Students Voice Concerns About Calendar Proposal

By Eric Richard
ASSOCIATE NEWS EDITOR

At last night's Undergraduate Association Council meeting, members of the council addressed students' questions and concerns about the proposal to increase the length of the academic year.

Students expressed that proposed changes should consider the financial losses and additional stresses which would be placed on them. Many said the present proposal's merits simply do not justify its costs.

Professor of Chemistry Robert J. Silbey, chairman of the committee, and committee members Stephen R. Immerson, director of social services, and Registrar David S. Wile '61 defended the rationale behind the calendar proposal.

Under the proposal, Independent Activities Board would be extended by two to four full weeks, and each term would be expanded to have three to four more days. The semester would be shortened by two weeks, and classes would begin before Labor Day in three of the first seven years.

The committee's recommendation states that the proposal will "provide more class days, as well as academic and social activities, while still creating "a variety of educational possibilities."

Some faculty want longer terms

"There is a strong feeling among a vocal portion of the engineering faculty that the term is too short to do things - not that they want to put more things in, but that they can't do things that they have already planned," Immerson commented. "They wanted more time for thinking about the topics already in the curriculum."

J. Paul Kirby, '72, former UAC president, suggested that the main problems stemmed from the rapid growth in the engineering disciplines, not from a lack of school days. "It seems as if it is only the engineering disciplines that are pushing for longer semesters. The humanities department doesn't give a damn. ... The management department doesn't give a damn."

President of the Panhelenaic Association Marquisa C. Gillifan '94 strayed the idea of weighing the proposal's costs and benefits. "I understand that teachers want more school days, but they are only getting three or four more days of class, at a great cost to us. How much (are those extra days worth)? If we look at the benefit versus the costs, the costs are much greater."

A common complaint among students was that the fact that the proposal would only alleviate the stress at MIT while still taking away from free time during the summer. "I've talked to a lot of professors, and they've admitted to the fact that if you increase the number of days, they will add to what they have to teach you," Linc Muller '93 said. "And yet, those same people will admit that during those 62 days, MIT teaches you one and a half to two times more than any other school in the country."

"I think what we are missing is a little bit of contemptuous time to think that you are learning," Silbey said. "The alternative would be cram things in a little bit more into some subjects."

Shorter summer a concern

Several students said that the shorter summer would impose a financial burden on them because they would not have as much time to work.

This complaint was emphasized by students in fraternities and sororities that because of rush and work week, their summers would be drastically affected. At the meeting, students and faculty gave varying numerical analyses of the effects of the proposal.

"With the way that the rush system works, you are realistically cutting the summer down to nine weeks!" for people who come back for Residence/Orientation Week, Gillifan said. "Companies do not offer internships for nine weeks."

"Do you expect MIT students to make $500 during the year without being able to get jobs over the summer?"

"That is a substantial concern on our part. That is a cost that the MIT student bears."

Tewhey Complaint Was Without Merit

By Josh Hartmann
ASSOCIATE NEWS EDITOR

Only one complaint was filed against former Associate Dean James R. Tewhey during his tenure here and this year, Provost Mark S. Wrighton said yesterday.

Meanwhile, the former associate dean for student affairs continued to defend his six-year leading the Residence and Campus Activities section. He said, "At no time have I ever received either a verbal or written reprimand for anything I have done."

Tewhey, who resigned April 20, said he had considered resigning since February, shortly before filing his own personnel complaint, claiming that a colleague had created a hostile working environment. In his resignation, Tewhey and Katherine M. Nolan, the financial aid officer with whom he had an 18-month affair, obtained

Student Robbed at Gunpoint

By Jackson Jung
ASSOCIATE NEWS EDITOR

This Sunday at 12:30 a.m., an MIT student was robbed at gunpoint near Memorial Drive Building 1.

A thief approached the student and said, "I've got a gun at your back. Empty your pockets and give me your wallet."

The student described the assailant as a 5-foot, 7-inch black male, in his twenties. He was wearing a black jacket, white shirt, and black pants.

Despite the noise of the area, the campus police did not apprehend the suspect.

Meanwhile, the campus police, believes the victim used the emergency phone located about 60 feet from the scene to contact campus police.

This was one of the emergency phones installed following the murder of Yigech R. Kassaie '94 on Memorial Drive this past fall, in order to improve the safety along the road. Glavin noted that the emergency telephones do not actually stop crimes, but give potential victims more accessibility to the campus police.

In the crime bulletin describing this incident, the campus police recommended using the safety shuttle service, A Safe Ride, after dark. However, in this case, the closest shuttle stop was at 77 Massachusetts Ave.

Glavin said that this was not an unusual crime, considering this is an urban campus.

In an unrelated incident, an MIT student confronted two suspicious, white, teenage males in the courtyard of the New West Campus Houses. According to the campus police log, the incident occurred at 10:13 p.m. on Saturday night. The teenagers had scaled the walls to enter the area, and one of them threatened the student with a knife before leaving.

The student and other witnesses described the intruders to the campus police, who were later arrested by campus police. The campus police refused to release the names of the two suspects.

MTG Focuses on Quality of Shows

By Edward Graumun
STAFF REPORTER

The arts are alive and well at MIT. The Musical Theatre Guild provides a prime example of how students are getting involved in performing in the classroom.

The Guild has focused on the quality of their shows, be continued. The group is currently in the process of applying for grants from the MIT Council for the Arts to start musical theater workshops. These workshops would allow students to develop their skills in the area of musical performance.

The Guild is also encouraging its members to take theater classes at MIT. The theater department is "excellent," said Dyckman, who is majoring in theater.

The group has been fairly pleased with its success to date. Dyckman called this year's fall show, The Baker's Wife" pretty successful. Moreover, the Independent Activities Period show, Jesus Christ Superstar, did better than expected, selling out four of its six performances. The Guild recently performed The Apple Tree and is planning to perform Cheka for its summer show.

Dyckman has found that one problem with MTG is that "the name of the show has a lot to do with the number of people who audition and come out for the production itself. For example, Jesus Christ Superstar had 70 person auditions for about 25 spots, whereas students were considerably less interested in the other shows this year."
**WEATHER**

**Chilly Breezes**

By Michael Morgan

By David B. Ottaway

A cyclone developing to the southeast of New England will make its way south to mid-Atlantic by late Sunday. The cyclone, a part of a weather system that produced snow and ice pellets in New England last year, is expected to slow. As the storm develops offshore, the winds will continue to chill, perhaps reaching 30 miles per hour by late Sunday. Cold temperatures will continue into Monday, with wind-chill values reaching 15 to 25 mph (24-40 kph) and gusts up to 45 mph (72 kph).

**New U.N. Sanctions Approved**

In Wake of Continued Fighting

By David B. Ottaway

The United Nations Security Council on Friday approved a resolution that imposes sanctions on Burma, a key trading partner of China and Russia. The sanctions were approved by all five permanent members of the Security Council, including the United States, Britain, France, China, and Russia. The sanctions will target Burma's military leaders and their families, as well as the country's export trade and financial institutions.

**Arson Investigators Say Cult Members Started Compound Fire**

Clinton Orders Stiffer Sanctions Against Serbia to Curb Warfare

By Paul Richter

WASHINGTON

As he deliberated over more drastic steps, President Clinton Monday ordered a tightening of the economic sanctions against Serbia in hopes of forcing the Balkan state to halt its warfare in Bosnia.

The new steps implement U.N. resolution, adopted Sunday, that calls for U.N. members to freeze Serbian assets abroad and move even further to cut off trade between Serbia and the outside world.

The measures are expected to do little to halt the Serbian military machine, but are likely to further damage an economy that is already suffering from hyperinflation, a 40 percent one-year decline in industrial production, high unemployment and shortages of key industrial goods and fuel, officials said.

Clinton said he would consult Congress this week on further steps to halt the fighting that already has left 155,000 missing or dead in the once-Yugoslav past the year.

The president, who last week said he was giving serious consideration to air strikes and a lifting of an embargo that prohibits the sale of arms to Bosnia, said it was "clear that the United States and our allies need to move to a much stronger policy."

"His policy would be announced "in the next several days," he said.

The U.N. resolution was put into effect Sunday night under a U.N.- sponsored peace plan.

Specifically, Clinton's executive order freezes American business interests in Serbia and its ally, Montenegro, prohibits U.S. ships from entering Montenegro territorial waters, and permits U.S. forces to board any truck or vessel believed to be violating U.N. trade sanctions. It also steps other steps to close loopholes in the economic sanctions ordered last May.

The resolution is also designed to halt transshipment of goods through Serbia and Montenegro. In the past, shipments headed for order destinations often ended up in Bosnia hands.

As part of the tougher sanctions, U.N. countries are stepping up their surveillance of both Adriatic ports and the Danube route between the Balkans and the central Europe. The United States has given six unarmed river patrol boats to Bulgarians and Romanian officials to help their cus

"There's no automatic relationship between the tightening of sanctions and any change in the political outlook of a leadership or people."

Concern Grows Over Effects Of IRA Bombings in London

London's financial district is the City, after the City of London as the world's premier financial center. Whether the sanctions might not he political, and thus are weighing on the economic situation, or simply stiffen the resolve of the Serbian leaders, the impact of the sanctions is becoming increasingly obvious that the price of a bomb is far less than the cost of replacing the glass and steel of buildings eviscerated by strategically placed explosives.

As things stand now, Congress appears likely to reject President Clinton's Russia aid package and the North American Free Trade Agreement, and only by aggressively fighting can Clinton win his major goals of economic growth and health-care reform, Budget Director Leon Panetta said Monday.

In addition, Panetta said he believes the president's job-stimultanous tax credit is in serious trouble and may be scaled back, but not entirely abandoned, while his proposed energy tax faces "a very tough battle" and could wind up being defeated.

In an extraordinary candid assessment of the three-month-old Clinton presidency, Panetta said his boss needs to focus on his major priorities and must do "a better of picking and choosing the battles he wants to go through" if he is not to lose anymore elections like the one he suffered on his economic stimulus plan.

Last week, Senate Republicans forced the administration to abandon virtually all its stimulus package by mounting a filibuster that the majority Democrats could not overcome. As long as Congress fails to pass some kind of domestic jobs bill, Panetta said, legislation that would provide benefits to other nations stands little chance of approval.

For that reason, Panetta said, he holds out little hope for passage the president's request for nearly $3 billion in additional appropriat-

on ships to Russia in its rocky transition to a market economy. He said members of Congress will oppose the Russia aid package until something is done to address unemployment in their own districts.

The outlook appears even more bleak for the North American Free Trade Agreement, which would remove trade barriers between the United States, Mexico and Canada, Panetta said.

Panetta Very Gloomy
About Clinton's Legislative Goals

Concern Grows Over Effects Of IRA Bombings in London

As structural engineers sifted through the rubble of a bomb explosion that devastated the heart of London's financial district Saturday, concern was growing over the effects it might have on London as a world financial center.

No one here wants to give in to the Irish Republican Army, but it is becoming increasingly obvious that the price of a bomb is far less than the cost of replacing the glass and steel of buildings eviscerated by strategically placed explosives.

Nor is there much confidence being expressed in the ability of the security forces to prevent future carnage. The head of operations for Commons home affairs select committee, Sir Ivan Lawrence, demanded "much more effective efforts to protect the City."

London's financial district is called the City, after the City of London, putting at risk lives, livelihoods and the position of the City of London as the world's premier financial center.

David Mellor, a former Cabinet minister, appeared on television to say, "For the second time ... terrorists have ripped the heart out of the City of London, putting at risk lives, livelihoods and the position of the City of London as the world's premier financial center.

Letters To The Editor

Tewhey Coverage Hurts Family, Personal Life

Last July, my husband, James R. Tewhey, the associate dean for student affairs, received a threat that he "would end up without a job, family, friends, and his daughter." In a phone conversation on July 31, 1992, I was told that Jim should end up without his job, family, and his daughter.

Nine months later, my husband is without a job and ostracized within his community. He does, however, still have the respect, love, and support of his family. As Jim and I work with the system to "clear his name," I am concerned about the increasing number of details and allegations about his personal life and the efforts that this has on his family, particularly his daughter.

Since July of 1992, there have been continual "anti-gay, anti-intellectual, classist, anti-disability or otherwise discriminatory." How can a fearful person who talks and socializes have any sort of a voice when he or she will oversee these rules? The consequences of doing so are serious, as convicted defendants will be subject to the unspecified "mandatory minimum penalty."

Such amorphous offenses can readily serve as an intellectual capsule. Just the threat of prosecution can have a chilling effect. This expansiveness creates a favorable environment for selective enforcement and use of charges as weapons of intimidation. A university, should be a place where people are encouraged to explore ideas, rather than needing to worry whether an impolitic opinion or rude equivalency will land them in disciplinary proceedings.

Noting how much the story about the而非 is the same in context, I am concerned by the MIT community and would value any efforts that can be made to contain these destructive, distorted personal attacks.

Karen Tewhey

Ad Hoc Proposal Is Dangerously Broad

Rader’s column, "Inadmissible Propositions Would Only Worsen Situation," Apr. 16, though harsh, rightly points out severe flaws in the Ad Hoc committee’s proposed policy. When I first read the policy, I was shocked and appalled at the breadth, the vagueness, and the fact that the hearing process is a civil-libertarian’s nightmare. Besides banishing "sexist" remarks and behavior, it also criminalizes those which are deemed "anti-gay, racist, anti-Semitic, classist, anti-disability or otherwise discriminatory." How can a fearful person who talks and socializes have such a voice when he or she will oversee these rules? The consequences of doing so are serious, as convicted defendants will be subject to the unspecified "mandatory minimum penalty."

Such amorphous offenses can readily serve as an intellectual capsule. Just the threat of prosecution can have a chilling effect. Opinion Policy

Editorials, printed in a distinctive format, are the official opinions of The Tech. They are written by the editorial board, which consists of the chairman, editor in chief, managing editor, executive editor, news editor, and opinion editors. Disputes, marked as such printed in a distinctive format, are the opinions of the signed contributor and should be considered as such by the reader.

Columns and editorial cartoons are written by individuals and represent the opinions of the author, not necessarily that of the newspaper.

Letters to the editor are welcome. They must be signed, double-spaced and submitted to The Tech, P.O. Box 79, MIT Branch, Cambridge, Mass. 02139, or by interdepartmental mail to Room 20-443. Electronic submissions in plain text format may be mailed to letters@tech.mit.edu. All submissions are due by 4 p.m. two days before the date of publication. Letters and cartoons must bear the author’s signature, address, and phone number. Unsigned letters will not be published. No letter or cartoon will be printed anonymously without the express written consent of the author.

Letters to the editor are welcome. They must be signed, double-spaced and submitted to The Tech, P.O. Box 79, MIT Branch, Cambridge, Mass. 02139, or by interdepartmental mail to Room 20-443. To Reach Us

Electronic mail is the easiest way to reach any member of our staff. Mail to specific departments may be addressed to individuals as you would write to anyone else, using their names and department. Mail addressed to The Tech may be sent to Tech Letters, c/o The Tech, Suite 340, 80 Quincy St., Cambridge, Mass. 02139, or by electronic mail to letters@tech.mit.edu.

For other matters, send mail to general@tech.mit.edu, and it will be directed to the appropriate person.
They Might Be Giants Please Weekend Crowd

By Deena Dinserley

Although seats were available, with the crowd on the floor was the place to be Friday night at They Might Be Giants and Tribe rocking Johnson Athletic Center. The concert, sponsored by the Student Center Committee was the main attraction of the year’s Spring Weekend.

The stage was set for the concert with two sets of instruments, one set for each of the two participating bands. Above the instruments were three posters, pictures of mouths speaking, prattled with the words “Fidelity, Melody, and Quantity.” While the audience eagerly awaited the bands’ arrival, seventies music played.

Tribe opened the concert with several songs from their new album. The words were barely understandable over the band’s lead base and drums, but the beat was good and the crowd danced.

“Tribe played a lot of their new stuff, and I’m really psyched about the new album because I liked the stuff they played. Out of the eleven songs they played, seven were new. I got to carry their drums off the stage... it was an honor,” said Jack T. '95.

During the forty-five minute intermission between the two bands, posters, programs, and raffle tickets in line to purchase concert T-shirts and hats.

They Might Be Giants appeared at about 10:30 p.m. and was greeted by a screaming crowd. The band warned the crowd that it was going to play several new songs, which it did not really know how to play. The audience was forewarned that lead singer John Linnell and John Stanisburgh would quite often be looking at their feet.

Their fans didn’t mind though. Jeremy M. Jaskoff ’95 said, “The concert was great. They tried some new stuff that was strange, but it was interesting.”

“They Might Be Giants worked the crowd with a number of gimmicks during the evening. At one point, Stanisburgh flipped a coin to determine which song the group would play next. When explaining what they were doing to the audience, they did not name the songs, but merely referred to them as songs eleven and twelve on the list. The coin landed heads up, and "Make A Little Bird House In Your Soul" won.

Another one of the antics included, "Spin the Dial." Stanisburgh brought a radio out on stage and tuned the dial to a song that the band could join in on. The band passed over rock and country songs, he joined in playing a jazz melody.

It finished off that set as Linnell apologized saying, “Sometimes we have a really good night, and sometimes it doesn’t work.”

At one point during the concert, one of the lights fell from the base supporting and landed on stage. Although many people wondered if that was supposed to be part of the show, “It was by no means the highlight of the evening,” said Peter M. Godden '96.

Although they did try new things, the crowd enjoyed the old favorites, including “Particle Man” and “Ball and Chain,” to which they danced and sang along. From the start of the concert, fans cried out for “Istanbul,” enough that Linnell and Stanisburgh became visibly annoyed with the crowd.

“It didn’t seem to be really set. They were totally relaxed, and they were just kind of hanging more than they were giving a concert. Even people who don’t like their music would have to admit they put on a really good show. But, I like their music, so I really enjoyed it,” John R. Bergquist '95, who worked set-up, take-down, and security.

Shortly after midnight, They Might Be Giants left the stage, and the audience went wild. The crowd began chanting, “Istanbul,” repeatedly, and Linnell and Stanisburgh came back out. They played “Istanbul,” as the crowd sang, danced, and screamed. Stanisburgh ended the song by picking up a green footlight, while the stage lights went dark, and just illuminating his face. Linnell, who was playing the accordian, was lit by a red footlight. The two sang the ending, “Istanbul” in voices reminiscent of Freddy Krueger.

The concert ended with Linnell and Stanisburgh bringing out the rest of the band, thanking the crew and the band. The concert’s finale was really good show. But, I like their music, so I really enjoyed it,” John R. Bergquist '95, who worked set-up, take-down, and security.

THE ARTS

**Sexual Perversity in Chicago**
By David Mamet.
MIT Dramashop production.
Directed by Gene Schuster '94.
Kresge Little Theatre, April 26-28 at 8 p.m.
By Jonathan Richmond

Sexual Perversity in Chicago moves around in the netherworld of foreplay, rarely allowing its participants to move beyond frustration. While Beirut, in its strange way, is about fulfillment and is intensely erotic, Sexual Perversity is full of dirty language but essentially an sexual essay about failure. Perversity took a few minutes to come together on opening night, and there were a sprinkling more of missed cues, but the acting overall was sparkling, the entertainment created deliciously wicked.

Craig White '93 does a stellar job of painting all the seedy little details of bernie Litko, a guy whose attitudes towards women might just be influenced by the guy who abused him in the movie when he was a kid. White is so convincing at delivering Bernie's BS that it appears Bernie is taken in by it himself. Out of the endless stream of sexual expletives we see a character who is at heart pathetic and unable to relate to other people except by orgasm. The character is made the stronger by the construction of a consistent system of logic governing his view of the world. If everything is defined by sex — "What do you have to do in this place to get a drink? Cum on a cracker?" — there are also limits set which make the world within those limits real. There's a truly earnest expression on White's face as Bernie gets upset by a porn movie: "A woman blowing a man is natural, but a woman blowing a dog is disgusting."

Bernie never gets very far with Joan, a character made interesting by Julia Soyer W by her evasiveness. Joan — a schoolteacher — is forever wearing a mask; the blank expression Soyer gives her while she talks to a couple of boys caught playing with each other's genitals is disturbing for what lies behind it; we're not quite sure whether she's more upset by the premature ejaculatory tendencies of her former partner or by her inability to release some decidedly lesbionic (the word is Mamet's) tendencies.

Deborah (Katie Lee '95) and Danny (Daniel Aalberts G) actually get to have a relationship, even though Deborah is rather more open about her lesbionic leanings. The relationship, even though Deborah is rather intriguing to watch, is slightly more upset by the premature ejaculatory tendencies of her former partner or by her inability to release some decidedly lesbionic (the word is Mamet's) tendencies.

The relationship, even though Deborah is rather more open about her lesbionic leanings, is slightly more upset by the premature ejaculatory tendencies of her former partner or by her inability to release some decidedly lesbionic (the word is Mamet's) tendencies.

The direction of Gene Schuster '94 is nice—on target, presenting Mamet's symphony of taboos in an absorbing way. If you're prepared for an evening where almost all the language is dirty and where at least some of your laughter will be accompanied by cold sweat, this production is on target for you. It should be seen before Beirut, to ensure that by the time of the two you will be not only completely shattered but distracted by the intensity and professionalism of drama at MIT.

**DR. WILLIAM I. KOCH**

1992 America Cup: Teamwork, Technology and Talent = Victory

Dr. Koch will describe the approaches and procedures he used in winning the 1992 America's Cup Match. Two notable differences between his approach and other aspirants for the oldest trophy in sports are Dr. Koch's emphases on teamwork and technology. Through a technology development program based on a scientific background and a disciplined approach, Dr. Koch's team, America's fastest boats amongst the ten competing teams. The use of a technical and design team introduced more useful ideas into the effort than could have come from a more traditional effort involving a more restricted set of individuals.

Cambridge, MA

**Refreshments:** 3:45 p.m.
George A. Romero’s occasionally loose translation of the original is faithful, but for the film it leads to a triumph of sorts.—CR. LSC Friday

The idyllic marriage of David (Woody Harrelson) and Diana Murphy (Demi Moore) is challenged by a wealthy financier who offers them a million dollars if Diana will spend the night with him. — CR. Loews Harvard Square

**** The Crying Game
Nigel Danson’s story of an IRA terrorist (Stephen Rea) is a remarkably well-written piece of work that at first seems to follow its protagonist in aimless yet intriguing directions, but eventually reveals itself to be a perfectly structured look at violence, race, love, and sexuality. Rea is ordered to guard a kidnapped British officer (Forest Whitaker), but he begins to care for the hostage and later flies to London, where he meets the officer’s girlfriend (Jaye Davidson). The two halves of the film, which contain some completely unpredictable plot twists, become mirrors of one another, reflecting how understanding and compassion may be a means of salvation. — CR. Loews Fresh Pond

**** The Dark Half
This mystery/horror film based on the Stephen King novel of the same name is a psychological thriller. Tim Robbins stars as Thad Beaumont and George Stark, Beaumont’s pseudonym who has suddenly come to life and is going on a killing spree. Amy Madigan is Thad’s wife Liz and Michael Rooker is Sheriff Alan Pangborn in director George A. Romero’s film that holds true to the horror themes of the original. Romero is able to effectively realize the two sides of the same character and create a haunting world. This movie is not for the faint of heart and has enough “ideas” to turn the intellectuals happy. — Douglas D. Kelly. Loews Fresh Pond

Falling Down
When Michael Douglas cracks under the pressures of society and lashes out with violence and rage, his actions provide the basis for an intense and important movie, but this is an issue attempt to comment on the problems of America today, a thriller that is laughable at best, and a film that deserves to be deplored for the enjoyment it derives from the violence it claims to be critical of. Rather than strive for realistic realism, the story blurs into a ludicrous cartoon by portraying all of Douglas’ victims as caricatures rather than credible victims. And Douglas is really nothing more than a psychotic control freak, not a normal person the audience can feel empathy towards. — CR. Loews Fresh Pond

****, A Few Good Men
Nearly every element of director Rob Reiner’s adaptation of the military murder/courtroom drama clicks into place with the efficiency of a finely tuned machine designed to churn out entertainment. Sure it’s unoriginal, but it’s also extremely effective. The performances by Tom Cruise and Jack Nicholson are strong, and the photography, with crystal clarity and frequent symmetry in its images, is polished until it shines. For the audience can make it to the next morning to find that first, it is Groundhog Day all over again, and second, he is the only one who realizes it. Phil soon recognizes that no matter what he does there are no consequences for his actions, and he therefore tries to stop himself from killing. Credit is due to director Harold Ramis who manages to keep the premise fresh through hundreds of repeated Groundhog Days. This is one of the freshest comedies to come out in recent memory. — DDK. Loews Fresh Pond

Indecent Proposal
A horribly derivative film starring Robert Redford as the millionaire, Woody Harrelson as the architect, and Demi Moore as the woman for sale. This movie is essentially Honeymoon in Vegas without the comedy and flying pigeons. Director Adrian Lyne applies his high-gloss directing style (Tamaño-Faye Baker applies makeup. Sprinkled throughout the film are elements of Pretty Woman, Good Morning Vietnam, Wall Street, and Fatal Attraction. If you haven’t seen any of these movies and want to be treated to a misogynistic validation of ’70s yuppie greed, then this is the movie for you. — DDK. Loews Cheri

Unforgiven
One of the better westerns ever made, David Webb People’s story about a retired gunslinger (Clint Eastwood) who agrees to hunt down two men for reward money is a richly written deconstructionist work that relishes its elliptical morality. In this version of the West, “justice” has been thrown out of the towns, “villains” are remorseful for what they’ve done, “heroes” only feel alive when killing, and no one can be forgiven when no one can even define a sin. Eastwood, Gene Hackman, Morgan Freeman, and Richard Harris are all excellent, and Eastwood’s direction has a slowly building pace that allows even the most minor characters and events to be embedded with fine detail. — CR. Loews Cheri

Look's like a Vivarin night.

PHILOSOPHY 101

Take-Home Exam

Compare and contrast the dialectic of phenomenology as revealed in the work of Hegel, Kierkegaard and Nietzsche.

(Use additional blue books as necessary.)

Looks like a Vivarin night.

It’s 10 PM. You’re crammed for finals all week. Took two today. And now you’ve got to pack an entire semester’s worth of Philosophy into one take-home exam, in one night. But how do you stay awake when you’re totally wiped? Revive with Vivarin. Safe as coffee, Vivarin helps keep you awake and mentally alert for hours. So when you have pen in hand, but sleep on the brain, make it a Vivarin night!

community has to pay to implement this calendar. While it is a concern, and while we understand it to be a concern, I don't know how big a concern it is," Silbey responded.

Mark A. Herschberg '95, a member of the InterFraternity Council and the undergraduate housing chair, further broke down the numbers saying that in order for an MIT student to earn the full $6,600 in self-help over the summer, he or she would need to earn about $15 per hour.

Herschberg added, "If you want the housing system to work, you need the BFC and IFC Rush. You are going to need us to come back for rush. ... Effectively, you are going to need us in mid-August. You are asking me too much and promising too much."

IAP versus summer

When Silbey asked the students if they would rather take days from IAP or the summer to make up for additional class days, about 30 percent said that they would prefer to make IAP shorter while only a handful opted for shortening the summer.

However, students were split as to whether they would prefer making up the days through an option requiring students to take classes during IAP. Silbey explained, "We stopped short of requiring students to be here during IAP. We weren't willing to require them to be here then."

The members of the committee tried to make it clear that their proposal is designed to change, meeting input from the community. "The committee is responding to pressures from lots of places," Silbey said, "if the community really wants to cut IAP down to two weeks and make it totally independent, that's fine with me."

Immelman agreed. "If the students and faculty come back to us and say, 'we are not going to push the issue,' he said.

However, Silbey also noted that the committee received virtually no input on the proposal. "Still, to this day, the number of letters that we have received is tiny. As far as we could tell, there was no interest at all in this matter, although we did not believe that to be the case."

After the meeting, Rajnish A. Chitaley '95, UAC floor leader, said that the three committee members "responded in the best way that they could, because they are not the people who are going to be making the decisions."

"The real people to convince are the faculty," Chitaley said, emphasizing the need for students to voice their opinions about the schedule to faculty. "I hope that the faculty really begin to discuss and think about the real issues that have been raised by the students and other faculty," Chitaley said. "The most convincing arguments can be made by individual students to their professors. They should make sure that their professor will be attending the next faculty meeting and that they know how students feel."

MTG Is 'Just for Fun'

MTG, from Page 1

year. In fact, the executive board ended up producing The Apple Tree because of a lack of interest in the positions. The group plans to remedy this problem by performing shows with name recognition that can also be done well.

Dyckman is optimistic about the future of MTG. "We have a strong group of freshmen this year. It is very encouraging," he said. "Auditions and production spots are open to anyone, and new members are always welcome."

There's a lot of talent at MIT. Hopefully, we can foster that talent and help the theater community grow," he added.

MTG has helped musical theater become a stronger presence at MIT.

Dyckman describes the group as an amateur musical theater group open to everyone. The group performs four musical productions each year.

Dyckman believes MTG is important because "it allows students of science and engineering to have an outlet for the arts. The Guild members are exposed to all aspects of theater production, from performing in the shows to producing their own shows. Students can do things that they'll never have the opportunity to do again," Dyckman said.

MTG was formed more than 20 years ago, when Tech Show and a Gilbert and Sullivan group merged. Since then, MTG has grown into an organization which currently consists of more than 120 members, most of whom are MIT undergraduates.

The MTG executive board, elected twice a year, governs the group. The board is in charge of the day-to-day functioning of the Guild, as well as running auditions, interviews, and producing shows. Students conduct interviews to select the production staff for each particular show. Once a production staff is chosen, auditions are held.

MTG is a group that is determined by involvement with the group. As soon as a person is in any way involved with a show, he or she receives a one-year membership. Members can attend meetings, elect officers, and vote on shows. Ideas for shows are suggested by members, then narrowed down until one is selected. Shows are mounted during the fall term, IAP, spring term, and summer sessions.

Help organize City Day I for 1993!

On Tuesday, September 7, Cambridge public school students will come to MIT to take part in activities planned and executed by MIT students.

Motivated students are needed to work during the summer on the City Days Committee to organize this event.

We need people who are interested in helping with:

- Publicity
- Transportation
- Working with community sponsors
- Visiting public schools to advertise City Days
- Coordination of living group activities
- Liaisoning with public schools
- Anything and everything else!

For more information about how you can get involved in City Days, contact the City Days Headquarters at the MIT Public Service Center, Room 3-123, x3-0742, as soon as possible.

Our next meeting is Tuesday, May 4 at 6:00PM, room 5-234; Dinner will be served.

Voice your opinion on the proposed calendar!

Give the faculty your perspective:
Should the year be two weeks longer?
Should IAP be four full weeks?
How long should reading periods be?

And come to the special forum on the proposed calendar on
Thursday, May 6th, at 7:30 PM in 6-120.

Contact Shally Bansal or Raaj Chitaley at x3-2696 or stop by the UA Office (W20-401) for more info.
I resign," Wrighton said. "I agreed her restraining order against approved a six-month extension to Newton District Court judge the morning of his resignation, while a Cambridge District Court judge the extension was turned down by a Nolan alleged restraining orders, both Tewhey and between the two.

Tewhey, from Page 1 restraining orders against each other, which prevented contact between the two.

In their requests for temporary restraining orders, both Tewhey and Nolan alleged the other had engaged in harassment. Tewhey's request for an extension was turned down by a Cambridge District Court judge the morning of his resignation, while a Newton District Court judge approved a six-month extension to her restraining order against Wrighton.

"He felt the time had come to resign," Wrighton said. "I agreed with his assessment and accepted his resignation without any prejudgment on the harassment allegations involved in the court order."

Reports in last week's editions of The Tech attributed a statement that there were several complaints against Tewhey to an anonymous source. The Tech later reported there were as many as eight complaints.

"A male colleague propositioned a male worker," Tewhey said. "That individual was spoken to about that issue, as well as some other work-related issue." Tewhey said this was the basis of the formal complaint, which reached the provost's office. He would not name the complainant.

Tewhey said he believes full investigation will clear his name. "My belief is that a fair and independent evaluation of what has gone on will show that I am the one who has been harmed and not the other way around," he said.

Wrighton released information about Tewhey's complaint only after receiving the complainant's explicit permission, Wrighton said.

An MIT spokesman refused further comment on the matter, citing the Institute's privacy regulations.

Tewhey remained close-lipped about future plans, saying he feels continued harassment. "I had approached [Dean for Undergraduate Education and Student Affairs Arthur C.] Smith back in February about leaving, because I felt the whole situation had not been handled well. It was increasingly difficult to do my work. I have several options available. I will be doing something in September. Given how ugly this has gotten, I don't have any intention of making generally public what I'm going to be doing."

Smith said yesterday that a search committee to find a successor was being formed and would include undergraduate and graduate students.

MAKE THE FIRST CHOICE PART OF YOUR NEXT CAREER DECISION.

The first choice for many careers is First U.S.A., with over three million credit cardmembers nationwide and a reputation as one of the industry’s fastest growing companies.

We’re now recruiting for a highly competitive, front-line position. As a Policy Analyst you’ll work one-on-one with senior management and play a vital role in setting the company’s direction. Knowledge of the re-engineering process, G.U.I. systems, and "C" programming, and telecommunications switching equipment along with an understanding of predictive dialing are a plus. We are looking for self-starter with initiative. Excellent communication skills, both written and verbal are essential.

Qualifications include: a strong G.P.A.; a major in Economics, Finance, Engineering or another highly analytical area -- and proven leadership and teamwork skills.

Make us part of your next career decision! Send or fax your resume -- as soon as possible to C. Diane Sutton, Senior Staffing Specialist, First U.S.A., Three Christiansa Centre, 201 North Walnut Street, Wilmington, DE 19851.

Fax: (302) 594-4011. Interviews are being set up now. First U.S.A. is an equal opportunity employer.

TODAY

ORGANIZED BY THE TECHNOLOGY AND CULTURE SEMINAR
ATTENTION MIT MINORITY STUDENTS!

The Center for Materials Science and Engineering is hiring undergraduates to assist with its one-week science and engineering day camp for seventh- and eighth-grade students.

The job involves:
- working on campus August 19-27, 1993, plus four sessions during the 1993-94 school year
- supervising, with faculty, technical staff and an elementary school science teacher, a group of 15 students
- helping the students perform lab projects
- $8.00/hour pay

Requirements:
- good interpersonal skills
- enthusiasm
- an interest in working with young people

If interested, please contact Susan Rosevear, Room 13-2098 or X8-6477, for further information.
Women's Crew Sweeps Regatta

By Rita Baranwal

Last Saturday, MIT's women's crews swept all possible races at the second annual New England Women's New 8 Regatta. The women's varsity eight and varsity four, first novice eight, and second novice eight all placed first in their categories.

After losing to Mount Holyoke College by 5 seconds at the Brown Cup on April 17, the MIT women's varsity eight made an excellent turnaround by beating MHC by 10 seconds by 23 seconds with a time of 9:36. The undefeated novice women's first eight crossed the finish line first, with a time of 7:45, beating Wellesley, MHC, and Smith. Its strongest competition at the New England championship will be Trinity College.

An exciting novice second eight race ended with the MIT-A team winning with a time of 8:29 and the MIT-B team beating Wellesley with a time of 9:02.

This was the second year of the New 8 Regatta. MHC won the contest in its first year. The Regatta marks the first time that MIT has swept all possible races at the New England championship. The Engineers set a record in the number of points scored in the Florence Smith Cup points trophy, a record that will never be broken because they scored the maximum number of points possible.

Crew alumnae visit MIT

Later in the day, rowing alumnae from across the country participated in a contest on the ergs. The alumnae were very excited to get back on the ergs, as some of them had not been on one in several years. Afterwards, they participated in a very competitive race out on the water.

The day ended with a banquet and several nostalgic speeches by past rowers and coaches. After listening to all of the troubles that women who rowed as many as 20 years ago had gaining recognition as a team sport, and their problems with lack of equipment, coaches, uniforms, and respect, the current women rowers said they realized how fortunate they are to have all that they do. Earle added a cautionary note, saying, "It's getting easier, but not by much," she said.

UPCOMING HOME EVENTS

Tuesday, April 27
Women's Lacrosse vs. Wheaton College, 5 p.m.

Wednesday, April 28
Baseball vs. Harvard University, 3 p.m.
