Number of Summer UROPs Down 60%

Summer funding declines dramatically

By David D. Hou

The number of Undergraduate Research Opportunities Program projects could drop by 60 percent compared with last summer, according to the UROP Office.

The decrease, which in large part results from changes last year in the federal rules that govern UROP, will be felt both by projects funded by sponsored research money and by the UROP Office.

The UROP Office has denied direct summer funding to more than 80 of the approximately 250 students who submitted proposals by the April 12 funding deadline, said Debbie H. Shoup, UROP staff associate. The total amount requested was more than double the summer UROP stipend budget, she said.

Departments like biology are finding UROP funding scarce. "We're trying our best to find support for as many students as we can," said Professor of Biology Gene M. Brown, UROP coordinator for the department. "Unfortunately, there isn't enough money to go around."

Professor of Electrical Engineering and Computer Science Richard D. Thornton, RECS UROP coordinator, also expects the number of students it has arrested, said Chief Anne P. Glavin. "We were concerned not only with complying with the Americans with Disabilities Act of 1990, Mackay said. Plan for this semester of the UA on administrativa business," said new UA President Russell S. Light '98. Several election decisions had to be approved, as well as the Finance Board budget decisions.

"Basically, people didn't know what the new constitution was," Light said. While the final draft was not circulated until yesterday, many of the changes had been discussed and voted upon by the UA Council at earlier meetings.

"I'm very afraid that the postponement of the new constitution means that we'll be in another semester of the UA on administrativa business," said new UA President

CPs Now Obey Information Laws

By Christopher L. Felling

As a result of a 1992 clarification of a Department of Education priva cy act, the Campus Police are now required to release the names of students it has arrested. "We were concerned not only with complying with the log law, but also with federal law," she said.

Under that law, known as the Buckley Amendment, DoE states that educational records of students should remain confidential. But in this 1992 Student Press Law Center v. Alexander decision, U.S. District Judge Stanley Harris made it clear that the Buckley Amendment could not be used to justify denial of access to campus crime information.

Questions about Campus Police’s compliance with the law arose following the 1992 theft of an Undergraduate Association election ballot box. The theft, which took place before the amendment had been clarified, resulted in the discovery by The Tech that the Campus Police might in fact not have been abiding by this law.

The Campus Police have been required by Massachusetts state law to maintain a log of names and addresses of people they arrest accessible by the public since 1981. Police log includes names

Committee Evaluates Walker’s Role and Use

Plans Include a Variety of Structural and Functional Improvements

By Stacey E. Blau

The Walker Memorial Strategic Planning Committee is currently developing a “program concept to determine ... the mission” of Walker Memorial, said Director of the Campus Activities Complex Philip J. Walsh, chair of the committee.

The plan will examine both the physical repairs needed and a restructuring of the intern al space for more efficient and diverse use, said Amy T. Mackay ’97, the student representative of East Campus and Senior House.

Suggestions have included proposals for a welliness and fitness center, a performing arts center, a graduate student center, a cultural center, and an international center, Walsh said. "The final plan may incorporate one or two of these recommendations, he said.

Walker still needs "major reconstruction" to repair structural problems, meet safety codes, and comply with the Americans with Disabilities Act of 1990, Mackay said. Plans for this summer include replacing the elevator, converting a storage room into a handicap-accessible restroom, and repairing access ramps on the third floor, Walsh said.

Walker has already undergone several reno

UA Council Rejects New Constitution

UAC size halved by later amendment

By Daniel C. Stevenson

In a meeting more like a barroom brawl than an organized legislative session, the Undergraduate Association Council last night overwhelmingly rejected a constitution that would have implemented changes across the entire organization.

Instead, the council passed an amendment to the current constitution that reduces the size of the body by half, one of the flagship provisions of the defeated constitution (see sidebar, page 11). The new constitution was not passed because "there was too much administrative business" to process at the meeting, said former UAC floor leader and now UA Treasurer Russell S. Light ’98. Several election decisions had to be approved, as well as the Finance Board budget decisions.

"Basically, people didn’t know what the new constitution was," Light said. While the final draft was not circulated until yesterday, many of the changes had been discussed and voted upon by the UA Council at earlier meetings.

"I’m very afraid that the postponement of the new constitution means that we’ll be in another semester of the UA on administrativa business," said new UA President

Chris--Vaitisins Summit Points To Future of U.S.-Russia Relations

THE WASHINGTON POST

Moscow

Cold war strategy had one clear goal: to lessen the chances of global thermonuclear war. In the early years of Russian democracy, U.S.-Russian summits aimed to support Russian reform and cement the U.S.-Russian partnership.

Now, as President Clinton and Russian President Boris Yeltsin prepare to meet here this week, the goals are as murky as the future of U.S.-Russia relations. Analysts here are calling this a "niggling and not-so-niggling issues.

In their eyes, the Soviets continue to share many basic interests on the world scene, analysts here said, and their differences -- unlike in Cold War days -- are not world-threatening. But both countries are battling over the future of Eastern Europe, a clear sense of what comes next.

"The rules of the game for Russian-American relations are really ill-defined," said Michael McFaul, an expert on Russian politics at the Carnegie Moscow Center. "The Russians don't understand the Americans' intentions, the Americans don't understand the Russian intentions, and both sides are doing a pretty bad job of communicat--"

Chirac Celebrates Election Win

Los Angeles Times

A grinning Jacques Chirac, the French president-elect, accepted congratulations from world leaders and chatted easily with outgoing President Francois Mitterrand during V-E Day festivities here Monday.

"It was a touching moment," said Chirac. "Avoid the task of putting together his new government, due to take over sometime next week, certain in the knowledge that his presidential honeymoon may--"

Authorities Consider Charging Nichols in Oklahoma Bombing

By George Lardner and Pierre Thomas

WASHINGTON

Federal authorities are considering charging Terry Lynn Nichols, a close friend of Oklahoma City bombing suspect Timothy James McVeigh, with involvement in last month's terrorist act.

Nichols is being held in Kansas as a material witness in the case, but so far has been accused only of contributing the ammonium nitrate found at a state park where they found "silver bouil--"

The April 19 explosion at the Alfred P. Murrah Federal Building killed 168 people, injured more than 800 others, and shocked the nation. A bugler played taps and--"

"There's an awful lot of stuff pointing to his (Terry Nichols's) being involved."

--law enforcement official

In an interview Monday night on the syndicated TV program "American Journal," Nichols' ex-wife, Lana Padilla, said she gave her husband a package last November with instructions not to open it unless he was on the convoy to the Philippines, where his current wife is from. Padilla, a Las Vegas--"

"Could your ex-husband have robbed a bank?" she was asked on the phone.

"I don't think so," she replied. Padilla said the package with the letters and the keys also contained stock certificates, bonds and a life insurance policy. Neither she nor a Padilla family spokesman could be reached Monday, but she has suggested thathe be to testify before a federal grand jury in Little Rock, as reports newsmen were in a Las Vegas storage firm and found "silver bouil--"

US Plans to Take Japan to WTO
As Trade Controversy Continues

By Clay Chandler

WASHINGTON POST

The Clinton administration is preparing to take a broad complaint against Japan to the World Trade Organization, alluding that excess U.S. trade friction and conflict against Japan, which has promised to halt the United States before the Geneva-based trade panel should Washington impose sanctions on Japanese imports in an effort to open the Japanese auto market.

Administration officials hope that, at a minimum, the prospect of a highly visible WTO inquiry into Japan's restrictions on economic structures would make negotiators in Tokyo think twice about taking their complaints about U.S. sanctions to the WTO. The U.S. Trade Representative, Mickey Kantor, who broke off negotiations with Japanese Trade Minister Ryutaro Hashimoto in Canada last week after five days of haggling, is expected within the next two days which Japanese imports the administration will target for billions of dollars in punitive tariffs.

Japanese-made luxury cars, minivans and auto parts lead the list of products earmarked for sanctions, according to administration officials, who concede that — if considered in isolation — unilateral tariffs on those items would violate WTO rules.

Last year, Japan exported about 200,000 luxury cars, each costing $35,000 or more, out of total exports of 1.64 million vehicles, according to Japanese industry figures.

The administration's grievance against Japan would rely on a relatively obscure provision in WTO rules known as the "nullification and impairment" clause. It would argue that anti-competitive features of Japan's domestic market essentially have "nullified" the benefits of the tariff reductions Japan promised as the price of admission into the global trade body.

If WTO arbitrators concur with the U.S. assessment — and many international trade experts predicted they might — it would be a considerable embarrassment for Japan. Such a decision would enable the United States to inflict harsh trade penalties on Japan without fear of international condemnation and could set a precedent for similar complaints against restrictive trade practices in other Japanese industries.

U.S. Claims Iran Trained Suicide Bombers to Hinder Peace Process

By Robby Wright

LOS ANGELES TIMES

Over the last six months, Iran has escalated its campaign to sabotage the Middle East peace process by training Palestinian suicide bombers who have been increasingly successful in killing Israeli troops, senior U.S. officials say.

The two suicide bombers who carried out an attack that killed 22 Israelis on Jan. 22 in Jerusalem had returned recently from training in Lebanon, according to officials. After their deaths the Iranian government made payments to the families of both men, the officials added.

Other Islamic militants reportedly have been trained in Lebanon and Sudan with the help of Iranian funds and personnel. Their instruction covers bomb-making — and religion.

If true, the charges would represent the first time Iran has been directly linked to specific attacks by extremists attempting to thwart the Sept. 1993 agreement between Israel and the Palestine Liberation Organization on Palestinian self-government.

And even if not, the Clinton administration's conviction that the charges are valid helps explain why President Clinton, who has been portrayed as a "paymaster for terrorism," signed an executive order last week banning all U.S. trade and investment with Iran.

The White House said the action was taken to underscore its opposition to the actions and policies of the government of Iran, particularly its support of international terrorism and its efforts to obtain materials and assistance critical to the development of nuclear weapons.

In addition, U.S. officials said, the administration is protesting Iran's progress in developing chemical weapons and its acquisition of technology that would allow it to manufacture its own medium-range, surface-to-surface Scud missiles within two years.

"There was no precipitating event that led to the sanctions decision. It was the product of a pattern of worrying behavior," an official U.S. official said. Like other officials who spoke about Iran, he asked that his name not be used.

Iran has denied charges that it has trained Palestinian suicide bombers.

Graduate Student Council

Upcoming Meetings:

Applications for GSC Nominations to Institute Committees are due Friday, May 19, 1995. Interviews will be conducted on Tuesday, May 23 and Wednesday, May 24. Contact the GSC office to schedule an interview (x3-2195, Rm. 59-222, gsc-admin@mit). See our other ad for more details!

The GSC is still looking for committee '95-'96 co-chairs.

Applications will be available soon at the GSC office. The deadline for receipt is Friday, May 19, 1995. An interview must be scheduled (contact the GSC office x3-2195, Rm. 50-222, gsc-admin@mit) for Thursday, May 25, 1995.

Re-engineering is here!!!

The GSC is looking for a graduate student member for the re-engineering team of Student Services. This position will have full financial support (stipend and tuition).

If you are interested, please email gsc-admin@mit or stop by one of the committee meetings!

The GSC funding for student groups is happening soon. Contact gsc-treasurer@mit for more details.

Do you need extra commencement tickets or do you have some you wanna dump? Please check out our next Tech ad for an announcement describing the new GSC Commencement Ticket Redistribution Program.

All Graduate Students are invited to all our meetings. All are held at 5:30pm in 50-222 and dinner is served.

Stay informed about all our events! Check out our web page [http://www.mit.edu/activities/gsc/gsc.htm]
Add yourself to our mailing list by typing blanche gsc-students -a username, or send email to gsc-request@mit.

Questions, comments, ideas? Give us a call at 3-2195 or send email to gsc-admin@mit.
The leadership of the Undergraduate Association has reached a new low in its brazen manipulation of its own rules.

Editorial

Yesterday’s unsuccessful attempt to replace the UA constitution has further broken leaders’ trust with the student body. The action would be laughable if it wasn’t so fundamentally a violation of their own constitution.

The motion that was used to replace the constitution read: “Resolved, that the Undergraduate Association Council…make amendments to the UA Constitution without regard to provisions of the previous Constitution.” Any reasonable person, regardless of their background, can see that this is simply smoke-and-mirror legislation being used to hide a flagrant violation of the rules.

What is even more frightening is that this is not the first time the UA has played with the rules. In the middle of the past election, to the consternation of The Tech and the candidates, they abruptly changed the dates and requirements. Thankfully, in the resulting furor, the Judicial Review Board stayed the action and the UA president vetoed it.

But it seems that the UA cronies (including non-student Jason Solinsky ’94) are intent not only on repeating their mistakes, but on making them worse. We would like to know why leaders of the UA did not learn to follow the correct process after their first scandal. MIT undergraduates deserve more from their representatives.

The previous constitution was written by people who knew that their successors might try to make rash changes. They wisely formulated protections, checks, and balances to keep the constitution coherent and viable. But no protection is effective if the officers choose to simply run roughshod over the rules.

Thankfully, the UA recognize this yesterday and demanded that the rules be followed. Furthermore, by their own admission, council members walked into yesterday’s meeting without having seen the text of the new constitution. Rarely has MIT witnessed so great an imporprity as the suspension of UA rules to replace an old constitution with a new document sight unseen. No matter how important the changes are, there is time to make them according to the rules and with proper consideration.

The constitution is the fundamental document of student government. To change it in such a reckless, injudicious, and immature manner is a disgrace that should not be allowed to happen.

Students Should Support the CEG Elves

Column by Eva Moy

DECEMBER 8, 1994

Once upon a time there was a old shoemaker who worked very hard but still remained very poor. One night, he carefully laid out the strips of leather on his work bench and went to bed. The next morning, he awoke with great surprise to find a completed pair of shoes. How did that happen, he wondered. So the shoemaker stayed up one night and saw that there were little elves who took pity on him and performed the task for him.

Every semester, students around the Institute fill out bubble and written comment forms, in praise and complaint of their professors. These forms travel from about 330 classes in the 30 departments (including each division of Course 21, Science, Technology, and Society and the program in Media Arts and Sciences) to a mysterious office, known to them only as W20-403. There the forms are magically transformed into the 200-page Course Evaluation Guide.

Who are these anonymous elves who take on such an odious task? First and foremost, the CEG is a way to review teaching at MIT, to make professors responsible for their actions and to praise those who perform well. We also answer to the facility and the departments because of ethical and financial obligations. Each of those 30 departments expects the CEG to come running to them every year. But there are only 10 of us who do this momentous task. We try our hardest to do things right the first time. Sometimes we mess up, and sometimes we have to say, no we simply have no more of ourselves to give. Can you imagine going into Graphic Arts by yourself at 8 a.m. and making 1,000 copies? Could you, if you were the CEG Elves, fill out the forms and everybody answers no, when some smart elf draws little stick figures on the bubble forms, when somebody chooses to use red pens instead of blue? We simply have no more of ourselves to give.

Imagine this. You received a text message on your cell phone at 4:30 a.m., saying that you are going to be woken up at 8 a.m. and making 1,000 copies, to a mysterious office, known to you only as W20-403. Your parents are asleep. Your roommate is asleep. Some of the rules will be hard to follow. Some of the mistakes will be ridiculous. We will mess up, and sometimes we have to say, no we simply have no more of ourselves to give. Can you imagine going into Graphic Arts by yourself at 8 a.m. and making 1,000 copies? Could you, if you were the CEG Elves, fill out the forms and everybody answers no, when some smart elf draws little stick figures on the bubble forms, when somebody chooses to use red pens instead of blue? We simply have no more of ourselves to give.

Guest Column by Jonathan D. Taylor

In the May 2 issue of The Tech, there was a cartoon depicting Martin Luther King Jr., with the caption: "Martin Luther King in 95," accompanied by a speech bubble that read: "I have a Dream." The cartoon seemed to imply that King was favorable to affirmative action, which is not the case. In his "Letter from Birmingham Jail," King expressed his opposition to affirmative action, stating that it was a "regressive step" and that it would lead to "victims of a new type." The cartoon, however, glosses over this important point and presents King as favoring affirmative action.

Consider the Jan. 1965 Playboy interview with King. In the interview, King was asked if he thought that affirmative action was a good idea. He responded: "I do not believe that affirmative action is a good idea. I believe that affirmative action is a necessary evil." He went on to explain that affirmative action was necessary because of the history of racial discrimination in this country, but that it should not be the ultimate goal of the civil rights movement. He believed that the ultimate goal should be the creation of a society in which everyone had equal access to opportunities, regardless of their race.

The cartoon, "Martin Luther King in 95," is a prime example of how the media can fail to accurately represent historical figures and events. It is important to remember that King's views on affirmative action were not always the same, and that the cartoon fails to capture this complexity.

Sincerely,
Jonathan D. Taylor

I went to Steer Roast the other night.

I had to mud wrestle with Cinantro Boy.

Commander Carinander was quite mad when his "trusty" sidekick lost.

As I left, Cinantro Boy hit me with a few bottles of salsa.

Great Fennel!

Today some new guy drew some Jim's Journals.

He kept giving the strip a plot.

I guess that's why the FBI came and dragged him away.

It was funny watching him in the lineup with the new dorm housemasters.

Your diploma can get you behind the wheel of the sports car for today’s world.

With four tough years of school behind you, things are about to get easy. Well, at least when it comes to getting a new set of wheels. Just show proof of a job, confirm you'll be a college grad within 90 days (four years from an accredited U.S. college or university) and you can leave school behind in a hot new Nissan 200SX.* Affordable, powerful, and built for four-passenger comfort, the 200SX is the one sports coupe built for you and your friends. And with a 115hp engine, front-wheel drive and rack-and-pinion steering, the ride isn't only comfortable, it's exhilarating. So visit your Nissan showroom for a deal on the new 200SX that includes no payments for the first 90 days. Or to take advantage of special lease prices now available on selected Nissan cars and trucks. Either way, you'll drive away with the best present any graduate could ask for.

*Nissan Motor Corporation U.S.A. Smart people always read the fine print. And they always wear their seat belts.*
Letters To The Editor

“More Is Better” Oversimplifies the Immigration Issue

The letter by Christopher P. Hanson '80 [“Immigrants Do Create Jobs,” May 5] points out that studies have shown immigrants create jobs for the economy. He then makes the error of extrapolating these results into the illegal immigrant issue — that if some immigration is good, a lot of immigration must be better.

If we were to plot the economic effect of immigrants versus number of immigrants admitted each year, we would find (as the studies have shown) that in small numbers they produce a net benefit to the economy. Say we were to admit 100 million immigrants this year — it would throw our economic infrastructure into chaos. Connect these two points and somewhere in between there is a point where additional immigration starts to become bad for the economy.

The question is not whether immigration is good or bad — it can be both. The questions are: At what point does immigration become bad? Are we able to determine this point accurately enough to make good immigration policy? Can we do so in an unbiased manner? Have we exceeded this point? And if so, to what lengths should we go to discourage immigration beyond this point (i.e., illegal immigration)?

I don’t know the answers to these questions. But pointing to studies that show our current limited immigration creates jobs oversimplifies the issue.

MITSO Review Does The Tech a Disservice

I recently came across the review of the concert given by the MIT Symphony Orchestra on March 10 [“MIT Symphony disappoints in group supporting role,” March 14]. I hope it is not too late to request someone other than Thomas Chen to review the orchestra. He did a real disservice to the credibility of The Tech in writing his last review.

If Chen believes that the violin sections “sound like someone taking a rake and dragging it over a chalkboard,” then why does he bother going to the concerts? Actually, I would like to ask if he really went to this concert. Contrary to his snobbish, derogatory comments, the strings played in tune and with good tone. The orchestra played well as an ensemble. Granted, there were mistakes; this is an amateur orchestra, composed mostly of very busy students. These mistakes aside, the Tchaikovsky was very well received by the audience.

Strangers approached members of the orchestra after the concert to praise the performance of the Tchaikovsky. Professional musicians told [Conductor David] Epstein that it was a remarkably fine performance. If the performance was truly as horrible as Chen would lead one to believe, then why would audience members say such things?

In addition to writing statements that verge on libel, Chen writes laughably bad prose. His description of the Tchaikovsky seems to come from liner notes, and extremely poor ones at that. There are technical flaws as well. He uses tautologies, such as “a popular favorite.” I have never heard of an unpopular favorite.

“Bassoon” is spelled, as one can see, with not one “s,” but two. Someone using such superior tones in his writing ought to take care that the writing itself is impeccable.

I realize that this review was an individual’s opinion, but Chen seems to have his objective reviewing abilities clouded by prejudices. In the interest of fair reporting, The Tech should end someone else to the performance of the German Requiem. Chen does not seem up to the task.

MIT music groups perform a heartfelt Requiem

MIT PRESENTS
THE BRUCKNER'S REQUIEM
MIT Concert Choir and Chamber Chorus, the MIT Symphony Orchestra.
John Oliver, conductor.
Soloists: Kendra Colton, soprano; Kenneth Goodson, baritone.
Kresge Auditorium.
May 5, 8 p.m.
By Craig K. Chang

The Englishman Who Went Up a Hill
But Came Down a Mountain
Written and directed by Christopher Monger.
Starring Hugh O'Connor, Tara Fitzgerald and Colm Meaney.

The Englishman Who Went Up a Hill but Came Down a Mountain provides an excellent look at provincial life in Wales during World War I. While the town's young men are digging trenches in France and Belgium, their fathers spend their time drinking beer in the local pub and making bets about the height of their local mountain.

Although the locals are excited by the prospect of seeing their tiny town on one of Her Majesty's official maps, they become out-raged when Anson announces that their beloved Fillan Garoo is but a 984-foot hill. Anson's voice projected boldness with which to compete with the intensity of the choral "Grave, where is the dust of our fathers?"

The precious map-makers in town until the hill has reached its full size. The scrappy villagers thus take it upon themselves to turn nearly every male villager into a character in his own right. In the local pub, every bucketful of dirt that sheds light on the exhortations of previous stage movements, an increasing sense of revelation blossomed from the grim march of the second movement. The MITSO and Concert Choir themselves seemed to extend from these dichotomies - drive. Briefly hushed the audience, and following the climax queries, an increasing sense of revelation blossomed usually forecast disaster. Even through the fully aware of the difficulties beforehand, the performers expressed it, the Requiem seemed to embody something of light that passes through darkness. Sweety innocent soprano shattered audiences' expectations about the height of their local mountain. The narrator too is influenced to lend the film a nostalgic touch. When the camera zeroes in on one person in particular, the narrator will utter a few lines about the person. In this way viewers are introduced to the bartender, the preacher, the railroad ticket-taker, the blacksmith, the neurological warfare casualty, and the village's ideological "beached" idols. Every bucketful of dirt is important, the film seems to say, and every carrier is playing a crucial role in the establishment of Fillan Garoo as an official mountain. A comical subplot develops around the villagers' attempts to keep the English map-makers in town until the hill has reached its critical level. The villagers do everything they can think of, from slashing tires and dis- Pacating "teched" idiots. Ballet's reworking of Taming of the Shrew succeeds

TAMING OF THE SHREW
Boston Ballet
Choreographed by John Cranko
Directed by Bruce Marks
Music conducted by Jonathan McPhee.
At the Wang Center through May 21.

During the night, the younger sister comes to see that Lucrentio is not always what they appear to be in matters of the heart. The suitors set out to "tame" her and refuse to let her go, but once she sees that he is persistent, Katherine believes his intentions are true, and they decide to marry.

Butt Trumpet performs as the opening act rather humorous take on the Bard. Their latest masterpie<;e is Beyond detection. In both performances, Butt Trumpet played again on Saturday at "Dead Dogs," whose subject matter is obvious. Their latest album, Butt Trumpet is beyond recognition.

Butt Trumpet consists of Bianca Butthole, lead singer and occasional bassist, Blare N. Bitch, lead guitar and backing vocals, Needles, bass, backing vocals, and occasional lead vocals, and Jerry Gelfand, who plays the drums and occasionally sings. The lead singer of Primitive Enema, Thom Bone, quit the band because he didn't want to be "tamed" by the music industry.

Butt Trumpet performed as the opening act for Sam Black Church at Avalon on Friday. How they became associated with a horror band like Sam Black Church is beyond comprehension. That day also happened to be Bianca Butthole's birthday. As part of the show's costume, she brought a cake on to the stage and sang to her.

Butt Trumpet may be reached at btrumpet@live.com.

Though the sound reaches back to the Sex Pistols, Butt Trumpet maintains its own comic/social identity.

Butt Trumpet performed Primitive Enema, their first big release, which gained them an album coming out in a few months — they plan to take their time on it and produce it in a playful manner. As a guiding principle, lead singer Bianca Butthole says she wishes people would "take the cork out and live a little." With a motto like that, what can she do but succeed?

Residents roast "The Steer," the traditional center of Senior House's annual Steer Roast celebration, held this weekend.

The Community needs to know what is going on, but the identities of [victims] is not critical," Glavin said. Most of the arrests on campus do not involve members of the MIT community, and arrests involving students are even more scarce, she said.

When asked about The Tech's May 2 publication of the name of a student who was arrested, Glavin said, "Under the circumstances I don't think that it was the best thing to do. I wish the name had not been published."

"We feel it is our responsibility as journalists to provide information like the Public Log with as much complete and practical content as possible," said Daniel C. Stevenson '97, editor in chief of The Tech. "The names and addresses of all persons arrested by the CPs, including students, are relevant information that the public has both a right and a need to know."

"I think the readers benefit from The Tech providing information about Campus Police arrests, be it as minimal as names and addresses in the log or as much as a full article," Stevenson said.

The Campus Police maintain that because it is a private institution, its internal records -- including incident reports -- do not fall under the public records law, Glavin said.

Currently, incidents involving complaints between members of the community are handled internally by the Campus Police, Glavin said. The complainant is informed of his or her rights to have the dispute settled internally or through a court hearing, she said.

If the complaint is settled internally, then there is no public record of the incident, Glavin said. However, if the complainant wishes to press charges, a complaint is initiated in courts of the Commonwealth of Massachusetts, she said.

The complainant is informed of his or her rights to have the dispute settled internally or through a court hearing, she said.

Once a complaint enters court it is handled through the district attorney's office and becomes a matter of public record accessible through the courts, Glavin said. Cases being heard by the judicial system require that police records relating to the defendant be held in confidentiality by the Criminal Offenders Record Information Law, she said.

SEEKING C++ WINDOWS PROGRAMMER

We are a startup commercializing 3D Printing, an exciting new technology that we have licensed from MIT which allows for the rapid creation of 3D physical prototypes directly from a CAD model.

We need a user-friendly graphical interface between a CAD system and our machine which must be fun, easy to use, and idiot-proof. This interface will be critical to our product's consumer acceptance.

We are seeking a creative C++ PC Windows (3.1, 95 or NT) programmer with experience creating high-quality GUI's to work either part-time on a project basis or full time. We will need to port this software to Unix platforms and thus value (but don't require) experience in these platforms as well.

Please send a resume or letter to: Z Corporation

"For purposes of determining representation, each dormitory with fewer than 250 residents shall be entitled to one representative, each dormitory with more than 250 residents shall be entitled to two representatives, each Class Council shall be entitled to two representatives, all undergraduates not in a Class Council shall be entitled to two representatives, and the Interfraternity Council shall be entitled to a number of representatives proportional to the number of representatives from the dormitories and the number of members of the IFC..."
An Open Letter From the Tech Catholic Community:

There are many things at MIT that we like to take for granted. The eventual spring thaw and first warm day spent lounging on the Kresge Oval, an available Athena terminal on the night before a term paper is due, the high green and gray walls of the Infinite Corridor, standing strong and solid against the stresses of time. These things give us solace. They give us warmth and security amidst social turmoil and academic anxiety. At first somewhat strange and foreboding, they are the things that come to make MIT our home away from home. They become fixtures in our lives, both passive witnesses of and active participants in the progress we make as we strive to become more complete and enlightened human beings.

Yet sometimes, we know, these fixtures must take leave of us. These things we like to take for granted, for the sake of their own need to grow and change, they must part our company. And when they do, we owe it to say a proper good-bye...

So we say to you Fr. Bernard J. Campbell; thank you, simply, for being a fixture in our lives. For nine years you were not only our priest, but you were our teacher, our advisor, our friend. You were a voice of sanity in the murmur of MIT madness. You were a beacon of hope, pointing us towards a greater aspiration, a greater cause, and a greater love to which we could devote our personal and professional lives. You have fed us, healed us, and understood us. You have felt our joy, and have shared our pain. You have forever affected our lives, adding new dimension and depth to our intellects, prodding us along through our sometimes frightening journeys to achieve spiritual grace. Thank you, Father, thank you. For your years of service, for your years of friendship. You will be missed.

Please come and celebrate our Farewell Mass and Breakfast in honor of Fr. Bernard J. Campbell, MIT Catholic Chaplain

La Sala De Puerto Rico
Editor's note: As of May 2, the names and addresses of people arrested by the Cambridge Police are being included in the Police Log.

The following incidents were reported to the Cambridge Police between April 28 and May 4:

April 28: Bldg. 35, wallet stolen in Bldg. 37 (discarded in dumpster) in campus back area; Bldg. 28, backpack stolen, $50; Bldg. E40, Apple Powerbook, $3,000; Bldg. E52, pocketbook stolen, $180; Kresge Auditorium, cash stolen from a briefcase, $110; DuPont Gymnasium, backpack stolen, $100.

April 29: Bldg. 7, sculpture and posters stolen, $400, room cleared.

April 30: Bldg. 45 Lot, 1990 Toyota truck; Ashdown, harassment; Bldg. E25, David Reynolds (no residence) arrested for trespassing; West Garage, motorcycle storage area broken into.

May 1: Bldg. 18, book bag and contents stolen, value unknown; Bldg. 20A, pocketbook stolen, $25; Bldg. 3, slide projector stolen, $100; Bldg. 7, cash stolen from a wallet; $110; West Garage, motorcycle stolen; removed in Somerville; Donahue, cash stolen from locker room, $35; Ambert Street, side view mirrors stolen from a Toyota.

May 2: East Garage, spoiler stolen from an Acura; Bldg. E15, leather bag stolen; Bldg. 110, model bag and contents, requested in lost and found.

May 3: Bldg. WW15, stamps stolen, $640; Bldg. 11, two chairs stolen, $200; Student Center, 1) Rajai Mahnol, of 20 River Street, Cambridge, arrested for shoplifting 2) Steven Pezzone, of Shadudek Shelter, Jamaica Plain, arrested for receiving stolen property; Bldg. E40, wallet stolen and recovered in Kendall Square; Bldg. 13 composed, attempted larceny of a bicycle.

May 4: Ashdown House, room broken into, nothing missing.

The Office of UA Secretary General would have been eliminated by the new document. The UAS's primary responsibilities concern keeping records of meetings and doing clerical work.

"The UAS was a useless position that did nothing," Muh said. The council already has a secretary, and archival duties would be delegated to the various UA officers.

The frequency of UAC meetings, strictly regulated under the current constitution, would have been less restricted in the new document. Currently, the council must meet no more than two times per month but with a minimum of 10 days between meetings.

The new constitution would have required the UAC to meet at least once 30 days, but put no maximum limits on the frequency.

The UAP currently has no vote on UAC or Executive; in the document, the UAP would be a voting member of both.

"As it stands now, the president has no legislative power whatsoever," Muh said. However, "the UAP is the person who gets all the flak, support, and blame for the legislative items which are passed," she said. "We felt that person should have some legislative power."

Another departure from the separation of executive, legislative, and judicial powers is shown in proposed changes to the judicial review board, the judicial organization of the UA concerned with interpreting the governing documents and resolving disputes between bodies of the UA.

Judicial board decisions, currently only able to be overturned by a constitutional amendment, would be able to be overturned by a three-fourths vote of the UAC.

The board would be expanded from three to five members, in part, because of past problems with members leaving, Muh said.

Muh said she plans to continue work on the new constitution and have something for the UAC to act on first thing in the fall. The ideas in the proposed constitution have all been vetted on beforehand, Muh said. "People hadn't seen them presented in one big format" and were "very surprised," Muh said. "I'm committed to passing something that will make the UA more effective."

The rejected motion to adopt the new constitution at the same meeting it was introduced was itself in violation of the current constitution. To circumvent that, UA Council Executive Committee voted to make the new constitution allowing the UA to vote on a new constitution at that specific meeting.

Shang-Lin Chuang and Ven-Kaisch Satish contributed to "the reporting of this story."

Brunelli's Pitching Lifts MIT Over Curry

Baseball, from Page 16

the first inning. But the Engineers were able to put together a three-hit, two-run rally in the fourth. Duane Stevens '98 and Nicky Botra each faced RBI singles to tie the game at 2.

After being retired in order in the fifth, MIT came back and scored three more runs in the sixth inning to take a 5-2 lead. Katz and Lepard led off the inning with back-to-back singles, putting men at first and third with no out. The next batter, Jay Grabeklis '95, fought off several pitches and battled to a full count before ripping a line drive single to left to bring in the go-ahead run. The Engineers added two more runs on an RBI single by Botra and an RBI double by Jeff Kyle.

Meanwhile, Brunelli was outstanding through the middle innings, giving up just one hit in the fourth through eighth innings.

The Engineers went on to add an insurance run in the bottom of the eighth on an RBI single by Grabeklis. Curry College threatened in the top of the ninth, scoring twice on back-to-back pinch-hit triples and a sacrifice fly, but Brunelli was able to retire the visitors' clean-up hitter, Mike Maruso, to end the game.

The varsity heavyweight crew suffered a disappointing loss to Drexel University last Sunday. The 6-3 loss on a rainy day in the Cooper Cup has not won the race for several years, and some rowers hoped that even if this was not the year, that at least MIT would be in the thick of the race.

But they were not. The race was rowed in a greasy course and that strengthened through the day. While all but one boat fell off the start, with MIT holding a slight edge, Dartmouth and Wisconsin very quickly pulled even and began to pull away from MIT.

MIT rowed faster than the other two teams. Through the first 500 meters of the race, Dartmouth and Wisconsin were neck and neck right next to each other, while MIT was falling behind, and in a lane more than 35 feet away from the other crews.

The distance proved to be a problem. "It's difficult to maintain intensity when you lose all contact with other crews," said Neeraj Gupta '96, last year's varsity coxswain. "In very quickly pulled even and should have raced it a lot better."

MIT continued to fall away throughout the rest of the race. They mounted a charge over the last 500 meters, but it was too little, too late, however, belonged to Dartmouth and its sprint. Dartmouth's eight repeated several times in the stroke ratings and raced through Wisconsin to take a six-seat lead over the finish line at 6:10.2. Wisconsin finished with 6:12.5; MIT with 6:22.1.

"I was quite disappointed," said Coach Gordon Hamilton. "I think we were in this race pretty flat, and it showed down."

JV fares better

The second boat's race was far more exciting out on the course when the crews arrived. It ended up a much better result. While Wisconsin handily won the race, MIT came second overall of the tournament.

Off the start, all boats were even. They scrapped their way through the first 700 meters without anyone able to gain an advantage. The lead changed repeatedly, with the lead crew never more than two seats in front.

From the 700-meter mark to the midpoint at the Harvard Bridge, MIT couldn't catch up to Dartmouth and Wisconsin over the other two boats. At that point, Dartmouth and Wisconsin began to pull away from Wisconsin. But in an exciting finale, MIT stopped Dartmouth's move and crossed the line at 6:12.2, 1.9 seconds over Dartmouth and 6.5 behind Wisconsin.

The victory has a significant impact on the second boat's seeding at the Eastern Sprints. MIT will rank ahead of Dartmouth and the crews below it. With the second-place finish they become part of the next highest tier of competitors, and will have a much stronger chance of advancing to the finals.

Freshmen collide

The freshmen lost to a strong Wisconsin crew, but easily beat Cornell with the excitement of a collision. The wind, which had strengthened through the day, became a significant factor by 11 a.m. Just before the start, four MIT boats went off course. Within five strokes MIT and Wisconsin collided, and freshmen referee recalled the race and ran it again.

In the second attempt, Wisconsin jumped out to an early lead. MIT and Dartmouth both made changes, Wisconsin easily held off to a half-length lead after 1000 meters, when free of Dartmouth and held their open water lead to the finish line. MIT closed the gap to 4.8 seconds over Dartmouth and 12.1 seconds behind Wisconsin.

Dartmouth were there some good parts of that race, but there are still a lot of technical issues to be worked out. Said Coach Stu Schull '96.

The second freshmen race Dartmouth's second freshman and the MIT third lightweight freshman; the heavyweight boat lost to Dartmouth and beat 32 seconds and beat the lightweight boat.

Men's Gymnastics Team Competes at Nationals, Finishes in Sixth Place

By David Golombeck

The men's gymnastics team finished off an excellent season by placing sixth at Nationals, held in Denton, Texas. The best division II, III, and non-scholarship division I schools in the country were there to compete, as well as club teams from around the country. Notable teams at the meet included UCLA, Arizona State, William and Mary, and Air Force Academy. Individuals such as Steve McGinn (UCLA) from the US National Team and Sinataya Nuez (Miami-Dade) from the Cuban National Team highlighted the meet with impressive performances.

Despite the tough scoring conditions at the national level, the MIT team again managed to break its five-man team record, bringing the total point count to 216 in the under scoring rules. Rob Cooper '97 placed 11th in all-around competition, followed closely by Chris '97 in 12th. Van '97 had an excellent meet, setting personal bests on the four events he competed in. David Golombeck '98 also had a good meet, setting two personal bests. MIT got off to a strong start in the meet on the va. Ellie Johnston '97 in

Baseball Loses Final Home Games

By Thomas Kettler and Farhan Zaidi

The baseball team finished its season on a somber note Saturday by losing both doubleheaders to the Sulfur Springs University Rams, 6-2 and 4-2. These losses made the team 7-21 overall and 3-9 in the Eastern Collegiate Athletic Conference.

The first game started quickly as both teams scored in the first inning. The Engineers tied the score in the bottom half when right fielder Baldeja Meyer '98 led off with a single. After one out, he advanced to second on a grounder and scored on a triple by DH Rob Lepard '95.

Sulfur scored two more runs in the second. After one out, Mike De Benedicts singled. After that, Ramirez Nazrill singled and both scored on Chris Anderson's triple. Neither team scored runs until the sixth when the Rams got three insurance runs. Then, Mark Kelly hit a single and advanced to second on a passed ball by batter catcher Ed Kohler '95. He scored on De Benedicts' double, with De Benedicts advancing to third on a grounder to the second baseman.

After a strikeout, MIT could have avoided any more bloodletting on Marc Swirbalus' grounder to the left, and pulled almost even. But in the sixth, it was the game-winning hit. Brunelli went the full nine innings, striking out 13 and allowing just six hits.

Brunelli struck out, gettin 2-0 in the top of the second inning. After Brunelli issued back-to-back walks to load the bases, with one out, Ed Harley stroked a base hit, bringing in two runs. Brunelli was then able to prevent any further damage by retiring the next two batters on a strikeout and a lazy pop out to first base.

Brunelli pitcher Carl Bussey seemed to be in a rhythm in the early innings, at one point retiring seven straight batters before giving up a single to Katz '95 in the

Volleyball nets were set up across most of Briggs Field this weekend as MIT played host to Siphon, an amateur three-on-three tournament that has absorbed the traditional yearly Beaver ball tourney.
