Nuclear-free Cambridge is discussed at MIT forum

By Ron Norman

Howard Zinn, professor of Political Science at Boston University, and John Flynn, professor of law at Northeastern University, discussed arguments in favor of the Nuclear-Free Cambridge Referendum Wednesday night at MIT.

The referendum will be voted on Nov. 8, and if approved, would prohibit any research or development of nuclear weapons within Cambridge. Starting in October 1983, fines and jail sentences may be imposed on violators.

The proposal states "no person, corporation, university, laboratory, institution, or any other entity shall, within the city of Cambridge, engage in work for the purpose of which is the research, development, testing, evaluation, production, maintenance, storage or transportation of nuclear weapons or the components of nuclear weapons."

"It's hard to do justice to arguments against the referendum," Zinn said.

The intent of the referendum is "to have the people of Cambridge decide if nuclear weapons will be built," Zinn said.

"Foreign policy has always been outside democracy in the US," Zinn noted. He said the referendum is an important step in making foreign policy a democratic decision.

Flynn refuted arguments against the referendum, and implied that the referendum would be constitutional if approved.

"There is no interstate commerce in nuclear weapons," Flynn said in response to opposing arguments based on the Interstate Commerce Act.

The principle of the first amendment and its exceptions "falls outside the intent of this ordinance," Flynn said. "[The fact that] some people think that democracy is unconstitutional is the bottom line," he noted.

Earlier this week, Ernest May, professor of history at Harvard University and chairman of Citizens Against Nuclear War, a group opposed to the referendum, said the proposal targeted about 70 firms in Cambridge.

Eric Segal, spokesman for Mobilization for Survival — the organization sponsoring the referendum — said last week, "There is only one facility that will be affected by this act, re-ferring to the Charles Stark Draper Laboratory, the facility devoted by the Institute in the early 1970s.

Mayoral candidates Flynn, King debate issues on television

By Burt S. Kaliski

Boston mayoral candidates Flynn and Melvin H. King held their televised debate Wednesday night, with panels from the Boston Globe, The Boston Guide, WNEV-TV.

The panelists gave each candidate several chances to dispute the record of his opponent but only King accepted the opportunity. Flynn instead said he preferred to run on his own qualifications.

"Anyone who moves from one position to another position... does not have the leadanship to... consistency... play a role in effectively leading the city," King said.

Flynn said the commission's budget "was top-heavy administratively" and the $350,000 in budget cuts which King claimed would abolish the commission were intended to "streamline" its function.

"I prefer to deal with the qualifications that I present to the people of the city," Flynn said. He is a six-year member of the City Council, and had served for eight years as a state legislator.

Hollings: Freeze spending

By Drew Blakeman
Democrat, Jr., presidential candidate Sen. Ernest F. "Fritz" Hollings of South Carolina vowed to enact an "across-the-board freeze" on federal spending if elected. Hollings claimed this would save $700 billion over five years and result in a "near-balanced" budget by 1988.

"We must get deficits down," he said in an address at the Harvard Law Forum on Tuesday. "No one expects a balanced budget this year," he continued, "but we want to get on a glide path to stabilize the economy.

Hollings would permit only three exceptions to the spending freeze: subsidies such as food stamps to the "truly needy," which would be funded as required; entitlement programs which would increase by 3 percent annually; and US commitments to NATO which call for a 3 percent increase.

US troops invade Grenada — Over 1900 American troops, along with forces from seven Caribbean nations, invaded Grenada early Tuesday morning. President Ronald Reagan said the objective of the invasion was to protect the safety of the 1000 Americans living on the island, including 600 medical students attending St. Georges University Medical School. Eight US soldiers were killed and 33 wounded in the fighting against Grenadian forces and Cuban combatants. Around 30 Soviet military advisors and 600 Cuban troops have been captured. The first American citizens were evacuated Wednesday.

Bush visits Marines in Lebanon — Vice President George Bush inspected the remains of the bombarded Marine headquarters Wednesday, as the search continued for the servicemen killed by last Sunday’s early morning suicide terrorist attack against a US headquarters in Beirut. Reagan stated in his speech last night that US Marines will remain in Lebanon and that American peace objectives will not be changed by the bombing. The death toll of US marine and naval personnel has reached 224, with 75 injured.

Kennedy taps on Cuban Missile Crisis released — The John F. Kennedy Library released transcripts and tapes of a high level conference held in 1962 on the Cuban missile crisis. In the conference, President Kennedy and cabinet members debated possible military steps to prevent the establishment of nuclear missiles in Cuba. The transcripts showed Kennedy was prepared to initiate air strikes against the missile complex and also considered a general invasion of Cuba, even if these actions led to civilian casualties.

Bid to oust Massachusetts House Speaker McGee fails — Massachusetts House Speaker Thomas McGee survived a move to ouster him Wednesday. The motion to ouster McGee was easily killed as 26 representative voted for McGee’s ouster, 55 against, and 26 abstained. The vote was triggered after McGee dismissed Rep. George Keverian, Massachusetts House majority leader, and Rep. Charles Flaherty, chairman of the House Taxation Committee, Monday. It was the first attempt to unseat a Massachusetts Speaker since 1964.

Massachusetts drinking age to remain at 20 — By a vote of 27-7, the state Senate defeated a bill to raise the legal drinking age in Massachusetts from 20 to 21. The bill was introduced at the urging of for-mer Massachusetts governor John Volpe, an advocate of a nationwide 21 year old drinking age. Sen. Louis Bertonazzi said the legislation would prompt 20 year olds to cross state borders to purchase alcohol.

Sun returning — Sunny today, with high temperatures reaching the middle 50s. There will be a chance of showers on Saturday, with a mix of sun and clouds. Temperatures will be between the middle 60s and the lower 70s.

Tempest, a truly tempesting treat

The Tempest, by William Shakespeare, performed by the MIT Shakespeare Ensemble, directed by Joseph Romeo.

The Shakespeare Ensemble has once again staged a fine production of a Shakespearean masterpiece. The Tempest is probably the last play written entirely by Shakespeare, and it is in many ways, Shakespeare's farewell to the world of the

The play takes place on an island run by the deified Duke of Milan, Prospero, with the aid of his "art" — magic. Using his magic, Prospero creates a tempest that brings his usurping brother to the island. Much as Shakespeare creates the drama with words, Prospero stages the ensuing drama with his magic.

Prospero controls two inhuman creatures: Ariel, an airy spirit who represents Prospero's (and Shakespeare's) higher artistic qualities, and Caliban, a disproportioned earthy spirit, who represents Prospero's (and Shakespeare's) lower baser qualities. One of the strengths of this production is the casting of the two actors who play these two creatures. Steven Ng, '85 is an extremely good choice for Caliban, and his tall grace and otherworldly voice work well. If he does not capture Ariel's spirit, he is still a very good prospect for having him act a bit too lethargically — Ariel should be leaping through the air and flying fleet-footed off the stage, rather than just walking slowly, gracefully, and somberly around the scenery. Ariel is sup-

posed to represent, in part, the lovelier side of imagination, and as such, he should be more whimsical, a quality the director apparently only rarely allows Ng to capture.

Caliban is superbly played by Andrew Berthold-Leisle, '94, who completely captures the base yet poetic deformity of this poor creature. In contrast to the tall, airy Ariel, Caliban is hunched over close to the Earth, and his language reflects his earthiness. From this performance, we can see why Shakespeare gives Caliban some of the finest poetry in the play, and why the baser qualities are as crucial to an artist as any of his other qualities.

Prospero, played by Geoff Pingree '82, gives a competent performance, but he is not quite able to capture the full combination of the earthy Caliban and airy Ariel until the end. Throughout the play, he is able to show the darker side of his person-ality — the anger and rage the tempest symphonies — very well, so that it is quite believable when he says of Caliban, "this thing of darkness I acknowledge mine."

Yet, the higher more artistic side of Prospero does not come through for much of the play. Part of the problem is that the lovelier side of Prospero's imagination has not fully been demonstrated in this production. Because of an unfortunately large mix-up of the spirit-filled nuptial scene in Act IV, Scene 1 — the one scene in which Prospero promises to bestow on the audience the joyous side of his "art." Pingree is, however, able to recapture some of this missing imagination with his moving delivery of the final speech, in which he (along with Shakespeare) asks for applause to free him from the stage.

As usual, the cast is remarkably strong for a student production. Certain perform-ers do, however, deserve special note. David Sidd. '84 is wonderfully verbose, tin-cere, and kind as the old counselor, Gon-zalo. John Kuryan 'G is amazingly slick as Antonio, Prospero's evil usurping brother. Kuryan looks and acts like he just walked off the set of The Godfather, which is perhaps appropriate for this Italian would-be murderer.

The Tempest also has its purely comic characters, and, in this production, almost all of the laughs are due to Maurice Karmman '85, who wonderfully captures the pathetic silliness of the jester, Trinculo. Although his nose wandsers a bit too much, and he cannot whistle, his whiny voice and fine comic timing are just plain funny.

The opening-night performance was not well attended, which certainly cannot be explained on the basis of either the play or the Ensemble. The MIT Shakespeare En-semble continues to show that it can perform Shakespeare far better than could reasonably be expected from a student group. And The Tempest, a wonderful commentary on the nature of his art, still remains one of his finest plays.

GENERAL COMPUTER IS REDEFINING THE STATE OF THE ART IN HOME COMPUTERS

We're looking for talented computer scientists and electrical engineers with experience in the following areas:

- Microprocessor Programming
- Peripheral Interface Design
- Single Chip Microprocessor Design
- Computer Graphics
- Digital Circuit Design
- Video Game Programming

General Computer is a small, innovative organization dedicated to developing successful consumer electronic products. We will be on campus Thursday, November 3rd and Wednesday, November 16th. If you are interested in any of these exciting opportunities please contact your career placement office. There are still positions available on our sign-up schedule.

HARRIS is holding an OPEN HOUSE

For exceptional graduates with bachelor's or advanced degrees in Electrical, Chemical and Aeronautical Engineering, Material and Computer Science and Physics

Monday, October 31st, 6:30 p.m. — 9:30 p.m.
At the Hyatt Regency Cambridge (Patriot Hallway)

We invite you to meet some of our key management people. They look forward to an informal evening of informative interchange that's particularly meaningful to you. They'll zero in on the direction Harris Corporation is taking today and the avenues of opportunity and growth that direction is offering this year's graduates in our Fortune 200 company.

Plan to join us for some enlightening conversation and refreshments.

This Is Harris

Exceptional People Paving The Way To The Information Age

Harris Corporation is at the leading edge of an exciting new era. Over the past 20 years we have developed an extensive line of information processing and communication products which generate worldwide annual sales of more than $1.4 billion. We're entering a period of outstanding growth opportunity. Join our people who thrive on challenge as we pave the way to the Information Age.

CAMPUS INTERVIEWS

Flynn and King agree city budget will be cut

(Continued from page 1) "I believe that Mr. King is qualified as well. I don't think he's more qualified," Flynn said.

Flynn said school busing was the most controversial issue for the candidates. He opposed integration in 1973, he said, because "I thought that at that time busing would be socially, educationally counterproductive."

King responded, "The real problem with respect to where we came out with busing was the fact that there wasn't the kind of leadership exhibited by people like my opponent" to support the integration of black and white school children.

King said that as a state legislator he provided "services" for people on a very direct basis. You haven't seen that kind of program come from Mr. Flynn."

Both candidates said they would cut the city budget. Flynn said he would consolidate planning agencies and had already recommended to Mayor Kevin H. White the abolishment of the Boston Redevelopment Authority, at a savings of $5.2 million.

Flynn said he identified approximately $25 million in city services more important to the city. At the same time, he added, he would redirect funds to programs "services for the delivery of essential services." He would cut the city budget. Flynn said he would "bring into city government capable, honest, effective people. They will be people that the neighborhood of the city have seen for years."

The candidates questioned each other several times on the use of tax incentives to lure businesses into Boston. King said Flynn opposed such incentives, but Flynn said the city would be unable to attract companies otherwise.

King claimed "tax incentives have not worked to get people to come in to do business in the city of Boston." Reducing crime and improving the city environment would attract the businesses, he said.

Flynn said 40 acres of the 46-acre plot in Roxbury on which Digital Equipment Corp. opened an office this year remain undeveloped. The city "ought to be providing ... federal money to encourage businesses to locate in that area."

King expressed doubts about Flynn's suggestion, claiming his opponent's plans for attracting businesses had failed in the past. "It's obvious to me that he does not have a system of incentives" which involve local funding, he said.

King also supported a payroll tax to fund the Massachusetts Bay Transit Authority (MBTA). All employers in the metropolitan area would pay the tax to help offset a $40 million deficit on the MBTA budget paid by the city, he said.

Flynn said the tax "will still be paid by the people who work in the city of Boston." The city should instead require many of the tax-exempt institutions which occupy 47 percent of city land to contribute "their fair share in services."

The city should be less aggressive in issuing parking tickets and in administering the Denver boot to scofflaws, the candidates agreed. The boot "should be used as a way of deterring people from flagrantly violating the law," Flynn said.

what it is," he said.

Hollings said that we should remove US troops from Lebanon until we can set legitimate national goals and identify reasons for their deployment. He also said he favors scrapping either the MX missile or B-1 bomber programs, and applying the $30 to $40 billion to education programs.

"If we are willing to spend all this money, the children of the United States are worth at least one weapons system," he said.

Volleyball stays unbeaten; downs Huskies, 3-1

By Robert E. Matchman
The women's volleyball games are mixtures of anticipation and frustration. There is the anticipation of smooth, powerful style that has made the Engineers the best NCAA Division III team in the nation, frustration with the time it takes them to un-track and play the way then.

The team faced its quality against visiting Division II powerhouse Northeastern University Wednesday night. Despite showing only occasional flashes of excellence, MIT overcame a lackluster Huskie squad, 15-13, 15-8, 15-12.

MIT and Northeastern began the first game evenly, moving slowly to a 6-6 tie. Servers missed repeatedly, as the teams traded sides-out. Anella Munro '85 was the only hitter to connect well on her side, and the Huskie defense succeeded in containing her drives.

Lotti Cantu '85 finally led the Engineers out of their doldrums, igniting a rally with two hard spikes and an ace on one of her three scoring serves. Northeastern called a time out after Munro's light tap over the defense brought MIT to a 12-6 lead.

The hitter cooled the Engineers, and the game resumed with another trade of points and sides-out. MIT moved to game point, 14-8, but the Huskies died with another trade of points and sides-out. Anella Munro '85 was the first game evenly, moving ahead 8-6. Momentary lapses plagued the Engineers: misjudged serves, a bad set, contact with the net. MIT regrouped, however, and continued to press on the Huskies, who in turn began making the same mistakes MIT had. Northeastern could not manage another point, as the Engineers rolled, 15-8.

The wins were all the more remarkable because MIT's two best setters, Michelle Hong '84 and Jenny Smith '86, were trapped on the bench when the Engineers ran out of substitutions halfway through each of the first two games. Janette Kaush '85, normally a hitter, played well in the unfamiliar role, according to head coach Karyn Altman '78.

The Engineers, one game away from a sweep, were looking to send the Huskies across the river with their tails between their legs. Instead, the Huskies put the bite on MIT, surging to a 5-0 lead at the outset of game three. The Engineers struggled back to 5-2, but Northeastern played evenly the rest of the way, maintaining its five-point lead, 7-2, then 9-4, as MIT could not handle the Huskie spikes.

MIT finally broke with the score 13-5. Northeastern flubbed a couple of bumps, and the Engineers closed to 13-9. It was too little, too late, though. Northeastern was down five points it started with, 15-10.

The Engineers fell behind in game four. 3-1. They scored four straight points, however, including two on a block and a spike from Koster. Northeastern tied the score at 5, and the teams resumed trading points and sides-out to 7-7.

Once again MIT demonstrated the explosiveness, retiring off seven unanswered points. Koster continued points with two soft taps and a block, and Munro and Westlund added a spike apiece. Westlund ended it all with a slam, 15-8.

The win lifted the Engineers to 27-0. In those matches, MIT, the best Division III school in the East, has only lost three games: to occasional Holyoke, and now Northeastern.

Altman was pleased with the victory, despite her team's inconsistent play. Cantu and Munro "hit exceptionally well," she said after the game, and Cantu "played well on defense, too."

The team "always starts out slow," Altman said. "That's just our style. They don't panic" when they fall behind by a few points at the beginning of a game, she continued. Northeastern did not play well, but it does have a good team, she noted. The Huskies had previously beaten Army, the best Division II team in the East. The Engineers travel to Saratoga, N.Y., this weekend, before returning home Tuesday night to take on Division II Springfield College at 7:30 p.m.
