Frat relations in Back Bay strained with neighbors

By John J. Ying
The MIT administration and members are attempting to improve the strained relations between students and Back Bay residents. According to Robert A. Sherrerd, associate dean for student affairs, neighbors called the Boston Police several times with complaints against fraternity members in the Back Bay during this year's rush period. Sherrerd noted that the problem is not due to an increase in fraternity noise levels or the rowdiness of their actions, but rather a result of a change in the type of residents in Back Bay. Sherrerd added that the neighborhood is not more tolerant of rowdiness but more concerned about the people in Back Bay participating in neighborhood issues.

"Something is different this year," said Robert A. Dulkakis, director of MIT's Responsive Policing Program. "I think he better get himself and his fraternity brothers for the noise when we get the complaints. 

"Annotating, a lot of times our people are making a lot of noise when we get the complaint," Sherrerd said. "Quite honestly, we blame the noise on the MIT students. 

"I think if we can have a good mix of numbers and bring people in, especially against a mid-week Pi Beta Phi fraternity, we'd have a lot fewer complaints," Sherrerd said. 

"Back Bay changing"

The fraternity community relays that they are not due to an increase in either fraternity noise levels or the rowdiness of their actions, but rather a result of a change in the type of residents in Back Bay. Sherrerd told the officers that the problem is not due to a change in the neighborhoods of the city. Sherrerd noted that in the past, the fraternity neighbors were more transient apartment dwellers who tried to bring people who were more tolerant of fraternity. Now, however, an increasing number of professionals are moving into the Back Bay area by buying condominiums.

After paying prices upwards of $250,000, these professionals, who are the ones taking an interest in their rights and exercise of them, will not tolerate what would be considered social fraternity activities, according to Sherrerd. "People are here and condos are not a good mix."

"Something is different this year. I think it is a sign that MIT students aren't making as much noise."

-Richard P. Branson, manager of the campus informatics service

"It is not clear to me that MIT is not the only school with neighborhood problems in Boston," Sherrerd said. "I think that MIT student is showing that they are not going to put up with as much.

Enrollment limit discussed

By Sam Cable
The city of Cambridge will hold elections next Tuesday, Nov. 8, for nine seats on the city council and six positions on school committees. Three referendum questions will also be on the ballot.

Sixteen candidates are running for nine seats on the city council. All nine incumbents are running for re-election, including Cambridge Mayor Alfred E. Vellucci. Councilors are elected for two years, and the city mayor is elected from among the members of the council.

Sixteen candidates, including five incumbents, are running for six positions on the Cambridge School Committee. Terms on the committees last two years.

The seats in both elections will be determined by a preferential ballot in city-wide voting.

Three referendum questions will also be on the ballot. The first question would allow Cambridge to proceed with acquiring a cable television system.

The second question, the Nuclear Free Cambridge referendum, would pass a funding resolution that outlaws in Cambridge "the research, development, testing, evaluation, production, maintenance, storage, transportation and/or disposal of nuclear weapons or their components."

The third referendum question would encourage the city to increase public housing funds and to strengthen rent controls.

Cambridge elections tug

By Daniel J. Crean
The city of Cambridge will hold elections next Tuesday, Nov. 8, for nine seats on the city council and six positions on school committees. Three referendum questions will also be on the ballot.

Sixteen candidates are running for nine seats on the city council. All nine incumbents are running for re-election, including Cambridge Mayor Alfred E. Vellucci. Councilors are elected for two years, and the city mayor is elected from among the members of the council.

Sixteen candidates, including five incumbents, are running for six positions on the Cambridge School Committee. Terms on the committees last two years.

Three referendum questions will also be on the ballot. The first question would allow Cambridge to proceed with acquiring a cable television system.

The second question, the Nuclear Free Cambridge referendum, would pass a funding resolution that outlaws in Cambridge "the research, development, testing, evaluation, production, maintenance, storage, transportation and/or disposal of nuclear weapons or their components."

The third referendum question would encourage the city to increase public housing funds and to strengthen rent controls.

Councillors comment councilman Richard P. Branson's slogan is "an end to polarization."

He says, "Cambridge can be a city of solutions, not a city of polarization."

He feels property owners in the city have been treated unjustly in the past. On the subject of MIT's Simplex property, Branson "has come out in favor of the Caragianes resolution that proposes a rezoning of the land, to allow development on the site.

Students barred from class

Bruce R. Muscici, assistant professor of EECS, said he had to prevent several students from taking the Microcomputer Project Laboratory (6.115) this term because of equipment limitations. "My impression is that the faculty and resources [of EECS] are not increasing with the student body," Muscici said.

"We can support about 35 people a term," he said. "We just can't do it at all."

"MIT really does have a smokescreen," Budryk said. "It turned out to be a site representative.

"In places like West Roxbury or Dorchester, where the students were more tolerant of their neighbors' problems, the question is, where are the students?"

"It has been making those tensions for the longest period of time. It's not just a matter of sitting with any people in the city of Boston," Flynn said.

"I think he better get himself and his fraternity brothers for the noise when we get the complaints," Sherrerd said. 

"Annotating, a lot of times our people are making a lot of noise when we get the complaint," Sherrerd said. "Quite honestly, we blame the noise on the MIT students.

Biogen will test newly developed interferon

By Harold Stern

Biogen, a Cambridge-based pharmaceutical company, announced it has begun the first tests of gamma interferon, a drug produced through use of recombinant DNA on humans in Switzerland.

The company will use volunteers to determine the effectiveness of the drug and to find any possible side effects. The volunteers will be people who have had all the normal treatments for cancer, Feinstein said.

"We must make sure it's non-toxic, and we must prove that the drug helps," he continued.

Later tests will determine proper dosages, and further studies will attempt to give additional information about the effectiveness and safety of the new drug, Feinstein said. The tests will take approximately three to four years to complete, and the approval of national regulatory agencies will take another year, he said.

Rich Kennen, a spokesman for Cambridge Mayor Alfred E. Vellucci's office, explained that Biogen is regulated by the city. "They can't do anything until they go to the CBC. They must explain the type of research to be done, and the city has the right to inspect the facilities," Kennen said, however, he was unsure whether any inspections have actually been made.

All salaries and expenses of the staff of the CBC will be paid by the institutions holding permits under the DNA technology ordinance.

Biogen recently began tests on a new cancer-inhibiting drug.

"We must make sure it's non-toxic, and we must prove that the drug helps," he continued.

Later tests will determine proper dosages, and further studies will attempt to give additional information about the effectiveness and safety of the new drug, Feinstein said. The tests will take approximately three to four years to complete, and the approval of national regulatory agencies will take another year, he said.

Reagan orders a reduction of American forces in Grenada — Defense Secretary Casper Weinberger reported "all hostilities have ceased" in Grenada and ordered a reduction in US forces there beginning next week. About 5000 American troops are presently on the island, but Weinberger gave no indication of how many would leave. The Pentagon reported a total of 18 Americans killed and 91 wounded in the recent fighting on the island. The United Nations General Assembly, approved 108-9, a resolution calling for the withdrawal of all foreign forces in Grenada. Cuba's ambassador to Grenada has refused to leave the island despite an order for his expulsion from Grenada's governor general. Thirty-seven Cubans and two Grenadians are inside the embassy which is surrounded by American forces. Deputy Secretary of State Kenneth Dam released data Wednesday from intelligence information which he claimed indicated the Soviet Union, Cuba, and North Korea were planning to give almost $38 million in arms to Cubans and two Grenadians are inside the embassy which is surrounded by American forces. Nation

Day is honored with national holiday — President Reagan signed a bill Wednesday creating a national holiday honoring the late Dr. Martin Luther King Jr. Reagan had originally opposed the legislation but signed the bill after it received overwhelming support in the House of Representatives and the Senate. Voting Monday in January will be a national holiday starting in 1986.

Weather

Today will negate Poland's debt — The United States will join other Western nations in renegotiating part of Poland's $25 billion debt, the White House announced Wednesday. President Reagan had originally pledged to renegotiate the debt. The Administration noted there have been "very modest improvements in the human rights situation" in Poland, but "very serious problems still remain." Discussions will also begin on lifting the ban on Polish fishing boats in US territorial waters.

Weather

Today will be windy and possibly snowy. The low temperature tonight will drop into the upper 30s, and tomorrow will bring more wind and a high temperature of 40 degrees.

**Reject Nuclear Free Cambridge Act**

Cambridge residents must uphold the right of free research by voting against the Nuclear Free Cambridge Act in city elections Tuesday. The act, under the pretense of limiting nuclear weaponry, would restrict free thought and expression in the city, and at the universities in the city. The community must oppose this act, for it threatens the freedom of MIT and, more importantly, the rights guaranteed by the Constitution.

The referendum is an improper response to a very pressing problem. The proliferation of nuclear weaponry must be controlled to ensure the safety of all people on this planet, but the solution must not be in restricting the right to pursue research which might further the production of those weapons.

Exclusionary clause in the referendum may exempt research at MIT and Harvard from the act. The very presence of such a clause illustrates the act’s weakness. Any such kind of varied interpretation cannot properly serve the interests of the community, including its proponents.

The United States prides itself on its attempts to allay concerns of special interest groups without individual rights, an accomplishment of which few other countries can boast. Respect for the freedom of the individual is of paramount importance, even when the consequences are as drastic as those of nuclear war. Individuals' freedom to research must not be revoked solely because of the consequences of the research made by Draper.

The act would be unconstitutional, were it to pass, both due to its wording and its implications. Residents of Cambridge, by supporting the act, would endorse the violation of constitutional rights. Those in favor of nuclear disarmament must act now, before the act is funded.

The MIT community — students, and members of the faculty, staff, and administration of the Institute — represents a substantial block of voters in Cambridge. The referendum requires support of one-third of registered voters, and one-half of these voting. The community must exercise its right to vote and prevent the Nuclear Free Cambridge Act from becoming law.

**Complain to Gray about benefits fee**

President Paul E. Gray ’54 holds regular open office hours to allow discussion of MIT policy with the members of the community. Students must take advantage of this time Monday, between 2 p.m. and 3:30 p.m., by expressing to Gray their collective disappointment that he has refused to exempt student activity fees from the burden of contributing an amount equal to 33.9 percent of their student payrolls to the MIT employee benefit fund.

The requirement is detrimental to student activities. It is in no way defined as a legitimate MIT employee benefit; Draper Institute graduates, who will bear most of the burden while deriving none of the benefits. The Institute will assume students accept the requirement unconditionally; however, we believe there are concerns which require attention. Students, whether or not members of student activities, must act to preserve the well-being of activities, which are so vital to life at MIT.

Gray has opened his office to learn the interests and concerns of community members; they must, in response, take full advantage of his offer and ensure the continued livelihood of student activities.

If you cannot get an appointment, stop by the president's office anyway. Sit down in the reception area and write Gray, advantage of his offer and ensure the continued livelihood of student activities, whether or not members of student activities, must act to preserve the well-being of activities, which are so vital to life at MIT.

Grey: "I went to college at Tufts, in Medford, where many students disliked the local residents. There we were, infusing the community with the art, and all those facilities, and they hated us simply for our presence, it seemed. We decided they were provincial and ignorant. Townies, we called them.

Now the townies watched us move out, pad out for a few years, raise hell in their neighborhood, and then blow out of town in Dad's car with a B.A. stuffed in the trunk. Snouts, they called us. I'm afraid that in my four years at Tufts, I did not break down these barriers. Relations with the neighbors were bad, except for when either of us got drunk, and then they were very bad.

Because students and working-class people often come from different backgrounds, living together will cause problems; that can be predicted. The difference in how these problems come up, and they are coming up now in Cambridge.

Cambridge residents will soon vote on a referendum to ban, within the city, research or evaluation that promotes nuclear weapons production. Now I don't care what you think of this proposal, or of the freeze movement, or of local government's proper role in shaping foreign policy. Two groups lead the fight on these issues, and they each have a dozen arguments supporting their position. For the ban is Mobilization for Survival and against the ban is Citizens Against Research Bans.

I am concerned that a conflict I watched for four years is affecting this campaign: Students and young people largely support the ban while older and working-class people largely oppose it. Sure, there are exceptions, but there is a general pattern here, and that is because many students are unaware that in this case, jobs are at stake.

If the act passes, and if it stands, up to a year, Draper Lab will move. Draper employs lots of people, and those people are upset because they might lose their jobs. Other companies may lose some good people.

So at the debate I attended on this issue, two weeks ago at the Harrington School, there was a sentiment full of self-pity. They were all from Draper, as they didn't want to lose their jobs. They did not want to discuss issues. They did not care about a nuclear freeze, so they wanted only to know as soon as possible who had the right to decide where the cold and could not work.

That night the Mobilizers for Survival were sneaky-like. Aren't the Draper employees fed up? Didn't they want to do more useful work? And isn't it clear where the cold and could not work? That night the Mobilizers for Survival were sneaky-like. Aren't the Draper employees fed up? Didn't they want to do more useful work? And isn't it clear where the cold and could not work? Stop nuclear war

To the Editor:

As a member of the greater MIT high-tech community, I resist any pressure to move the Nuclear Laboratory to Draper Labs. The facility contains significant computing facilities, creative scientists and knowledgeable engineers. This know-how is a credit to Cambridge and the capabilities of human-kind.

Flexible tools such as those at Draper can be used for many purposes. Sadly, influential forces in our society want Draper to use its tools to develop weapons to harm people. Due to our complex global arms race, the increase in number and “effectiveness” of weapons increases the likelihood that the weapons will be used. By whom and against whom?

The United States has a policy to give away weapons. It has become known to arm both sides of conflicts (i.e., the Mideast). The weapons developed by Draper in 1983 will be used by the US military, to arm both sides of conflicts, and by the current President, to give them to a few years after that.

Countries desiring arms are likely to be unstable. Weapons are inherited, often without the choice of the original owner. Thus, the weapons developer, manufacturer, and initial distributor have little control over whom the end user will be. Consider Iran over the last 10 years, or Uganda.

Draper is developing weapons - which may be used against Draper, or at least weapons that will provoke the use of similar weapons against the country that Draper lives in. Draper could be thought of as a focal point of a society that is striving to invent “better” methods of committing suicide.

The Nuclear-Free Cambridge Act is not aimed at forcing Draper to move. It is aimed at improving civilization by redirecting our resources from destructive to productive ends. I would like to think that the weapons developer, manufacturer, and initial distributor have little control over whom the end user will be. Consider Iran over the last 10 years, or Uganda.

I would like to think that the weapons developer, manufacturer, and initial distributor have little control over whom the end user will be. Consider Iran over the last 10 years, or Uganda.

Draper is developing weapons which may be used against Draper, or at least weapons that will provoke the use of similar weapons against the country that Draper lives in. Draper could be thought of as a focal point of a society that is striving to invent “better” methods of committing suicide.
The day of the United States-led invasion of Grenada, the posters of a protest posted photocopies of The Boston Globe report of the action, together with the time after which Grenada became an independent country, after which Grenada became an independent country, after which Grenada became an independent country, after which Grenada became an independent country, after which Grenada became an independent country,
March of 1979 to 1982, the end of the first phase of the literacy program, over a million and a half people were taught to read and write. The primary reason for this invasion was to destroy the Grecian revolution. US troops overran an almost defenseless country, bombed a civilian mental hospital, killing 17-27 people, broke several treaties and the US constitution. Where the rest of us would have had, so one knows, it is ironic that our government, strongly condemned it, yet Reagan and Carter, never recognized Bishop's authority and rejected his attempts at negotiations with the United States. What is certain, however, is that the United States has absolutely no right to interfere in Grenada affairs. This invasion is one of many. Numerous American officials are worried, with good reason, that they are next.

**US attack mirrors historic pattern of aggression**

March of 1979 to 1982, the end of the first phase of the literacy program, over a million and a half people were taught to read and write. The primary reason for this invasion was to destroy the Grenadian revolution. US troops overran an almost defenseless country, bombed a civilian mental hospital, killing 17-27 people, broke several treaties and the US constitution. Where the rest of us would have had, so one knows, it is ironic that our government, strongly condemned it, yet Reagan and Carter, never recognized Bishop's authority and rejected his attempts at negotiations with the United States. GA sends letter to Governor Dukakis

By Ellen L. Spero

The Undergraduate Association General Assembly unanimously decided last night to send a letter to Massachusetts Gov. Michael S. Dukakis requesting he delay action on a bill to take away state financial aid from those students who have not registered for the draft.

The legislation, Massachusetts bill 30-7A, is an extension of the Solomon Amendment, which denies federal financial aid to draft non-registrants.

“We urge the governor not to take action on the bill until the federal courts have determined the constitutionality of similar legislation at the federal level,” the motion stated.

The US Supreme Court is presently considering the constitutionality of the Solomon Amendment, Dukakis has until Nov. 12 to sign the bill into law.

The General Assembly also endorsed a letter written by Undergraduate Association President Michael P. Witt ’84 to Gray expressing, “disappointment at the institute’s decision to bill student activities for a portion of the employee benefit fund.”

“It seems unreasonable and unjust for undergraduates and graduate students to be coerced into helping to fund graduate and research programs,” the letter stated. “…especially when their expected contribution, though insignificant in the total picture, is so vitally important to the student organizations.”

“I urge you to consider this matter and then forgive this surcharge for all student activities,” Witt concluded.

The General Assembly debated a proposal to have the MIT community vote whether or not they favor the showing of pornography on campus. The proposers of the referendum, Ishai Nir ’85, member at large of the Executive Committee of the General Assembly, and James A. MacStravic ’84, said the referendum would be a “vehicle for obtaining community standards on pornography.”

Steven E. Barber ’83, chairman of the Student Committee on Educational Policy, said actions to reduce the overcrowding in the Department of Electrical Engineering and Computer Science will be taken by MIT before the fall of 1984.

Possibilities considered by the Faculty Committee of Educational Policy include having people apply to a specific department when entering MIT, choosing students for different departments based upon their freshmen year performance, and reviewing the records of sophomores to allow them to remain in various departments, according to Barber.

Hey, MIT!

We Don’t Think You Can Do It!

Do What?

Solve Sumthing, the diabolical magic square puzzle.

There are four possible solutions to this compelling puzzle. They range from Simple, which a freshman should be able to handle, to Impossible, which is recommended for seniors, grad students and alumni.

Take the challenge! And let us know how you do.

Please send me Sumthing.

Microsoft®

Microsoft® develops the leading edge in microcomputer systems software. Our BASIC is world renowned. Our XENIX® OS, the microcomputer adaptation of the UNIX® OS, has computer companies and others clamoring at the bit. We design state-of-the-art system software.

We need programmers to work on Operating Systems, Compilers (FORTRAN, COBOL, Pascal, BASIC, C), Word Processing, Data Base Management Systems, Graphics and more.

Our OEM customer base is a Who’s Who of the hardware business (IBM, Apple, Radio Shack, Intertel, Tektronix). As new systems like the IBM® Personal Computer and new processors like the 68000™ are developed, Microsoft’s programmers get their hands on the machines before they go into production.

So your hardware suggestions and software innovations during B & D become part of the computers of the future.

Microsoft provides the best systems programming work environment.

- all the high-level hardware (DEC, 2060, two 11 70’s, and VAX 11 750 development systems) and the software development tools you’ll need, in a
- small company with lots of involvement and sharing of ideas and methods where
- you can develop your full potential.

And, Microsoft is still in the

- major cultural, sports, social, and commercial activities in Seattle, just fifteen minutes away.

We are looking for outstanding programmers—those with intelligence, drive, and a commitment to excellence.

We want programmers who
will advance The Standard in microcomputer software.

Microsoft offers an exceptional compensation and benefits package.

We will be interviewing on campus
Monday, November 7, 1983.
Please contact your career placement office for schedule information.

Rules for The Tech’s Photo and Essay Contests

Photo Contest

- Black-and-white prints only (any size).
- Open to all members of the MIT community.
- Limit three entries per person.
- Entries must not have been published elsewhere.
- Entries must be received in The Tech’s offices, Student Center Room 483, before midnight, November 30.
- All entries will become the property of The Tech, and will not be returned. The Tech reserves all publication rights to winning entries.

Essay Contest

- Essays shall be on the topic “1984”.
- Open to all members of the MIT community.
- Entries must be typed, double-spaced, on 8½-by-11-inch paper, and between 500 and 1000 words in length.
- Entries must not have been published elsewhere.
- Entries must be received in The Tech’s offices, Student Center Room 483, before midnight, November 30.
- All entries will become the property of The Tech, and will not be returned. The Tech reserves all publication rights to entries.

A total of $500 in Coop gift certificates will be awarded. Prizes furnished in part by the Harvard Cooperative Society.
Flynn and King debate

(Continued from page 1)
not understand what you mean when you say the legislature gives you a windfall, and then to say what the spending priorities are. "I've established employment opportunities and development, both human and economic, as the places where I want to put the additional money that would come from the windfall," he said. He would also develop youth training programs, he said.

Flynn against payroll tax
Flynn again criticized King's proposed payroll tax on businesses in the metropolitan area. "We are having problems right now with development in our neighborhoods," he said. Business would "worry" to operate outside Boston should the city impose a payroll tax. "A payroll tax is a regressive tax," Flynn said.

To cure the state legislature to approve the payroll tax and the MBTA takeover, King said, he would form a "coalition" with "legislators and people from other cities and towns in the region. It's in their interest to get the MBTA off of their back — because it is a drain on their fiscal affairs," he said. His coalition would approach the legislature with a "good cross-section of people.

Should the legislature reject the proposals, King said he could still rely on an additional $30 million in aid to Boston from Massachusetts. The new mayor must be "fiscally responsible" because many budget cuts would be necessary, he said.

**Course VI overcrowded**

(Continued from page 1)

ig Donna R. Savicki: "Even if we packed the council into 10 rooms, they would have a hard time finding the manpower. Staffing is not a huge problem."

"I feel that there is a strong sense that something needs to be done by next year, but not necessarily any long-term plan," Lombardi said.

The forum will be held Tuesday, Nov. 8, in 26-100 from 4 p.m. to 6 p.m.

Tom Wolfe at his best

Tom Wolfe has been a controversial figure in the world of writers and journalists. He is known for his unique writing style and his ability to capture the essence of American culture. In his work, he often explores themes of consumerism, technology, and the changing American landscape.

A FREE Pair of MOVIE tickets

to the first twenty people who purchase this book and mention this ad. "The Right Stuff," a compelling book about the seven men who pioneered the space program and redefined concepts of courage and patriotism.

King claimed earlier in the debate that as director of the MIT Community Fellows Program he gained much experience in "running and managing programs" and balancing a budget. "My opponent, Mr. Flynn, doesn't have any of that kind of experience."

King then pointed out that the Boston City Council had defeated the budget cut King proposed. "I don't think that that indicates an ability to handle a fiscal situation in a way that is credible," he said.

Flynn countered, "My record is very, very progressive, and it's very, very clear I'm a person who can get things done, work with coalitions."

Flynn said he "was the only candidate for mayor to submit a comprehensive tax reform package in the state legislature. That package included a 15 percent parking excise tax, which would raise $12 to $15 million, and a 2.5 percent increase in the hotel-motel tax, which would raise another $2 to $4 million."

"Those taxes would not put a further burden on the taxpayers of the city of Boston," Flynn said.

**Courses overcrowded**

Flynn also had harsh words for the tax-exempt institutions which occupy 47 percent of Boston land. "They're not paying taxes in any significant way to the people of the city. Why, at least, can't they be making in-lieu-of contributions?"

"Those universities and those colleges, those hospitals, ought to be participating with the city administration, with the people of the city to help out on the neighborhood community boards, centers, to help out in our public schools," Flynn said. King would form "groups similar to local school boards to discuss the placement of police and firemen in the city.

When Mayor Kevin H. White spoke at his best over the zoning boards," he said.

"I feel that there is a strong sense that something needs to be done by next year, but not necessarily any long-term plan."

"I feel that there is a strong sense that something needs to be done by next year, but not necessarily any long-term plan."

King agreed with King's concerns. "I would like to see people from our neighborhoods serving on the zoning boards," he said. "It would be very productive for this city to have people from the neighborhoods serving on those agencies."

King would offer Flynn a position in his administration, he said. "If he's able to meet the qualifications and criteria for the job, King had previously said, he would form a panel of neighborhood and business representatives to screen applicants for city offices."

Should a victorious Flynn offer Flynn a position, King said he would accept, "assuming I could meet the qualifications for that job. I'm not sure that that is a thing that I would do."

Cambridge councilors discuss issues

(Continued from page 2)

better for MIT and the MIT stu-
dents."

Clinton opposes the nuclear refer-
dendum, "For ten years we tried to get jobs into Kendall square and now these same peo-
ple are trying to get this referen-
dum passed. You hear that we have to send a signal to Wash-
ington," Clinton said, "We already
had a referendum on that. What good is it going to do to take nu-
clear research out of Cambridge
when it's still in Boston, Somer-
setville and other places."

Incumbent Councilman Thom-
son W. Duseky bases his campaign
"on the preservation of neighbor-
hoods...but back in 1971 we were
talking about preserving neigh-
borhoods when it wasn't even fa-
sible." He favors development - pro-
per development, "...although some peo-
ple are considered by some to be too
conservative I am in some cases
my own destiny.'" He opposes the
Caragianes referendum. "I am in some cases
interested in working more
closely with the state to channel
some of the problems caused by
the competition between
cities," in order to "alleviate
the problems created by
proposition 21."

Duseky said that Councilman
Francis H. Duchay is "very con-
cerned with the financial aspects
of the city government." He is "in-
terested in working more
closely with the state to channel
some of the money back to
the cities," in order to "allay some of the problems caused by
proposition 21." Duchay noted
53% of Cambridge land is tax
exempt, and since the city pays
primarily on property taxes for
revenues, this has caused funding
problems.

Duchay emphasized his con-
cern with the environment and
education. He sees himself as
"somewhat of a consensus build-
er on the Council," and he is not
supporting the Nuclear Free
Cambridge referendum.

Vincenzo A. Vellucci says he is "run-
ing primarily as a taxpayer's ad-
nocate." He noted city govern-
ment spending has been rising
much faster than inflation in re-
cent years, while "city services
have not improved at all." He is
"certain that services can be im-
proved at no additional cost to the
taxpayer."

Dowling has been "active in
politics for 20 years, but this is
the first time I've run [for the
city council]." He has "come out
strongly against the Nuclear Free
Referendum. I feel it's absolutely
unfair and even scary that you
are the community to be able to
vote to keep that kind of basic
research." He opposes the
Nuclear Free Cambridge referen-
dum.

Incumbent council member
Brenda Graham has "been on the
council for 12 years and has
worked on housing, employment,
subsidized housing, and review
action." She sees herself as a
"strong advocate of the elderly,
the working poor, the unem-
ployed, the underemployed, peo-
ple of color, and women."

Graham is very concerned with
"child care," citizen participation
in the government, and a budget
that provides "quality human ser-
vice programs." She was one of
the petitioners to put the Nu-
clear Free Cambridge referen-
dum on the ballot.

Incumbent Council member
David E. Sullivan said he feels
"the city of Cambridge needs a fairer
housing policy." Housing is the
most important issue for the city
council, and we have to look for
ways to improve low and moder-
ate income housing. It has no
position on the Nuclear Free
Cambridge referendum.

Duchay thinks Cambridge col-
leges impede too much on hous-
ing. "The universites have to be
contained," he said. He feels the
"Simplex" referendum should contain a
number of housing units for peo-
ple of low and moderate in-
come. Since the Caragianes posi-
tion which MIT has supported
does not guarantee any housing on
the site, I do not support that
position."

Incumbent Council member
Saundra Collins has "been on the
council for 12 years and has
worked on housing, employment,
subsidized housing, and review
action." She sees herself as a
"strong advocate of the elderly,
the working poor, the unem-
ployed, the underemployed, peo-
ple of color, and women."

Collins is very concerned with
child care," citizen participation
in the government, and a budget
that provides "quality human ser-
vice programs." She was one of
the petitioners to put the Nu-
clear Free Cambridge referen-
dum on the ballot.

Incumbent Council member
David E. Sullivan said he feels
"the most important issue is
keeping Cambridge a place where
people of all incomes can afford
to live." He stresses the need to
"keep controls on rent and con-
dominium conversion to allow a
diverse group of people to have
the opportunity to live in Cambridge.

Sulllives says "I think I've been the
leader on the council in support-
ing these issues. He take no
position on the nuclear referen-
dum. 'I am urging people to vote
their conscience,' he said.

Cambridge Mayor Alfred E.
Velucci said he is concerned
"with the poor people of this city.
I am concerned with the people
with no place to live. I'm con-
cerned with the big square that
drove all the housing out of
Cambridge. He is worried about
elderly housing and public educa-
tion. Velucci said he is "concerned
with the competition between
MIT, Harvard, and the rich peo-
ple of the city with the poor. It's
a war between the haves and the
have-nots." He refused to state a
position on the nuclear referen-
dum. "I'm so busy helping the
people, I don't have time to deal
with the world affairs.

Alice Wolf thinks the most im-
portant campaign issues are de-
velopment and the city budget.
She wants to see more commen-
tial development and the city budget
doesn't signifi-
cantly change the city and that it
provides jobs for city develop-
ments. She "hopes to be a cata-
lyst in resolving the" Simplex situ-
ation. "which hasn't really
taken off in ten years."

This is "the most important issue and "establish-
ing an equitable state aid formu-
lum," according to Michael LaRosa,
"One of the main ideas that I pro-
posed to the governor and state
legislators is a plan which would
reimburse cities for revenues lost
from tax exemp land." She sup-
ports the nuclear referendum.

Winston C. Corde, Alfred W.
Lofius, Leonard A. Russell, Wal-
ter J. Sullivan, and David Wylie
could not be reached for com-
mment.

School Committee Candidates
Five incumbents are running for re-election as six-member
Cambridge school committee: Horowitz S. Niles, Alfred B.
Famini, Glenn Stephen Koocher, Joseph E. Maynard, and Jane F.
Sullivan.

The other eleven candidates are:
David B. Connolly, France H.
Cooper, David Estin, Anthony F.
Gorzano, David J. Helson, David P.
Kennedy, Daniel C. Le-
carr, Rena L. Libb, Ellen M.
McBride, Therri P. Reardon, Timo-
thy J. Toomey, Jr.

END THE POLITICS OF POLARIZATION

Paid for by the Committee to Elect Richard Branson to the Cambridge City Council, 1000 Massachusetts Avenue, Cambridge, MA 02140.
John Hudson, Chairman, Jane Hardy, Treasurer.
Telephone: 497-1050

GIVE TO THE AMERICAN CANCER SOCIETY.

Richard Branson's
10 Point Program for Cambridge

Fair and Sensible Housing Laws
End discrimination against many condomini-

ors owners who are predatory, by city
ordinances, from living in their own homes.

Allow current tenants in "hybrid condomini-

ums" to buy their own units while protecting tenants who choose to remain tenants.

Permit temporary rent of your own home free of
rent control.

Target rent control protective to the elderly
and to the low and moderate income people for
whom they were intended.

Equitable and Timely Assessments
Establish a 10% residential exemption on
property taxes to mitigate the impact of 100%
valuation.

Develop a mechanism to keep property value
assessments in line with the market.

Ensure that the City assessors use accurate
formulas to guarantee homeowners fair
assessments.

Efficient Use of City Income
Develop annual goals and productivity standards for
city agencies.

Structural Reform of City Government
Publicize vacancies on city boards to encourage participation in city affairs. Limit service on city boards to
definite terms.

Place the City Manager under contract to free him/her from undue political influence.

Converssion Building on Key Issues
- Reinforce a city-wide commitment to civil rights for all.
- End the politics of polarization and emphasize common goals.
- Promote openness for diverse viewpoints and those who oppose them.

Affirmative City Response to Women's Issues
- Service city workers' insurance and pension programs that discriminate on the basis of sex.
- Implement job sharing, part-time employment, and flexible hours to accommodate families.
- Increase opportunities for low-cost day care centers.

Effective Use of Our Police
- Target police patrols to high crime areas- including use of walking patrols.
- Have officers target dangerous and drunk
- Drivers.
- Promote city-wide coordination of neighbor-
hood crime-watch programs with the police department.
- Make our open spaces and park areas safe to
walk at night.

Public Health Programs
- Reduce pollution in city water to alleviate a long-term health risk.
- Tighten city amounting controls and manage-
- ment to reduce deficits at Cambridge Hospital.

Education and the Schools
- Target goals for basic skills in our public

- schools.
- Seek a long-term commitment of the city's colleges and universities to improve public

- education.

Small Business
- Create a supportive climate within the public

- sector to encourage and nurture take care as
- a mechanism of innovation, to create the new jobs, ideas, products, and services that benefit our community at large.
Volleyball wins
(Continued from page 16)

two points, raising the score to 14-5. Springfield took one more point before MIT captured the game, 15-6, and the match, 3-0, on a Cantu spike.

Although Engineer head coach Karyn Altman '78 said her team "blocked fast and served well," a style which "carried them through the match," she was disappointed that "Springfield did not test our defense — they weren't keeping their shots in... ."

Springfield was one of only three teams to beat the Engineers during the regular season last year.
The Engineers' next home match is Saturday, when MIT will host the Massachusetts Association for Intercollegiate Athletics for Women (MAIAW) Championships starting at 9 a.m. in Rockwell Cage.

Join us for a morning jog

On Tuesday and Wednesday, November 8th and 9th, representatives of General Electric will be on your campus.

Our Technical Recruiters would like you to join them for a morning hour jog. We'll begin at 77 Massachusetts Avenue at 8:30 a.m. each day, jog down Memorial Drive to the Boston U. Bridge, cross over to Storrow Drive and head down to the Longfellow Bridge, cross back over to Memorial Drive and finish up our 5.4 mile jog back at 77 Massachusetts Avenue. Some our our managers will turn back up Massachusetts Avenue at the Harvard Bridge for a 2.6 mile run.

If you're interested in meeting our people in a completely informal setting... put your track shoes on and join us. If for some reason you can't make it... you're still curled up in bed... or with a good textbook... just remember your interview with General Electric.

“David Sullivan is the kind of person who makes politics worthwhile.”
—John Kenneth Galbraith

A graduate of MIT and Harvard Law School, David Sullivan first got involved in Cambridge politics when an Election Commissioner refused to let him register to vote because he was a student. David went to court and succeeded in winning for Cambridge students the right to vote.

In the four years he has been on the Cambridge City Council, David Sullivan has brought a fresh perspective to problems which have long plagued Cambridge as a home for many types of people. He has provided crucial leadership in preserving the economic, racial and ethnic diversity of the city. He has fought for rent control, neighborhood protection, job creation, progressive government, and fair taxation.

In the last two elections, student support has been crucial in David Sullivan's victories. Vote #1 for David Sullivan. November 8: Polls are open 8am-8pm.

Last Week's Results
Assumption 23, Fitchburg State 9
MIT 16, Bentley 13
Stonehill 34, UMass-Boston 22
Worcester State 16, Providence 5
Roger Williams defeated Hartford by forfeit.

This Week's Games
Fitchburg State at MIT, 1:00 p.m.
Providence at Stonehill, 1:30 p.m.

General Electric
By Dan Orange

The varsity rifle team opened its season when shotved the en-
tire New England Collegiate Rifle League in match action last
weekend. The team got off to a strong start by defeating all six
opposing teams.

MIT posted a score of 2191, topping Coast Guard (201),
Norwich (1971), Westworth (204), Dartmouth (204), Nor-
theastern (1952) and Maine (1948). Eight people from each
team shoot and the team score is ar-
rived at by adding the top four
scores.

MIT was once again led by
CLiff Fikev '85, who scored a 560
out of a possible 600. Team cap-
tain Bob Colley '85 shot a strong
560, followed closely by freshman
Mark Foringer (345). Felixa
Goldenberg '85 shot her best
score ever (337) to complete the
top four.

The Engineers also displayed
exceptional depth, with seven of
the eight shooters posting scores
above 500. Using this match as
an indicator, the team hopes to
continue their success in league
competition for the second year in a
row.

Update

Women's soccer wins

The women's soccer club
blanked Endicott College 1-0
Monday afternoon on Briggs
Field. Marie Bump '87 scored an
assist from Jeri Ikeda '87 to score
the lone MIT goal. The club
closes its season tonight when it
hosts the Worcester Women's
Club at 7 p.m. on Briggs Field.

Preview Six rugby clubs play

Six teams will participate Sat-
urday in the MIT rugby club's
annual fall tournament on Briggs
Field. Norwich University, Fra-
ingham State, the Thames Riv-
er (Conn.) RFC, the Boson
Gentlemen, and the Old Gold
RFC will provide the competi-
tion. Last year MIT lost to Nor-
wich by three points in the final.

The games are scheduled to be-
gin at 10:15 a.m., with the final
scheduled for 3 p.m.

Women's Volleyball hosts AIAW tourney

MIT will host the Massachu-
setts Association for Intercolle-
giate Athletics for Women (AIAW)
Volleyball Tournament Saturday in Rockwell Cage. 18
teams in three divisions will be
competing. The Engineers, the
top-seeded Class A team, have
maintained a strong start by de-
feating all six opposing teams
this weekend and looking for its
collegiate best of 25:36.

HARVARD
COOPERATIVE
SOCIETY
The women's volleyball team added Springfield College to its growing list of victims Tuesday night, defeating the visitors in a quick match before a large, supportive crowd in duPont. The Engineers raised their record to 32-0 with a 15-3, 15-7, 15-6 sweep of their NCAA Division II rivals.

MIT dominated the first game in the best-of-five match, holding Springfield to just three points. The Engineers jumped out to a 7-0 lead with Michelle Heng '84 and Janette Kauth '85 serving for four and three points, respectively. Springfield came back with three of its own, one the result of an MIT player's hitting the net. The Engineers came right back as Jennifer Smith '86 served, matching Springfield's three points to raise the score to 10-3. With the help of Lori Cantu '85 at the net, Barbara Wesslund '84 brought the game home, serving five straight points, despite Springfield's attempt to break her momentum by calling a time out at 12-3.

With a commanding victory under its belt, MIT jumped out to a 5-1 lead in game two on the serving of Anella Munro '85. Springfield called a time out, however, regrouped, and broke MIT's momentum. Smith added one more point, but Springfield answered with four of its own, mostly on MIT mistakes.

The teams then traded serves, the Engineers winning two points to Springfield's one. Kauth broke the game open with the score 8-4, serving for three, highlighted by a commanding Munro spike on the third point. Springfield again called time with the score 11-6, but Kauth came out of the break to score two more points before losing the serve. Springfield mustered only a point before Munro served the final two, the Engineers winning 15-7 on a Julie Koster '85 spike.

The third game started out slowly for the Engineers, with Springfield handling a series of Wesslund spikes. Munro was able to serve three points, but Springfield answered with three of its own. Jennifer Smith entered the game with the score tied at 3, serving for three points thanks to strong net performances by Cantu and Amy Smith '84. Wesslund added three more points, raising the score to 10-3, but Springfield answered with two, one on a vicious spike and the other when MIT hit the net. Heng and Rachel Chin '87, with the assistance of Carol Morris '87 at the net, each served for the final two (Please turn to page 14).

Spikes from Lori Cantu '85 fell through the Springfield College defense easily to help MIT defeat Springfield on Tuesday night at duPont. MIT remains the only undefeated team in the nation with an impressive 32-0 record.
