Humans under review

By Marc Condit

Two faculty committees formed to study the current state of the humanities requirement and liberal arts at MIT have met for the first time. Both were created by the HASS committee, a student to satisfy the humanities requirement. It is possible for undergraduates, Maier added.

The faculty is concerned that the approximately 150 humanities classes taken by all students do not provide a coherent basis for the liberal arts, and that the requirement does not ensure enough breadth. It is possible for a student to satisfy the HUM-D requirement using three classes with similar content, Maier explained.

Faculty members of the School of Engineering complained about the lack of a "common culture" and opposed to the proposal. Among undergraduates, Maier chairs a committee which will be presented to the Committee on the Undergraduate Program (CUP), which has student members. The issue of student input will be taken up at a future meeting, according to Maier.

The other members of the HASS committee are Alan Guth, associate professor of Physics, and Louis Menand, III, senior lecturer in the Department of Political Science. (Please turn to page 11)

CIA recruitment comes under fire; students protest MIT interviewing

By Earl C. Yee

A group of MIT students demonstrated Wednesday to protest the presence of recruiters from the Central Intelligence Agency (CIA) in the Department of Political Science, which conducted employment interviews on campus that day.

The protest had two major goals, according to Adam Grossman '85, one of the protesters.

"One is to show the MIT community, especially the administration, that a portion of the community is opposed to the idea of allowing this group of companies to recruit on campus," he explained. "The second is to educate the people about the CIA."

The demonstrations disrupted the office, so "we asked them to leave, and they did," Olivieri explained.

"It was orderly and they made their point," he continued. "There were no problems."

"We didn't let it derail the interviewing," Weatherall commented. "About a dozen MIT students interviewed with the CIA, Weatherall said.

MIT's policy since 1969 has been to allow all organizations that are genuine employers to recruit on campus, according to Weatherall. This policy allows all governmental organizations to conduct interviews here.

"Students have every right to be here, but they can't disrupt our service to the students that do want to talk to the CIA," Weatherall explained.

Some of the protesters memorized lectures classes in the morning dressed in military attire and announced their opposition to on-campus CIA recruitment, according to demonstrator Jonathan Feldman G.

The demonstrations, partly organized by the student Committee on Central America, started in the morning outside the Office of Career Services (OCS) in Building 12, according to James Oliveri, chief of Campus Police.

Approximately 10 of the protesters entered OCS around 9:30 chanting slogans and carrying placards, said Robert K. Weatherall, director of OCS.

The demonstrators disrupted the office, s"o "we asked them to leave, and they did," Olivieri explained.

"It was orderly and they made their point," he continued. "There were no problems."

"We didn't let it derail the interviewing," Weatherall commented. "About a dozen MIT students interviewed with the CIA, Weatherall said.

MIT's policy since 1969 has been to allow all organizations that are genuine employers to recruit on campus, according to Weatherall. This policy allows all governmental organizations to conduct interviews here.

"Students have every right to be here, but they can't disrupt our service to the students that do want to talk to the CIA," Weatherall explained.

Some of the protesters memorized lectures classes in the morning dressed in military attire and announced their opposition to on-campus CIA recruitment, according to demonstrator Jonathan Feldman G.

The CIA is antithetical to the goals that we try to promote at MIT and in this country," Weatherall said. "Some of these goals are human rights, democracy, respect for democratic, fairly-elected governments, rights to privacy, and rights to free expression."

"The CIA has had people on our campus that were death squads," Feldman indicated.

"I was pleased with the level of participation and solidarity that we had," said Feldman.

"The fact that we reached many people made it a success," Feldman agreed.

WMBR raises $9000 on the air but AP wire service to sign off

By Timothy Zhang

WMBR, MIT's non-commercial student radio station, has made little progress in soliciting corporate grants to support its operational costs, according to the station's technical director, Henry N. Holtzman '85.

The station begins week-long pledge drives as the first of their kind, and then try to improve them.

Programs of the station support their cause with studies programs and "social interactions", according to Holtzman.

The station in summer because of increasing expenses, WMBR must make major capital expenses, Holtzman said.

The station began seeking and foundations for its summer because of increasing expenses. WMBR must make major capital expenses, Holtzman said.

The station's chief concern is money. "Helping to raise money through other means. An over-the-air fund-raising effort started Oct. 5 yielded over $9000 in pledges, according to chief em- Pdiator Jonathan S. Bernhardt '86.

The station will spend the next few weeks collecting pledges.

WMBR also plans to sell advertising space in its program guides. The station now distributes guides, but will have only large them to 300 pages and 1000 pages over the next four years, Holtzman said. The guides will contain program schedules, and "television" lists, that require money. They plan to raise money through other means. An over-the-air fund-raising effort started.

Students demonstrate against CIA recruitment on campus, Wednesday in Lobby 2

By Mary Coadello and Social Science Ann F. Stauf

Two similar situations exist over the merits of an antisp!W-study legislation in Cambridge. (Please see sidebar).
The Institute Colloquium Committee will hold a two-day Institute wide discussion of apartheid, according to Professor of Mathematics Fran Morgan '74, chairman of the committee. South African activists Ntshato Motlana and Oliver Tambo will participate in the program.

Motlina will give the opening address in Kresge from 3:30-5 on Nov. 6, said Judy Dougall, executive officer in the Office of the Dean for Student Affairs, and chairman of the evening discussions subcommittee. He is the chairman of the Soweto Committee and the Soweto Civic Action Committee.

There will be a reception open to the MIT community following the opening address. The committee has tentatively planned to hold the reception in the Burton Dining Hall, Morgan said.

Several dormitories and three fraternities will host guests and faculty at their houses for coffee and donuts. The living groups will hold workshops afterwards, Dougall said.

Dormitories scheduled to hold activities include Ashdown House, Green Hall, Next House, Senior House and McCormick Hall. Baker and Burton may also have activities, she said.

Each activity will cover a different aspect of the apartheid issue, Dougall continued. "There will be specific themes set up ahead of time," she said.

Joel Clark, professor of Materials Science and Engineering, will lead a discussion on "The Myth of South Africa's Strategic Minerals," Morgan said.

Roy Schotland, professor of Law at Georgetown University, will also run a workshop entitled, "The Myth of Divestment," according to Robert Rotberg, professor of History and Political Science, chair of the program subcommittee.

A panel discussion will be held on Thursday, Nov. 7. The panel, which will be moderated by Rotberg, currently includes Dr. Medama and.

- Shirley Chishaulu - Former member of the US House of Representatives.
- John Reed - Vice chairman of the Committee and member of the MIT Corporation.
- Gennetha Ritzer - An MIT graduate student in political science.
- Oliver Tambo - Member of the African National Congress.

On Thursday evening there will be a series of discussions which will be held in the living groups, according to Morgan. Dougall said there may also be a closing address on Thursday.

The Institute Colloquium Committee, created last spring, meets every four to six weeks. The next meeting will be on Oct. 18, he said.

Committee meetings have had "a spectrum of people involved," Morgan said. The diversity of opinions has "made for a very lively process which I think was a very healthy thing," he added.

The Committee's mailing list includes members of such diverse groups as the Inter-Fraternity Conference, the Interfraternity Conference, the Graduate Student Council, the Undergraduate Association, and the Dormitory Council, Morgan said.

The community groups liaison subcommittee was "concerned with getting the ones that weren't so obvious," Dougall said.

The Institute Colloquium Committee will hold "no political position at all," Morgan said. "We don't want to be sponsoring any rallies for any cause ... I think the idea is to present as broad a view as possible and not to present just one side," Dougall said.

The Institute Colloquium Committee is an ongoing committee affiliated with the Provost's office, Dougall said. The Committee will run a series of programs each academic year, she said. "This is the first experiment, so to speak," she added.

The purpose of the Committee is to 'generate discussion ... hopefully more educated discussion, [and] get people involved with issues outside the campus," Dougall said.

The Committee has not decided what the next topic covered will be. "The Committee is interested in hearing topics that people in the community are interested in," she continued.

Morgan disagrees with those who claim, "This whole thing is something that just won't work at MIT." While "most [MIT students] have decided not to be activists at MIT, [they are] very interested and concerned about big events," she said.

Are you denying yourself a better shot at grad school?

Okay it may be too late to get a 40. But it's not too late to try to do better on your LSAT, GMAT, GRE, or MCAT. For that, there's Stanley H. Kaplan.

Kaplan has prepared more students than Stanley H. Kaplan. Our test-taking techniques and educational programs have prepared over 1 million students.

So whatever grad school exam you're taking, call us. Remember, the person next to you during your exam might have taken a Kaplan course.

CLASSES STARTING NOW for December LSAT, GRE and January GMAT

INSIDE TEKTRONIX

Today's possibilities become tomorrow's products, thanks to the efforts of dedicated professional scientists and engineers. Whether you're in one of the hundreds of CAD-CAM-CAM, artificial intelligence, gelmane semiconductor, lithoid structural, graphics and real-time software systems, avionics, engineering workstations, and the world's fastest scopes.

If you're graduating with a degree in Electrical Engineering, Computer Science or Physical Science, we invite you to the following events:

OPEN HOUSE—October 16, 1985, 7:00-9:00pm
Room 1-150

Presentation will begin at 7:30 pm and will include a tour of Tektronix 4404 artificial intelligence system, high-speed scope and Tek's logic analyzer.

Refreshments will be served.

CAMPUS INTERVIEWS—October 17, 1985

If you are unable to meet with us, please contact Diane Smiley, Tektronix Inc., Corporate College Relations 5655 NE 46th Ave, Portland, OR 97077, or call 1-800-547-1516.

We are an equal opportunity employer.
World

US Navy foil's Palestinian pirates' escape - Two US fighter planes forced the landing of a Egyptian transport boat in the Mediterranean off the coast of Athens carrying the four Palestinian hijackers of an Italian cruise ship last night. All four were apprehended in Sicily where the plane landed. The US government will seek extradition for the four from Tunisia carrying the four hijackers of an Italian cruise ship last night.

Harold A. Strauss
Robert F. Mackin

Gorbachev may agree on arms limitation - Soviet leader Mikhail Gorbachev may be prepared to accept an agreement with President Ronald Reagan which would limit each side to 6,000 missile warheads and 1,000 long-range bombs. This information was relayed unofficially by a Soviet bloc diplomat. The diplomat said that although he did not necessarily represent the opinions of the Kremlin, he had reason to believe that this type of arrangement could be possible if Reagan shows enough interest.

Cystic fibrosis mystery closer to solution - Researchers from Toronto and Boston have found a gene marker which may lead to the discovery of the elusive gene which causes cystic fibrosis. They have narrowed the position of a special segment of DNA which is usually inherited with the disease, and expect to find the cystic fibrosis gene itself in this vicinity.

Nation

Senate approves deficit elimination - The Senate overwhelmingly supported a proposal to remove the overall deficit by 1991. This proposal involves a gradual reduction of deficit ceilings over this time period and an attempt to preserve a balanced budget thereafter.

Treasuty borrows while it still can - The Treasury borrowed $5 billion Wednesday to cover government checks already issued. Before this act, the government's cash balance was only about $3 million, according to Treasury Secretary James A. Baker. There is still some confusion over whether the Treasury was legally authorized to do this. Most of the money went toward benefit checks, such as Social Security and civil service pensions.

Disaster strikes in Roberto Rico - A landslide near Ponce, Puerto Rico buried an estimated 200 people under 40 to 60 feet of muds. The official death toll stands at 29, and 75 families remain unaccounted for. Health officials are debating whether to attempt to rescue the bodies or seal the valley floor to prevent a health hazard.

Local

Governor plans aliena new rights - Massachusetts Governor Dukakis established a controversial new policy last Friday giving refugees, aliens, and immigrants a better chance at state aid while protecting data on their nationalities. Under the new order, state agencies and employers are forbidden to ask about citizenship when making hiring decisions or offering benefits.

Drunk driving punishment debated in Quincy - Local defense attorneys are decrying Quincy District Court's program against drunk driving, explaining that it is based on a conflict of interest. Valc Associates, the private company contracted to analyze first-offenders for the court, has been too strict, according to three attorneys. Valc sent a large number of their subjects to an intense 30-week program for heavy drinkers. Many people defended this experimental program, stating that it is a cost-effective deterrent to problem of drunk driving. The Quincy drunk driving model is being considered by other communities.

Sports

But Jays edge Kansas City - The Toronto Blue Jays defeated the Royals 6-1 in 10 innings Wednesday, putting them two games ahead in this seven-game American League play-off.

Bullets dodge Cardinals - Los Angeles defeated the St. Louis 4-1 Wednesday, placing them one step in this opening game of the National League play-off.

Celtics lose to Bullets - The Washington Bullets ousted the Boston Celtics 101-95 in an exhibition game Wednesday night. Maurice Cheeks, the Bullets' 7-foot-6-inch freshman center, blocked nine shots and gathered in nine rebounds.

Weather

Sunny, but cool weekend weather - Today will start cloudy, but clear up later in the day with highs in the upper 50's. Saturday will be sunny with highs in the mid-50's. Keep plenty of hair spray on hand - it will be very windy both days.

It hurts to make hypocritical choices

Most of us are hypocrites. We want to prevent Ethelians from starting. We want to see an end to the "Killing Fields" of Cambodia. We want to break the economic barriers which separate the slaves from the South Dako. But we also want to improve our own lives, and this is often more important to us than the lives of others. The "New Right" may be characterized by its lack of concern for others. I volunteer at the hospital twice a week, three hours each day. Sometimes when I'm there, things get really busy. It's exciting to watch the doctors in action. I think to myself that one day I will be one of them. The patients are in pain, but they usually don't complain very much.

I talked to a friend from Harvard last week who has done much work in the public sector. I was surprised to see her confused about her role in policy matters. She had always seemed so sure of her goals. Recently, however, her close friend switched from strong public motivations to more self-centered motivations.

"I've lost a lot of sleep wondering what I should contribute," she told me. "The more I think about it, the more I think I should do more." We all place limits on the amount of time we are willing to devote to others. The fact that we do not do more for others often causes an inner conflict. She gives much more of herself than most people, and I respect her for it.

When I am at the hospital, and before I go to sleep at night, I think about why I want to become a doctor. Did I reach my decision because I want to heal and improve people's lives? Or was I thinking more of the prestige and wealth associated with the medical profession? The thought that I may be solely influenced by the money worries me.

Some people (myself included, at times) think that self-interest and altruism are mutually exclusive options. Self-interested people ignore problems that do not affect them directly. They are devoted to their South Hampton homes. They argue that we are

Column/Ben Stanger

Scientists should take stand on South Africa

To the Editor:

There has been no progress toward the destruction of apartheid since we left their respective universities for the summer. I do not believe opponents of apartheid should become too confident about the shallow and hypocritical efforts being made by the Reagan administration and the Pretorian government. Opponents of apartheid must be devoted to gradualism and reform. The establishment of one man, one vote in all of South Africa is a nonnegotiable objective, and it must be achieved now, and not "trucked down with deliberative speed."

The Pretorian government will refuse and delay voting rights as long as companies from the United States and other countries are there. To seek changes while these companies remain in South Africa is nonstrategic. The only leverage is the withdrawal of these companies until full voting rights are established countrywide.

I believe a real opportunity falls on the shoulders of scientists in the major research universities throughout the country. If a company refuses to withdraw from South Africa, scientists ought to reconsider research and development (R&D) for them should continue further research in their behalf.

Just as this country selectively employs economic sanctions against certain countries, multilateral sanctions should be employed against companies that continue to operate in South Africa. R&D is the lifeblood of major industrial companies that wishes to be competitive and retain in the forefront, without such sanctions falling.

Instead, faculty disassociation has at least two attractive compo-

Morgan encourages students to participate in apartheid program

To the Editor:

As chairman of the Institute Colloquium Committee, I am writing to invite you to participate in our activities. The Pretorian government will refuse and delay voting rights as long as companies from the United States and other countries are there. We must do something.

I went today to the funeral of a friend. And I was very angry. I knew that there were people for whom this man's death was good news. Not because they knew him, not because they knew what he was, and not because he had done anything to them. But because he had AIDS.

For most people AIDS is a topic of academic concern. It frightens me, too. And it justifies that sometimes good and hatred of people like my friend, of people like me. But for my friend, for his family, for my friends, it meant much more. So I felt.

LSC promotes display, as it tries to save money

A New York company will take "a bold step" if it does not recover a promotional display which was stolen from Lobby 10 last week.

The Library Services Committee (LSC) used the exhibit to promote Bud Light and Ritz Crackers, according to Chairman Kim Cor- thern. The committee set up the display on Sept. 22. The display was removed between 9 p.m. on Sept. 22 and 10 a.m. the following morning.

"The value of the display is approximately $5000," according to Carl Schwedock, account coordinator of Brian Winthrop International (BW), the company which supplied the exhibit. "We will take some serious action if we don't get it back," he said. "We are not taking it lightly."

The exhibit included several powerful-looking glossy pictures, Corthern said. "It's a general rule we display company advertising if we can't do anything better."

Schwedock was critical of the lack of security surrounding the exhibit. "The display was in a fairly open area without supervision. It was fairly visible to theft," Schwedock added, noting that other companies stored their display near offices or stores. BW is in the process of determining what measures will be taken, Schwedock said. A decision should be made by the end of the week, and if the photos are not recovered, the display will be cut out.

LSC has not determined what its response would be in such an event, according to Corthern. "The first thing would be to contact the law office to determine who is liable," LSC said. "If the display was given to LSC, he added.

Some speakers oppose measure

Other parties opposed the referendum. Several were concerned that pornography was the symptom, not the cause, of violence and discrimination against women. Martha Polio, a feminist writer, explained that sexual harassment has existed for thousands of years before the development of pornography. As a result, blaming pornography would not reduce sexual assault and rape statistics.

If anything, the measure would weaken the situation, said Carol Vance, a social science student at Co- lumbus University.

Feminists have limited influence

"We are not taking it lightly."

The station will continue to recruit new students. About half of the students were community residents, but "people who are interested in it," said Corthern. "We want to keep a good reputation with the company," Corthern added. "We are offering a $50 reward for the display's return."

Section 2: Harmful Acts:

1. In Chapter 25, "Human Rights," shall be amended to read:

2. A. The word "human shall be changed to "human.

3. B. The word "human shall be changed to "human.

4. C. The word "human shall be changed to "human.

5. D. The word "human shall be changed to "human.

6. E. The word "human shall be changed to "human.

7. F. The word "human shall be changed to "human.

8. G. The word "human shall be changed to "human.

9. H. The word "human shall be changed to "human.

10. I. The word "human shall be changed to "human.

11. J. The word "human shall be changed to "human.

12. K. The word "human shall be changed to "human.

13. L. The word "human shall be changed to "human.

14. M. The word "human shall be changed to "human.

15. N. The word "human shall be changed to "human.

16. O. The word "human shall be changed to "human.

17. P. The word "human shall be changed to "human.

18. Q. The word "human shall be changed to "human.

19. R. The word "human shall be changed to "human.

20. S. The word "human shall be changed to "human.

21. T. The word "human shall be changed to "human.

22. U. The word "human shall be changed to "human.

23. V. The word "human shall be changed to "human.

24. W. The word "human shall be changed to "human.

25. X. The word "human shall be changed to "human.

26. Y. The word "human shall be changed to "human.

27. Z. The word "human shall be changed to "human.

Amendments to Cambridge Human Rights Ordinance to appear on ballot

For the November Chapter 25, "Human Rights," shall be amended to read:

A. The word "human shall be changed to "human.

B. The word "human shall be changed to "human.

C. The word "human shall be changed to "human.

D. The word "human shall be changed to "human.

E. The word "human shall be changed to "human.

F. The word "human shall be changed to "human.

G. The word "human shall be changed to "human.

H. The word "human shall be changed to "human.

I. The word "human shall be changed to "human.

J. The word "human shall be changed to "human.

K. The word "human shall be changed to "human.

L. The word "human shall be changed to "human.

M. The word "human shall be changed to "human.

N. The word "human shall be changed to "human.

O. The word "human shall be changed to "human.

P. The word "human shall be changed to "human.

Q. The word "human shall be changed to "human.

R. The word "human shall be changed to "human.

S. The word "human shall be changed to "human.

T. The word "human shall be changed to "human.

U. The word "human shall be changed to "human.

V. The word "human shall be changed to "human.

W. The word "human shall be changed to "human.

X. The word "human shall be changed to "human.

Y. The word "human shall be changed to "human.

Z. The word "human shall be changed to "human.

To find out more about our engineering opportunities, attend our information meeting on Thursday, October 17 at 5:00pm in Room 4-153. Interviews will be held Friday, October 18. Please contact your placement office.

If unable to attend our meeting, please send your resume to: Kazer Electronics, Dept. MIT265, 335-32, 3701 Orchard Park Way, San Jose, CA 95110. We are an equal opportunity employer.

Stephen King's latest horror drama, Stephen King's Silver Bullet, is now out and will soon creep into a theater near you. Everyone should avoid this touching, meaningful movie, whether or not you enjoy the talents of your favorite horror star.

This movie follows a theme which is present in much of King's fiction: that of a person or group of people who must overcome their weaknesses to become a greater terror, or werewolf.

In most of King's movies and novels so far, the stress on horror overshadows the protagonist's personal imperfections. In Silver Bullet, however, the horror is a human character.

King's emphasis is on the struggle of a crippled boy, his resilient family, and their impossible task to overcome their personal imperfections and work together to combat a greater problem. True to King's style, this problem is an ancient, primordial terror: a werewolf.

Corey Haim, who plays the crippled boy, gives a performance that defies expect to come from a 13-year-old actor. The chemistry between him and Megan Follows (the baby-werewolf) seems genuine to the point that even when they argue, the bond between them remains strong.

Their alcoholic, womanizing Uncle Red (played by Gary Busey), proves to be a slightly more complicated character. He fluctuates between the loving uncle and a stubborn dolt who refuses to recognize the proof Marty and Jane reveal to him about the werewolf. The most disappointing character is Reverend Lowe (played by Everett McGill). The portrayal of the Reverend is flawless, but I think the story itself could have been enriched dramatically by a deeper insight into Lowe's thoughts and history.

Although this film is on a deeper level than some of King's previous exploits, it will in no way disappoint blood-and-guts horror fans. The violence has been relegated to a less prominent position in the proceedings, but the anticipation is worthwhile and the suspense, humorously flawed.

King's townspeople are typically typical: they go in search of the mysterious killer at night, in a foggy swamp, during the full moon; where the werewolf is sure to be. They are rewarded for their stupidity by violent, painful deaths, which flow with blood and echo with screams.

All in all, Stephen King's Silver Bullet is a worthwhile movie for anyone to see. If you are an avid King fan, the special effects are a must-see; if you prefer a deep, meaningful story about human triumph, you will also be satisfied — just cover your eyes whenever the music approaches a crescendo.

King's Silver Bullet: a triumph of spirit
ON OCTOBER 22 & 23, UNITED TECHNOLOGIES WILL BE LOOKING FOR ANOTHER CURIE. ANOTHER MARCONI. ANOTHER WATT.

People with perseverance. Vision. Confidence. And the persistent courage to keep going to prove how right you are. That's the kind of people we're looking for.

If you identify with these people, then you're our kind of people. To find out if you're qualified, Norden Systems, Hamilton Standard, Otis elevators and the United Technologies Research Center will be conducting campus interviews for graduates with a BS, MS, or PHD in Aerospace, Electrical or Mechanical Engineering, Physics, Computer Science and Materials Science.

Contact your College Placement or Career Planning Office and sign up for an interview.
Integrative major proposed

(Continued from page 1)

"to design a curriculum which will fit into a liberal arts education at MIT for 100-150 students each year," Marx said.

"Around the country, a lot of rethinking of curricula is going on. In many traditional liberal arts schools, there's a big drive toward a comprehensive science and technology center in life to be reflected in the curricula," he continued.

"Mars said the committee may eventually make a proposal for some modification of entrance requirements. This modification would allow and attract qualified students with a strong liberal arts inclination, he said.

"There has been a long history of attempts like this at MIT," Marx pointed out. He has "no illusions" that his committee's proposals will be accepted in their entirety.

"We will work closely with the other committees on educational reforms, particularly the HASS committee. He also mentioned a desire for student input, but wasn't certain how it should be obtained.

"The other members of the committee are John Harbison, professor of Music; Philip Khoury, associate professor of Engineering; Linda Weatherall, professor of Urban Planning; Mathias Roemer, assistant professor of Applied Economics; Frans Ooghe, head of the Ocean Engineering Department; Joseph M. Sumnitz, head of the Civil Engineering Department; Irene Taylor, professor of Literature; Martin Weinbren, professor of Computer Science; and Jeremy Wolfe, assistant professor of Psychology.

For the 1986-87 consecutive year, the Professional Studies Program in India is offering American graduate students a wide range of professional fields the chance to do graduate research for a year in India. Applications for the 1986-87 year are now available from the Indian Institute of Technology, University of California, Berkeley, which coordinates the program.

The Professional Studies Program places U.S. graduate students at universities and their research institutions in India. Participants work with Indian faculty and professionals in developing proposals related to their professional and research interests.

Many program participants have used their Indian research data in writing their doctoral dissertations and in preparing articles for both Indian and American professional journals.

The 190 participants in past years have come from fields as diverse as architecture, agriculture, business administration, engineering, librarianship, public welfare, sociology, public policy and arts planning, as well as the traditional professions of law, medicine and education.

The program provides one month of language training and orientation seminars, and then civilizes and the problems of development and social change.

Also available are round-trip airfare from the east or west coast, medical care, a living allowance, and research-related travel expenses.

January 6, 1986 is the application deadline. To apply or to obtain further information, write to:

Boston University's Fatherhood Project now offers programs for both mothers and fathers alike in recognition of the stress and complexity of family life. Workshops being offered this fall are:

**"Being Parents: A Workshop for Couples with Babies,"**

Wednesday, 6:30 p.m., Oct. 1-Nov. 19; "Single Parenting: Getting Along," 6:30 p.m., Oct. 8-Nov. 26; "Step Parenting: The Second Time Around," Wednesday, 6:30 p.m., Oct.8-Nov.27. All workshops will be held at Boston University's School of Education, 605 Commonwealth Ave., Boston. For reg. info., contact Dr. Ronald Levin at 535-4277.
Listings
Student activities, administrative offices, academic depart-
ments and other groups — both on and off the MIT campus —
can list meetings, activities, and other notices in The
Tech's "Notices" section. Send items of interest to the ad-
dress specified via Institute mail to "New Notices, The Tech, room
28-101," or via US mail to "New Notices, The Tech, PO Box
29, Wellesley, MA 02181." Notices run on a space-available basis only;
they are given to officials in ascending order of MIT student
acquaintance. The Tech reserves the right to edit all listings, and
make an eanor to all of our notices.

Monday, Oct. 14
Joan Benet will attempt her
biased American record run. Two
hours after the Boston Belle, she
will be joined by an inter-
national field of elite runners in the annual Boston 10 mile race newly
sponsored by Tufts Associated
Health Plan. The $125,000 in
prize money top the ten fast-
half a mile world and the 5000
yard world record. Race starts 12:00. It is not too late to enter —
me registration is free and all are welcome to attend. Michael Ziesing is
struggling to attend. "The Struggle." The program will take place
at the New England Aquarium.

Friday, Oct. 18
Black Rose Lectures will present a lecture by Michael Ziesing enti-
tled "Anarchism and the Irish Struggle." The program will take place
at 705 Mass Ave. (Building 51), room 417, at 8:00 PM. Admission
is free and all are welcome to attend. Michael Ziesing is a philosopher, long time political
activist, and a founding member of the Ly-
curian Spooner Society's periodi-
cal, instead of a magazine. He is the author of No Starch Solutions: Anarchism and "The Prussian" in Northern Ireland.

SAT. OCT. 19

Now, when you want to interview with a major force in America's research and development community you only have to sign up once.

AT&T's R&D effort... is constantly pushing back the frontiers in the areas of photonics, micro-electronics, computer hardware and software development, with applications in switching, transmission, networks, military systems, business systems and manufacturing systems. We also work in the areas of energy extraction, conversion and combustion.

Our Mission... is to advance fundamental research in the physical sciences, material sciences, communication sciences, information sciences and manufacturing sciences to provide technology for the marketplace.

We want to talk to... BS, MS, or PhD degree students in Computer Science, Computer Engineering, Electrical Engineering, Systems Engineering, Mechanical Engineering, Operations Research, Nuclear Engineering, Applied or Engineering Mechanics, Human Factors, Physics, and Material Chemistry, as well as MBAs with a BS or MS in Engineering. BS/MS candidates must be U.S. citizens or permanent residents. Citizenship is required for employment at Sandia National Laboratories.

Our facilities are located... In: New Jersey, Illinois, California, Colorado, Georgia, Indiana, Massachusetts, New Mexico, Ohio and Pennsylvania.

We will be on campus... October 23, 24 & 25 Check with the Placement Office for details

MIT debate does well in Vanderbilt Tournament

By Darrell Mavis

Two MIT debate teams fared well at the Vanderbilt University Debate Tournament held last weekend in Nashville. The partnership of Darrell Mavis '88 and Tim Kalvaitis '88 placed ninth, and the team of Joe McCally '89 and Tony Pak '88 finished 17th in the Nashville competition.

The pairs advanced through eight rounds of competition debating against colleges from all over the United States. A team from the University of Florida, former national champions, finally eliminated Mavis and Kalvaitis.

Mavis finished as fifth speaker in the 128-competitor field. The debate topic was: "Resolved: that significant government restrictions on media coverage of terrorist activity are justified."

(Editor's Note: Darrell Mavis is a member of the MIT Debate Team.)

Speak your mind at ROLM

It's more than just talk. At ROLM, your career is always a two-way dialogue. Right from the start, you have an immediate voice in important business communications projects, while flexible assignments broaden your professional experience.

Your voice makes a difference. In the future of a company that is standing on the threshold of the most exciting years in the history of telecommunications. Bringing full-feature desktop voice and data systems—complete with PC capabilities, digital memory and more—to a market intense with competitive challenges.

Your ideas hold the answers. And our products, continue to be unique expressions of the people who create them. It's hardly surprising coming from one of the first companies to make "Create a great place to work" one of its founding goals. That's why you'll find ROLM attracts and motivates the brightest in the industry, and provides physical surroundings and benefits befitting that kind of quality.

After the hard work you've put into preparing for your career, ROLM wouldn't think of offering you any less.
