Three dorms to get condom machines

By Niraj S. Desai

The Housing Office will install condom vending machines in Ashdown House, East Campus and Russell House during the coming academic year. Each of the houses will receive two machines, according to Robert W. Hagerty, operations manager of the Housing Office.

The three dormitories were selected as test cases for installation of the machines. If no problems arise and demand is high, the UA Council meeting on Wednesday night to endorse the idea of a condom vending machine in the Student Center.

Campus Police Chief James Olivieri will retire in December.

Come from within the department or outside MIT. At least one officer feels the replacement must come from the outside for the department to "move forward." Dickson is currently interviewing members of the Campus Police to solicit opinion on the merits of an internal replacement, or open to hiring someone from outside the department. Dickson said he will decide by early October whether MIT will conduct an internal or outside search.

"There are some very fine people in the Campus Police organization," several of whom might be worthy of promotion to chief, Dickson said. He decided that it would be in the best interest of the MIT community to look for a replacement outside the department, internal members would.

Deutch will appoint an associate provost of arts

By Sally S. Vanderwal

MIT plans to strengthen its visual arts program, hire more faculty in theater and dance, and create a new position of Associate Provost for the Arts, among other changes recommended by an all-faculty committee.

The Office of the Provost will implement the changes, which also include modifications in the means by which artistic groups obtain funding and studies of facilities for the performing arts, according to Provost John M. Deutch '61. Deutch appointed the ad hoc Committee to oversee changes at the new post of Associate Provost for the Arts. The search should take about a year, he added.

The position of associate provost is near the top of the administrative ladder, according to Provost John M. Deutch '61. Deutch appointed the Ad Hoc Committee to review the Arts at MIT, composed solely of faculty, in September 1986. Deutch said he "reluctantly agreed" to find an individual who new post of Associate Provost for the Arts. The search should take about a year, he added.

of Music, Theater, Arts and Dance and that additional resources be provided to this section to allow the hiring of additional faculty in the theater and dance fields, Deutch said. This recommendation has already been implemented, according to Deutch. Dramatics and Dance Workshop and the State University Ensemble are now funded by the School of Humanities and Social Sciences, he said. The committee also recommended that a new building be designated solely for the performing arts. It is not possible to accept that recommendation now, Deutch said.

Instead, Deutch has instructed the Planning Office, under the leadership of the Dean of the School of Humanities and Social Sciences, to do a systematic survey of space that might be available for the performing arts and to identify sources of funds for the renovation of these spaces.

UA to open store in Student Center

(Continued from page 1) should not affect the decision as to what is the Student Center next year.

The exact details of the project will be discussed at the next UA Council meeting on Oct. 14.

The store will carry mostly stationery and supplies at first, according to the drafted plan. The store will only be open for one year while the Student Center renovation continues and its hours of operation will be 11 am to 6 pm Monday through Friday.

Even though the store will be stocked with goods from the Coop, purchases may not be made with a Coop charge card, nor will Coop receipts or Coop coupons be valid. Only cash transactions will be accepted.

Rodriguez asserted that all though profits from the store will go the Finance Board for allocation to student activities, the primary objective of the store is to provide a service to students.

Store will provide goods conveniently

Rodriguez noted that since the Coop moved to Kendall Square last term and until the Student Center can house vendors next year, students have no nearby place to buy essential items.

"It is inexcusable for students to go to Kendall Square or Central Square just to pick up essentials like pens, paper, or lias when they run out," Rodriguez said. "Also, visitors to MIT who only want to buy an MIT sweat shirt or other insignia find the trip off-campus inconvenient as well."

Rodriguez will provide the UA with a loan of around $30,000 to use as starting capital for inventories, a loan of around $15,000 to use as starting capital for inventories, a loan of around $50,000 to use as starting capital for inventories,.

"Worry, Worry, Worry, Worry, Worry" Managing the Stress of Student Life

There's still time to take the Course "WORRY, WORRY, WORRY, WORRY, WORRY, WORRY" Managing the Stress of Student Life. The course will be held on Friday, October 2, 5:30 pm. The cost is $7.50. You can find this course under the course number 28-October 2, 5:30 pm.

REFORM (Audubon House Reform Shabbat Service)

Friday, October 1, 6:00 pm

Saturday, October 2, 11:00 am & 4:30 pm

CONSERVATIVE (MIT Chapel)

Friday, October 1, 6:30 pm

Saturday, October 2, 4:30 pm & 8:30 pm

Three will be special Shabbat services. Students can pick one service under the service as "Reform" on Friday, October 1 at 6:00 pm and 4:30 pm, and as "Conservative" on Saturday, October 2 at 11:00 am and 4:30 pm.

Admissions: Shabbat Dinner in 50 Mountain Drive, at the corner of towels and Mountain Drive. The MIT Chapel is near the corner of New Hampshire and Mountain Drive.

A few seats will be reserved for all shabbat services. Students can pick one service under the service as "Reform" on Friday, October 1 at 6:00 pm and 4:30 pm, and as "Conservative" on Saturday, October 2 at 11:00 am and 4:30 pm.

A community event will be held at the Audubon House Reform Shabbat Dinner for all participants of all services.

Soviets test long-range missiles

The Pentagon said that the Soviet Union has conducted two tests this week of a new long-range ballistic missile aimed at firing them a target 500 miles north of Hawaii. The Reagan Administration is concerned about the tests, because the US has never before found the Soviets to do so close to United States territory. The tests did not appear to violate international law.

Judge says Seabrook evacuation plans are misunderstood

The judge who will hear days of testimony on New Hampshire's evacuation plan says his renunciation of excluding public testimony is misunderstood.

Energy Secretary to put off a decision today about whether New Hampshire's ten-mile zone may testify. The restrictions have been imposed because the plant is undergoing an overhaul.

Two Republicans say the House has avoided working on legislation toward a collective bargaining agreement replacing the expired 1979 agreement. A 214-team vote Tuesday to return to the bargaining table.

Key Republican opposes Bork

Sen. Al Gore (D-Tenn.) joined President Carter today in the confirmation of Supreme Court Nominee Robert Bork. Specer was a key uncommitted member of the Senate Judiciary Committee. He fell in line with Senator Smith and Senators Walter Mondale of Minnesota and Hubert Humphrey of Minnesota.

Specer said he has to vote against Bork because of what Specer calls "substantial concerns about how Bork could apply fundamental principles of constitutional law."

President Reagan was called the key vote by Senate Republican leaders, who have been working to get the nominee confirmed. Senators Smith and Specter were key undecided members of the Senate.

Dukakis campaign officials implicated in Biden tapes

Governor Michael Dukakis' campaign manager John Sasso has resigned Wednesday after Dukakis acknowledged that Saso had provided the videotapes that led to Senator Joseph Biden's withdrawal from the field of Democratic candidates.

The tapes show that Saso had told him that he was responsible for distributing copies of the tape. The tapes show a Biden speech and one goes by British Labor Party leader Neil Kinnock. Biden did not credit Kinnock for the views he expressed in the speech.

Dukakis revealed yesterday that a third staffer -- Field Director Jack Corrigan -- also knew about the videotapes. Dukakis said Corrigan's actions were wrong, but not bad enough to call for a dismissal.

Malone signs with Utah Jazz

The executive director of the NFL Players Association signed a six-year, $6 million contract with the Utah Jazz yesterday. The former Los Angeles Lakers star has averaged more than 18 points a game in his two seasons in Salt Lake City.

Dorsett crosses picket line

Running back Tony Dorsett reported to the Dallas Cowboys yesterday, making it close to 50 National Football League players who have crossed picket lines since the strike began 10 days ago.

Upshaw claims NFL owners trying to divide white and black players

The executive director of the NFL Players Association says league owners are trying to split striking players along racial lines. Speck also has threatened legal action to prevent the league from dividing the union along the lines of black and white.

Redbirds win division title

It's the third division title in six years for the Redbirds. Danny Cox threw a five-hitter to get the victory in front of nearly 49,000 fans. The crown included members of the St. Louis Cardinals, who won their first division title in five years.

Missile treaty would hurt NATO, US

To the Editor:

In his column ("German need nuclear shield," Sept. 29), K. J. Seager makes several questionable assumptions and omissions. First, he believes NATO must achieve a conventional force strength roughly equal to that of the Warsaw Pact if it is to deter an attack by conventional means alone. As I recall, it takes many more men and materials to successfully deter an attack than to successfully deter one.

Second, he implies that intermediate-range nuclear missiles were stationed in West Germany to liberate us from a decision — whether to invade or to cede the territory or cause it to be invaded — in the event of a Soviet attack. If this is true, precisely how do the intermediate range missiles alter this picture?

Seager also seems to ignore the fact that many of our battlefield nuclear weapons are placed close to the East German frontier from that in the first hours of a communist attack they will either be used or quickly overrun. Since current NATO policy dictates the forces along the West German frontier will be "countered" by the shorter-range weapons, regardless of the presence of the intermediate range weapons.

Lastly, the deployment of intermediate-range nuclear forces was largely a re-tariff response to the deployment of heavy forces aimed at Europe, such as the 8th Army. Seager's argument ignores this.

Michael C. Morgan '88

In any number of situations, the MIT Alumni Association has continued and its investment Committee to choose for MIT investments.

One can argue that these investments are the official position of the Club. Our alumni group like the Class of 1972 are constrained by charter and vote of the Board of Trustees. It is not the responsibility of the faculty or student groups to discuss this matter face to face. We will certainly share our letter with the Board of Directors.

Feedback

Protesters were disruptive and rude

To the Editor:

On Tuesday Sept. 29, a group of about 20 protesters marched to Building 20 to protest US involvement in Central America. They stomped up and down the halls and chanted a variety of slogans including anti-ROTC ones.

While we respect their right to free speech, we are very upset that they did disrupt our day. It would be nice if they had a right to interrupt our class because it was a ROTC class and they disagree with what was being taught. Perhaps if people who do not like any argumentation than behaving childishly, more people would not feel the need to disrupt. We, in turn, would merely dismiss them as troublemakers and self-promoting agitators.

Shreema S. M. Huang '89

Students were not trying to influence US foreign policy, I suggest that they write to the congressmen who represent them and formulaté that policy. On the other hand, if the protesters were trying to influence cadets into being conscientious objectors, they were doing so in the wrong way.

More seriously, just as I would not try to dissuade a student from joining any activity such as the Committee on Central America or the MIT, I would expect others to respect any individual who feels they are distressed by the protesters' lack of respect for their rights. By disrupting our class, they are irre- frigation to give up on their right to a choice of education.

How would you feel if some protesters marched into your class because they disagreed with what you were being taught? Perhaps if people take their political arguments rather than behaving childishly, more people would not feel the need to disrupt. We, in turn, would merely dismiss them as troublemakers and self-promoting agitators.

Affirmative action is no solution to racism

To the Editor:

I would like to discuss an age- old issue and perhaps, in some cases, a glaring issue raised by Thomas T. Huang G in his column ("The Education of a Racist," Sept. 15).

Racism is very much alive in our society and is not isolated to the minority races as sometimes claimed. The mental force of minority peoples in our country is quickly becoming weakened.

Assimilation would be a wise step

(Continued from page 4)

minority peoples, for the most part, do not wish to integrate, fearing the loss of racial and ethnic identity. So this seems ironic to them since these very same minority peoples would protest vehemently if the white majority chose the identical course of action for the white man.

Clinging to affirmative action promotes the argument against minority peoples: that they are not willing to stand on equal terms with the majority, making the issue of color irrelevant in so-societal and economic realms. Radically, however, whether this argument is true or false is of no importance. The general majority's belief concerning this issue is inaccurate. His intent may be noble, yet his countermeasures to racism are, at best, outdated. The majority would be a wise move to recognize their differences, yet they must realize what they have in common as countrymen. Peoples of a nation must become one people. Minority peoples must value assimilation and the majority people in turn value diversity he is doing, they may move toward a common understanding.

We are at a key point in history where the great economic and social influence of racism may be quelled. We should look at the problem in its present state, not relying on the solutions of yesterday to answer the questions of today.

Racism cannot be eradicated in the near future. For such to be the case, a generation must be born that needs to make no conscious effort to be racially unbiased, since for them all people are their people. At this time, our goal should be to establish true economic and social equality. We should rise to the challenge at hand, leaving that which is beyond us to posterity.

AIDS AWARENESS WEEK AT MIT
October 4-11, 1987

AIDS-AWARE: AIDS IN FORMATION TABLE
Monday, Tuesday, and Wednesday
LOBBY 10, 11:30 a.m. - 1:30 p.m.

Free pamphlets, fact sheets and information with Medical Department professionals on hand to answer your questions.

VIDEO PRESENTATION "AIDS: Beyond Fear"
Wednesday, October 7
12 noon, Emma Rogers Room, Building 10-340

A compelling update on the AIDS epidemic, focusing on The Virus, The Individual and The Community. Following the 1-hour videotape, members of the Medical Department will answer questions from the audience.

These events are sponsored by the MIT Medical Department and inaugurate its AIDS-AWARE Project, an ongoing effort to inform the MIT community about the disease, its prevention, and progress toward a vaccine and cure. To learn more about AIDS or other AIDS-AWARE activities, call the Health Education Service at 253-1316.

Three dorms receive condom machines

(Continued from page 1)
products be included in the machines.

MIT's Medical Department has already decided to install birth control devices, according to David E. Bailey, chief pharma-
cist in the Medical Department.

However, compared to the number of birth control pills sold, sales of condoms have been very low — only about 140 per week. "We don't sell as many as I think we should," Bailey noted.

He suggested that so few condoms are sold because people might feel embarrassed to buy them at the pharmacy, might not know that the pharmacy sells condoms, or might think it in-
convenient to go to all the way to the Medical Department.

The presence of condom vend-
ing machines in discreet places in the dormitories would give stu-
dents much easier access to con-
doms and fewer inhibitions about buying them, Bailey noted.

Gauging student reaction

The Housing Office is installing the machines in only three dormi-
tories presently in order to gauge the attitude of residents toward the machines and to measure the demand for condoms.

"In one word, the issue is 'ac-
ceptance,"' Hagerty said. Selling
condoms in dormitories is a new
idea, and MIT is not absolutely sure how students will react.

Groups from the Medical De-
partment will hold discussions
with dormitory residents to gather student opinions.

Hagerty said he expects a posi-
tive reaction. "Other houses want
to get ahead [with installation of
the machines]." So far there have been few complaints about the plan, he said.

Whitman also expected stu-
dents to react favorably to the machines. It seems like a good
idea, and "I don't think it's of-
fensive," she said.

But she cautioned that "it's a
little hard to tell right now" what
the student reaction at East Cam-
pus will be, adding that word has only begun to spread about the installation of the machines.

At Ashdown, the initial rea-
tion has been positive.

"Our consensus was that with
the AIDS epidemic, we really had
an obligation to support some-
thing that might help," said Scott
J. Smith, chairman of the Ash-
down Executive Committee.

Smith said he expects students will handle the situation well.

"We are all grown-ups," he said.

Last year, before the Institute-
wide plan was announced, 500
Memorial Drive had considered installing condom machines on its own. However, many people objected to the house spending its own money on the project, ac-

According to Joseph M. Mullally '89, 500 Memorial Drive presi-
dent, now that MIT has put forward its own plan, support for the ma-
chines is high. "We're ready for it
[the machines]. ... the stu-
dents are enthusiastic," said
George G. Hosker, 500 Memorial Drive house manager.

AIDS education

Bailey stressed that the Insti-
tute, by making condom pur-
chases, is not suggesting that condoms are a panacea for AIDS. There have been some studies suggesting condoms re-
duce the spread of the disease but "there are no iron-clad guar-
antees," he said.

Bailey's sentiments were echoed by Borivoje B. Mikic ScD '67, housemaster at 500 Memorial
Drive. These machines are only one part of the "big picture" in the fight against AIDS.

"Condoms are not the complete
answer to the problem, nor are
they even the best method," Mikic
said. Even more important than
condoms is education, he contin-
ued.

Before and after installation of the machines, a group from the Medical Department will visit the dormitories to discuss with stu-
dents the various methods of
AIDS prevention, according to
Janet H. Van Ness, director of the Health Education Service.

One of the primary purposes is to dissuade students of the no-
tion that condoms alone will solve the AIDS problem, Van
Ness said. "Condoms are a big
help, but they are not the an-
swer."

Condoms are not suitable for
every form of sexual activity. Van
Ness continued, and they can break. Also, there are many ways to catch the disease which do
not involve sexual activity.

How the Medical Department will approach various dormitories
has not yet been decided. A lot
of people are not really con-
cerned about AIDS and may not be willing to come to a seminar
or discussion group, Van Ness
noted.

"I'm not sure myself if [with the current round of AIDS pub-
icity] a lot more people are using
condoms," she added.

Van Ness noted that people cannot be "force-fed" health in-
formation and the Medical De-
partment can only try to spread
as much information as possible.
Next week is AIDS Awareness
Week in Massachusetts and sever-
al high-profile events are planned, she said.

Van Ness also rebutted the
notion that the presence of condoms implies that the il-
lections believe everyone at MIT is sexually active." Nor did she
think condoms would encourage increased sexual activity.

Machines supplied at no cost

The machines belong to Pro
Tek, a company in Boston. Pro
Tek is supplying the first six ma-
chines at no cost to MIT. The
company will also maintain the
machines and collect all money.

When the program is expanded to include all the dormitories, other arrangements may be
worked out, Hagerty said.

MIT had some difficulty in lo-
cating a company to supply the machines, Hagerty said. Vending
machine companies tend to be
rather specialized — focusing on
food machines, soft drink ma-
chines, etc. Van Tek also was chosen because it was
ready to install the machines right away, at no cost. If Pro
Tek fails, after installation of
the first machines, that demand is
very low and the venture is un-
profitable, it has the right to pull
out, Hagerty said.

Bailey described the condoms that will be in the machines as
"generic" — not a brand name.

They are produced by Circle
Rubber Company, are individual-
ly wrapped, and will cost 75¢.

Right now, there are no plans
to place condom machines in in-
dependent living groups or non-
dormitory Institute buildings.

Sarah Kishnowsky

I told you what I wanted for
the party, Enid. And you didn't
get it. So from now on I'm not
going to show my face to any of your friends.

PAGE 6 The Tech FRIDAY, OCTOBER 2, 1987

On the way to a 1-0 victory, Christine Le 'Vanina '89 (right) moves the ball past Babson's Colleen Reddy. MIT plays Clark tomorrow.
MIT begins search to replace Olivieri

"One of my prime objectives when I became chief was the development of professionalism," Olivieri said. In the 1950s and 1960s many officers were older people who had retired from a municipal or state police force. Olivieri said he sought younger officers and stressed the need for education and training.

Numerous officers have associate and bachelor's degrees in criminal justice and law enforcement, and some have additional training in management, Olivieri noted. The training of the department "matches or exceeds the training of municipal departments," Olivieri said.

A Campus Police officer can become a good municipal officer, but the reverse is not necessarily true, Olivieri said. The ability to help and serve people is vital on a campus. A Campus Police officer must be "sensitive and equally attentive to the needs of different segments of the community," Olivieri said.

Dickson said that the qualities necessary for a good chief are "police experience, service-oriented, good communications skills within and outside of the community, and better than average administrative ability." Dickson said he would not hire someone with police skills if the person was not "service-oriented."

A successful Campus Police chief should have "training in psychology and business management as well as public relations," Lewis said. The MIT community is very different from a municipality, and thus a campus police chief must be able to deal with many different people and cater to the needs of male and female alike, and people of all races, he added.
ART's special effects are appropriate to Six Characters

The action of the six characters, on the other hand, has been more or less left alone. (One notable— and somewhat questionable— exception is the exchange of the seventh character, the madame of a brothel, for a male Hispanic pimp.) For us, this heightens the effect of separation between the two groups on the stage: the six characters seem a little stagier in contrast to the struggling, who seem to be free to improvise. (This separation is also heightened visually by dressing the six characters entirely in black and white, but the rest of the company in street clothes.)

The "improvisational" work is a highlight of the production, especially at either end of the play, where a prologue and epilogue of sorts have been added. Anyone objecting to other freedoms taken with the text should view this as a rather loose translation from 1920s Italian into 1980s Bostonian; within this context it is not excessive.

Jeremy Geidt guides the troupe effectively as the Senior Actor. In one of his best scenes, he appears with a clipboard and eraser, prompting the actors with practiced efficiency into their new roles, a jovial director.

John Bottoms is equally outstanding. As usual he exhibits remarkable control over his body; he warms up for rehearsal by standing incarnate in front of him, he adopts the character's mannerisms as they circle each other. Several of his one-liners are hilarious, such as the one in which Fields says: "never work on a stage with children or dogs..."

Tom Rooney almost plays a universal character, as a stage manager who will be familiar to anyone who has worked in a theater. John Grant-Phillips is a cogent stage manager, and Sandra Shipley, Thomas Darrah, and Harry S. Murphy get in their share of good lines.

As for the six characters, the two principals, as Derrah, and Harry S. Murphy get in their share of good lines.

The characters of Pirandello's Six Characters in Search of an Author.

Glamor, not music, dominates the BSO Opening Night

By JONATHAN RICHMOND

The Boston Symphony Orchestra began its one hundred and seventh season on Tuesday night with performances appropriate to an audience more interested in visualizing and the "glamor" of Opening Night than in the music. It was, after all, a grand evening for the Boston Establishment.

The first piece, Bernstein's "Chichester Psalms," was the best. Ozawa wound up the opening dynamics his orchestra can display for a powerful, if hesitant, account of Psalm 100. And 14-year-old alto Raymond Jourdan showed flair, while he lacks complete tonal purity, his voice possesses a soft innocence that makes for a profoundly moving account of Psalm 23, "The Lord is my shepherd." The orchestra, ruffled, gently uplifting, was always close by to provide a poignant backdrop to the loneliness of the soloist on stage. The chorus, here, played a subtle, supportive role, too.

John Oliver's Tanglewood Festival Chorus, however, was not consistently sharp. Finer passages showed a tendency to become unfocused; and there was some dissonance, perhaps, with the Hebrew texts. It was in the music, however, that the Boston Symphony Orchestra on Opening Night. Ozawa next walked the BSO through a superb performance of Schoenberg's "Symphony in B minor," the "Unfinished." He reduced a work of sparkle and spirit into one which came across as ponderous, mechanical and downright dull. Tempi were unfortunately relaxed, and any sense of discipline that might have held the orchestra together. Did Ozawa spend any time rehearsing this piece?

Jessye Norman performed with a sense of musicality, but her approach lacked attention to detail. She did not provide the pleasure that comes from a performer able to explore and elaborate the ideas in each word, and deliver those words with perfect diction.

Instead, words tended to become mind-shapes and to dissolve into one another.

Norman sang without romance, and the poetry of Hermann Hesse and Josef von Eichendorff was denied its fragrance and vitality. Ozawa's orchestra was also rather vital, a characteristic Eichendorff was denied its fragrance and vitality. Ozawa's orchestra was also rather vital, a characteristic

The program ended with Richard Strauss's "Four Last Songs," sung by Jessye Norman. Now, to sing "Four Last Songs,

Ensemble

Engelhard helps make many of the products we use everyday even though the company name doesn't appear on most of them. Engelhard products and technologies help make the cars we drive, clothing we wear, food we eat, homes and offices and plants where we live and work, telephones and computers that make us read, pharmaceuticals and vitamins that keep us healthy. The company's materials perform vital functions in a customer's manufacturing process or serve critical purposes, enhancing reliability, or giving a certain characteristic to the customer's finished product. That's why Engelhard is known as a Performance Products company. And why technology is so important in enabling the company to continue advancing the leading edge in quality to give us an advantage over competition by meeting the needs of customers in our markets. Engelhard is organized into two major operating divisions-Specialty Chemicals and Specialty Metals.

ENGLERLARD IS COMING TO MIT!

Engelhard is a Fortune 200 company offering employment opportunities that are unparalleled. Our 18-month Graduate Development Program provides each graduate with an excellent balance of process/project orientation and hands-on experiences. At Engelhard, you'll gain valuable exposure to a rotation of operations, process, maintenance, R & D, and developmental assignments. Plus, you'll enjoy an environment that is conducive to your professional growth. To learn more about the career opportunities available, plan to meet with our representatives on campus. We'll show you how Engelhard's "exceptional technologies" can bring you the best of tomorrow... today!
The Tech Performing Arts Series presents...

MOZART CONCERT
Pro Arte opens season with Mozart spectacular

MOZART
Piano Concerto No. 21
Symphony No. 29
Symphony No. 40

KRAFT
Double Play

We have a limited number of discounted tickets for the opening concert of The Pro Arte Chamber Orchestra's 1987-88 season. Sanders Theatre, Oct. 10, 8pm. Pre-concert lecture at 7pm. Ideal for 21.60 assignment. MIT price: $6

Tickets are on sale at the Technology Community Association, W2045 in the Student Center. Office hours posted on the door. Call x3-4885 for further information.

The Tech Performing Arts Series, a service for the entire MIT community, from The Tech, MIT's student newspaper, in conjunction with the Technology Community Association, MIT's student community service organization.

Harry S Truman Scholarships
The annual Harry S Truman Scholarship Awards will be made to current sophomores in good standing who are U.S. citizens or nationals. Two MIT students will be nominated by the Institute. The awards will be for $7,000 and are renewable for the senior year and for up to two years of graduate study. Any sophomore wishing to be considered should contact Ms. Britt Raphling, E51-110, x3-4062, NO LATER THAN OCTOBER 5, 1987.

Clarke's Suite in D highlights Emmanuel Church concert

CONCERTOS AND CANTATAS Concert by the New England Bach Festival Orchestra. Conducted by Blanche Hangemer Moyse. Emmanuel Church, Boston. September 27.

I dripped wet. The drowned form is lifted from the lake, it is ominous reality it mimics, mirror thus becomes more real than the staged stage. After a few crude props are placed restrained, the instrumentation varied throughout.

Another amusing effect comes in the climactic scene, where a giant hand falls into the illusory theater world. The little girl lies senselessly on a sheet of blue plastilene to indicate that she drowned in a back-yard duckpond. It is all we need to accept her death: such is the conventional logic of the theater. But suddenly, and sensibly, her body begins to rise from the plastic and the stage beneath, and there is an ominous trill of water. When the drowned form is lifted from the lake, it is dripping wet.

The line between make-believe and reality thus remains not only for the actors themselves, but also for the audience. He should react as if he knew they were quite banal, but for the performance by the New England Bach Festival Orchestra. This past Sunday they played works of the first three quarters of the 18th century: Concerto in G minor for Flute, Harpsichord & Orchestra, "La Nozze," F. X. No. 5 by Vitali; Cantata, BWV 42, "Ich habe gehört" and the Brandenburg Concerto No. 6, BWV 801 by Bach; Serenade Nocturne in D, K. 279 by Mozart; and the Suite in D by Jeremiah Clarke.

The special effects, as mentioned, are restrained and essentially dramatic rather than visual. The key effect is a giant mirror which is lowered at the back of the stage. After the crude props are placed in front of it to suggest a setting for a stage run-through, a light effect suddenly reflects the mirror in full detail, behind the mirror. The image in the mirror then slowly comes into form, and the reality it mimics, providing a nice visual realism throughout.

A Diverse Support Group led by Marcia Uhlen Jackson, LICSW, will begin on Sept. 16, 1987 at Riverside Family Institute, 259 Walnut Street, Newtonville. The group will meet on Wednesday evenings for ten weeks in Room 14 from 7:30 to 9 pm and is designed to help people overcome the social and emotional impact of separation and divorce. Call 964-6933 for more information. A fee will be charged.

Do you have questions about Distribution subjects and fields? Concentration requirements or procedures, what are HASS Elective subjects? Come to the Humanities, Arts, and Social Sciences Office, 140-409 for help with anything to do with the HASS requirements. We are open 9:30. Stop by or call us at x3-441.

The Off-Campus Housing Service welcomes any member of the community who either has available housing or who is searching for housing to contact our office in Room E18-301, ext. 3-1493.

The professional tutor staff of the MIT Writing and Communication Center (14N-317) will be glad to consult with you on any writing or oral presentation project (papers, theses, letters, etc.) from 10-6 Monday through Friday. You may either phone for an appointment (x3-3906) or just drop in. In addition, workshops for those for whom English is a second language are held in the Center on Wednesdays from 6:15-7:15. All services are free.

Explorer Dr. Barry Barker of the National Institute for Exploration is organizing a series of expeditions during 1987 in an attempt to discover the hidden answers of mysterious and strange happenings in Peru. The results of these expeditions will be a full color book representing the best journalistic and photographic efforts of more than 100 individuals. For further details, call or write Dr. Barry W. Barker, Director, National Institute for Exploration, 111 N. Market St., Champaign, Ill., 61820, 217-352-3667.

The MIT Museum has many ongoing exhibits. The Museum is located at 265 Massachusetts Ave., and is open Monday through Friday 8-5, Saturday 10-4. Admission is free.

It takes a certain talent to create the kind of performances that have made history. CODEX has that talent. And we’re looking for more.

For 25 years we’ve played the leading role in data communications and networking management. Giving command performances to data communications managers, worldwide...everyday...with innovative products, technical consultations and networking solutions. Our encore? We’re developing the integrated communications networks of the future. Right now.

The best performers make history.

Acclaimed nationwide as “The Complete Networking Company” CODEX offers you one of the most exciting high-tech environments available. Our entrepreneurial spirit, excellent benefits and greater Boston location...close to some of the finest cultural, educational and recreational resources, make CODEX the perfect setting for you to perform your best.

If you’re a CS major interested in software development, take center stage with CODEX.

On Campus Interviews: October 5
Tuesday, Oct. 6
AIDS Awareness Day — Joining a nationwide effort, the Beth Israel Wellesley Program at the Le-venthal-Sidman Jewish Commu- nity Center will sponsor an AIDS awareness booth in the lobby from 4 to 7 pm. Information on AIDS — including AIDS in chil- dren and AIDS in the workplace — will be available. "Beyond Fear," a documentary on AIDS in the community, will be shown from 6 to 7 pm and will be fol- lowed by discussion led by a nurse from Beth Israel's public health. This program is free for all community members. Please call 965-7410 x 87 for fur- ther information.

The Cognitive Science Seminar Series will sponsor Attitudes De- fense and Logical Form, a talk by Generoso Chierchia, a linguis- tic form of Cornell University, with commentary by MIT Professor James Higginbotham. Gencer Con- ference Room, 34-150, 7:30 pm.

Dr. Jan Marsh, author of Pre-empting the Holocaust, will dis- cuss "The Interaction of Painting and Poetry in the Work of Eliza- beth Siddal and Dante Gabriel Rossetti," at the Simmons Col- league Trustman Art Gallery, 3–5 pm. For information, call 734- 3124.

Wednesday, Oct. 7
The Cambridge Forum will spon- sor a talk by Prof. Robert D. Richardson of the University of Dar- former winner of the Melcher Award, honoring the book judged to be the most sig- nificant contribution to religious liberalism. Begins 8 pm at 3 Church St., Harvard Square.

Marvin Minsky will address the secrets of both human and artifi- cial intelligence in a lecture, "The Society of the Mind: A Psycho- logical Look at Artificial Intelli- gence," in The Computer Muse- um auditorium, Museum Wharf, 80 Congress St., 3 pm.

Wednesday, Oct. 14
An informal wine and cheese re- ception in honor of newcomers and their spouses will be held at the President's House, 111 Me- morial Drive, 4 to 6 pm, hosted by Dr. and Mrs. Paul Gray and the MIT Women's League.

"Japan and America: What Lies Ahead?" is the title of a Cambridge Forum talk to be given by Harvard Professor Susan Pharis. She will discuss the economic, political, and social relationships between the United States and Japan. Begins 8 pm at 3 Church St., Harvard Square.

The MIT-Japan Science and Technology Talk Series will spon- sor a talk by Institute Professor Mildred Dresselhaus on "An overview of Japanese Material Research in University and Indus- trial Laboratories." Begins at 5:30 pm, Room 4-139.

Wednesday, Oct. 21
There will be a MIT Women's League Open House in the Bush Rooms, 17-41D, from 10 am to 4 pm. Displays illustrating the Leag- ues' interest groups and volun- teer activities will be featured. Refreshments will be served. New and old members are all wel- come.

Friday, Oct. 23
Marine Poisons — Legends and Fact is the topic of a lecture to be given by Bruce Halstead, Direc- tor of the International Biologi- cal Center, World Life Re- search Institute, Colton, California. The lecture begins at 5 pm in the auditorium of the New England Aquarium. Free and open to the public.

Friday, Oct. 30
Is There a Real Monster in the Congo? is the topic of a lecture to be given by Phil Lobel, Anti- racist Scientist, Woods Hole Oceanographic Institution. Sen- sational tales from the first scienti- fic reconnaissance to find Mi- kele Mheme — a dinosaur thought to be stalking the forests of the Peoples Republic of the Congo. The lecture is at 7:30 pm in the auditorium of the New England Aquarium. Free and open to the public.

Announcements
National College Poetry Con- test — cash prizes for the top five poems. All entries must be post- marked not later than October 31, 1987 and must include all fees to be paid, check or money or- der, to: International Publica- tions, P.O. Box 48844-L, Los Angeles, CA 90044.

1988-1989 NSF Minority Grad- uate Fellowship competition will receive stipends of $12,000 per year for 12 months. The application deadline is November 15, 1988. Submit your application by mail to: NSF Fellows Program, 1800 G Street, N.W., Suite 300, Washington, D.C. 20550. Applications from women, members of ethnic minority groups, or other underrepresented groups will be considered.

The Committee on the Writing Requirement

"VIVID. ORIGINAL. A MUST READ!!"

The Committee on the Writing Requirement

• SENIOR PAPER DEADLINES •

Dec. 11, 1987 — Paper submissions (either phase) for Jan. 1988 Degree Candidates
Feb. 19, 1988 — Paper submissions (either phase) for June 1988 Degree Candidates

• FRESHMEN, SOPHOMORE, JUNIOR* PAPER DEADLINES •

Oct. 16, 1987 (Add Date) — Phase One paper submission from Spring '87 subjects
Room 34-101, 7 - 10pm. ONLY for new transfers and members of the Class of 1991 who have not yet taken the Freshman Essay Evaluation.

FOR ADDITIONAL INFORMATION, call or come by the Undergraduate Education Office, Writing Requirement Section, Room 20C-105, x3-7909.
OK. Enough theory. It's time to get hardcore about your career in software. With Microsoft.

We'll give you all the resources you want. Tens of millions in R&D funding. Along with one of the most elementary tools for thinking—a door, leading to your own private office (instead of the cubicles or—horrors—bullpens you find elsewhere). All backed by management that truly does speak your language, because they probably helped write it.

We're serious about software design. If you are, too, now you know the perfect place to start—Microsoft.

Software Design Engineers

We're working on everything from compilers, operating systems, and networking to sophisticated graphics, powerful productivity software, designing features in the user interface for a new generation of products, and some things that can't be mentioned in print. You could be, too, if you're about to graduate with a BS in Computer Science, Math, or a related major, with provable understanding of micros, "C", the 8086 family, UNIX®, XENIX™, or MS-DOS®.

Join Microsoft, and you'll not only have the opportunity to work with the world leader in microcomputer software, but also the opportunity to live in the beautiful Seattle area. And, while you've probably heard a lot about the gorgeous scenery around Puget Sound, you may not know that Seattle boasts the most active live theater west of Broadway. A cultural calendar filled with everything from film festivals to jazz concerts. As well as major league baseball, football and basketball.

To all of that, Microsoft adds a stunning modern campus, with amenities such as workout facilities, a parcours, and membership in a nearby health club. Plus an array of benefits for your personal and financial well-being.

How do you get hardcore? Attend our on-campus interview on Thursday, November 5. Contact your Career Placement Center to sign up. We are an equal opportunity employer.

Your MIT degree will take you far...

but four miles is all you'll have to go.

From Kendall Square to Fresh Pond Circle. From MIT to BBN. Only four miles in distance, but it could mean light years for your career in science or engineering.

BBN is one of the world’s leading centers for research and development in computer, information, and physical sciences technologies including artificial intelligence and expert systems, automated systems, communications technology, educational technology, distributed operating systems, experimental psychology, file sciences, simulation and training systems, speech signal processing, architectural and environmental acoustics, structural mechanics, and underwater acoustics. And we do more than R&D. We’re also a market leader in integrated wide-area communications networks, high-performance computers, and computer image generation systems. And we’ve developed software for scientific, manufacturing, and engineering research unmatched in the industry (our RSI package is used in Project Athena).

We’d like to introduce ourselves, show you around, and let you talk to some of the MIT grads who’ve made the move from Kendall Square to Fresh Pond Circle. So if you’re an electrical engineering, physical or computer sciences major, come see what a four mile trip could mean to your future. We’ll even drive.

VISIT BOLT BERANEK AND NEWMAN (BBN)

Thursday, October 15, 1987
OPEN HOUSE for MIT Students

Time: 3:00 PM - 5:00 PM
Transportation: 2:30 PM pickup in front of the Administration Building Main Entrance on Mass. Ave. (Bus Transportation provided by BBN)

Location: 70 Fawcett Street, Cambridge

Sign-up: Office of Career Planning and Placement by Tuesday, October 13th.
