Leaders object to Witt's amendment

By Thomas F. Hoang

Leaders of several student government activities whose groups would be affected by passage of an amendment to the Undergraduate Association Constitution (UAC) are awaiting a vote by students to support the basic tenets of the proposed amendment, but criticize its structure.

The amendment describes a joint committee between a new UA council and the Graduate Student Council (GSC). The undergraduates will vote on the amendment tomorrow.

The joint committee would "provide student organizations and activities, and be responsible for the recognition and annual review of all student organizations," the proposed charter states. This duty currently falls under the domains of the Association of Student Activities (ASA) and the Graduate Student Council (GSC).

The joint committee would not, however, be allocated space or funding, according to David W. Jensen, G, president of GSC. Jensen supports "the principle of a joint committee in general," he said. "The specifics are yet to be debated," he added.

The GSC would be able to vote on the charter, even if the item passed, he explained. Ratification of the charter requires a two-thirds majority vote by the GSC. Marianne K. Libby '85, chair-elect of the UA Finance Board said, "This amendment should not be passed because it would not necessarily be a bad thing."

"As long as they're taking this step," he said, "they should take a step toward consolidating activities funding in a separate committee."

Jensen has encountered problems because his structure lacks a clear definition. "The student code of most [MIT student organizations] is not in line with some central organization of activities," Const. said. "But to attack a problem going directly to another group."

Other issues activities face, such as space reassessment, still need to be addressed, he added.

The student activities board ultimately involves representatives from various committees that would attack these issues. If ASA is... to be expanded, then someone should take over those functions.

Candidates use comic strip in violation of copyright law

By Bart S. Kaliski

Two teams of students seeking the top offices of the Undergraduate Association are displaying campaign posters that violate copyright law. Each team's campaign posters, such as a comic strip "Bloom County," which is owned by the Washington Post Co. Neither team has requested permission to reproduce the material.

David M. Libby '85, an unendorsed candidate for the UA presidency, confirmed Sunday he had not contacted the copyright owner. His campaign was "only the copyright owner," he said. "I really can't think it's a major problem."

Bernard M. Gunther '90, who is running for UA president as a write-in, also said Sunday he did not contact the Washington Post Co. "I had not done actually anything along those lines so far as taking care of that," he said.

Copyright law, contained in Title 17 of the United States Code, gives "exclusive rights of display and reproduction of material in the code," Gunther claimed. Each candidate also expressed doubts that the campaign posters violates copyright law. "We're not doing anything to violate..." Libby said.

"We're not doing anything to violate..." said Gunther. "What's the major thing was..." Libby said. "I was doing direct copies of the actual work and making sure nothing was changed."

He points contain copies of several "Bloom County" strips, each a satire of presidental politicians. Libby's posters change the wording of a comic strip to include MIT "inns.

"Drew Libby's poster is actually a take-off on the actual comme," Gunther said.

Breasted, Gunther claimed, would approve of the posters since they are inspired in much the same manner as his army through his career. He referred to a recent lecture at MIT by Breasted in which the artist discussed "all ties..." pranks.

The campaign posters, nonetheless, include duplication not governed by copyright law. Exemp- tion, according to chapter one of the code, is permitted only for "fair use." Such use depends on "purpose and character" of the use, is allowed to teachers, libraries, and archives reproducing the material for educational purposes and in limited quantities.

Go Go's fail to respond SCC to consider alternate groups

By Ellen L. Spero

The Go Go's have not yet responded to the Student Center Committee's bid to respond Spring Weekend, the committee announced Sunday night. A two-week moratorium on other groups was passed.

The joint committee would instead consider other groups.

Kenneth D. Cornett '86, ASA secretary, said the proposed joint committee's assumption of ASA's responsibilities would "not necessarily be a bad thing."

"As long as they're taking this step," he said, "they should take a step toward consolidating activities funding in a separate committee."

Go Go's has encountered problems because its structure lacks a clear definition. "The student code of most [MIT student organizations] is not in line with some central organization of activities," Const. said. "But to attack a problem going directly to another group."

Other issues activities face, such as space reassessment, still need to be addressed, he added.

The student activities board ultimately involves representatives from various committees that would attack these issues. If ASA is... to be expanded, then someone... should take over those functions.

Meanwhile, we are talking to other agents about finding another band," she said.

In other business, the commitee passed a motion 12-1 to censure Fradd, who was not present at the meeting. "For borrowing the same event and [SCC re- vealed] her voting privileges for one meeting.

Art Gallery will be dedicated April 7

By Edward Whang

The dedication of the Jerome B. Wiesner Student Art Gallery will occur on the evening of April 7. The gallery will be located in what was the East Lounge of the Julius A. Stratton '23 Student Center, and will display the works of MIT groups as well as individuals.

The gallery was a gift from the Class of 1983 and was planned and organized almost exclusively by its founder, according to Andrew M. Eitzenberger '75, Senior Office Assistant at the Student Affairs Office and coordinator for exhibits for the gallery.

Fradd refused comment on the matter, but said the steps through the meeting and returned the same to the office later that night.

Casserale, said committee Chairman James S. Persin III '86, "is a public acknowledge-" (Please turn to page 2)
SCC approves motion to censure member

Contacted from page A1, it's now that a group has been
denounced. A motion to fine the "TARDIS"
was voted by a vote of 26-1.

The Committee did, however,
approve a motion stating that
removal of the name from the office without
committee approval will be noted as
a criminal offense resulting in
local action and expulsion from the
committee.

SCC unanimously approved a
motion to appropriate $250 for
Field Hockey for the two John
W. Smith Mem. Gymnasium
and the Field Office of the John
W. Smith Mem. Student Center.

It also approved a motion to
appropriate $500 for food and
tickets for the Spring Weekend party.

Local

A lucky seven hit the jackpot — Seven people held winning tickets in the $18.2 million Massachusetts Megabucks state lottery drawing Saturday. Each will receive $2.6 million. Four people had claimed their share of the winnings, as of yesterday morning. The Megabucks jackpot was the largest of any state lottery in North American history.

Weather

Warming, but slightly wet — Today will be cloudy and windy, with temperatures in the low to mid 40s. Snow is expected to start in the afternoon and change to rain or sleet in the evening. It will be variably cloudy on Wednesday and fair on Thursday.

Do you like computers? Well, the NUCLEAR ENGINEERING DEPARTMENT invites all freshmen and undesignated sophomores to an OPEN HOUSE Thursday, March 15, 1984 Bush Room, 10-105 1:00-4:00 p.m. Come and see how we use computers, talk to faculty and students, and enjoy ICE CREAM SUNDAES FROM J. P. LICKS
Charles P. Brown

"Offensensitvity" is rampant at MIT

Of course we're all in the condition of being overreactive to acts deemed offensive in society.

At one of the most outstanding engineering schools in the country there is a school Newspaper, a school yearbook, and a school community. We share racist slurs entirely unacceptable and we will refer to it as "schvartzes", among other things.

Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech. Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech.

The new Course 19 graduate major in Cognitive Science offers a formal alternative to Course VI majors who want to learn Artificial Intelligence. In fact, if you want to get involved with computer vision, Course 19 is the place to go. You know a department is doing serious computing when you can take more than half of the restricted and unrestricted electives combined in Course VI, including the famous Structure and Interpretation of Computer Programs (6.001).

And do not worry too much about many of the implications of computer vision are definite right now, because the department is still in the process of deciding which courses should be the sentence. If you consider the subjunctive, this would be the sentence. If you consider the subjunctive, this would be the sentence.

1. It is clear that there is no such thing as "mytacism" which is "excessive speech, written or spoken with excessive emphasis or rhetorical devices, often to the point of being embarrassing or offensive."

2. You go to MIT.

3. Therefore, you are not a human being.

Get psyched for Courses IX, XXIV

Use of the word "schvartzes" was meant as "angry ironic reference"

Right now, potential Course VI majors are contemplating a decision that may change the fabric of education at MIT.

Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech. Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech.

On January 11, 1983, The Tech ran an editorial cartoon showing a gorilla in the zookeepers saying, "We are lucky to get him - he had a football scholarship."

As a professor of Artificial Intelligence, I can think of one; that many of the applications of computer vision are definite right now, because the department is still in the process of deciding which courses should be the sentence. If you consider the subjunctive, this would be the sentence. If you consider the subjunctive, this would be the sentence.

Human beings who go to MIT resolution of urban conflagrations with the Soviet Union.

1. "You will be gone to my grave."

2. You go to MIT.

3. Therefore, you are not a human being.

Feedback

Ms. U is the source of this column's Least Insignificant Bit of Educational Information. Every week here is the LIBEL of Ms. U's in the Course XXIV. She said today, "You know that the title song of the movie Course XXIV is Let's Get Married by Olivia Newton-John-Sartre it was a real classic of linguistics. He was always correcting people's grammar. He came from a polytechnic school so absolutely correct that I can think of one; that many of the applications of computer vision are definite right now, because the department is still in the process of deciding which courses should be the sentence. If you consider the subjunctive, this would be the sentence. If you consider the subjunctive, this would be the sentence.

Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech. Today's column is about computer vision, a philosophy of science, Technology, and the MIT Tech.

Course XXIV has two programs, the first being more traditionally middle-class and metaphysics, which are not so much about how the word "schvartzes" was used as "angry ironic reference."
Pornography dispute is foolish and unwanted

(Continued from page 4)

The president of this engineering school wrote a letter to the editor complaining about this comic. He stated that "I believe that if we had a truly integrated community here — one in which diverse backgrounds were understood, welcomed, valued and shared — that such a cartoon would never be found on the editorial page of The Tech."

There have been many similar incidents during the past few years, including Thursday's "Consequences" Guide to MIT Men, the "MacGregor Deck Incident," and the differing of the Resident Handbook to the administration.

The point is that people on this campus suffer from offensiveness the way people look for things to take offense to, and then overreact to. The solution, therefore, is to take a real look at the people at MIT, from the students to the administration. It is stupid, and, pardon the phrase, offensive.

The Goon incidents are primary examples of this. Implicit in anyone's reaction that these incidents were racism is a fundamental belief that a gorilla is closely related to a black person. When I look at a gorilla I think "gorilla," not "black." For anyone to do otherwise is extremely racist.

When other people think "black" for gorilla, it is their problem. However, they assume I am racist also, and that when I see "gorilla" I mean "black," an assumption which 1 personally find demeaning.

The freshman picturebook for the Class of 1987 contained a picture of "Skywhot," a bizarre cartoon character, who, the book said, was from Puuggaapuug, New York, my hometown. Should I take that to imply that all the people from Puuggaapuug are bizarre and weird? The picturebook also contained Opus, the penguin, a character in the comic strip Bloom County. Does that imply that the Class of 1987 is full of comical penguins?

The problem of offensiveness is evident in the current furor over the registration day film. A group of women complained about the registration day film because they feel it is demeaning to women, and many people think the registration day film should be banned because it is offensive to this minority.

Offensiveness.

The primary argument against these registration films is that they are demeaning to women. This argument is disingenuous.

First, half the audience at these registration films are women, who are demeaning themselves by watching sex in a movie. I suggest that the people who prefer registration day film talk to these women and find out why they prefer to see these films. They may have reasons for watching registration films that are not discrediting to women. "Sadism and Masochism" films and bondage films usually make low-level peevish male fantasies. I, for one, would find those demeaning to men and women and would protest the Literature Committee ever showing them.

The type of pornographic film that L.S.C. does show is fairly straightforward, and after you have seen one or two, boring. After all, sex is a theme with few variations. If the scenes in this movie are demeaning to women, then they are just as demeaning to men. Those who find these movies offensive should not try to regulate my mind.

One can also argue these films serve an educational purpose. They provide the average MIT student an opportunity to see a scene of entertainment that he or she would not otherwise see. I would rather see an X-rated movie and decide I dislike pornography than see it and never form convictions about it one way or the other.

If the protesters are seriously offended by films degrading women, why don't they paint Jane Bond films instead? James Bond is more degrading to women than any pornographic film I have seen on this campus.

This all brings us back to offensiveness. People who suffer from offensiveness are sensitive to being easily offended. These same people assume that everyone else is just as easily offended, and they react accordingly.

Not all of us suffer from offensiveness, but those who do have an easy way to make life difficult for the rest of us. It is good to be sensitive to the plight of others, but some people are not. But perhaps I am just oversensitive to others' oversensitivity.

SAFE DRIVING AND CLEVER THINKING CAN

Earn You Thousands!

Here's a contest where everyone who enters STROH'S ULTIMATE SPRING BREAK ROAD TRIP is upon all registered students and it's FREE! To enter, simply mail us the form below.

For starters, we will send you complete contest information, safe driving tips from automotive safety experts, and those who do manage to make the Swing break survival kit of valuable skin products and discount coupons. This prize will be awarded upon your arrival at Stroh's Spring Break Welcome Center in Daytona Beach. 50 lucky winners each week will also receive a record album by artists like Doobie Ray, The Fixx, Night Ranger, rest of the Righteous Brothers, and others.

Today's Spring Break Survival Kit includes a goody bag of Stroh's Chameleons also give you a $5,000.00. You can also send me your Entry Kit.

One hundred years ago this week

From The Tech, March 12, 1884

Professor William T. Hall: "I am disposed of anything that might lower the standards of the Institute. However, I find that many men, after dances on Friday night, are hardly suited to classes the next morning."

From The Tech editorial:

With the undergraduate tending under the burden of a week of forty-eight hours or more, it is now suggested that all classes be crowded into five days in order to let enterprising students seek more culture and more research. What the Institute needs is not a five-day but an eight-day week. The student has all he can do to carry him through the daily routine, and so learns his lessons as to exam purposes more or less successfully, and in four years takes a degree, still a boy, of larger growth, with litle comprehension of the principles which he has learned and ability to apply them to the solution of the complex problems of practical life.

Either of two directions for self-improvement (the student) might have followed by wise use of an extra two years.

From The Tech, Wednesday, March 9, 1884 (Volume I, No. 9)

Informal canvass on five-day week plan conducted — The plan, now under consideration by the Faculty, involves the suggestion that all classes be concentrated in the first five days of the week, leaving Saturdays free for study and research, as well as cultural development and relaxation.

From the canvass:

"With barely enough strength to carry him through the daily routine, and so learns his lessons as to exam purposes more or less successfully, and in four years takes a degree, still a boy, of larger growth, with little comprehension of the principles which he has learned and ability to apply them to the solution of the complex problems of practical life."

"Either of two directions for self-improvement (the student) might have followed by wise use of an extra two years."

CONSTITUTION REFERENDUM

The following referendum question will appear on Wednesday's ballot. The referendum is binding on the Undergraduate Association. Please read the following questions, as well as the supplementary materials available at the voting booths, before answering the questions:

- **Item #1:** The following shall be inserted in the Undergraduate Association constitution following Section 1.20:
  
  "The Council of Student Representatives shall advise the General Assembly and the Undergraduate Association president on matters concerning the faculty and administration. The council shall consist of the student representatives to all institute student-faculty committees and shall be administered by the UA Nominations Committee. The council shall meet seven times each term, as requested by the UA president, vice president, five council members or the nominations committee."

- **Item #2:** The General Assembly of the Undergraduate Association shall be replaced by the UA Council. The UA Council shall assume all legislative and representative powers now held by the General Assembly. The membership of the United Kingdom shall be as follows:
  
  - one representative from the Non-Resident Student Association
  - one representative per 125 undergraduates from each dormitory
  - one representative per 125 undergraduates at-large from the IntraFraternity Council
  - Conference, four representatives from each of the upper class, elected in the spring UA elections, four freshmen elected early in the fall term.

All references to the General Assembly in the constitution shall be amended to reflect the above changes.

The UA Council shall draw bylaws in accordance with the above changes. Until the 1982 UA elections, the presidents, vice presidents, secretaries, and treasurers of each class shall serve as the class representatives to the UA Council.

- **Item #3:** The charter of the General Assembly - Graduate Student Council shall be adopted by the Undergraduate Assembly. (A vote to adopt the charter is unsuitable for viewing by minors should be permitted to be shown on the MIT campus.)

PORNORPHRDY REFERENDUM

The following referendum question will appear on Wednesday's ballot. The referendum is not binding on the Undergraduate Association.

Do you feel that motion pictures deemed by the Motion Picture Council as unsuitable for viewing by minors should be permitted to be shown on the MIT campus?

WHERE, WHEN TO VOTE

Polls are open from 8:45 a.m. to 6 p.m. in Lobby 10, between Krenke Auditorium and Baker House, at the Great Hall, and at Theda Chi. Should Wednesday's weather be unfavorable, the Great Hall polling booths will be moved to Walker Memorial. The UA Election Commission has not selected an alternate location for the booth near Krenke.

WRITE-IN CANDIDATES

Voters are not restricted to choose among candidates listed on the ballot. A voter may write on the ballot the name of any undergraduate.

Any student is eligible for election to an office. The Election Commission will not require a write-in candidate, before signing office, to sign a statement showing he promises to fulfill the duties of his job.

Write-in candidates statements are not presented here.

Several of the class offices have no candidates. The elected members of the new class councils are responsible for selecting students to fill vacant positions.

Questionnaire

The following questions will accompany the ballots:

1. Have you ever seen a pornographic film?
2. Have you ever seen a pornographic film on the MIT campus?
3. Do you consider pornographic films morally degrading?
4. Do you object to such a "pornographic" film being shown on the MIT campus?
5. Do you consider pornographic films morally degrading?
6. Have you ever viewed an R-rated movie theater or otherwise?
7. Do you consider pornographic films morally degrading?
8. Do you object to such a "pornographic" film being shown on the MIT campus?
9. Do you object to such a film being shown on the MIT campus?
10. Do you consider pornographic films morally degrading?

PREFERENTIAL BALOTTING

Elections for positions with three or more contenders are in this election. Class of 1987 president, vice president, and treasurer will also be elected. This system requires that voters rank the candidates for a position in order of preference.

Counting ballots for such a position may have several rounds. A candidate must receive more than half the votes in a given round to win the election; otherwise, ballots of the weakest-finishing candidate are redistributed. These ballots are assigned to those candidates remaining in the contest according to preferences. The remaining candidate listed highest takes the loser's ballot.

MARCH 13, 1984 UA ELECTION SUPPLEMENT

UNIEERGADUATE ASSOCIATION

PRESIDENT / VICE PRESIDENT

David Libby and Stephanie Scheider

What does the UA do for you? Nothing! (If you think about what the UA does, and the Medicare - an outdoor event on the Walker Plaza - an Undergraduate in the tall is similar to Spring Weekend - and the UA Council - a concert at the same time)

We want our government doing useful, interesting projects rather than getting bogged down in trivial bureaucratic squabbles.

We want student opinion to have a real influence on the administration's decisions. This means that the insti- tute's decisions rather than merely waiting for them after they are made. Effective communication between students, the stu- dent body, and the administration is needed, especially on critical issues such as Course VI overcrowding, need- based admissions, tuition costs, and last- minute cuts.

Experience is vital in dealing with the administration on sensitive and complex issues such as these. Through our involve- ment in activities we have become fami- liar with the system and know how to deal with it.

We want student government to work for you.
UA ELECTION SUPPLEMENT  MARCH 13, 1984

CLASS OF 1984

PRESIDENT
Diane M. Peterson

The President of the graduating class must impress many qualities, including leadership and organizational skills, enthusiasm, willingness to listen to other people, willingness to cooperate, ability to incite enthusiasm in others, knowledge and understanding of what has already been planned and what is still left to be planned, familiarity with the Alumni Association and the Dean for Student Affairs Office, and awareness of what the duties and responsibilities of the job encompass. As current Class Vice President, I have been instrumental in the organization and planning of Senior Week activities already underway. I have made recent contacts with the Alumni Association concerning the duties of a Class President during the five years following graduation, and look forward to working on our fifth reunion and planning numerous events prior to that. I am currently the class liaison to the Athletic Association in selecting an appropriate class gift. Last term I formed a network of personal contacts in each living group who are notified about class events and supply the personal interaction necessary to stimulate suggestions and comments.

As a leader and initiator on campus for three and one-half years, I am experienced in organizing and coordinating both large and small scale events, whether they be an Alpha Pi's dinner for 85 people, Spring Weekend for the entire MIT community, or Senior Week events for 1200 of MIT's finest.

VICE PRESIDENT
Michael D. Battat

Continuing connection between class members, and between our class and the Institute requires an active alumni leadership. The responsibilities of the class officers include maintaining these connections, planning various events, and, ultimately, planning the fifth year reunion.

While at the Institute I have been involved in a number of activities, which have allowed me to exercise my abilities in leadership and organization, as well as participate actively as a member of several committees. I take this interest and activity into mind, as well as the acquaintanceships and friendships I have developed within our class, in deciding to serve as a class officer.

I have spent much of the last four years serving the Institute in various capacities, and I look forward to serving as the Class of 1984 Vice President.

SECRETARY
Hendrikus "Hen" Meerman

Individuals in our class have been involved in many aspects of Institute life; we have not, however, interacted as a group. Before graduation I would like to see us have our own MIT, which has grown to be a great part of each one of us. I anticipate that the Senior Week activities and the pledge program for the class gift will make this possible.

I have served the MIT community as chairman of Social Council, vice-president of my fraternity Sigma Chi, the 1983 TANK Chairman, and an associate advisor. I have enjoyed my stay at MIT because of the friendships I’ve made; I hope to keep in touch with and meet more of you through the position of permanent secretary.

The permanent class secretary is the primary link between us, as alumni, and MIT. Through the “Class Notes” in Technology Review, I hope to keep you close to MIT and to maintain, if not further, our affection for this place and our class members during the next five years.

TREASURER
Lisa C. Tener

As an active member of the class of 1984, I feel that I possess the organizational skills as well as the willingness to work required for the position of class treasurer.

CLASS OF 1985

PRESIDENT
Michael Candan

I believe that our class government should be responsive to your needs. I would like the class to speak to the student activities director. Also, the most important decision our class government must make is the choice of commencement speakers. I would like to get input from all of you during the decision-making process and have the person you want!

VICE PRESIDENT
Barry McQuain

I would appreciate your vote in the upcoming election. If I am re-elected, I will continue to support the class of ’85 through various activities such as study breaks, parties, roo-roo, T-shirts, and a good senior week. I’m also in favor of getting Bob Hope to be our commencement speaker. Let’s have a great senior year. Please vote for me.

Noelle Merritt

As a member of our class government since my freshman year, I’ve seen the role of the officers go through many changes. Unfortunately, it seems that with time these roles have lost some significance. To correct this, I’d like to see more feedback from you, the class members. Anyway, I’ve had fun bringing in past year and try to create a more worthwhile senior class government. I’d appreciate your vote in the upcoming election.
**CLASS OF 1985**

**SOCIAL CHAIRPERSON**

George Allen

One of the biggest problems with MIT's social atmosphere is that it lacks class spirit. Why? Because the level of the class spirit is directly related to the success and participation of class social activities. The people who have been in charge of planning these activities do the same thing over and over again or they do nothing at all. Some of these people have even come up with a good idea every now and then but have not implemented it very well. A good social chairman has to do more than plan an activity and run it. He must be able to induce participation in the activity. I've spent the last two and one-half years here doing an awful lot of socializing and getting others involved, and I can do the same for our class.

My motto for my senior year will be "Go for it!" So go for it and vote for me as social chairman.

---

**CLASS OF 1986**

**TREASURER**

Tol A. Beveridge

As your treasurer (alias donut stand manager), I promise to be practical and responsive to your suggestions. Compared to my able opponents, I have more experience, dedication and good old American know how at getting through the "red tape" at MIT. So, for more lively donut stand, vote T.A.B, for Treasurer.

---

**CLASS OF 1986**

**SOCIAL CHAIRPERSONS**

Alka Jain

D'Juanna White

As social chairpeople, we intend to promote social activities which would encourage the Class of 1986 to become more involved in class sponsored events. We have many ideas which we would like to see implemented and hope that you will give us the opportunity to do so. Included in these ideas are class study breaks, barbecues, class trips, a carnival and parties. Suggestions from you would be welcomed and encouraged because we would like to truly represent the needs and interests of all the people in the Class of 1986.

---

**CLASS OF 1987**

**PRESIDENT**

Kevin R. Foote

My primary goal as president will be to raise money so that we, as a class, will have the necessary funds for social events. Class oriented events (parties, trips, outings, etc.) will provide a social interaction that living-group oriented events do not. In addition they will promote class unity, and make life as a student more appealing. I want to see more of these social happenings, and will work towards their success if elected. I am enthusiastic about working with people and would be honored to guide our class as its president.

---

**PUBLICITY / NEWSLETTER COORDINATOR**

Hannah Bond

I am running for the office of Publicity / Newsletter Coordinator for the Class of 1986 because I feel that I have the enthusiasm, dedication, and organizational ability to do the job. Having been an active class council member this past year, I was impressed by the Council's attitude that any project is worthwhile that would be enjoyable and that would attract a fair percentage of our class. I also appreciate the necessity for adequate, well-aimed advertising to encourage class members to take part in these activities.
Please vote for me!

Kerry E. O'Neill

Grace W. Ueng

I am running for the office of President in order to become more involved with MIT's Class of 1987. In the past I have enjoyed organizing events, planning activities, and working with other students. I would like to continue this by taking an active role in the MIT UA. During this academic year I have been involved with several activities such as being a student coordinator for Project Contact and participating in the MIT Tanawan De Club as well as holding membership in the Society of Women Engineers, the Chinese Students Club, and the Association for Women Students. I also serve as a tutor for the MIT/Wellesley Upward Bound Program. Next year, as a part of this school, I want to contribute something to its students. I think that fulfilling the duties of a class office would make a worthwhile contribution.

Todd C. Malone

After seeing the inefficiency of the general assembly, I would like to take part in reorganizing it. If the proposed new constitution is passed, the class officers would be able to do this in the upcoming year. I definitely want to increase communication so that the student body knows what is going on. This will get more people involved or participating in events. Also I would like to see class officers take on specific responsibilities that will carry on from year to year.

Kerry E. O'Neill

I would like to put my time into my class, and I think one way I could do this is by being Treasurer of the Class of 1987. Please vote for me!

Paul G. Shepard

The responsibility of the treasurer is to oversee and execute the financial exchanges of the class in its own best interest. I feel my experience on the treasurer's committee of Sigma Phi Epsilon is of assistance in fulfilling the duties of this position. My organization experience in high school, my experience in Freshman Council, and high school as a member of freshman council, attended meetings regularly, helped organize activities, and most importantly, published the two major events: Pizza Pub and Carnations on Valentine's Day. My organization experience in high school, secretary of my senior class, and editor of the school newspaper will aid me, if elected, in serving the class.

Timothy Bernard Jones

My intention is to make the treasurer's office more than just a static, immutable position of little real power, and characterize myself as someone very eager to lend insight to political matters beyond the realm of those purely financial. I am deeply interested in increasing the solidarity of our class through campus-wide events and possible living group dinner exchanges (partially sponsored by my budget). I would also like to start a fund purely intended for events in our senior year. Four votes can put this plan into action. It's time we started pulling together!

Brian Moser

At this point, student government at MIT is essentially non-existent. We must show the students and administration that there is a need for student government here. I believe this need for this representation and a further involvement of MIT students in their own affairs. I can design no "platform," nor can I make any promises to a student body that doesn't know the state of student government on campus. The class of 1987 must become particularly involved in student government, and set a future pattern of student enthusiasm at MIT.At 87 Vice President, I will support and organize activities which bring our class together outside of standard academic circuits. Until we change our attitudes toward student government, we will continue to stifle our own voices on campus. The MIT class of 1987 has a very important choice to make now. We can either continue the mistakes of the past or contribute something to our class and the rest of the MIT community.

Thomas R. Hoffman

If elected to the office of Vice President of the Class of 1987, I, Thomas R. Hoffman, resolve to work hard at getting my class more involved in major campus activities, working on the class of 1987 Ring Committee and to openly accept advice from any of my classmates on new ideas or opinions they may have of current class offices functioning.

Stephen Thorne

If elected to the position of vice president, I hope to lead our class in a productive yet enjoyable year. We must make our immediate priority fundraising so that our young class can build a strong financial base. With this accomplishment we can hold class parties and other social events where we can get to know each other better. As your vice president it would be my job to help guide our class in the pursuit of these goals.

Randi Rubin

I feel well qualified for this position because of my experience in Freshman Council and high school. As a member of freshman council, I attended meetings regularly, helped organize activities, and most importantly, published the two major events: Pizza Pub and Carnations on Valentine's Day. My organization experience in high school, secretary of my senior class, and editor of the school newspaper also will aid me, if elected, in serving the class.

Kevin S. Murphy and David R. Brown

We feel that MIT environment focuses one's social activities very sharply within living groups. We would like to see MIT become a more sociable community. Our goal is to promote involvement in class and major campus activities to create a more cohesive atmosphere for our class and the rest of the MIT community.
This film has got a lot of heart.

Heart Like a Wheel, a 26th Century Far
Fiction; directed by Jonathan Kaplan, screenplay by Ken Friedman, starring Ben
Boteler, Boots Bridges, Lon Ross, Heart Aaron and Anthony Edwards: rated PG. At the Nicholson Theatre, Ken-
more Square.

cine popular with young people, hence a
financial success. The movie failed to
catch on, but critics who viewed the film
rated it above its box office and depth. Al-
though the studio moved the film to major
first-run theaters, it still failed to attract
much public attention. Quickly and ignomin-
ously, the film closed before the Chris-
mas season.

Low Tech: Just Furniture for Next to
Nothing, by Rick Ball, Dial Press, 218 pp., $14.95 softcover.

I have always enjoyed scavenging in
dumpsters for discarded treasures. As
this book demonstrates, one person's trash
is another person's furniture. The introduc-
tion clearly states, "Low Tech advocates
thinking creatively, recycling objects that
have outlived their original use. Low Tech
is an attitude, higher than this approach rule studies and frugal ex-
periences.

The book consists of a great number of
different types of projects for furni-
iture at a minimum cost, accompanied by brief descriptions. It is not suited
for someone who wants clearly detailed plans and photographs of the finished project; its purpose is to encourage people to think
creatively about problems.

Perhaps the finest sketch is that of an
auto-lover's headboard. It is made from
an old bumper and features tires for cou-
pling and a steering wheel for illustrations.
While I can't think of anyone who would
want such a headboard, it might be nice
for a car-lover's child's bedroom.

Suggestions and sketches cover every-
thing from yard furniture to kitchen fix-
natures. The end of the book covers the ex-

Don't Feed the Fashion Sharks, the Dark
on Relativity Records.

The Dark, not to be confused with the
English hardrock band of the same name
which disbanded in 1981, are a group of
musicians from the Boston area who have
been playing together in local clubs since
1980. Now, with their polished stage pres-
ence and their dancable performances per-
1980. Now, with their polished stage pre-

their early era's most enduring impress-
s at the Wheel's site, and most of them
would lose the battle to the "Nobby Shop." Is
this book worth the money? It is, if
you can't think of clever ways of furnish-
ing your new apartment or adding spunk
to your dorm room. The section in the
book on hardware and tools is really
handy if you don't have something similar
already. The section on "Low Tech" will be in
the book that would be good for reference,
but it's not the sort to buy for a specific
project.

The Sunlit Magazine series of books on
furniture are superior for individual pro-
jects and usually cost less than $5.00. The
Nomadic Furniture books by Hamness and
Pasquari are a good compromise, giv-
ing both ideas and plans, but the author's
comments are often sketchy.

I like Low Tech, but the ideas are not
sufficiently unique to make it necessary for
a car-mad child's bedroom.

The Dark finally get to see the light.

The Dark have long been hoping for na-
pipple that is destined to send this record to-

The result is vinyl that supplies the listener
with a dose of creativity and sound inno-

The entire Fashion Sharks EP is full of
total great dance music. From the opening
bars of "Better than That," a contempla-
tive, dreamy tune, right into the driving
intensity of "Darkwood," it is difficult to
listen to this record without losing control
of the involuntary finger-tapping reflexes.
The Dark have obviously been listening to
the best new music, and they have pro-
ceeded to rework the rhythms and com-
bine it with their own cheerful insinuation.
The result is vinyl that supplies the listener
with a dose of creativity and sound innova-
tion, as well as an unmistakable funda-
mentality that is destined to send this record to-
ward local commercial success, especially
in club arenas.

The clockwork steadiness of the Clark
Goodpastor/Mike Clark guitar rhythm sec-
tion lays the necessary foundation allow-
ing freedom for Davy Wilcox and guitarist
Greenaway to explore a num-
ber of chromatic and atonal scales. They
also take advantage of breaks in the music to
load the group back into the flow with
one of their battery of modulating sounds.
Clark's guitar keeps an edge to the
overall sound by his non-modal soloing
that is intermittently reminiscent of Robert
Fring's style.

Lucidly, the music on this record is kept
under control despite the obvious strong
individual personalities and talents of the
band members. The band is careful not to
let the sound get out of hand; none of the
solos or fills are extravagant additions.
The musicians show restraint in the record,
allowing the various numbers to take the spotlight at the appropriate
moment.

With all this in mind, it is still a bit sur-
prising that the Dark refuse to take them-

rock band. By having both bands, we're hoping to attract both students and older adults to the dedication ceremonies,” said Mary L. Morrison, Director of the Campus Information Center and organizer of the ball.

Several groups, including the Student Center Committee, the Graduate Student Council, the Council for the Arts, the Social Council, and the Office of the Dean for Student Affairs, will provide funding for the dedication ceremonies.

The Student Center Committee “is paying between $3000 and $4000 for the ceremonies,” said Micheline K. Fradd ’85, band coordinator of the Student Center Committee. “We will sponsor the party in the Sala featuring the Sex Execs.

“We want people to come, especially since this is the first ball of this type,” since the inauguration of President Paul E. Gray ’54, Fradd added.

The gallery will display the works of five permanent groups — two from the School of Architecture and Planning and one each from computer graphics, the Department of Materials Science and Engineering, and the Student Art Association. Works of individual students will be chosen for each exhibit by a committee of students, faculty, and staff.

How do we put together a newspaper? Come to The Tech and find out.

Sunday, Monday, Wednesday or Thursday night
New production staff always welcome.

The FASTEST Growing Flight School in the Rugged Northeast

PATRIOT AVIATION GUARANTEED PILOT COURSE

Hi... I'm Art Teager... 
MIT Class of '48 and '49.

Come and enjoy the fun of flying with us
Enjoy a new kind of freedom
Experience the thrill and excitement of soaring with the eagles. Join the Patriot Family of safe, confident pilots. As a Patriot pilot, you will be part of a special group of people who have gained a new perspective, soared to new heights and gained new friends.

You'll joint the Patriot Fraternity of safe, confident pilots and see the world through different eyes. We can help you conquer your fear, so that you too can enjoy this wondrous world of beauty.

Join our Patriot Family and earn your Patriot Wings. Come and enjoy the Fun of Flying with us.
Flying is really a lot of fun. We help conquer your fear by using only the BEST NEW Planes, BEST Flight Instructors, BEST Cessna (F.A.A. APPROVED) Program with UNLIMITED Flight Hours and UNLIMITED Ground School under our unique 2-3-2 program, all at a GUARANTEED Price (NO SHORT CUTS).

We train only in NEW Cessna 152 aircraft, the world's most forgiving trainer. You'll train at safe Hanscom Field with a control tower and long, wide runways. You'll receive the full ground course as part of the "Patriot Guaranteed" one-on-one program. You'll receive everything needed to earn your private pilot's license and Patriot Flying Wings.

PATRIOT AVIATION is the only flight school in this area to offer an all-inclusive flight training program using new equipment at a guaranteed price. In just 14 short weeks, you can join our Patriot Family of safe, confident pilots. Patriot is open 7 days a week with hours to fit your schedule. PATRIOT AVIATION IS SIMPLY THE SAFEST AND THE BEST.

Jandura takes hoop honors

By Mike Blalock

Louise Jandura '84, a member of the MIT women's basketball team, was recently named to the 1984 College Division Women's Basketball Academic All-America second team by the College Sports Information Directors of America (CoSIDA).

Jandura, a 5-foot-11 guard from Clifton, N.J., was second on MIT's team in scoring with 14.6 points per game. She led the team in rebounds (4.3), with 18 total rebounds in 16 games. She is third in assists with 42.

"She's terrific," said Coach Jean Heiney, who coaches Jandura in both basketball and softball. "She always gives a solid effort and she's the kind of player you can depend on. She's a good clutch player."

Jandura led the team in scoring in 16 games, including a 24-point performance in a 73-57 win over Bates. She scored 30 points in MIT's loss to Wellesley, hitting 10 of 21 shots. In the Engineers' 80-20 rampage over Simmons, Under Heiney's direction, MIT posted an 11-9 record, its first winning mark in 10 years of varsity competition. The Engineers were an impressive 7-2 playing at home. Julie Koster '85 led the women in scoring (14.6 points per game), rebounding (10.3) and field goal percentage (.508) to earn the most valuable player award.

Like Koster, Jandura is one of MIT's most versatile athletes. Jandura is also a starter on the women's field hockey and softball teams. In 1983, she hit .379, and was an impressive 7-2 playing at home. Julie Koster '85 led the team in scoring with 10.4 points per game. She also averaged 4.3 rebounds per game and was third in assists with 42.

"She's terrific," said Coach Jean Heiney, who coaches Jandura in both basketball and softball. "She always gives a solid effort and she's the kind of player you can depend on. She's a good clutch player."

According to MIT Director of Sports Information Ken Cerino, Jandura is the seventh MIT student-athlete to receive CoSIDA Academic All-America recognition in the past year. The other winners were: First Team, John Schmitz '83 (swimming); John Friedman '83 (water polo); Ken Shull '84 (wrestling); Second Team, Anella Munro '85 (volleyball); Third Team, Barbara Westlund '83 (volleyball); and Honorable Mention, Robert Joseph '83 (basketball).
Fencers qualify for Nationals

By Mike Blabnik

Charles Kwon '84, fencing team captain, Russell Holtz '84, and Alan Williams '85 qualified Saturday for the National Collegiate Athletic Association National Championships March 19-21 at Princeton University. Defending champion Holtz was undefeated in the foil individual competition of the Intercollegiate Fencing Association Championships after a slow start in the season.

Kwon qualified in the sabre competition and Holtz finished 12th in the foil competition to qualify. Holtz defeated the defending NCAA foil champion, who had lost him during the team competition Sunday.

The MIT team finished 10th in the 12-team field with 40 team points. Columbia University scored 68 points to win the team championship, edging Yale with 66 points and the University of Pennsylvania with 65 points.

MIT Coach Eric Sollee was pleased about sending three fencers to Nationals. "Since I've been here we've always qualified at least one fencer and more often than not, we've sent all three," said Sollee. "It's nice to be on the winning side with Russ. He won in an even more convincing fashion than last year," he added.

The Engineers finished eighth in the foil team competition Saturday, which was expected to be their strongest event. Mitch Messer '85 and John Sheffield '86 both failed to qualify for the finals. "Our foil team didn't do as well as we hoped," Sollee said. "We need a lot more competition with skilled fencers."

MIT finished ninth in the epee team competition. Williams was the only MIT fencer to advance to the individual finals, where he finished seventh. Harvard and Yale tied for the team epee title.

Kwon was the only MIT fencer to advance to the individual sabre finals. "I'm very happy about going to nationals," said Kwon, who also finished seventh in the finals. "I found out today, but I had a bad start." Columbia won the saber competition, scoring 29 of a possible 33 points.

Holtz commented on his performance: "I was hoping to win it, but I was worried. I did poorly yesterday, but I did better at the end of the day and I carried through to today. I put in a lot of hours working for it." He added that he thought he fended as well as he could.

Holtz finished 12th in last year's NCAA Championships. Sollee said Holtz will be very competitive at nationals. "I hope he's in good health and that he continues to be at his competitive peak. He has a good shot to finish in the top three." Kwon, who started fencing as a sophomore, can finish in the top two-thirds at Nationals, Sollee also said, and Williams "can go against the best."

"Well find out in two weeks," he said.

Men's fencing team hosted the Intercollegiate Fencing Association Championships last Saturday and Sunday in duPont gymnasium.

Xenergy will be at MIT March 19th.

XENERGY is a nationally recognized leader in energy engineering and automation, and energy use analysis and modeling.

XENERGY is looking for several outstanding graduates in Computer Science, Mechanical Engineering, Mathematics or Operations Research in these areas:

Energy Applications Software Development - From new product design through implementation using the latest hardware and software, we offer challenging work creating sophisticated engineering analysis and database systems. XENERGY is a leader in providing software to help America understand its energy needs, and we are looking for talented individuals to develop.

Programmer/Analyst (Forecasting) - As the software strength behind pioneering work in energy use analysis, you will create software to solve both technical and economic problems. This is an exciting opportunity to explore your ability to create products from the tools you develop.

XENERGY offers competitive salaries, excellent benefits, and the highly visible environment of a small, rapidly growing company! If you would like to learn more about opportunities at XENERGY, contact the Placement Office to sign up for a personal interview.

XENERGY is a leader in providing software to help America understand its energy needs, and we are looking for talented individuals.
