addcitional funds came in after raising $4894.50. Peterson said.

"At the time of commencement, raised by the class, Peterson said, exceeded the amount of money according to Ovadia, R. Simhla, director of planning. The Planning Office did not have information yesterday on the total cost of the maps, according to Ovadia. Simhla, director of planning.

The cost of the sign slightly exceeded the amount of money raised by the class, Peterson said, but MSIT would make the difference. At the time of commencement in June, the sign was raised $4894.50, Peterson said. Additional funds came in after graduation, but he could not have exact figures.

The new MIT Campus Information map in use.

Campus map provided by Student Center

By Andrea Lamberti

In a boon for visitors to the MIT campus, the first of two MIT Campus Information maps has been placed between the Stratton Student Center and Massachusetts Avenue.

The map was the gift of the Class of 1987. The second one will be installed at the Massachusetts Bay Transportation Authority (MBTA) station in Kendall Square, according to Barbara A. Peterson, the Alumni Association's program director for students and parents.

The second sign is not part of the class gift, Peterson said. It will be "in something provided by the MIT," she said.

The class gift sign lists MIT buildings by number and name, and the numbers are referenced on the color map. It includes street names, bus stops and parking lots. However, the map does not indicate to own location in a "you are here" manner.

The Planning Office did not have official information yesterday on the color of the map, according to Ovadia. Simhla, director of planning.

The cost of the sign slightly exceeded the amount of money raised by the class, Peterson said, but MSIT would make the difference. At the time of commencement in June, the sign was raised $4894.50, Peterson said. Additional funds came in after graduation, but he could not have exact figures.

Number of HASS minors increases
(Continued from page 1)
each have 11 students in minor programs. Course 14 and 4 have nine HASS minors each.
Eileen P. Murray, senior secretary for the School of Humanities and Social Science, felt that interest in a subject and the desire to get a better job influence students' decisions to take a minor. Although there is no evidence that a minor provides any advantage on the job market, career considerations remain the main incentive, she felt.
However, Murray believed in minorizing as an end in itself. "It broadens a student's knowledge in different areas, and prepares them better for the world," she said.

Bone marrow donor found for Christopher Corcoran
(Continued from page 1)
In the meantime, the person was further tested, and proved to be a positive match," he said.

The NMDP maintains a list of approximately 138,000 donors throughout the country. The list was established in 1987 to help patients searching for marrow donors.
Corcoran sponsored two bone marrow drives in September and November, according to Kathryn J. Comer '91, membership vice president of the Technology Community Association, which helped sponsor and publicize the events.
Even though a potential donor had already been located through the NMDP, Corcoran still went ahead with the drives. "We did the drive mainly to increase his chances [of finding a match]," he said. It also opened up the possibility that other people with leukemia could find matches.
The Sep. 30 drive, which drew over 1200 people, did result in a tissue match for another leukemia patient, Corcoran said. "[That] individual has already been contacted as a possible donor for someone else," he said. The two people, he added, are still confidential.
Three hundred people were tested in the second drive on Nov. 11, Comer said. The drives were held largely through Corcoran's and instructors, were added to the original list of 17 last year.
A minor in East Asian studies might also be added, depending on the success of Chinese language courses that were begun last fall, according to Professor Philip S. Khoury, acting dean of the School of Humanities and Social Science. "East Asian studies will be more probably be offered in two years," he said.
Besides East Asian studies, the possibility of any new minors in the near future appears to be slim. The impetus for new minors does not originate from students, but rather from the quality of the faculty, Khoury said.
"We target the department which has enough depth of knowledge to offer a first-class program in a certain field of study," he said.

The Students of AIDS Response at MIT (SARMIT) and The MIT ADHOC Committee for AIDS Awareness cordially invite you to participate in MIT's World AIDS Day Activities
Lecture Series Committee Presents:
"Longtime Companion"
November 27, 1990 8:00 pm
Kresge Auditorium
Winner of 1990 Audians Award - UI Film Festival
AIDS Information & Educational Resources
November 18 & 20, 1990
Stevenson Student Center Lobby
"The Inner Circle"
November 29 & December 1, 1990 8:30 pm
William Hall
A play performed by MIT Students
World AIDS Day Observances
November 30, 1990 11:00 am - 2:00 pm
Lobby of Building 7
Pieces of AIDS Project Quilt on Display
Quilting Toss
Student Poster Contest Exhibition
AIDS Information and Educational Resources

Sponsored by
ARMS and the other members of the MIT ADHOC Committee for AIDS Awareness
Computer Activities Campus, MIT Council for the Arts, Lecture Series Committee, MIT Medical Department's Health Education Service, MIT Museum, Office of the Dean for Student Affairs, Public Service Center, Residence and Campus Activities

Research & Advanced Development
Motorola Codex is a leading worldwide supplier of data communications equipment for private networks, from transmission products through wide area networking solutions (STDM, X.25, T1), all under integrated network management. Codex is a recognized leader in bringing state-of-the-art technology to products.
We are building upon our expertise to provide advanced private networking solutions for the 1990's. Areas of activity include new system architecture and design of integrated networking nodes, new system and software architecture, design and implementation of real-time distributed microcomputer networking products, ISDN call processing and frame relaying, system and networking software.
Research and Advanced Development at Codex brings together research, advanced marketing and advanced development in a unique setting to focus innovative efforts in new communication technologies. The ideal Codex RA&D enginee is one who wants to see his/her ideas realized in commercial products; someone with outstanding technical ability and the desire to turn ideas into tangible output that meets real market needs.
If you are qualified by education and experience for positions in the following areas, we invite your inquiry.

Software Design and Implementation for Networking Nodes
- Loading, Configuration and Initialization
- Fault Recovery and Management
- Network Management and Service Access
- Routing, Clock Synchronization and Distribution
- Call Processing Software
- System Integration, Testing, and Performance Measurement

Software engineers should be proficient in C". Working knowledge of structured analysis and design techniques is desirable.
Codex, a subsidiary of Motorola, Inc., offers an excellent environment conducive to professional growth, competitive salaries and a comprehensive benefits package including profit sharing, 401K and a generous pension plan.
Please send your resume to Advanced Sourcing Group, Codex Corporation, Dept. MIT, 20 Cabot Blvd., MS MA-70, Natick, MA 01760. An Equal Opportunity/Affirmative Action Employer, M/F/H/V.
Permanent Security Council Council members
generally agree on use-of-force
text (the five permanent members of the United Nations council have agreed to a draft resolution allowing "all means necessary" to liberate Kuwait from Iraq's grip. The only Arab member of the council, Yemen, said the United Nations should not give up on the use of economic pressure to force Iraq out of Kuwait. The Soviet Union and China fell in step yesterday, joining the United States, Britain and France in deciding to send Saddam Hussein an ultimatum in the form of a use-of-force resolution. They have agreed on a draft that authorizes military force to drive Iraq from Kuwait and redefine the conflict in the United Nations' terms. The resolution will be decided in consultations among the 15 council members.

The draft contains optional deadline dates. Jan. 1 or Jan. 15. Diplomats said the deadline in the final resolution will be decided in consultations among the 15 security council members.

Officials said the entire 15-member council will act on a final version of the resolution on Thursday.

Trade tops agenda at Mexican summit
President George Bush, meeting with Mexican President Salinas de Gortari for two days in Monterrey, Mexico, said relations between the United States and Mexico have never been better. Both leaders want an agreement including the war against drugs and the current situation in El Salvador.

A prospective free trade agreement, similar to one the United States negotiated with Canada, heads the agenda.

Polish elections will require runoff
In Poland's first popular presidential election, Solidarity leader Lech Walesa and an emigre businessman, Stanislaw Tymiinski, will compete in a runoff election on Dec. 9. Walesa led the voting with a little more than 39 percent of the vote in Sunday's election. Poland's prime minister, Tadeusz Mazowiecki, announced his resignation after finishing third in the race.

Jamaica Plain shooting raises controversy
Residents of Boston's Jamaica Plain section are calling for a formal probe into the weekend shootout that injured three police officers and killed a neighborhood resident. About 16 residents raised questions about police conduct in the case during a meeting with Mayor Raymond L. Flynn Sunday night. Several police officials also attended the meeting.

The shooting occurred at about 9:20 pm Saturday near Egleston Square. Police said two plainclothes officers were outside in their unmarked car when 19-year-old Hector Morales Jr. opened fire with a shotgun. One officer was struck on the head and the other on the hand. The two returned the fire, hitting Morales in the abdomen. A third officer was injured in a scuffle with another suspect, who remains at large. Two officers remain hospitalized, but authorities said their injuries are not life-threatening. Morales died about three hours after the shooting.

Denver jet fuel tanks ablaze
A broken valve set a 400,000 gallon tank of jet fuel on fire Sunday morning at Stapleton Airport in Denver, CO. The heat from the blaze set three other tanks on fire, setting ablaze a total of more than two million gallons of jet fuel. Firefighters near the blaze had to be pulled back yesterday when the fire spread from two 400,000 gallon tanks to two 800,000 gallon tanks. Crews had been trying to cool the tanks all day Sunday.

The fire wreaked havoc on travelers returning home from the Thanksgiving holiday weekend. Stapleton is the nation's fourth busiest airport, and airlines were forced to delay, divert, or cancel many flights. According to Richard Boulware, an airport spokesman, United Airlines virtually put out of use the fuel. Boulware said the fire was too big for any metropolitan fire department, but posed no danger to the airport itself. He said firefighters will probably let the blaze burn itself out.

Flooding hits Washington state
At least 2100 people in six rain-drenched counties in Washington state have fled their homes because of floodwaters. Crossings the area.

Volunteer Opportunities
The Giving Tree
The MIT Public Service Center
Giving Tree will be held again this year in the Student Center. Names of underprivileged children will be available to pick up, Nov. 26-30 from 11:30-1:30. All gifts requested are under $10. Help make this Christmas special for Boston area children. Stop by the Student Center table, or the PSC Men and Wed 3-5.

Big Night on the Town
The Big Brother Association of Boston/Cambridge is holding its annual fundraiser at the Remy from 6:00 to 9:30 on November 29. The party will include cocktails, reception, silent auction, and dancing to Big Band music. Many celebrity items and more will be auctioned off. Tickets are $10 in advance and $12 at the door. For more information or tickets call 426-1237.

Crafts at the Castle
Family Services of Greater Boston is sponsoring a show of over 100 craftspeople from around the country, Nov. 30-Dec 2. The show will include displays of furniture, ceramics, jewelry, leather and more. Free admission to volunteers who help set up the craft people on Nov. 29, from 8 am to 3 p.m. Call Beth Tishler at 523-6400 ext. 560.

Ultimate Holiday Celebration
The New England Home for Little Wanderers invites you to an exciting “night to remember” from 5:30-9:30 on Dec. 17. Buffet dinner and five entertainers will make for a splendid evening. All proceeds benefit the NESW. For more info call 323-3600.

Christmas Day
Little Brothers/Friends of the Elderly needs volunteers to go to their office on Christmas Day, pick up a turkey driver, attend a buffet dinner and a bouquet of flowers to take to the home of a lonely elderly person. A perfect opportunity to help out if you're spending the holiday in Boston. Call Michael Duffy at 836-2404 for more information.

Help Build a House
Habitat for Humanity is starting a new project. Volunteers needed to construct part of the house for the fundraising drive. Help also needed in writing proposals and possibly lobbying for the project. For more info, contact Bob Badger at 455-9971 or 926-3317.

Elementary School Tutoring
Graham and Parks Alternative elementary school of Cambridge is looking for volunteers to tutor fifth and sixth grade kids with learning disabilities. Help with general homework is needed from 4:30-5:30 on Wednesdays and Thursdays. Ability to speak Spanish would be very helpful. For more info call Nobles Smith at 549-6612 or leave a message at 497-5172.

ATHENA MINICOURSES
Schedule and Index
November Minicourses 1990
(One Week -- Last Chance for Fall Term!)

- Athena workstations (computers) are available for use all over campus.
- All minicourses are one hour each, and are taught in Room 3-343.

PLEASE NOTE: No Pre-Registration or Reservations are Needed...
Just show up for class!

Minicourse Descriptions

Advanced Word Processing: Latex (Latex) An introduction to Latex, a widely-used text formatter, used for converting a text file into an attractive, professional-looking document. It is a powerful and flexible program, with the capability to typeset many foreign characters and very complex mathematical text. Pre-requisite: Basic WP

Advanced Word Processing: EZ (EZ) Introduction to EZ, a combination text editor and formatter, with text-editing commands that are similar to Emacs. As a formatter, it is menu-driven and easy to learn, in the style of the "What You See Is (pretty much)

Matlab An interactive program and programming environment for scientific and engineering numeric calculation. Applications include: matrix manipulation, digital signal processing, and 3-dimensional graphics. Pre-requisite: Basic WP

Emacs A more detailed look at the text editor introduced in Basic Word Processing. Pre-requisite: Basic WP

LaTeX Thesis Using the Laretx text formatter to produce a fully-featured thesis that meets all MIT format requirements. Pre-requisite: A WP: Latex

SPACE GRANT PROGRAM SUMMER POSITIONS

The Space Grant Program is now offering an opportunity for a summer position in the fields of space science and space engineering. There will be a meeting on November 14, 1:00-2:00pm in 37-252 (Marlar Lounge) and another meeting on November 30, from 3:00-4:00pm in 37-252 (Marlar Lounge). This meeting will introduce the program and we will also have information available on the participating companies.

If you are interested in a summer position, please see Helen Halaris, 37-441, X-5546 or Lisa Sasser, 33-212, X-4929 for an application or further information.

DEADLINE FOR APPLICATIONS: DECEMBER 3, 1990
opinion

LETTERS TO THE EDITOR

Courtney's message is harassing to those not sharing his beliefs

In his letter, Michael W. Courtney accuses his "opposition" of trying to discredite his message of Jesus Christ by discrediting him ["Opposition distorts Courtney and message on this," Nov. 14]. He is unfortunately not seeing the real issue.

This is not a theological debate on whose god is the better. The point that Courtney is missing is that it is an issue of religious harassment, not who is and who is not going to hell.

Courtney claims that if he expressed his discontent with other religions in his own name, few would be offended. This is only half true. There is a fine line between expressing discontent and harassing.

I find that he is putting up a poor example of his religion by using it to hurt others. I do not mind people wanting to share their beliefs, but he is using his religion to attack other religions.

He put up posters declaring "witchcraft is wickedness" and calling Wiccans whores, using the Bible, a book that Wiccans do not acknowledge as truth, as his justification.

I, for one, was very hurt and offended by Courtney's unprovoked attack on what I hold sacred. As I recall, at his talk on Nov. 7, Courtney responded to a question from the audience by saying, "You'll be spending your eternity with your god, and I'll spend my eternity with mine."

All I ask of you, Courtney, is that you practice what you preach, and leave me be.

Why Morgan is looking for a special breed of genius.

One key is development of strong, proprietary analytic models. They're critical to Morgan's moment-to-moment trading activities around the world. The success of our actions—whether for funding, trading, or risk management—relies on those models. Each day, they must pass the test in one of the world's toughest proving grounds: the financial markets.

To assure that success, we seek exceptionally talented, team-oriented individuals who have strong mathematical and computer modeling skills. Demonstrated mastery of computer-based decision and simulation tools is important, as is a desire to work in an environment that fosters and rewards superior performance. Please plan to attend our upcoming information session.

JPMorgan
The Rhythm of St. Paul

THE RHYTHM OF THE SAINTS

By DAVID WATT

A n old roommate of mine in Berkeley, who graduated with honors in economics and sold psychedelic mushrooms in his spare time, once asked me what pop music I listened to. "Oh, the Beatles, Simon and Garfunkel, stuff like that," I mumbled. I feared my roommate. Once he came into the room at 2 am, woke me up, and blew pot smoke in my face. "I've seen your kind before," he said this time. "No others, are there? There is no 'stuff like that,' huh?"

He'd smoked me out. Fresh out of high-school band, where music was Serious Business, I'd chosen two groups whose undeniable appeal would leave my vast ignorance of pop music unchallenged. Five years later, my tastes have changed, but Paul Simon has grown along with them.

In The Rhythm of the Saints, Simon bases his songs on rhythms and sounds found in the drum music of Brazil. Most pop music relies on drummers to the role of expensive metronome; but in parts of Africa, for example, skilled drum playing is a language. Drum players are African kings, for example, skilled drum playing was part of theocratic ceremonies in ancient Egypt. The rhythm of the Saints, Simon shows courage - he follows his muse, whatever the commercial risks. Pop artists, take heed: It makes him a rich man.

Simon's attempt to reinvent himself and his music with each new album have earned him a fanatical following. Most of this may sound familiar to Simon fans. On his last album, the Grammy-award winning Graceland, the song "Homeless" is sung in English and Zulu. Its opening track, "The Boy in the Bubble," also begins with instruments unusual in rock: first an accordion, then BAMI enters a hand drum - BAMI — and finally a tenor saxophone, mimicking a tuba starts, playing the role of lead guitar. Only then does Simon begin to sing. Satish's opening track, "The Obvious Child," begins with the loud snare drum chorus, then synthesizer playing octaves; Simon joins in after the instruments have their fun. The familiar mesh with the aliens.

Satish's opening track, "The Obvious Child," begins with the loud snare drum chorus, then synthesizer playing octaves; Simon joins in after the instruments have their fun. The familiar mesh with the aliens.

Simon's attempt to reinvent himself and his music with each new album have earned him a fanatical following. Most of this may sound familiar to Simon fans. On his last album, the Grammy-award winning Graceland, the song "Homeless" is sung in English and Zulu. Its opening track, "The Boy in the Bubble," also begins with instruments unusual in rock: first an accordion, then BAMI enters a hand drum - BAMI — and finally a tenor saxophone, mimicking a tuba starts, playing the role of lead guitar. Only then does Simon begin to sing. Satish's opening track, "The Obvious Child," begins with the loud snare drum chorus, then synthesizer playing octaves; Simon joins in after the instruments have their fun. The familiar mesh with the aliens.

Trina’s Amazing Waffles-o-Doom

2 cups all-purpose flour
2 tsp. baking powder
1/2 tsp. salt
3 eggs separated
1 Tbls. sugar
1/4 cup whole milk
1/2 cup melted butter

Sift flour. Resift with baking powder and salt — three times. Personally, when I made these, I omitted the sifting altogether, and the waffles tasted just fine. But I talked to Arnett, and she made very sinister growling noises when I told her about this apparently sacrilegious behavior, so I’ll leave it at that.

What makes these waffles so good is the separation of the eggs, so, even if you were too lazy to do the sifting, the “it all ends up in the same place anyway” attitude will lead to sub-optimal results.

Beat egg whites until stiff, add sugar, beat some more until the soft peak stage. Proper folding technique is the key — I usually use one of those rubber spatulas, though a large spoon will do. If this is not done gently, the mixture will lead to sub-optimal results.

In a separate bowl, beat yolks, add milk, and salt - three times. Personally, when I made these, I omitted the sifting altogether, and the waffles tasted just fine. But I talked to Arnett, and she made very sinister growling noises when I told her about this apparently sacrilegious behavior, so I’ll leave it at that.

Fold in egg whites. Proper folding technique is the key — I usually use one of those rubber spatulas, though a large spoon will do. If this is not done gently, this apparently sacrilegious behavior, so I’ll leave it at that.

The Blacksmith House, Cambridge. Admission: $5 or 50 cents; $3 seniors, $2 children. Telephone: 536-6340.

The second in a series.

We begin our education believing that the facts we learn and the technologies we master are the foundations for our careers. But changes in careers are common and technologies become obsolete quickly. In fact, alumni records show that it is likely for many of us to work in many fields or to change fields entirely. We may also move from engineering and science into non-technical areas such as marketing or general management.

The ability to do excellent work in a range of fields and to meet diverse challenges with bold creative solutions is the hallmark of a good education. However, to work effectively in fields that are new to us we cannot rely on facts and technologies that may have become obsolete or are not applicable; we must depend on fundamental preparation for a lifetime of competition, skills that will serve him in a variety of different sports.

For the scientist or engineer the heart of the learning process is finding and solving interesting problems. This is true if this subject is quantum physics, as it is in managing a company. With proper mentoring, the mental struggle of dealing with a difficult and important problem results in the development of mental skills that cannot be learned in any other way and that are applicable to a wide range of new situations.

The purpose of education.

**Basketball teams begin their seasons**

**Sports Update**

The men's and women's basketball teams recently began their seasons in tournaments. The women's team won their second tournament in two years by winning the Regis College Tournament, defeating the University of Massachusetts at Boston, and Regis en route to the win. Junior forward Tania Panizza was named the tournament MVP.

The men's team placed third in the State University of New York at Stony Brook Tournament, losing to the host school and defeating Trinity University (TX) in the consolation game.

Senior co-captain Chris Sonne and Dave Tomlinson were each named to the all-tournament team.

Yet another award for football's Prather

Football linebacker Darcy Cross-country team captain Prather '91 has been named the tournament MVP. Prather is one of only seven Division III scholar-athlete award. Prather is all-conference team, Foundation and Hall of Fame Athletic Conference cross-country all-conference team, based on his seventh-place finish in the conference championship.

Men's soccer players led CAC scoring

Men's soccer players Marc Bailey '91 and Stephan Feldgoise '92 finished 1-2 in the scoring race of the initial Constitution Athletic Conference season. Bailey tallied five goals and five assists in five CAC games, while Feldgoise had five goals and one assist.

MIT finished in third place with a 3-2 CAC record.

**Sports Update**

Williams named to XC all-conference team

Cross-country team captain James Williams '91 has been named to the first Constitution Athletic Conference cross-country all-conference team, based on his seventh-place finish in the conference championship.

Men's tennis ranked high in pre-season

Senior Alexis Photiades is ranked 23rd in the nation in the pre-season Division III tennis rankings by the Intercollegiate Tennis Coaches Association. The team rankings show MIT in 17th nationwide.
