters.

Koyaanisqatsi begins without a single word spoken. It ends the same way. In fact, the only things one hears through the entire 87 minutes of this "odyssey into wordless cinema" are the tumultuous score and exclamations of "oh, wow!" from an awed audience.

Producer/director Godfrey Reggio attempts to show us the world we live in as we have not previously perceived it. His chief artistic tool is the use of time-lapse photography, a time-worn device transformed by cinematographer Ron Fricke into a new medium by applying it to fresh subjects. We've all seen time-lapse shots of suns rising and flowers growing, but Reggio and Fricke turn their lens to less obvious images: cloud shadows moving across mountains, buildings, and trees. The nature shots, especially the aerial cloud sequences, are among the most beautiful on celluloid, but when Reggio has achieved an ideal visual/musical synthesis, which in itself makes Koyaanisqatsi a worthwhile viewing experience. Keep in mind, however, that just as you should not expect sociology with this entertainment, you should not expect sociology with this entertainment.

David Shaw

A la carte a Latacarta

Latacarta, 638 Winthrop Street, Cambridge, 354-3565.

Latacarta is a charming, relaxed, natural-foods restaurant hidden in Harvard Square next to the Crimson Gallery. It is located in a half-flight below street level — consequently it has no windows — but this actually enhances the serene atmosphere.

Appetizers at Latacarta include mussel pasta, and enchiladas, most of which are simply smaller portions of the entrees, making it possible to have a nice meal solely from two or three appetizers. In the past, I have had Latacarta's mussels, which are offered plain and in a variety of sauces. The seasoned variety were some of the best I have ever tasted. They were delicate, coming easily out of their shells. In a dish consisting solely from two or three appetizers. In the past, I have had Latacarta's mussels, which are offered plain and in a variety of sauces. The seasoned variety were some of the best I have ever tasted. They were delicate, coming easily out of their shells. In a dish consisting solely from two or three appetizers.

The menu at Latacarta consists of a standard menu and a nightly menu. Recently, one of the nightly specials has been a dish consisting of mussels and pasta. The pasta was served in the center of a deep dish, with the twenty mussels arranged around the side. It was hearty, a bit heavy for my tastes (I like light pasta), but was lightly seasoned, not stringy or sticky — properly prepared pasta, if a bit heavy.

I ordered an entree of stir-fried chicken with vegetables, served over brown rice, and my dinner partner had burritos. The chicken was attractively presented, with squash, peppers, broccoli, water chestnuts, and other vegetables over a bed of finely cooked rice. The vegetables were correctly prepared — stir fried with the chicken, but still crispy — though there were not enough broccoli flowers. The burritos were accompanied by corn chips in lentil sauce. Both plates were mildly seasoned and tasted very good.

Latacarta offers a beverage selection that includes fine tea, mineral water, and various fruit juices. There is no liquor licence, and it is not clear that you may bring your own bottle, so you may wish to call in advance.

In accordance with its natural-foods orientation, meals at Latacarta, including desserts, are not prepared with white sugar, although the deserts are sweetened with maple syrup. Deserts offered include strawberry crunch cake and other fruit desserts, are not prepared with white sugar, although the deserts are sweetened with maple syrup. Deserts offered include strawberry crunch cake and other fruit desserts.

All about 45 minutes to an hour for dinner, depending on what you order. Prices run $4.50 for appetizers, $5.50 for entrees. Subdivided music accompanies your meal, which, in conjunction with its quiet atmosphere, makes Latacarta a lovely and relaxing retreat from the outside world.

Simson L. Garfinkel

On the town

The Experimental Music Studio presents Computer Du Camera, a performance of chamber music for computer and live instruments. Two world premiers are featured: James Dashoek's In Winter Shine and Graham Hair's New Work for trombone and computer-processed sound. Saturday, Sept. 24 at 8 pm in Kresge auditorium, tickets $5 with student ID.

The MIT Lecture Series presents The Microfilm II Laser Show, featuring the music of the Police, the Who, and Fleetwood Mac and others, Monday, September 26, 7 & 10 pm, Kresge auditorium, tickets $2.

The Harvard Square Cinema also continues its International Director's Festival with a pair of double features: Luchino Visconti's Death in Venice and The Damned, Friday, Sat., Sept. 23-24, and Orson Welles's Citizen Kane and The Magnificent Ambersons, Sun.-Mon., Sept. 25-26. For information call 364-4580.

The Flying Karamazov Brothers, the world's fastest juggling/ comedy troupe, has crash-landed in Boston for a two-week run at the Wilbur Theatre. Don't miss the chance to see these lobster-tossing half-foots, call 423-4008 for ticket information.

Brador: Everything you've heard about it is true.
By Joel Gluck

Dr. Isaac Asimov, author of 203 books on such topics as dirty little secrets, the history of religions and science, spoke at Boston University Tuesday night.

Asimov, a science-fiction writer, tooted the word "robotics," spooking the audience that he had with his Radio Shack word- processing computer, and of his idea of how computers will become a humanizing force in future society.

"People who worry about the dehumanizing of human beings reveal that they know nothing of history. . . . History is a record of people used as lamps of muscle and nothing else. . . . Science has removed the necessity of a human being to be used" in this way, he said.

Asimov compared the movement from labor-intensive to energy-intensive operations in the Industrial Age to a similar mental liberation that may occur in the Information Age.

"There is a great deal of mental labor that is beneath the dignity of human beings to do. . . ." he said. "The human mind is no more important to fiddle with numbers. . . . Computers are going to do the jobs that human beings ought not do." He then spoke about the diversity of human creativity and intelligence, such as that found in a baseball player, an aerodynamicist, Mozart and himself.

"Whereas computers never make mistakes, human beings prefer to make mistakes. Human beings are designed to be creative, intuitive, and figure out problems given insufficient information," he said.

Asimov compared the pursuit of computers that are intuitive and creative to the attempt to design machines that can walk. "Why do it?" he asked, pointing out that conventional computers are complementary to human mental ability, just as machines with wheels complement our ability to walk.

Asimov related some amusing anecdotes concerning his word-processing system earlier in his talk. "I'd wake up up after morning, approach the darned thing, and try to turn it on. One time, I succeeded in turning it on, and danced for three hours."

Many have wondered what Asimov's secret is. His reply: "Be born ex... that's what it amounts to."

ter, to take four straight points and the game. The second game also see-sawed back and forth, but MIT again finished on top, 15-12.

"Boy, we sure did need it," Karen Welch '84 said of the victory. Welch and Cathy Smith '84 are the co-captains of MIT's junior varsity.

The varsity has a lot of talent, Altman said before the game. "Our goal this year is to finish higher than last year, to make it to Laverne, California. NCAA will hold its Division III finals this year. "It's a pretty tough goal," she added.

Last year's 33-5 record was MIT's best ever. The team won the Eastern Association of Intercollegiate Athletics for Women Championship and finished tied for fifth in the NCAA.

Getting picked for the NCAA championships depends on many factors, Altman said, especially which selectors see the team and when. "It helps that we were picked once already." The selectors know MIT has a good team, she continued.

"We have a strong team," Altman said, made up of nine returning players, one new sophomore, and two freshmen. Experience is one of the team's greatest strengths, she noted. "But experience doesn't get you everywhere." The squad has been working hard in preparation for this season, she said.

Amy Smith echoed the coach's words. "We want to go to the finals," she said.

Amy Smith, Wesslund, and Koster captain the varsity. Lo- pingbeh '86, Rachel Chin '87, Carol Morris '87, and defensive specialist Akiko Koducka '84 come off the bench to spell the regulars.

Altman has two assistants, Ar- mando Hernandez '84 and Adra Smith G, who coaches the junior varsity. Altman and Smith played varsity volleyball at MIT. Alt- man, formerly women's varsity volleyball coach at Harvard and Radcliffe Colleges, replaced Da- vid A. Castenon as MIT's coach this year.

Field hockey dominates Pine Manor

(Continued from page 20)

The Engineers, for all the pres- 
sure, could not get a tally in the first 
half, although they had a 
number of close calls. Beverage 
blew three good chances (two were 
vented, while one went just 
wide). Karen Renaud '84 put one 
wide of the goal, and Nancy 
Schuster '87 had a bid which the 
Pine Manor goalie came up with. 
The best chance in the half was 
by Chen. With 4:01 remaining, 
MIT was awarded a penalty shot 
when a Pine Manor defender 
stopped the ball on the goal line 
with her foot. Chen was chosen 
to take the shot. She lifted 
the ball into the air, but at the 
goalie, who made an easy stop 
with the chest protector. Chen 
later explained that "You're sup-
pose to go for the corners, ei-
ther the upper or the lower, but I 
couldn't get it there." Several oth-
er opportunities for MIT fell, 
and the half ended in a scoreless 
tie.

The second 35 minutes were a 
repeat of the first. The Engineers 
ever let Pine Manor get orga-
nized and constantly put the heat 
on the enemy goal. At the 19:51 
mark, a. Beverage shot off a feed 
from Renaud was trapped in the 
goalie's pads, forcing the second 
penalty shot of the contest. Chen 
was called upon again to take the 
shot, and this time the connect-
ed, putting the ball in the upper 
right corner off the goalie's hand. 
Chen's second goal was one of 
the more artistic one will see in a 
field hockey game, where most of 
the action is centered less than 
10 yards in front of the goal. 
She intercepted a Pine Manor 
pass, ran about 15 yards, and 
then fired one home from about 40 
feet on the left side. Chen later 
commented, "I was fortunate to 
have a clear shot inside the cir-
cle." Her tally with 12:27 to go 
gave Tech a 2-0 advantage, and 
the hosts cruised in from there. 
The unbalance, one-goal start 
gives MIT a good shot at its first 
3.500 season Since 1980, when it 
finished 9-4-1. The team has the 
fortune of having lost no one to 
graduation, and the addition of 
first-year players such as Bever-
age is a big plus. Chen feels that 
since most of the players have 
been together for at least a year, 
there is a definite change in the 
team's style of play: "We're play-
ing a smarter, more patient game 
than last year, when we were more 
aggressive."
UTRECHT SAVING SYSTEM

Serving: ARTISTS • DESIGNERS • ARCHITECTS • DRAFTSMEN • SCHOOLS
• No further quantity discounts on Utrecht products • Our Utrecht Branch Stores carry thousands of other items at Impressive Savings

UTRECHT Art & Drafting Supply Center of BOSTON:
333 Massachusetts Avenue (Corner of Huntington, opposite Symphony Hall) • Boston, Massachusetts 02115

Defense fails; soccer gets blanked 5-0

By Arthur Lee

Under scorching sun and humidity, the men's soccer team suffered its second defeat and first shutout of the season, losing 5-0 to WPI Engineers at Steinbrenner Stadium. MIT's record falls to 1-2-1.

Just seven minutes into the game, the MIT backfield was caught off guard as Caneiro slipped in his first goal of the afternoon. Communication broke down between the defensive players, as they stood and watched the ball go in. The defense quickly scrambled to tighten up and did not allow another goal to be scored for another thirty-four minutes. The WPI offense, nevertheless, dominated the first half by continuing to probe for weaknesses in the MIT backfield.

The MIT defense allowed twelve shots on goal to slip during that time. Goalkeeper Robert Noecker '85 had to make saves on four of those that got too close to the goal. In contrast, the MIT offense only chalked up three shots on the opponent's goal, with only one coming close enough to require a save.

After thirty-four minutes of WPI's probing attacks, the MIT defense totally collapsed. John Meehan of WPI easily slipped by a defender on the right-center side of the backfield and found a good angle for a shot. Noecker dove to his left, but the ball was already out of reach as it sailed into the goal.

Thirty-five seconds later, the home team received another shock as its crumbling defense gave up another easy goal. This time, however, the threat came from the left side of Noecker. WPI's Dave King was not marked tightly enough as he found ample time to kick a twenty-yarder toward the goal. Noecker misjudged the flight path of the ball and jumped too early. The ball flew over his hands and into the net, making the score 3-0 at the half.

The second half of the game brought no better luck to the MIT Engineers. Once again, WPI outshone the home team in 8 to 3. 1005 into the half. Caneiro scored again with the able assistance of his teammates, finishing game. About twenty minutes later, Caneiro teamed up with Gazzan Namogolu to humiliate the MIT backfield. The ball passed no less than three times between Caneiro and Namogolu before Caneiro decided to collect his hat trick for the afternoon.

MIT coach Walter Alexisi said basically one thing to his team after the game: "It was pathetic." According to assistant coach David Apatzer, at least it was "a team effort." But Alexisi noted, "If we continue to play the way we did today, we will not win any more games."

Golf - The golf team dropped a 5-0 loss to visiting Northeastern Wednesday afternoon.

Tennis - The men's tennis team upset their rival from 2-1 Tuesday afternoon, defeating host Brandeis 6-3. Janet Schnee '84, Jennifer Hyman '87, and Francie Gurney '86 all won their singles matches in straight sets, while Jennifer Shandling '84 came back to take her match after losing the opening set. Hyman and captain Jennifer Lin '84 combined to capture their doubles match in straight sets, and the team of Shandling and Lisa Shields '85 staged another comeback performance for another doubles victory.

The men's team went up against strong Boston College Tuesday afternoon and lost 7-2. Rob Craig '86 was the only singles winner, and he also teamed up with Ramy Rizk '86 to chalk up the only MIT doubles victory.

The women's tennis team upset their rival from 2-1 Tuesday afternoon, defeating host Brandeis 6-3. Janet Schnee '84, Jennifer Hyman '87, and Francie Gurney '86 all won their singles matches in straight sets, while Jennifer Shandling '84 came back to take her match after losing the opening set. Hyman and captain Jennifer Lin '84 combined to capture their doubles match in straight sets, and the team of Shandling and Lisa Shields '85 staged another comeback performance for another doubles victory.

Weekend preview

Tomorrow - Part of the varsity sailing team will be at Harvard for the New England Single-Handed Championships, beginning at 9:30am. The women's sailing team will also be out at 9:30 for the first day of its Single-Handed Championships, which MIT is hosting.

Both the men's and the women's tennis teams will be out on the courts at 11am to host visitors from Maine. The men will take on the University of Maine, and the women will meet Bates.

The baseball team will be in action on Briggs Field at noon for the first game of a doubleheader with Bentley College. The golf team will get to play host to yet another team from Maine - Bowdoin. The two squads are scheduled to be out on the links at 1pm.

The men's soccer team will be in Steinbrenner Stadium at 2pm to take on an out-of-state school - Trinity College.

Sunday - The women sailors will start the conclusion of the Single-Handed Championships at 9:30am. The men will also be on the river at 9:30am in the Boston University Trophy.
Volleyball teams sweep Salem St.

By Robert E. Malchman

The women's volleyball team opened the 1983 season impressively Wednesday night, the varsity sweeping host Salem State 15-6, 15-6, 15-1; and the junior varsity blanking the hapless Vikings 16-14, 15-12.

The victory was the first for rookie head coach Karyn Altman 78. "I feel a lot better now," she said.

The Engineers seemed overanxious during the first two games. Despite winning both, the team showed only flashes of the brilliance that led them to the National Collegiate Athletic Association Division III Eastern Championship last year.

Front-line hitters Amy B. Smith '84, Barbara E. Westlund '84, Lori A. Cantu '85, Janette Heng '84 and Jennifer L. Smith received many of the few sets they received.

MIT broke on top in the First set 12-2, thanks in large part of the serve from Michelle M. Heere '84 and Jennifer E. Smith '86, baffling their spikes far over the net line as a result.

MIT's return to dominating precisioned dismantling of Salem was clearly overmatched, despite MIT's inconsistent play. The Vikings could not set the ball for their hitters most of the time, and the hitters misplayed many of the few sets they received.

The third game witnessed MIT's return to dominating play. The Engineers calmed down, setting and spiking with clockwork regularity. MIT earned a 12-6 lead before cruising to a 15-1 final score.

The junior varsity then took the court against the Viking varsity's bench. MIT has never had a JV volleyball team, but the young Engineers acquitted themselves well in their first game. They played a match more erratic than the varsity's, but likewise more exciting than the senior squad's precisioned dismantling of Salem earlier in the evening.

The Vikings were serving on game point, leading 14-13. MIT rallied, displaying great character. (Please turn to page 10)

Field hockey victorious, 2-0

By Eric R. Fleming

M.I.T.'s field hockey team opened its home season on a warm Monday afternoon at Steinbrenner Stadium, but the heat could not thaw out the cold lock on the Tech goal. Sporled by two goals from Julie Chen '86, the Engineers blanked Pine Manor 2-0. MIT has not given up a goal this season while Pine Manor could not mount any sustained attack, much less get the ball past the midfield stripe.

Key to M.I.T.'s dominance was the play of the forwards, links, and halfbacks, who applied consistent offensive and deft pressure by intercepting and free shots (an unobstructed pass awarded after a foul, setting the ball, and causing the ball to be in front of the Pine 8 goal). Pine Manor could not mount any sustained attack, much less get the ball past the midfield stripe.

The click, "the game was not as close as the score indicated" was without question applicable at this contest. After the first five minutes, the hosts were in complete command, making continuous forays into enemy territory. Pine Manor could not mount any sustained attack, much less get the ball past the midfield stripe.

The cliché "the game was not as close as the score indicated" was without question applicable at this contest. After the first five minutes, the hosts were in complete command, making continuous forays into enemy territory. Pine Manor could not mount any sustained attack, much less get the ball past the midfield stripe.

The field hockey team drives on Pine Manor's goal enroute to a 2-0 shutout Monday.

Raychem

Because Success Is Your Way of Life

Raychem Corporation was founded in 1957, dedicated to pioneering commercial applications for radiation chemistry. Today a Fortune 500 company and leader in materials science technologies, Raychem develops, manufactures, and markets a wide range of high-performance products to industries in more than 80 countries.

Our research and development efforts have led to innovations in heat-shrinkable plastics, conductive polymers, heat-recoverable metals, fiber optics and adhesives.

We invite you to get to know us. Take a closer look at our technologies, products and people.

Meet with our representatives on campus at the time listed below or contact:

Robert Lawrence
College Relations Manager
Department N41-45
Raychem Corporation
300 Constitution Drive
Menlo Park, CA 94025

On-campus information session:
October 16, Chemistry Department, 4–5 pm
October 16, Building 37-212, 4–6 pm

On-campus interview session:
October 16 & 20, 1983

An affirmative action, equal opportunity employer

Saturday, September 24th is M.I.T. DAY
One free beer plus discount admission

KING RICHARDS FAIRE

This Saturday, Sept. 24, show your M.I.T. Student ID and get two adult admissions for the price of one, plus one free beer with each admission. Enjoy a fantasy trip back in time to a rollicking, spirited world of Knights jousting on horseback, music & dance, handcrafted art, exotic foods & drinks. Mingle with pirates, peasants, wenches & wizards in the king's forest. It's M.I.T.'s Day at the Faire!

Offer limited to M.I.T. students with current Student IDs. Limit 1 per person. Not combinable with other discounts. No cash, bottles or coolers may be brought into the Faire. Adult ID required to purchase or receive beer or wine.

OPEN EVERY WEEKEND
