MIT students divided over use of force

By Brian Rosenberg

MIT students are almost equally divided over whether the United States should use military force against Iraqi forces in Kuwait. More than three-quarters, however, support the continued use of economic sanctions against the régime.

Of those questioned, 36.3 percent said they approved use of sanctions instead of military force to expel Iraq from Kuwait. This was slightly less than the 38 percent who supported opposition to the use of force. However, 36.9 percent of those interviewed said they opposed sanctions, while a relative majority, 41.7 percent, had no opinion or were unsure of their position.

Only 47.6 percent said they supported "the use of military force to expel Iraq from Kuwait after the United Nations deadline expires," a figure slightly less than the 52.8 percent who opposed the use of force.

A poll was conducted Sunday, January 13, in Lobdell Hall. Two hundred thirty-two students, primarily upperclassmen, were polled, including 200 undergraduates, 25 graduate students, six staff members, and one faculty member. The poll was conducted by a trained and authorized George Bush to use force.

(June 30)

Smith will return to teaching next term in the Department of Chemical Engineering, where he is the Edwin R. Gilliland Professor.

Profe sor Mark S. Wrighton appointed J. David Lister PhD '83 as interim associate provost, vice president for research and director of MIT's Whittaker College of Health Sciences and Technology. Earlier last month, Gene M. Brown, professor of biochemistry, announced his resignation from his position as Dean of Science, effective June 30.

Smith has been appointed to teaching next term in the Department of Chemical Engineering, where he is the Edwin R. Gilliland Professor.

Profe sor Mark S. Wrighton appointed J. David Lister PhD '83 as interim associate provost, vice president for research and director of the MIT Whittaker College of Health Sciences and Technology. SAE awaits rape response

By Andrea Lamberti

Neither MIT nor the national chapter of Sigma Alpha Epsilon (SAE) has taken action against the MIT chapter of SAE in connection with the charges of rape facing Thomas M. Fahy "91. On Dec. 9, as MIT separate reports to the police that she was raped at the SAE house. "Police subsequently arrested Thomas Fahy," the police report said.

MIT would not take action against an individual prior to a decision by the courts, said Assistant Dean for Student Affairs James R. Fetter, "That is not preclude us from taking any action vis-a-vis the fraternity," he said.

However, no information regarding possible sanctions against the fraternity has been released. The national will not take any action against the fraternity "until we do [an] investigation," said Scotti Barrio, consultant to the national, "Right now, we'll really like to get as much information as possible." Barrio would not comment as whether or not the national was planning an investigation, or who would conduct said investigation.

Additionally, the national will wait for decisions by the courts and by MIT before taking any action regarding the fraternity, said Barrio.

The national has been working with Neal H. Dorow, adviser to fraternities and independent living groups. The national "got all [of its] information from Dorow," Barrio said. The Dean's Office has been meeting with representatives of the fraternity to discuss the incident, Dorow said.

Cases involving other chapters of the nationwide fraternity would not necessarily serve as precedent to guide the handling of this case, Barrio said. Each case is evaluated individually, he added.

Fahy did not return repeated telephone calls made over the past week and could not be reached for comment. SAE President Mark E. Lundstrom "91 was out of town and also could not be reached for comment.

Alleged rape occurred at Christmas party

The alleged rape occurred Dec. 8, the night of the SAE Christmas party at the fraternity's Beacon St. house. The alleged victim attended the party with a member of the fraternity, and became drunk after her date, who was not Fahy, became "very drunk and ... passed out," according to an anonymous source who is a close friend of the woman.

The following day, the victim reported the incident to the MIT police, who then notified the Boston Police Sexual Assault Unit, the police report said.

The Boston Police "subsequently arrested Fahy," according to the police report. He is scheduled for a hearing in Boston Municipal Court on Feb. 15.

Rape is defined as "Having sexual intercourse or unnatural sexual intercourse with a person and compelling such person to submit by force and against his will, or compelling such person to submit by threat of bodily injury," according to Massachusetts state law. It is a felony.

Under state law, intercourse is considered to be committed against a person's will if the person is unconscious, asleep, drugged, intoxicated or otherwise rendered helpless, or if the person agrees to intercourse, according to MIT Campus Police literature.

"It's hard to say if there has been a rise in the instances of acquaintance rape for MIT students," Glavin said. "It's one of the most underreported crimes there is."

"I think we're at the point where people are more comfortable about coming forward. My own judgment is that it [acquaintance rape] has always been there, people are just starting to report it more," Glavin said.

The increase in reporting cases of acquaintance rape is most likely due to several factors, Glavin explained. Services for rape victims, including services at police departments, hospitals, and rape crisis units have improved.

Heightened awareness of acquaintance rape, and the fact that it is a crime, have also contributed to the increases in reports, Glavin said.

The present case involving Fahy would not necessarily lead to more incidents being reported, Glavin said. "Based on view-points that I've heard, ... my personal view is that [public report on acquaintance rape would tend to discourage [victims]," she said. "They're often very concerned about confidentiality."

Interview appointments may be made at the Careers Office, Room 403, Cambridge Center.

Additional information about Matsushita is available at the Careers Office, Room 403, Cambridge Center.
Americans urged to leave Middle East

The Soviet Parliament has approved an American to leave Pakistan and Sudan because it is concerned about what it calls unsafe conditions in those countries due to Iraq's refusal to leave Kuwait. All non-essential US government employees and their families have been ordered to get out of those countries.

Both Pakistan and Sudan are Muslim countries. Pakistan has supported the embargo against Iraq, but the US and Soviet tanks. A State Department note that there have been frequent rebel leaders and demonstrations by Pakistanis opposed to that policy.

The government of Sudan has shown sympathy with Iraq and its stance on Palestine civil war. The US embassy there has suspended its operations.

Two PLO leaders are assassinated

The assassination of two top officials of the Palestine Liberation Organization Sunday night has triggered a wave of violence in the Israeli-occupied territories. Palestinian prisoners chanted with Israeli troops and Arab reports claimed several killed and wounded at least 60.

The army confirmed that at least 13 were wounded. The protesters accused Israel of being behind the murder of Yasser Arafat's aide, but police in Tunisia have arrested a suspect who was a member of a rival PLO faction.

Israelis schools closed

In Israel, the army has closed all schools. The order is due to security and Israeli and Arab residents were issued an hour before the UN deadline for Iraq to leave Kuwait. No one was hurt.

Two grenades were thrown at the US embassy in Panama yesterday. At an anti-war rally in Boston, protesters said the administration was "close to home." Anti-war group plans protests

Activists claim UN deadline offends King's memory

A new study suggests there is a connection between the experimental "IQ40EZ" this year, and the compromised Ministry of Security in the region. The "Army" said the schools will be closed until Sunday and has advised children "not to close to home.

Drug trafficking surrenders

The man arrested for his second arrest, the notorious Medellin drug cartel has surrendered. Forty-year-old Jorge Luis Ochoa is accepting a government offer of lenient treatment in exchange for surrendering. His brother Fabio, also a cartel leader, turned himself in last month.

By surrendering and confessing at least one crime, the IAC plans to clean off.

China: Stand back and wait

Column by Matthew H. Hersch

There are few nations, I believe, that Americans have misunderstood as badly as China. Since the 1850s, the United States has consistently backed the wrong factions, dealt with the wrong governments, and fought the wrong wars with that misunderstood nation. Foreign trade, the ticking bomb that led the United States government to发动 first serious ites with China a century ago, still causes trouble. A few weeks ago, disorganized, backward China, however, has now become a strong, ordered, backward China. When U.S. government might make China's territorial integrity. For better or worse, the United States is intricately linked with Chinese security.

When U.S. military aid and development aid to China, China's credibility as a major power in the region is bolstered. The United States must now re-evaluate its strategy toward China. The Chinese government is not a monolithic entity, but rather a collection of different political factions. It is likely that the United States will have to engage in a long-term, gradual process of working with China to improve relations. The United States cannot afford to compromise on its principles or allow China to dominate the region.

The United States cannot afford to compromise on its principles or allow China to dominate the region. It is important for the United States to maintain a strong presence in the region and to work with other countries to achieve common goals. The U.S. must also work to build a strong and stable relationship with China to ensure long-term stability in the region.

A once weak, disorganized, backward China, however, has now become a strong, ordered, backward China. The United States cannot afford to compromise on its principles or allow China to dominate the region. It is important for the United States to maintain a strong presence in the region and to work with other countries to achieve common goals. The U.S. must also work to build a strong and stable relationship with China to ensure long-term stability in the region.
Threat of Persian Gulf war sparks student debate

I stare with incredulity at Peter H. Mott's letter ("Gulf war needlessly costs lives, marks death and injury," Jan. 9). The lack of comprehension of the nature of the Gulf conflict just boggles my mind. If anyone is "taking a calous, one-size-fits-all attitude over what is going to happen," Mott is it.

We cannot understand the impending conflict as a "war for oil" by discounting the isness (Iraq) invasion of Kuwait. Mott has considered the consequences of not stopping this Iraq's aggression; have we forgotten the oil-consuming countries? Peru, the lives of Kuwait and other Third World inhabitants are not "miltant" for him (do I detect racist overtones here, but the effect American and international neg- is that the Iraq-Kuwait situation would not be happening if Saddam is more lethally dangerous than the oil's lives in an American-led Gulf war. If Iraq is able to gain from its aggression without any form of hard retribution, license would be issued to every Third World power for aggression and domination of its less-powerful neighbors. While Mott is content letting sanctions work, Kuwait ceases to be a country as the people starve and die in Saddam Hussein's super-power grip and the country is self-dismantled.

The oil-consuming countries have much more to lose from foreign aggression than they do from the price of oil. And for your information, Mott, India has much more to gain from Iraq's takeover as it stands than they do from lower oil prices. India's conventional forces, according to most analysts in the region, are more powerful than China's and could defeat even the mighty Chinese in a conventional war. To boot, they have nuclear weapons with medium-range de- livery.

India has already used its military might to control unrest in Sri Lanka. South Asia's regional superpower would feel free to dominate its neighbors as it will in this precedent-setting incident, Iraq's aggression is left unchecked. It "stikes you as Orwellian" that our forces are in the Gulf "because . . . the best way to not get into a war is not to send in the army in the first place?" Mott, where have you been for the last 10 years? The massive U.S. military buildup under former President Ronald Reagan was done for the military's sake, not for the money he thought he would get from the oil. And he isn't getting any.

I'll take out New York." How you feel he is erring, but in a "callous" tunnel vision, Mott, is much, much worse. "Remember Saddam from ever gaining credi-
ture agin. Only then will mas-
sive civilian casualties be avoided. Your "callous" tuned vision, Mott, is far more destructive than any po-
tential U.S.-led Gulf conflict.

Avik S. Roy '94

(Editors note: The Tech re-
cived a copy of this letter ad-
dressed to President George

Bush.)

Congress has given you the au-
hority to start a war, I write to ask you not to use that power.

Thank you for the time you have taken to read this letter. I hope you will consider it before reaching a decision.

1. Your sanctions are working brilliantly! If every foreign item in Iraq is a foreign item not replaced. The media tell us that our gross national product is down 40 percent and still drop-
ing. If the Iraqi civilian. Must be felt at many levels of Iraqi society. On the issue of sanctions, your coalition is holding. You have achieved some of our most im-
portant goals: The hostages are free, and Saudi Arabia is safe. By contrast, Saddam Hussein has not. He didn't is-
vade Kuwait for oil, he invad-
ed for the money he thought he could get from the oil. and he isn't getting any.

2. A war would be incredibly costly. Many of our young people would die. Anti-Americanism in the Middle East is bad enough now, but the sight of American killing Arabs would make it much, much worse. "Remember Iraq?" could become a rallying cry for terrorists for decades to come.

Among the dead would be many Kuwaitis - the very people we want to help. Also, many Iraqi civilians would die, even though the people of the United States have no quarrel with the people of Iraq.

3. It's not clear that a war would help us achieve our objec-
tives. We would end up destroy-
ing much of what is left of Kuwait in order to "save" it. Saddam could be strengthened within his own country - as we all know, it's one thing to dislike your leader in person when you feel he is earring, but in a war, patriotic feelings grow much stronger. Surely this is as true in Iraq as anywhere else. And if he is killed or deposed, would the next person be much better?

4. A war could have results no one can predict - except that they are likely to be unpleasant. Will the Soviet support a campa-
gin in Iraq? How long will the Egyptians fight? Do you really trust the Soviets? Will anything happen to the government of Turkey? For these reasons, I ask you: Cautio, use pressure, threaten if you must, and let Saddam worry about what you might do next. The danger doesn't start there. There would be no winners; only losers.

We can outlaw Saddam. We waited 40 years to win the Rus-
sians over, and I dred the re-
sults are encouraging. We can do it again if we have to, but Saddam could be sustained by the Soviets and is not likely to last anywhere, not as long as the war. William Jockusch G

Sexuality, Intimacy, & Power

We are gathering diverse personal accounts by MIT women and men dealing with experiences and problems relating to communication, intimacy, sexism, sexual identity and practice, sexual coercion and rape. We hope to present how these are influenced by racial, ethnic, national, religious and regional identifications. Information can be presented in various forms — essays, personal experience, perspectives, opinions, quotations, etc. Materials submitted may be included in a theatrical performance and/or a publication for the MIT Colloquium on March 5, 1991. Material may be submitted with or without a name, and anonymity will be guaranteed if requested.

Your work should be submitted by January 22, 1991 to:
MIT Colloquium Committee c/o UASO, 7-104

or by email to

Student service efforts deserve commendation

The Elizabeth Peabody House would like to thank all of the students at MIT who participated in the donation of 240 Christmas presents to the children and youth of Somerville. In addition, we would like to thank the MIT Public Service Center for organizing this very generous contribution. Many of the gifts went to needy families. The presents brought the children much joy!

One often hears that the young adults of today are self-centered and apathetic. This gesture by the students of MIT proves that this is not true. Many young adults in college are compassionate and dedicated to community service and the spirit of the holidays.

The efforts of the MIT Public Service Center and the students of MIT are greatly appreciated by the Elizabeth Peabody House.

Thank you all very much.

Betsy R. Doorkam
Director of Social Services
Elizabeth Peabody House

Maute letter is inaccurate

Paul Maute's letter to President Charles M. Vest [Institute must eliminate unintentional acts of bias.], Jan. 9 contains an error which deserves correction.

Maute referred to "pin-ups of partially clad women" in the stockroom of Lab Supplies in Building E19. The Office of Laboratory Supplies has no stockroom in E19. Also, the Lab Supplies' stockrooms have no such arrangements.

Barry Rowe
Director, Purchasing and Stores

NOTICES

Project Contact: Undergraduates who are interested in communicating with high school students (and guidance counselors) about what it is like to be an MIT student are encouraged to join Project Contact. For more information please contact the Registrar's Office, Room 4-240, 253-3534.

The sports medicine division of the MIT Athletic Department's seniors' fitness program for U.S. military personnel en route to Okinawa, Japan, has allowed the use of valid athletic medical standards for individuals over the age of 15 who meet medical criteria. A personal physician must be available to the program. The tests consist of a submaximal endurance test, flexibility measures, body composition analysis, strength measurements, and physical body composition. Everyone entering the program must submit a signed informed consent form. The consent should be mailed to: The Boston University Staff, Room 3-1493, 65-9000;

The Boston University Astronomy Department opens the Open Observatory every Wednesday from 8:30-10pm for more information call 253-2306.

All first-semester student loan borrowers (Federal Family Education Loan or other loans) are required to attend a loan counseling session. Please contact the Registrar's Office for a schedule of the sessions.

Surplus equipment is available for departments and offices of the MIT community. The Equipment Exchange, building 3-251, every Tuesday and Thursday from 11-1pm. Thirty days after being advertised in the equipment exchange, all equipment is available for departmental purchase.

The Science and Humanities Library (HART) Building Library is open now from Monday-Sunday 9am to 10pm. Surveys from 9am to 5pm on Saturday and evening hours as well as free parking are available.

The Off-Campus Housing Service welcomes any member of the community who either offers housing or who is searching for housing to contact us in Room E32-121, x3-1493.

The "Statement of Registration Status" is still required of all new students who are required to register for the draft. If they wish to receive federal financial aid, women, underage students and those who have completed or are in processes of obtaining a passport are also required to register.

MIT requires male students who have completed the mandatory by indicating that they are "registered" to submit the statement annually until they have registered.

Opportunities with Curran Software GmbH

Curran Software is a young software company trying to make breakthrough products. The company is located in Munich and is eager to hire MIT students. We are interested in developing software systems for our clients employing the following technologies:

- O/S and hardware systems
- C/C++ oriented programming
- CASE software development tool packages
- Artificial Intelligence

These clients come from a group of top-performing, international companies from the financial, pharmaceutical and chemical manufacturing sectors. Curran Software provides its clients with innovative information technology solutions to solve business problems and yield competitive advantages. Through rigorous analysis of the real business needs and dedication to innovative technology, the clients receive the appropriate mix of management and technology services for the situation.

We have openings for developers and would appreciate knowing more about you.

Come to the Office of Careers Services Room 12-170 to set up an interview.

Gerard Depardieu gives this Cyrano panache

Cyrano de Bergerac

By DEBORAH A. LEVINSON

The film itself is a homage to the stage version of Rostand's play, which was first performed in 1897. Depardieu, who plays the title role, brings a real sense of tragedy to his performance as Cyrano de Bergerac, a soldier with a large nose who falls in love with the beautiful Roxane. The film is directed by Jean-Paul Rappeneau, who has previously directed films such as "The Dreamers" and "Cyrano de Bergerac." The film is set in France during the 17th century and features a cast of talented actors, including Anne Brochet, who plays Roxane.

The film is the most recent adaptation of Rostand's play, following previous adaptations such as the 1954 version starring Robert Taylor and the 1990 version starring Jeff Bridges. Depardieu's performance is widely praised, with many critics noting his ability to convey the character's intense emotions.

When asked about the role, Depardieu said, "I was really touched by the script. Cyrano is a character who is so rich and complex. I felt I had to do it for my own sake, to challenge myself." He went on to say that he felt a real connection with the character and that he was able to bring a new sense of depth to the role. The film is a beautiful and emotional tribute to the classic play, and Depardieu's performance is a highlight of the film.
THE RUSSIA HOUSE—love story or post-Cold War spy story?

By PRABHAT MEHTA

The Winter Film Fest has come to an end, but the screening of the film "The Russia House" continues to provide a thought-provoking commentary on the nature of espionage and the post-Cold War world. The film, directed by Fred Schepisi and starring Pierce Brosnan and Michelle Pfeiffer, explores the complex relationship between two spies, a British agent and a Soviet agent, as they navigate the treacherous world of intelligence operations.

Brosnan's character, the novice spook Barley Blair, returns to us as the protagonist of "The Russia House." He is a second-rate man, not the shining star required for hard-core, high-risk intelligence operations. Instead, he is a washed-up British publisher whose favorite pastime is getting drunk in Portugal. But little does he know that some of his drunken rants have inspired a top Soviet scientist to save his nation by betraying it.

Through his interactions with Krya (Michelle Pfeiffer), Blair is able to confirm the authenticity of a set of notebooks with detailed accounts of Soviet technological weaknesses. The notebooks were written by a brilliant Soviet scientist who took his own life. These notebooks provided enough information to reverse engineer the nucleus of the spy racket on which the Western intelligence officers and the relationship which blossoms between Blair and Krya.

As an ethical quality further underlines the importance of the espionage plot, scenes that showcase the notes typified and associated with the British secret service, and the CIA become almost comical with their concerns over the Soviet threat to Western freedom. The Soviet Union was seen as a threat to our own democracy, and the film seemed to suggest that the Soviet Union was a threat to the West in general.

The film's narrative is a testament to the complexity of the relationship between Blair and Krya, a relationship that blossoms between Blair and Krya's love story. The film's themes are associated with the British secret service and the CIA become almost comical with their concerns over the Soviet threat to Western freedom. The Soviet Union was seen as a threat to our own democracy, and the film seemed to suggest that the Soviet Union was a threat to the West in general.

If there is any political message, it is that Glasnost is a positive development. The film has given a sense of renewal to the Soviet people, a new hope. At the same time, the film also makes it clear that reforms in the Soviet Union have unleashed powerful forces that need to be reckoned with, and that a simple attempt to restore real political and economic freedom is not in short supply, and fear remains.

But the film is more than a simple story about the end of the Cold War. It is a film about the human costs of war and the importance of human connection in a world that seems to be increasingly disconnected.

LITERATURE

The novel "The Russia House," by John le Carre, is set in Moscow and depicts Russian intelligence agents. The novel is a post-Cold War spy story and explores the complexities of espionage and the role of Western intelligence. The novel was written by John le Carre and published in 1990. The film adaptation of the novel, directed by Fred Schepisi and starring Pierce Brosnan and Michelle Pfeiffer, explores the complex relationship between two spies, a British agent and a Soviet agent, as they navigate the treacherous world of intelligence operations.

The film's narrative is a testament to the complexity of the relationship between Blair and Krya, a relationship that blossoms between Blair and Krya's love story. The film's themes are associated with the British secret service and the CIA become almost comical with their concerns over the Soviet threat to Western freedom. The Soviet Union was seen as a threat to our own democracy, and the film seemed to suggest that the Soviet Union was a threat to the West in general.

If there is any political message, it is that Glasnost is a positive development. The film has given a sense of renewal to the Soviet people, a new hope. At the same time, the film also makes it clear that reforms in the Soviet Union have unleashed powerful forces that need to be reckoned with, and that a simple attempt to restore real political and economic freedom is not in short supply, and fear remains.

But the film is more than a simple story about the end of the Cold War. It is a film about the human costs of war and the importance of human connection in a world that seems to be increasingly disconnected.
INDIGO GIRLS
Dec 10 at the Orpheum Theatre.

By DAVID ZAPOL.

The INDI GO GIRLS have been playing together since high school, and their intertwining musical styles have contributed to the growth of the genre. Their inspirational lyrics and intense, invigorating music have been an integral part of the American cultural scene and have resonated throughout the world with their powerful and honest performances.

Their honest, down-to-earth unre- tracted approach to the craft of songwriting has allowed them to connect with their audience on a deep level. The Indigo Girls have been able to convey their emotions and experiences through their music, creating a sense of community and shared understanding.

The Indigo Girls are composed of Amy Ray and Emily Saliers, both graduates of the University of Georgia and former members of the Athens music scene. Their sound is a blend of folk, country, and rock, with a strong focus on harmony and melody.

The group's debut album, "Spiritual Arrangements," was released in 1987 and received critical acclaim. Since then, they have released numerous albums and have earned a dedicated fan base with their unique blend of music and storytelling.

Their concerts are known for their powerful vocals, emotional depth, and engaging stage presence. The Indigo Girls are always up for an audience interaction, often inviting fans to sing along or participate in the music.

Newest album "O

August Wilson's Fences continues through February 3 at the New Repertory Theatre.

The Art of Architecture: The Carlisle Indigo Girls also performed an encore set at the end of the show, with the audience singing along to their hits and new songs alike. The intimate setting allowed the audience to feel like they were part of the performance.

Upcoming Events

The Nightingales at T. J. Maxx on January 16 at 8 pm

Bo Diddley at the Channel Orpheum Theatre on January 27 at 8 pm

The Indigo Girls will be performing at the Orpheum Theatre on February 3 at 8 pm, with tickets available online. It's sure to be an evening filled with music and good times. Don't miss out on this incredible opportunity to see one of the best musical acts of our time live in person!
Each year GCC Technologies seeks out top engineering talent from the nation's finest schools to help us continue to stay ahead of the pack. Current positions include hardware and software engineers who have a desire to dive right into the design and implementation of cutting-edge products for the Macintosh. Come join the exciting design team that has set the pace in the Macintosh market for the past six years.

**Terrific work environment:**
- Macintosh and Sun workstations
- Flex-time schedule
- Performance-based incentive bonuses

**Small and growing company:**
- An atmosphere that encourages and rewards individual contribution
- A voice in product development and planning
- Easy access to top management

**Challenging work:**
- Development in C and assembler
- RISC processing
- Color graphics

**Great location:**
- Beautiful historic New England
- 15 minutes from Boston

**Presentations:**
- January 31 and March 7
- 7:00 PM; Room 4-153

**Interviews:**
- February 4, February 11, March 13
- Room 12-170

GCC Technologies was founded in 1981 as a developer of video games by three MIT students. Since January 1984, GCC Technologies, Inc. has been a major developer of peripherals for the Apple Macintosh computer, one of the industry's most dynamic markets.

Our design team is focused on increasing product innovation through the use of RISC processors and highly-integrated ASIC designs in conjunction with graphically oriented interface software. Our team is pursuing products that will be state-of-the-art in the areas of performance, color imaging, versatility, and networking.

Engineering innovation keeps GCC on the forefront of the market and will continue to be the strength of GCC for the years to come.

If you miss us on campus, please send your resume to GCC Technologies, Human Resource Dept., 580 Winter Street, Waltham, MA 02154
Area scientists speak out against war

By Prabhat Mehta

Area scientists last Thursday called on President George Bush to seek a peaceful settlement to the crisis in the Persian Gulf. "We call on the Administration to alter its policy and to rely on the United Nations to end the present noose around Kuwait," began the statement, initiated by MIT Professors of Physics and Chemistry, Thomas Hollocher, Institute Professor Emeritus Feschbach, Professor of Biology Herman K. Schwan, and Professor of Chemistry Thomas Cech. The statement was signed by over 100 scientists and engineers from colleges, universities and research institutes throughout the United States.

The scientists presented their statement at a press conference at Cambridge City Hall Thursday evening. In response to the condemned invasion and subsequent annexation of Kuwait and supported the use of sanctions and the deployment of defense forces to protect the region, the group opposes the use of military action to expel Iraq from Kuwait, citing the grave risks in loss of life as well as in destruction and in the Middle-East.

To add to the group's indignation was the notion that this international coalition to make this stand in the face of the world's emerging superpowers is an act of terrorism straight in the eye and heart of many citizens. To look this international coalition to make this stand in the face of the world's emerging superpowers is an act of terrorism straight in the face of the world's emerging superpowers is an act of terrorism straight in the eye and heart of many citizens.

"The United Nations has failed as an organization to do anything to protect the citizens of the world from Iraqi aggression," said the spokesman. "The United Nations has failed as an organization to do anything to protect the citizens of the world from Iraqi aggression." The statement went on to say that sanctions have been indefinitely imposed on the region.

"I resent the idea of economic warfare on our own people - once again including our children - now oversees public health and life. And daily his troops continue their attacks against Kuwaiti citizens," said the spokesman. "I resent the idea of economic warfare on our own people - once again including our children - now oversees public health and life. And daily his troops continue their attacks against Kuwaiti citizens."

"I do not believe in the idea of nuclear war that could make this a madcap war of good vs. evil." The man went on to stress the need for the United Nations to bring the peace and democracy of the emerging New World Order we now see; this long dreamed-of vi-sion we've all worked toward for so long.

A year after the joyous dawn of a new, hopefully peaceful world, a dark evil has descended in another part of the world. We must not lose sight of this - the war we have been fighting is not the war we have the obligation to - stop right now.

I have been in war, I have known the terror of combat. And I do not think we should have the luxury of being able to walk away from this conflict - to protect the peace and democracy of the emerging New World Order we now see; this long dreamed-of vision we've all worked toward for so long.

But while we search for that answer, in the gulf young men and women are risking their lives in order to stand for peace in the world and for the essential value of human life itself. Many are younger than you or me; most of them. Doing tough service for a country called "our country."" Mr. President, I just wanted you to know your soldiers and I are ready to do whatever mission you decide. Freedom as we know and cherish it, does not come from another country and must be made here; we may be separated from family, friends, and from one another. But we will do what must be done; I'm sure we will not lose, and will be waiting. God bless you and the United States.

Terrified about the moral obligation that has compelled our country to make this stand in the face of the world's emerging superpowers this international terrorist straight in the eye and heart of many citizens. To look this international coalition to make this stand in the face of the world's emerging superpowers is an act of terrorism straight in the eye and heart of many citizens. To look this international coalition to make this stand in the face of the world's emerging superpowers is an act of terrorism straight in the eye and heart of many citizens.

As the Rev. Jesse Jackson closed his speech on Monday night, he left with these words of

"KEEP HOPE"

Future events will be held by protesters to demonstrate their desire for a peaceful solution to the Middle East crisis.

Scientists and engineers from the Boston area urged President George Bush to continue with sanctions and negotiations in a news conference at Cambridge City Hall last Thursday. Included in the photograph are Professor of Biology Jonathan A. King (far left) and Professor of Physics Vera Kistiakowsky (second from the right).

After his speech, the Rev. Jesse Jackson joined in dedicating the Snellman Student Center as the "Martin Luther King Jr. Peace and Justice Center."
encouragement —

**ALIVE**

These words describe the motivations of many who have demonstrated against war in the last week.

The Rev. Jesse Jackson held a press conference Monday with members of the MIT Initiative for Peace, which sponsored his visit. Behind Jackson, from left to right, are Penn Loh '90, Rosina Samadani G., and Steven D. Penn G.

The Rev. Jesse Jackson delivered an emotional speech heard by several thousand people in Kresge Monday night.

The MIT Initiative for Peace in the Middle East has planned small group discussions and seminars to continue throughout the week.

Puppets held out cries for peace.

Deans Smith, Brown resign posts, return to teaching

(Continued from page 1)

Brown mentioned the benefits he will enjoy once he is no longer dean. "One of the things I missed most about being dean was not being able to deal with students and young faculty as much," Brown said.

"I’ve been involved in administration one way or another for the past 24 years; it’s time for a break," he said.

Latest in series of resignations

Smith and Brown’s resignations come as the next in a succession of resignations over the past year.

In April, the dean of the School of Engineering, Gerald L. Wilson PhD ’72, announced his resignation, saying he would hold his position through January 1991. Also in April, John C. Fiedler, PhD ’68, former dean of the School of Humanities and Social Science, announced in February that he was relinquishing that position to oversee teaching economics at the Institute.

And Dean Shirley M. McBryde took two year leave last June 30 from her position as Deans of the Graduate School.

It is believed that this recent succession of resignations is in response to the inauguration of the new administration. Brown admitted that one of the major reasons he chose to resign at this time was the installment of the new administration.

"With the new administration coming in, with new ideas in many other departments, the change in administration has not merely been at the top but at middle level administration as well," Brown said.

"I feel it’s a reasonable time to step down and allow a new dean of science to take part in the intensive discussions that always take place when a new administration takes over," Brown said.

A new administration is always accompanied by in-depth discussions about the future of the Institute, including goals and priorities for the future, Brown said.

Brown did not want to deny the new dean the opportunity to take part in such discussions. "Especially since I would have been leaving in two to three years’ time anyway," Brown said, adding that next week he will turn 65.

It is believed that several other deans may be planning to step down over the next semester. However, Wrighton could not be reached to confirm this.

Events continue this week

The MIT Initiative continues events this week promoting the use of force to remove Iraq from Kuwait, beginning with giving lectures every night this week. Last night Institute Professor of Physics, L. Martyn Jackson said at a press conference preceding his Kresge address, "The Initiative is sponsoring this group.

The purpose of the Initiative is linking their opposition to American intervention with such do.

In addition, Martin Luther King, Jr. ’26th birthday, Zaidan claimed Israel will use a war to carry out what she characterized as its "largest plan of "transfer" - the main expulsion of Palestinians to Jordan.

The United States, he felt, must not allow its "addiction to a military economy."

A military economy has resulted in the instability of the United States to deal seriously with "triggering the arms race.

"The war-making institutions of our country must be dismantled," he said.

Fatima Zaidan of the Union of Palestinian Women’s Groups told the Kresge audience that Arabs do not want war. "Arab people do not need weapons, they do not need bread and butter," she said.

Zaidan blamed US policy for promoting aggression in the Middle East. "We see sick and tired of the West dealing with a super-gas station," she said.

In addition, Zaidan claimed Israel will use a war in order to carry out what she characterized as its large plan of "transfer." - the main expulsion of Palestinians to Jordan. 

ECONOMIC RECOVERY

Give yourself and your wallet a rest. The Somerville Holiday Inn may surprise you with all it has to offer your out-of-town travelers.

- Lowest MIT Preferred Rate of $80*
- Single or double
- Continental breakfast or to/from MIT service to/from the D
- Free parking
- Indoor pool

Hockey hopes to average loss

By Peter E. Dunn

The MIT men’s hockey team has advanced to the championship match of the annual Ben Martin Hockey Tournament, played annually at the Worcester Polytechnic Institute tonight at 8:30. The Engineers hope to average their 12-4 loss to WPI in the championship game last year (Worcester Polytechnic Institute and Springfield College play in the consolation game at 6:15). The MIT skaters advanced to the championship with a 7-3 win over Springfield Saturday night.

Indoor track punishes Coast Guard, Colby

By David Redstone

Bad weather and injuries conspired against the US Coast Guard Academy when they met with the MIT indoor track team last Saturday at the Johnson Athletic Center track. The USCGA certainly did not need the extra burden. The Bears indeed did not meet the expectations of some on the MIT team, and at the day’s end the score was: MIT, 87; USCGA, 49. Oh, and Colby College also showed up, managing 23 points.

MIT took advantage of injuries to several key Bears, as well as the absence of most of the Coast Guard weightmen—who had taken a separate car and lost their way—to run away with the meet early on.

As the rain began to fall, MIT co-captain John-Paul Clarke was shown up, managing 23 points. MIT did not begin to dominate the scoring until the last minutes of the second period, but were favored this year to take the trophy: they have a 7-2-0 record, have only one loss at home all year, and defeated WPI, 5-3, when last they met on Nov 28.

Why has the MIT squad met with so much success this year? Two reasons: defense and depth. While the defense still lacks the size and bump-and-grind power of previous years (when Coach Joe Quinn had at his disposal the likes of Alec Jostman ’88 and Rick Russell ’90), Coast Guard and Dotterer pose the ever-present threat of a sink-long drive, and Gene McKenna ’92 and Mike Quinlan ’92 help to keep the defense rock solid.

Offensively, MIT’s first line has always been strong—the Engineers’ weaknesses has usually been their second and third lines. This is no longer the case. An influx of new blood has strengthened MIT’s all-around attack.

Field hockey hopes to average loss

By Bob Jaffe

Play was chippy, so much so that the third period was to be a 15-minute mercy period whenever the red light was flashed. When it was not, the game continued.

The MIT skaters advanced to the championship with a 7-3 win over Springfield Saturday night.

Co-captain John-Paul Clarke was shown up, managing 23 points. MIT did not begin to dominate the scoring until the last minutes of the second period, but were favored this year to take the trophy: they have a 7-2-0 record, have only one loss at home all year, and defeated WPI, 5-3, when last they met on Nov 28.

Why has the MIT squad met with so much success this year? Two reasons: defense and depth. While the defense still lacks the size and bump-and-grind power of previous years (when Coach Joe Quinn had at his disposal the likes of Alec Jostman ’88 and Rick Russell ’90), Coast Guard and Dotterer pose the ever-present threat of a sink-long drive, and Gene McKenna ’92 and Mike Quinlan ’92 help to keep the defense rock solid.

Offensively, MIT’s first line has always been strong—the Engineers’ weaknesses has usually been their second and third lines. This is no longer the case. An influx of new blood has strengthened MIT’s all-around attack.
