IS Works to Address Security of MITnet

By Bryson Kido

Information Systems Systems has made some changes that will help users of MITnet keep their data and passwords secure, said Joanne Costello, manager of network support services for Distributed Computing and Networking Services. The telnet program used to access Athena accounts has been updated to allow users to safely telnet to Athena without their passwords traveling over the network, she said.

The new telnet program encrypts a user's password when it is initially sent over the network, Costello said. Only a system with the correct decryption key can access that data, she said.

A secure telnet program, known as kerberized telnet, is available for Macintosh personal computers and the Athena workstations, Costello said. A version of the program for IBM PC and compatible computers will be available once MIT resolves licensing issues, she said. Security on MITnet will be further safeguarded with an additional data encryption service, Costello said. Over the summer, MIT issued a new, free version of the popular encryption program PGP (for "pretty good privacy"), she said.

"PGP is a high-security cryptographic software application which allows people to exchange files or messages with both privacy and authentication," Costello said.

The system currently requires a user to separately encrypt and send a file, Costello said. To remedy this, "PGP hopes to make available packages which will provide a seamless integration of PGP with computer systems used on campus," she said.

Grad dorms, printers added

Earlier this month, IS extended MITnet to include the graduate dormitories Ashdown House, Edgerton House, Green Hall, and Tang Hall, Costello said. Two more graduate dormitories, Eastgate and Westgate, are scheduled to be added in the fall, she said.

GSC Revives Grocery Shuttle on Trial Basis

By John Yoon Choel

The Graduate Student Council is reviving a grocery shuttle to bring students to LaVerde's Star Market in Medford, a full service grocery store, according to Jeffrey J. Silverberg, chair of the GSC Housing and Community Affairs Committee.

The grocery shuttle will begin operation this Saturday and will run every Saturday through October, Silverberg said. Buses will start at Building E40 at 11 a.m. and 12 p.m. and make several stops across campus before heading out to the Star Market, he said.

"Based on what the interest is during the trial period, we will make a decision as to whether to continue the shuttle through November and beyond," Silverberg said.

Frank LaVe and, the owner of the Star Market and LaVe's Market in the Student Center, is sponsoring the shuttle, Silverberg said. LaVe also sponsored the shuttle attempt in the fall of 1993, which was terminated due to a lack of participation, Silverberg said.

"Frank LaVe is looking for at least 30 participants a week to make the program a success," Silverberg said.

"If there is enough interest, he is willing to continue to sponsor the shuttle," LaVe would be sponsoring the shuttle mainly as a community service, Silverberg said.

The GSC has been receiving several requests to restart the shuttle service, and the issue has been petitioned at various graduate student dormitories, Silverberg said.

"We have every reason to believe that the shuttle will be widely used," said GSC Adviser Ying Li. First-year graduate students and undergraduates will make the most use of the shuttle, Li said. Also, "it will soon be winter, and it will be even more difficult for people to carry food from stores or T-stops," she said.

"What we need is hard evidence to present to Frank LaVe that the program will be a success," Silverberg said.

The committee agreed to organize a four-week trial period with LaVe to sample the amount of interest among MIT students, he said.

The shuttle will be available for all graduate and undergraduate students and spouses, Silverberg said.

Participation in the shuttle last spring waned toward the end of the semester due to final exams, Silverberg said. A weak publicity campaign may have also contributed to the failure, he said.

Safe Walk Electing, Roulette to Office

By Sarah Y. Kightley

Running against seven other students, Jessica J. Lin '98 was elected president of the Student Center class Friday by the narrow margin of nine votes.

"I don't think the margin has ever been that close," said Vijay P. Sankaran '98, Undergraduate Association president. The races are usually close because the voters get "divided up" under the preferential voting system, Sankaran said.

"Since the race was close we had to double check our results," he said.

**Mitchell Concedes Death Of Health Reform for 94**

**WASHINGTON**

By Karen Tumulty and Edwin Chen

L.A. Times

Senate Majority Leader George J. Mitchell of Maine said Monday he will announce his support for a health care reform plan that he has been negotiating with the Clinton administration, a move that would give the proposal a major boost.

The plan, which has been the centerpiece of Clinton's agenda for health care reform, is expected to be unveiled on Tuesday.

Mitchell's decision to support the plan is likely to increase the chances of its passage in Congress, where it has faced opposition from both Republicans and some Democrats.

Mitchell, who has been a vocal critic of Clinton's health care proposals, said in a statement that he believes the plan is "the only way to achieve universal health care for all Americans in the long term." He said he was convinced that the plan would provide "access to quality, affordable health care for all Americans."
Clinton Softens Haiti Sanctions

President Clinton, asserting that American military intervention would violate human rights abroad in Haiti, softened U.S. economic sanctions against the impoverished Caribbean nation Monday to permit a resumption of airline service, financial transactions and humanitarian projects.

In a speech to the U.N. General Assembly, Clinton said it is time to begin rebuilding Haiti's shattered economy because elected President Jean-Bertrand Aristide, ousted in a bloody military coup three years ago, is scheduled to regain power in less than three weeks.

"Essential civil order will be restored," Clinton said. "Human rights violations will be curbed. The military leaders will step down. The democratic government will be restored. President Aristide will return."

The president said he has already lifted U.S. sanctions except those aimed directly at military leaders and their civil servants, and he urged other countries to do the same. He said the embargo imposed by the U.N. Security Council should be ended as soon as Aristide returns to Haiti.

In a speech to the Haitian Congress on Tuesday, said his country's "economic and political situation is beginning to improve, and we are ready to begin rebuilding Haiti's shattered economy because elected President Jean-Bertrand Aristide, ousted in a bloody military coup three years ago, is scheduled to regain power in less than three weeks."

"Essential civil order will be restored," Clinton said. "Human rights violations will be curbed. The military leaders will step down. The democratic government will be restored. President Aristide will return."

The Tech recently ran the Interfraternity Council Judicial Committee went unnoticed for most students. At an institution where harassment and discipline incidents often generate inescapable controversy and discontent, the IFC should be lauded for a judicial system that works in a just and timely fashion. Although there are legitimate questions about the system’s ability to discourage such violations, the open and generally fair process should be modeled for other Institute dispute resolution processes.

The most impressive aspect of the IFC’s system is its continuing openness. Charges, trials, and sanctions are brought, conducted, and reported in public. The individuals and living groups convicted of rush violations must publicly affirm or deny responsibility for actions. Unlike other disciplinary proceedings at MIT, living groups are held responsible by their peers; an example of self-governance at its best.

The IFC system also retains principled and equitable, and continues to encourage informal resolution of disputes between living groups. Not every living group may be entirely happy with the disposition of their individual cases, but the fact that only five of its 13 convicted groups will likely appeal indicates that the system’s constituents do find justice. Even the Interfraternity Council President was not sheltered from scrutiny: His living group was charged and found guilty to a rush violation in which it was implicated.

Although the IFC system processes rush violations efficiently, the ability of the system to discourage violation remains suspect. Year after year, living groups violate long-standing and well-known rules like the prohibition against bad-mouthing or hiding freshmen. Some living groups even budget for fines as part of their rush budgets. It seems that the active punitive actions of the IFC Judicial Committee are regularly being ignored. Because some living groups fail to learn the lessons of past sanctions, the IFC should explore other methods to ensure that the living groups do not repeatedly violate rush rules.

In the final analysis, the success or failure of judicial systems will be determined by their ability to enforce rules and dispense justice in an efficient, open, and objective manner.

Reasons concerning readmission of the IFC’s judicial process seems to meet this standard and should serve as a model for student judicial self-governance.
Make a Difference!

Discover how you can make a difference on these issues and more on October 6 when members of the Corporation will be on hand to discuss how to be elected to the Corporation.

The ballot to elect a young alumni/ae (Classes 1993, 1994, 1995) to the Corporation needs strong candidates. Could that be you or a friend at MIT? Herald your interests and concerns by nominating yourself or a friend.

Watch your mail for nomination notices and come to the Open Meeting on Thursday, October 6, 1994 in Lobby 13 from 6:00 to 9:00 p.m. Share a pizza with members of the Corporation and learn how you can make a difference for the student body at MIT.

See other side for nomination form.

UA Council Meeting Schedule Fall 1994

All Meetings are in Room 400 of the Student Center at 7pm. Anyone is welcome to attend.

Wednesday, October 5, 1994
Wednesday, October 19, 1994
Wednesday, November 2, 1994
Wednesday, November 16, 1994
Wednesday, November 29, 1994

Do you have concerns about MIT? Do you want to make your voice heard? Do you want to change student government at MIT? We’ll soon have an email hotline where you can send us your comments and problems about MIT and the UA. Look for suggestions@mit.

The UA needs people to bring in new ideas, plan activities, and lobby for issues. If you are interested in getting involved with student government, please contact veef@athena or stop by the UA Office anytime during the day.

Attention Student Groups!!!

If you were unhappy with your Fall 1994 Finance Board allocations or missed the deadline last Spring, you may appeal to the Finance Board for more money. Additional budget requests are due by Thursday October 6, 1994 in the Finance Board mailbox. The appeals meeting will take place on Thursday October 15, 1994 in Room 400 of the Student Center. You can pick up the supplementary request forms in the UA Office (W20-401) or print them out on Athena by typing add finboard; cd /mit/finboard/forms; lpr -P<printername> finboard_request.ps.
Terminal Velocity entertains with humor, action

**TERMINAL VELOCITY**
Directed by Deran Serafian.
Written by David Twitty.
Starring Charlie Sheen and Nastassia Kinski.
Laetus Copley Place.

By Kamal Swamidoss

Don't judge this film by the first 15 minutes: Otherwise, you'll think you know how they came up with the "terminal" part of Terminal Velocity. Be patient, and you'll see a few good action scenes, as well as some funny lines, from the stars.

The story starts as a group of former KGB agents sneak a 747 full of Russian gold into Arizona. They plan to launder it and finance a part of Sheen's evil plan. Sheen has a more interesting part in a more interesting story in that film. The Chase is just a funnier action-comedy, probably because Terminal Velocity was focused more on suspense and action than on comedy. That's too bad, because Terminal Velocity doesn't fully make use of one of Sheen's best abilities. However, the action scenes are done well.

People will be comparing action movies with Speed for a long time, and they'll be hard-pressed to find one as entertaining. There are some excellent aerial scenes in Terminal Velocity that rank right up there. The most amazing one has Sheen, Kinski, and a big red Cadillac plummeting to earth from a cargo plane. But compared to Speed, this film has far too many slow parts. That movie redefined the action film, and Terminal Velocity doesn't fare well in comparison.

That's not to say that Sheen and Kinski do a bad job. On the contrary, they play their parts well throughout the film. They have an on-screen rapport that really helps the story. They're effective in both action and comedy. Kinski is the one in charge, the one who knows the whole story, while Sheen is trying to figure out what's going on. He's usually the one with the funny lines, regardless of situation. His one-liners make every scene, action or comedy, that much more entertaining.

Sheen and Kinski are forced to accept all of the audience's attention. The bad guys don't say much, and when they do say something, it's generic bad-guy stuff. The other characters aren't developed as well. But you don't look for character development in an action film. You look for big explosions, impressive stunts, and stars trying to get out of dangerous situations. When it works, Terminal Velocity has all of that; unfortunately, it doesn't have enough. Many (maybe too many) minutes are spent in conversations. When it's between Sheen and Kinski, this helps to create their relationship. In other cases, it just tries to justify the plausibility of the plot. In all, Terminal Velocity has some really exciting action scenes and a lot of flimsy lines that recommend it more than does its story.

**Orangutang creates a diverse sound in Acid Blues**

DEAD SAILOR ACID BLUES
Orangutang
Imago Records.
By Brian Hoffman

Once upon a time, not so very long ago, in a land not so very far away, there played a band by the name of Orangutang. They played, and through the haze of the smoke and the glasses of beer, the people watched and judged them worthy of praise. The band of the Rothskeiller rejoiced. Orangutang's latest production, Dead Sailor Acid Blues, deserves every bit of that praise. Diverse and original without becoming overly eclectic, the sound of Dead Sailor Acid Blues runs the gamut from the exceedingly heavy all the way to lighter, more intricately textured weavings of guitar and vocals. The sound of these four guys can loosely be described as a mix between Rush's vocals, Stone Temple Pilot's rhythm guitar work, and Voivod's mental sounding edge to their work.

Orangutang keeps things interesting by mixing in some great guitar and other offbeat work on a lot of their tracks, especially during the song intros. For example, "Shahday & Canvas," which lasts only 39 seconds and consists entirely of samples and effects-work, proclaims at its end, "Good Evening, Ladies and Gentlemen," and jumps immediately into the second track, "Bigger Chunk." "Bigger Chunk" combines especially Rush-like vocals with a sound vaguely reminiscent of Jane's Addiction productions, with some innovative guitar work to form a truly excellent track. "Postharmonium," the second shortest song on the disc, conjures up images of a multicolored ball of play dough in its swirling construction. It's an instrumental mix of reversed sound bites, screams that could have come from a roller-coaster, and a few high notes on guitar repeated throughout.

Whether火爆 and brooding, harsh and heavy, or light and intricate, Orangutang has literally wrung out their emotions and poured them into their music. By way of an intensely personal example, "The Day Before I Died" compelled me to leap from my seat while writing the article and jump around my room during some great heavy rhythm work about two minutes into the track. "Sweet Lemon Maureen" juxtaposes

**Nomination to the MIT Corporation for Final Year Students and Recent Graduates**

(Classes of 1993, 1994, 1995)

DUE DATE: NOVEMBER 4, 1994

Nominee:
Degree: ______ Year: ______
Address: ____________________________________________
Phone: ______

Please briefly state why you have chosen to nominate this individual (self-nominations welcome). Any additional information you can provide (relevant activities, references, etc.) is also welcome:

Your Name: ______________________ MIT Affiliation: ___________
Address: ______________________ Phone: ______________________

Please forward nominations to Kathleen Cragin Gaitalis, Room 12-090 or rcragin@mitvmc.mit.edu no later than Nov. 4. Your nominee will be contacted for further information.

The Shawshank Redemption

Directed by Frank Darabont.
Written by Frank Darabont, based on a short story by Stephen King.
Starring Tim Robbins, Morgan Freeman, and William Sadler.
Louis Copley Place.

By John Jacobs
STAFF REPORTER

The Shawshank Redemption is an extraordinary movie about hope, friendship, and suffering in life. Tim Robbins plays the classic hero in Andy Dufresne, a successful banker who is imprisoned for two murders (of his wife and her lover) he did not commit. Without a fight, like a biblical sheep led to the slaughterhouse, he allows his sentence to be commuted.

In prison he is withdrawn, carrying himself in the same dignified manner that he had become accustomed to as a banker. This strange demeanor in the midst of the prison's physically and psychologically abrasive reality immediately attracts the curious attention of Ellis "Red" Redding, played by Morgan Freeman. Two months pass before Andy approaches him.

Andy approaches Red out of necessity, in a somewhat forced condition: He wants to resume his rock sculpting hobby and Red, being aware of a kingsize within the prison ranks, is the only inmate with enough connections to smuggle small rocks and tools into the prison.

Slowly, the audience is introduced to their complicated friendship. While Red is natural- ly social, Andy has a tendency to deny his relationships with others. Actually, exactly how and to what extent Andy is socially imprisoned seems to be anybody's guess, including his own. This is the only flaw apparent in the movie. Intro

Orangutang shows depth in musical, composing ability

Orangutang, from Page 6

amazingly personal lyrics — "Bathing in the light of a radiant splendor / Like a crystal sky in a Cuban December / She's been burning bright, I am a frozen ember / Holding on to the letter that I know I'll never send her / Sweet lemon Maureen / I'm still right here on to the letter that I know I'll never send her / Sweet lemon Maureen / I'm still right here..." with guitar work that could have easily come from Helmet. It brings the writer's feelings of loss and isolation to the forefront, leaving the listener with a sense of unfulfilled connection.

Another track that could have easily come from Helmet, "Daddy Raw," is a dark sounding tune with some lyrics that make one wonder exactly what they're thinking about, standing apart from the other tracks on the disc in that it doesn't really fit with the images evoked by the other tunes: definitely not of the bunch.

An equally intense emotional outpouring comes forth during "They All Write Her Songs," and "Sea of Glass," with surprisingly melodic vocals. "They All Write Her Songs" augments the vocals with a more upbeat tempo and some interesting guitar effects at the intro, whereas "Sea of Glass" makes use of a slower guitar that sounds like it's getting out of the fishes' mouth, bearing bright, one mired in deep depression, being lifted out of his misery by the halluci-

in the prison.

Augments the vocals with a more upbeat tempo and some interesting guitar effects at the intro, whereas "Sea of Glass" makes use of a slower guitar that sounds like it's getting out of the fishes' mouth, bearing bright, one mired in deep depression, being lifted out of his misery by the halluci-

doing exactly what Andy's social problem is, or how he feels about it.

As his friendship with Red develops, Andy's free, irrepressible spirit, conveyed by his socially imprisoned self, becomes more evident. Andy Dufresne communicates without words, but Tim Robbins, although he deftly portrays Andy's free, irrepressible spirit, doesn't clarify exactly what Andy's social problem is, or how he feels about it.

AXO Members Move Into Sorority House

By Fenney Kwan

A week before this year’s Resi-
dence and Orientation Week began, 23 Alpha Chi Omega sisters moved
into the sorority’s new four-story
brownstone at 478 Commonwealth
Ave., across the street from the
Alpha Phi sorority house.

The building includes a televi-
sion room, a dining area, a computer
room, a kitchen, a library, and a
bike room, said AXO President
Diane E. Hodges. The house is also
handicapped accessible with an ele-
vator and a bathroom that are
equipped with special features, she
said.

The residents were chosen
among interested sorority members,
Hodges said. The 23 sisters and three
new members filled the two
quadrophiles, two triples, three dou-
bles, and four single rooms in the
house, she said.

MIT purchased the house for
the sorority for about $1,050,000, said
Stephen D. Immerman, director of
special services. Renovations costed
about $750,000, which included all
costs associated with furnishing the
house and installation of an
advanced security system, Immer-
man said.

The AXO House Corporation,
which is made up of AXO alumnas in
the area, is in the process of negoti-
ing a repayment plan with MIT, Hodges
said.

New house is “gorgeous”

“The house is gorgeous,” said
Catherine J. Mangon 95. “There’s a
chandelier in the downstairs area,
and there are stained glass windows
everywhere throughout the house.”

The house’s special features
include several fireplaces, Hodges
said. One mantle has intricate carv-
ings and sculpture flashing each
side, she said.

“It’s a wonderful opportunity to
walk down the hall and hang out
with sisters,” Hodges said. “Before
we got the house, it was a hassle to
get everyone together. Everyone
was in a different dorm.”

Sohals Libal ‘98 agreed. “The
new house is a piece for the whole
group to get together,” she said.

Some sisters chose not to live in
the house. “I think I can have
house offers without actually living there,” said
Ela Ben-ur 97. “I could hang out
there, but if I left anything [at home]
I could just pick it up,” she added.

Hodges is not bothered by the
commute from the house in campus.
“It’s a very short time. You just
jump on a bike and you’re there,”
she said.

Kim Levin ’98 also decided not
to live at the house. “I want to live
in a dorm,” she said. “I also want to
meet unaffiliated people.”

The Boston West route of the
Safe Ride vans was changed to
include a stop in front of the new
house. Plans to include the site of
the new house along the route began
even before the purchase of the
property, Immerman said.

From donating the 1.5 acres, or
59,000 feet, of land for the park, the
 Instituto will be allowed to develop
between 73,750 and 103,250 square
feet of building space, said Stuart
Dash, a neighborhood planner in the
City of Cambridge community
development department. However,
restrictions apply to the design and
height of any buildings that are
detailed in the zoning bylaw, he said.

When MIT helps the Cambridge
community at no cost to the city gov-
ernment and gets something of value
in return, “we get a win-win-win
situation,” said Gallop. “This is a
unique way of addressing municipal
issues in a time of economic strain.”

Under the August agreement,
MIT is responsible for donating the
land contaminant-free. The cost of
preparing the park was originally
estimated at $200,000, but after high
levels of lead and petroleum hydro-
carbons were found in the soil it was
found that an additional $400,000 to
$500,000 would be needed to decon-
taminate the area, Gallop said.

“These are not unusual contami-
nants to find,” Gallop said. “They
are a result of the industrial fill that
Cambridge was built on and are not
hazardous to those who live and
work in the area, but when kids are
involved, we want to remove these
types of substances,” she said.

The process of site preparation
began four weeks ago with the

MIT and Cambridge Swap New
Park for Development Rights

By Hsiang Yin

Officials from MIT, the Cam-
bridge City Council, and Cam-
bridgeport came to an agreement
last month that MIT would donate
about 1.5 acres of land for the con-
struction of a Cambridgeport park in
exchange for development rights in
the area, said Sarah E. Gallop, assis-
tant for government relations in the
president’s office.

The possibility of building a
park on Institute property was intro-
duced in early 1992 after a 12-year
rezoning effort in Cambridgeport,
where MIT owns 40 acres of land,
Gallop said. Cambridgeport is bounded by
the Charles River, Pearl Street,
Massachusetts Avenue, and Memori-
al Drive, Gallop said. The park is
located on Sidney Street, between
Pacific Street and Tudor Street, she
said.

MIT’s development rights will be
used to build housing, Gallop said.

Student Phonathon Supervisors Needed
Will manage student fundraisers to contact the constituents of MIT by telephone to solicit funds on behalf of the MIT Alumni Fund. Responsible for supervising students on a nightly basis and for maintaining an adequate number of trained callers performing at levels in accordance with nightly calling objectives. Responsible for monitoring calling sessions for the project, coaching callers, and assisting in development of related statistical work and training materials.

Recommended Qualifications:
- Supervisory experience
- Demonstrated problem-solving abilities
- Strong interpersonal and leadership skills
- Strong quantitative skills
- Familiarity with computerized databases
- Strong organizational skills
- Flexibility in working hours
- Ability to organize and prioritize work
- Ability to manage and motivate employees performing result-oriented tasks with standardized goals.

A team of two to three supervisors will be hired and will have the responsibility for covering all student calling shifts throughout this project. Calling shifts will be held on Sunday from 2-9pm and on Monday-Thursdays from 6-10pm. Supervisors will be expected to arrive 30 minutes prior to each calling shift to set up for the nightly calling session and will be expected to stay 30 minutes after calling to complete nightly reports. Supervisors will also be required to attend weekly staff meetings that will take place at a mutually convenient time. Each supervisor will be expected to work an average of 15 hours per week beginning in the middle of October and continuing through the second week of December. Supervisors will be paid at a rate of $12.00 per hour.

Supervision of student telephone fundraisers is highly demanding and requires a great deal of self-motivation, "people skills", and superb organizational abilities. Because the calling work force is exclusively made up of part-time students whose priority is education, a great deal of supervision and motivation is required to maintain a positive and productive environment. This work is done primarily in the evening and weekends and demands a flexible approach, common to goal-oriented managers.

Qualified candidates:
Leave message for Marilyn Silverstein at 252-1608

POLICE LOG

The following incidents were reported to the MIT Campus Police Department from Sept. 16-22:

Sept. 16: Bldg. 54, bicycle stolen, $50; Bldg. 56, tool stolen, $550; Bldg. NE43, computer stolen, $2,500; Westgate, bicycle stolen, $130; Student Center, backpack stolen, $40; New House, harassing phone calls; Bldg. 3 bicycle rack, bicycle stolen, $160.

Sept. 17: Baker House, unlocked bicycle stolen, $300; McCormick Hall, bicycle was vandalized in an attempt to steal parts; West Garage, attempted larceny of a '52 Renault.

Sept. 19: Johnson Athletic Center, bicycle stolen, $600; McCormick, male arrested for trespassing; Bldg. 4, camcorder stolen, $600; Bldg. 12, vandalism, Bldg. 20, suspicious activity; MacGregor House, bicycle stolen from suite, $360; East Garage, tire stolen from car, $250; MacGregor, bicycle stolen from room, $400; Bldg. NW30, male arrested for trespassing; Bldg. 5, larceny of VCR, tennis racket and wallet, total value $575.

Sept. 20: WILG, bicycle stolen, $200; Bldg. 14, bicycle lock damaged; near of Walker, bicycle stolen from room, $300; Bldg. 38, bicycle lock, bicycle stolen, $200.

Sept. 21:Bldg. 36, vandalism to door; Bldg. 18, (1) vandalism to a door, (2) breaking and entering, computer stolen, (3) electronic equipment stolen, $13,800; Bldg. 66, breaking and entering, walkman stolen, $200; Bldg. E17, (1) room broken into and bicycle stolen, $350; (2) CD player stolen, $200; (3) keys and Walkman stolen $100, (4) camera stolen, $400, (5) backpack stolen; Bldg. 57, bicycle handlebars stolen, $250; Bldg. E40, harassing phone calls; Bldg. 14, computer stolen, $1,500; MacGregor, CD player stolen from room, $350; Bldg. 17, Safari Street parking lot, '76 Honda stolen; Bldg. W31, bicycle tire stolen, $25.

Sept. 22:Bldg. 4, vandalism; Bldg. 8, attempted break into a room; N10 parking lot, attempted break into '94 Civic.

Majority of Freshmen Did Not Vote Preferentially in Election

Election, from Page 1

said. The candidates who did not win can still participate in other UA positions and committees, Sankaran said.

The newly elected officers are already making plans for the year. "I hope everyone gets off to a good year, and I'm sure Jessica and I will be getting back to everyone in the freshmen class about projects that we'll be planning," Roulette said. Roulette said that if any freshmen have suggestions, they can send him electronic mail.

Yo and Yu said that they are working on different fund-raisers and study breaks, and they "definitely want to continue the 'Screw Your Roommate' Dance."

Rank system might sway vote

The UA uses the system of preferential voting in elections, Sankaran said. In preferential voting, each voter ranks their choices for a certain position instead of selecting just one candidate, he said. When officials are tallying the votes they go through rounds. Whoever has the fewest number of votes in the round gets dropped, and "their votes are divvied up among the other candidates," Sankaran explained.

For the president and vice president races, "most of the ballots ended up being nonpreferential," Sankaran said. "The majority of people only ranked one person on their ballot" for these positions, he said.

Sankaran speculated that if some candidates had received more second place votes they might have ended up winning the race. Though "the ballots said rank your choices in preferential order from one to eight," Sankaran is not sure if freshmen understood the concept of preferential voting.

"It kind of makes you think that candidates should campaign for second place votes," Sankaran said.

The deadline for filing to run for either the secretary or publicity chair positions was extended until 5 p.m. on Tuesday because no one was running for either office. Though candidates who were running in highly-competitive races also had the option to switch and run for these positions, only new candidates decided to run for these offices, Sankaran said.

IS Purchases Printers for Dorms

Margi Costello, from Page 1

"Printers will be installed as soon as the dorms are ready," she said. Dormitories will be responsible for supplying paper, toner kits, and a secure location for the printer, she said.

Burton-Conner House has already installed its printer while Baker House has turned in its request, Costello said. "Students in our dorm seem very excited about having a printer," said Brandon W. Porter '97, a residential computing consultant for Burton. In the next few weeks, students with Macintosh and Microsoft Windows-based computers will have access to the printer, Porter said.

IS has hired six new residential computing consultants to replace those who left after last year, Costello said. The consultants help with connecting students to MITnet, providing them with necessary cables and software, and troubleshooting problems with connections or applications, Costello said. Currently, a total of 19 consultants serve the 10 undergraduate and four graduate dormitories connected to MITnet, she said.

Future upgrades, "are scheduled to come on-line next year when their phone system is updated," she said. Increasing the availability of MITnet is important as the public Athena clusters become more crowded, Costello said. "Even early in the year we can safely say that the number of students connected to MITnet exceeds the number of public workstations," she said.

IS has purchased Hewlett-Packard Laserjet 4si printers for the undergraduate dormitories, Costello said. "Printers will be installed as soon as the dorms are ready," she said. Dormitories will be responsible for supplying paper, toner kits, and a secure location for the printer, she said.

**ANNOUNCING TWO NEW CREF ACCOUNTS**

**YOU'RE LOOKING AT TWO COMPLETELY OPPOSITE, FUNDAMENTALLY DIFFERENT WAYS TO INVEST IN STOCKS. WE RECOMMEND BOTH.**

Introducing the CREF Growth Account and the CREF Equity Index Account.

Whether you want a fund that selects specific stocks or one that covers the market, we're on the same page. Our new CREF Growth and CREF Equity Index Accounts use two distinct strategies for investing in the stock market, but both aim to provide what every smart investor looks for: long-term growth that outpaces inflation.* The CREF Growth Account searches for individual companies that are poised for superior growth. In contrast, the Equity Index Account looks for more diversification, with a portfolio encompassing almost the entire range of U.S. stock investments. It will invest in stocks in the Russell 3000®, a broad index of U.S. stocks.

Like our CREF Stock Account, which combines active, indexed, and foreign investing, and our Global Equities Account, which actively seeks opportunities worldwide, the new funds are managed by experienced investment professionals. They're the same experts who have helped make TIAA-CREF the largest pension system in the U.S., managing over $130 billion in assets.

To find out more about our new stock funds, and building your portfolio with TIAA-CREF, just call 1-800-842-2776. And take your pick.

Ensuring the future for those who shape it.*

*The Russell 3000 is a registered trademark of the Frank Russell Company. Russell is not a sponsor of the CREF Equity Index Account and is not affiliated with it in any way. For more complete information, including charges and expenses, call 1-800-842-2776 or send for a CREF prospectus. Read the prospectus carefully before you invest or send money. CREF certificates are distributed by TIAA-CREF Individual and Institutional Services, Inc.

New Cambridgeport Park to Open in Spring

Park, from Page 9

removal of asphalt from the area, which was previously used as a rock yard, Gallop said. Removal of the contaminants involved digging all soil 4 feet from the surface, she said.

After the construction of an irrigation system and a fence and the planting of grass seed, the park will be turned over to the city, Gallop said. The park officially opens next spring, she said.

MIT involved in community

"The park is a valuable open space asset for a neighborhood not well served by city parks," Dash said. With a newly trained force of 25 people, Safe Walk can perform effectively, Miranda said. Working from 8 a.m. to 11 p.m. and 1 a.m. to 7 a.m., she said, the force can patrol the campus and find the right escort for the right rider.

One possible explanation for the use of Safe Walk is the popularity of the Safe Ride vans. "They ask us on the spot about escort," she said. "No one wants to bother us otherwise."

"The majority of people who use the campus are already heading to their dorms who see us walking around," said Abraham Abraham. "We're here to be as helpful as we can," he said. "Let's make positive contributions."
Ifumbled following an 8-yard return to the end. The only plays of note for WNEC were the Beavers first of the season to result in a Beaver lead, 8-6. However, their possession stalled and the Golden Bears pass fell incomplete at midfield, but BC's quick counters tired the MIT defense and goalie Even Mendez. Paik also played great defense, stealing the ball 2 meters from goal. Carpenter to the team by making five saves shot from within 4 meters. Carpenter played excellent defense and made crucial stops. David Brandenburg '95 once again lead the team to victory. Together they took the lead early on and never relinquished it, taking the top two places. Finishtime surprised the crowd as he led the final stage, but having missed the opportunity, Brandenburg scored after making an interception. Ben Soule '96, Robert Mchale '98, and Troy Gayeski '97 each had one goal. Park also played great defense, stealing the ball 2 meters from goal.

The next race will be held on Saturday, September 27, 1994, at the Rochester Country Club. The course will be 10 kilometers long, with a total of 1600meters. The team race will start at 9:00 AM, and the individual race will follow at 10:00 AM. The course is hilly, with both uphill and downhill sections, creating a challenging course for the runners. The men's race will be followed by the women's race, which is scheduled to start at 10:30 AM. The top three finishers in each race will receive medals, with additional awards given to the overall winners of the men's and women's races.

The Rochester Country Club is located at 1234 Country Club Lane, Rochester, New York 14615. The race will be held on the country club's 18-hole course, which offers beautiful views of the surrounding countryside.

The Rochester Country Club was founded in 1895 and has a rich history of hosting various events and competitions. The club is home to a large and active membership, with members enjoying not only the course but also the social events and activities offered by the club. The club's mission is to provide a community gathering place for all members and their families, promoting the sport of golf and fostering a sense of camaraderie and friendship.

In summary, the Rochester Country Club is a vibrant and active community hub, offering a challenging and scenic course for all levels of golfers. The upcoming races are sure to attract a large and enthusiastic crowd, making it a must-attend event for all golf enthusiasts.

You've been in Cambridge for six months and you still haven't eaten at the S&S?

You probably feel embarrassed to know we're just around the corner in Jamaica Square. We've been there since 1899, delighting smart diners with everything from New York style deli sandwiches and buffalo-sized Buffalo Wings to juicy rib-eye steaks and Swordfish Dip. Food and folks are all over the world served in portions so generous, the Boston Globe called them "hungrymen." All at very affordable prices. So why not come to the $5, and take in a few courses. And learn what great dining is all about.

MITSeeking defensive player of the week.

Eventually, MIT got on the scoreboard with 1:42 left in the first quarter. The Beavers scored on a 24-yard screen from Sgouros to Troy Gayeski '97. On the ensuing punt after, MIT faked a kick and scored on a wide-open pass play to Gayeski.

The second quarter was worse offensively than the first. However, WNEC scored its only touchdown with 9:30 left in the quarter when Steve Carroll ran off-tackle for three yards to score. However, the Golden Bears pass fell incomplete to result in a Beaver lead, 8-6. However, their possession stalled and the Golden Bears pass fell incomplete to result in a Beaver lead, 8-6. After the kickoff, the Golden Bears moved the ball to the MIT 26. However, a third-down gain was knocked down by Matt Turner '96 and the resulting 43-yard field goal attempt missed.

But MIT's resulting possession was successful as first Troy Thorson '98 and then Andy Phelps '95 got his and the Beavers first sack to stall the resulting Golden Bears drive. Phelps would get 2.5 sacks and one tackle for loss with 10 tackles overall during the game and was nominated for conference defensive player of the week. However, all is not well with this team. The Beavers committed 10 penalties for 96 yards. Also, the offense often had long spurts of possession which will create problems against the better teams in the conference including Bentley, Rhode Island, and the United States whom MIT plays next week on the road. The 299 yards of offense represents the best performance so far this year while they only generated 44 yards on the ground in last week's 41-7 loss and 213.3 over the season. Also, the 197 yards allowed on the ground was the best performance against perennial ECFC powerhouse Bentley with their numerous offensive

Even so, their is plenty of optimism. Over the next three weeks, the Beavers in two weeks at Homecoming against Curry College, the next home game after the away game at Stonehill College Saturday.

Runners Blaze Past Saturday Opponents, Remain Undefeated

By Arnold Seto

The men's cross country team extended its undefeated record to 5-0 with a victory Saturday against Tufts University, Bates College, and Bentley College. MIT won the race against slower runners with ease. Sanford Fitch '96 replaced Weis and brought new energy to the team by making five saves shot from within 4 meters. Carpenter played excellent defense and made crucial stops. David Brandenberg '95 was good in 2-meter defense, not letting the ball near the goal. Finish surprised the course as he led the final stage, but having missed the opportunity, Brandenburg scored after making an interception. Ben Soule '96, Robert Mchale '98, and Troy Gayeski '97 each had one goal. Park also played great defense, stealing the ball 2 meters from goal.

The next race will be held on Saturday, September 27, 1994, at the Rochester Country Club. The course will be 10 kilometers long, with a total of 1600meters. The team race will start at 9:00 AM, and the individual race will follow at 10:00 AM. The course is hilly, with both uphill and downhill sections, creating a challenging course for the runners. The men's race will be followed by the women's race, which is scheduled to start at 10:30 AM. Football Crushes WNEC with Record Number of Sacks

By Thomas Kettler

Setting an Eastern Collegiate Football Conference and MIT record of 11 sacks for a loss of 78 yards, the MIT football team defeated the Western New England College Golden Bears 25-0 Saturday at Stoneham Stadium. The victory was the Beavers first of the season and put the team 1-2 overall and 0-1 in the conference.

WNEC fell to 0-3 overall. The first quarter was uneventful as neither team could mount a serious offensive threat until the quarter's end. The only plays of note were a punt by WNEC that MIT fumbled following an 8-yard return but was nullified by an infelicitous whistle midway in the game. Also, MIT committed its only turnover at 7 minutes 23 seconds when Alex Sgouros '95 had his pass intercepted by Keith Murphy. One minute later, Andy Phelps '95 got his and the Beavers first sack to stall the resulting Golden Bears drive. Phelps would get 2.5 sacks and one tackle for loss with 10 tackles overall during the game and was nominated for conference defensive player of the week.

Eventually, MIT got on the scoreboard with 1:42 left in the quarter. The Beavers scored on a 24-yard screen from Sgouros to Troy Gayeski '97. On the ensuing punt after, MIT faked a kick and scored on a wide-open pass play to Gayeski.

The second quarter was worse offensively than the first. However, WNEC scored its only touchdown with 9:30 left in the quarter when Steve Carroll ran off-tackle for three yards to score. However, the Golden Bears pass fell incomplete to result in a Beaver lead, 8-6. However, their possession stalled and the Golden Bears pass fell incomplete to result in a Beaver lead, 8-6. Men's Tennis, from Page 20

sent then turned up the intensity to capture the win at 7-5 in the third set.

Lanyon also took his opponent to deuce sets, battling back from losing the first set to take the second set. However, his opponent won the third game, 6-4, 2-6, 6-1. Despite coming back up short, Weintraub at first and Wang at third played their opponents tough, with scores of 6-4, 6-3, and 7-5, respectively.

Easy opening win over Clark

The Engineers opened up last Monday on a positive note with an easy win over Vassar University. After capturing all three doubles matches, none of the bottom four singles games lasted more than four games in their individual matches. Such performances fortunately secured the team win, as the top two MIT players, Lanyon at first, and Wang at second, struggled with their opponents.

Lanyon, in his first intercolle-
gate match, had much trouble early on, but was able to overcome his problems, prevailing, 7-5, 6-3. Meanwhile, Wang fell behind in both sets. He was able to come back to win the first set, 6-4, but then lost the second, 6-3. The match was swamped due to darkness, the resulting draw awarded half a point to both teams.

The team will play its next dual meet tomorrow at home against Bucknell College in an important Division III contest. For the singles players and doubles teams, the match will also serve as further preparation for Rolex New England Division III Tennis Championships this weekend, also at MIT.

For the Engineers, this year’s players will have big shoes to fill given the team’s enormous success in past years. MIT has produced the last three doubles champions, as well as having a singles player reach the semifinals or farther. All of the players who did so have since graduated. Although things may change this year, expectations still remain high for the Engineers.

Deion Sanders Signs With San Francisco

Light, from Page 19

Sanders signed with San Francisco. In case anyone missed it, Deion took an interception 74 yards for the game-clenching touchdown in a 24-13 victory over the Saints. In an otherwise fairly even game, Sanders was the difference as New Orleans saw its hopes of coming back from a 17-11 deficit erased with just 32 seconds left in the game.

In other games, Seattle beat Pittsburgh, 36-13; Atlanta downed Washington, 27-20; Cleveland held on to beat Indianapolis, 21-14; Houston got its first win of the season, 26-11, over Cincinnati; and Green Bay crushed Tampa Bay, 30-6.

Win over WPI Last Week Gives Women's Tennis Its First Victory

Women's Tennis, from Page 20

7-6 (7-3), 6-4, Fan, at second singles, came up against a tough opponent but lost 6-0, 6-0. Kommineni fought well at third singles but also came up against a tough opponent, losing 6-0, 6-1.

At fourth singles, Koo played an excellent first set, just falling short 7-6 (7-2), 6-0. Ramnath dominated the first set 6-0 at the fifth singles position. In the second set, her opponent regained the momentum and took 6-2, but Ramnath was not to be denied a victory, winning 6-2, 6-1.

"I was really proud of the way everyone coped with this weekend," said Coach Candy Royer. "We have a super group to work with this year. . . . Every coach we played against noticed our exemplary sportsmanship!"

Beavers crush WPI

Last Wednesday, the team traveled to Worcester Polytechnic Institute seeking its first victory. The Beavers were successful, dominating eight of the nine matches played. MIT did a good job of keeping its focus and therefore playing solid, wise, ande, precision tennis.

At first doubles, the team of Matsumuki and Tan lost the first game but never looked back, winning 8-1 with overwhelming serves and penetrating volleys. At second doubles the fairly new team of Kringer and Humphrey gave a good fight but were overcome with inexpertise playing together and injury, as they lost a tight set, 8-5. The third doubles team of Koo and Kommineni totally crushed their bewildered opponents, 8-1.

Before the singles matches started, Royer advised the team to focus on service percentages and consistency. This they did and went on to sweep the rest of the matches. At first singles Matsuzaki served- and volleyed her way to a 6-2, 6-2 victory. Second singles player Fan was down 4-1 in the first set but battled back beautifully, taking the next 11 games in the match, 6-4, 6-0.

Third singles player Kommineni used her powerful and attacking groundstrokes to slaughter her opponent, 6-2, 6-2. At number four singles, Koo totally annihilated her opponent, giving up only one game in the whole match, winning 6-0, 6-1.

Humphrey, playing her inaugural match as an Engineer, made it evident that she is a competitor by outplaying her opponent 6-3, 6-1 at the number five position. Number six singles player Shah showed how tough she really was by crushing her opponent in the tiebreaker, 6-3, 7-6 (7-1).

This victory gave the team its first win in the New England Women's Eight Conference. The team hopes to continue this streak.

The team will play Wesleyan College at home today at 3:30 p.m. in its second New-England Conference match.

The 1994 Ig Nobel Prize Ceremony

Thursday, September 22, 1994

2 p.m. in the Academic Auditorium

Groups winning Ig Nobel Prizes: 
Deaminating by M. J. F. Lipton, W. W. H. Doisy, and members of minority groups to apply.

Howard Hughes Medical Institute
Predoctoral Fellowships in Biological Sciences

1995 Competition

30 fellowships will be awarded for full-time study toward the Ph.D. or M.D. degree in cell biology and regulation, genetics, immunology, neuroscience, structural biology, biostatistics, epidemiology, or mathematical biology.

Fellowship Terms

- Three-year initial awards, with two-year extension possible
- $14,000 annual stipend
- $14,000 annual cost-of-education allowance
- If an M.D./Ph.D. student: not in a funded program
- No citizenship requirements: U.S. citizens may study elsewhere; others must study in the United States

Eligibility

- Less than one year of post-baccalaureate study is allowed
- College seniors; baccalaureate graduate
- Students or professionals
- United States citizens or permanent residents

Deadline: November 4, 1994

Applications must be received by

Fellowships start: January 1996

Light Agapizes for Poor Weekend Game Predictions

Column by Bo Light
SPORTS
Page 19

My sincere apologies to anyone who bet on my predictions this weekend. I knew something was wrong when every area betting ser-
vice called Sunday afternoon to per-
sonally thank me for my picks. If you're not sure what I'm talking about, go find a copy of last Fri-
day's edition and read the predic-
tions as you go, too. You can laugh as you see the results.

Colleges
First and foremost, in one of the few games I picked correctly, MIT
won its first game of the season, a 22-6 pounding of Western New
England College. Aha Spooner '95 threw scoring passes of 24 and 26
yards to Troy Gaye '97, and Stasi DeLo '98 had a 2-yard touchdown-
run down. On the other side of the ball, the MIT defense applied intense pressure to WNEC's quar-
terback, and came up with 11 sacks, an ECFC conference record.

Boston College also improved to 1-0 with a 21-2-0 victory over a rather pathetic Pittsburgh team. True freshman Scott Mayne
was less than impressive in his first col-
terback, and came up with 11 sacks,
leag comparing pressure to WNEC's quar-

Women’s Tennis Comes Away With One Win, Two Losses

By Carol Matsuzaki

women’s tennis team had a busy weekend, playing Colby College on Friday and Wesleyan University on Saturday. MIT lost both matches 8-1. Still, they did win last Wednesday’s match against Worcester Polytechnic Institute. Against Wesleyan, the doubles teams all had very tight, winnable matches but lost at all three positions. 8-4, 8-5, 8-6, respectively. The team feels that their doubles teams are getting stronger with each match they play.

At first singles Carol Matsuzaki ’95 was victorious in a great come- back, 6-1, 6-4, 6-2. Competing at the number two position, Bobby Kommineni ’97 played tough but came up against the top Division III Massachusetts current, losing 6-0, 6-0. Seetha Ramnath ’96, at the number three position, played an extremely close and intense match all the way through, barely losing 6-3, 6-4. Fourth singles player Miranda Fau ’95 gave a valiant effort but lost 7-6 (7-1), 6-0. At the fifth spot, Lily Koo ’97 played very well and lost 6-4, 6-2. Number six singles player Nora Humphreys ’98 played with poise in a losing effort, 6-4, 6-4.

In exhibition single play, Saaj Shah ’95 lost a tight match, 8-3. Sarah Klinger ’97 overpowered her opponent, as she took it 8-4 victory.

Engineers Fall to Wesleyan

In the Colby match, first doubles partners of Matsuzaki and Fau lost it in a match that was decided by less than half a dozen points. Second doubles pair Ramnath and Kinger and the third doubles team of Kommineni and Koo both lost their matches 8-2.

At first singles Matsuzaki played a good match but lost a close one.

Field Hockey Falls to Babson But Upsets Gordon, Wheelock

By Catherine Mingion

Last week the MIT field hockey team played against Gordon College, Babson College, and Wheelock College, and came away with two wins. The first two games were away on grass fields while Saturday’s match was at home on the artificial turf.

On Tuesday, the Engineers traveled to Gordon College for their first game on grass this season. During the first half, MIT played harrassingly, taking only two shots at the Gordon goal. In the second half, MIT took control of the game after Katherine Merrilees ’97 scored a goal on a penalty shot 15 minutes into the period.

Three minutes later, Ann Terry ’96 dodged the Gordon goalie and scored.

Gordon remained very aggressive and almost scored later in the game. A shot taken by one of the Gordon players ricocheted off of the corner of the MIT goal. The ball rolled along the goal line and was about to roll into the goal when it was saved by Co-captain Catherine Margison ’95 with a reverse stick hit. For the rest of the game, the ball was kept in MIT’s offensive end.

The second half saw MIT suffer a disappointing loss in Tuesday’s game against Babson, from a New England Women’s Eight Conference opponent.

Babson dominated the first half of the game, taking 13 shots to MIT’s three. The Babson Beavers scored the first goal only 9 minutes into the game. Gaile Lara Walker ’97 had an incredible hit, making it 1-0 in favor of Babson.

With less than 4 minutes remaining in the half, Babson scored their second goal 60 seconds later. With only 5 minutes left in the second half, Babson had possession of the ball, and was able to score an unassisted goal.

In the second half MIT was able to turn things around and dominated the game throughout the period. The Engineers took nine shots this time while Babson took only five. Approximately 10 minutes into the period, Co-captain Meera Saini ’97 scored an unassisted goal. Despite several further attempts to score, Babson was never able to get past the Engineers in the second half.

Men’s Tennis Now Standing at 1-2

Although the doubles matches would not have affected the final team decision, the Engineers hoped to cut down the margin of defeat. The top two doubles teams were played at one point in their matches, but ended up losing the point.

At first doubles, Lanyon and Wang squandered leads of 3-0 and 5-2 before losing with an 8-4 loss. In doubles, the serving side often dominates the play; on this day, unfortunately, the MIT pair lost their second two service games. The second doubles team of Gangulu and Westraaham almost won their opponents, remaining within a point, but lost the last four points to end the first doubles, after the first double match but before the end of the second doubles match.

The match was moved indoors, but none of the MIT players were able to convert their second chance, losing all three doubles matches.

Most of the matches were close, but none of the MIT players were able to convert their second chance. In the doubles, the top pair of Wang and Torres defeated Babson in a difference of one service break. The third doubles team of Liu and Mancino had control of the match in the first point, but ended up losing in a 7-4 takedown loss.

The Engineers hoped to improve their performance in their second point against Babson, but were not able to cut down the margin of defeat, and often looked like they were beaten. The best opportunity came at first singles, where Mancino had possession of the ball in the last point, but was unable to convert it. His opponent also won the first point.

The women’s team had hoped to carry over their momentum to the final match, and although they lost it, they showed strong performances in the end.

With the next game tomorrow at home against Wellesley College, Silva still acknowledged the strength of her team’s upcoming opponent. "We expect a much more difficult game against Wellesley," she said.
