Mass. Ave. Accident Injures MIT Student
By Stacy E. Blau

Joseph A. Croswell '99 was released from Massachusetts General Hospital Wednesday where he had remained for several days to recover from injuries he sustained Saturday on Massachusetts Avenue.

Croswell suffered injuries to his neck, chest, and right hand, including a compound fracture to his collar bone, a broken rib on his right side, and a torn tendon in his right hand, Croswell said. He underwent surgery following the accident to repair the broken collar bone and had pins placed in his rib and hand.

Croswell, who lives at Phi Sigma Kappa, was headed home south on Massachusetts Avenue at about 1:05 p.m. Saturday afternoon after a review session. He was traveling east along the Harvard Bridge when a truck hit him.

"I'm not entirely sure of what happened in the accident," he said. "I have a very limited memory of it."

Croswell was lying in the middle of the road when Campus Police arrived to administer first aid, said Chief of Police Glavin said.

Because of the serious nature of Croswell's injuries, officers called a paramedic unit which in turn transported him to MGH.

Amherst corner is a problem
The corner at Massachusetts Avenue and Amherst Alley by Ashdown House has been a continued source of problems and accidents, Glavin said.

"That's been a difficult section," Glavin said. "Sometimes you have a situation with people running lights."

The intersection falls under the jurisdiction of the Cambridge Police Department, which is currently investigating options to stop up enforcement and curb problems there. "The city traffic unit is looking at it," Glavin said.

Ideas under consideration include delaying the light at the intersection when it turns from green to red, slow down cars or installing a left turn signal, said Harold Murphy, superintendent of the operations division of the Cambridge Police Department.

New University Park Construction To Feature Hotel and Star Market
By Douglas E. Heimburger

Construction on a $45 million development project at University Park at MIT is set to begin next month.

The project will add a hotel, a 1,000-car parking garage, a Star Market, and 100,000 square feet of office space to the University Park development.

Forest City Development, which is developing the property under a long-term lease from MIT, is currently soliciting construction companies for the project, said Jonathan Ginsberg, director of government and community relations for Forest City.

The office building and the Star Market should open December 1997, with the hotel following in mid-1998, he said.

Hotel name will feature MIT
The four-star, 200-room hotel, which will be located at 20 Sidney Street, will be managed by DoubleTree Hotels for Forest City. But its name will not involve "Doubletree."

"It'll have a unique name featuring MIT," Ginsberg said.

The hotel will have meeting rooms for 85 to 100 people and a roof garden but it will not have larger conference rooms. "It won't be a place for a wedding," Ginsberg said.

The second floor of the hotel building has been reserved for a Star Market. The lease for the space should be signed next week, Ginsberg said.

The Star Market will feature prepared foods and will cater specifically to house a Starbuck's Cafe.

Star Market officials could not be reached for comment.

Attached to the 20 Sidney Street building will be a 1,000-car parking garage. The third floor of the garage will connect the Star Market, Ginsberg said. In addition, customers will be able to reach the Star Development, Page 11

The major topics of discussion were the reasons for the ban and apparent inconsistencies in the implementation of the policies.

Chief of Police Anne P. Glavin said that the layout of Walker made proper security for a metal detector party impossible. "It would take a small army of Campus Police to do these events," she said.

The number of officers required to guard all the entrances was too large, especially since there are often other events going on around campus at the same time, Glavin said.

Along with the basic complexity of Walker's architecture, with balconies and an elevator accessible from the main hall, this makes the required CP detachment prohibitive, she said.

Director of the Campus Activities Complex Philip J. Walsh said that a long-term solution to the problem might involve a renovation of the building. However, any renovation would not occur for several years at least, he said.

Policy has been inconsistent
President of the Association of Student Activities Douglas K. Wyatt G. attacked the implementation of the metal detector policy as inconsistent. "Some events have gotten special exceptions," he said.

Glavin agreed that some exceptions had been made. However, she defended the decisions to allow the Greek Week Ball and other activities at Walker, even though they apparently fell under the metal detector policy.

Exceptions to the policy were granted on a case-by-case basis, for "tamer events that haven't got the large following," she said. The kind of people attracted is important to the decision, she said. Ballroom Particles, Page 16

Designer Paul Rand Speaks at Media Lab
By Saul Blumenthal

"I try to make art out of commercial stuff," Paul Rand responded when he was asked to describe what he does. And when this "commercial stuff" includes companies like IBM, Westernhouse, Next, and The Limited, it is readily obvious that we're not dealing with just any artist.

It would probably be hard to find someone who is not familiar with the works of Rand, one of the most influential contemporary graphic designers. His designs have defined the corporate identities of countless companies throughout the world, and yesterday morning, a standing-only crowd at the Media Laboratory got an opportunity to learn more about the individual behind the art.

The talk, entitled "The Language of Art," was sponsored by the Aesthetics and Computation Group of the Media Lab. It was moderated by Assistant Professor of Media Arts and Sciences John Maeda, who heads up the group.

Chicago Cardinal Bernardin, 69, Dies From Cancer

Cardinal Joseph L. Bernardin of Chicago, whose gentle manner, passion for conciliation, and courage in the face of death touched the lives of ordinary Roman Catholics and world leaders alike, died Thursday in Northbrook, Ill. He was 69.

The senior active cardinal in the United States and one of the most prominent religious figures in the nation, Bernardin died at his residence surrounded by family and friends.

Among the callers offering prayers and final goodbyes were Pope John Paul II, President Clinton, and Vice President Gore. "He was at once both a prince of the church exercising a gifted role of leadership, and a parish priest concerned with the hopes and anxieties of each parishioner," said Cardinal Roger M. Mahony of Los Angeles. "History will record Cardinal Bernardin as our nation's premier voice in the moral and ethical dimension of our time."

Bernardin's death was anticipated since he disclosed last August he had terminal pancreatic cancer. In a message to Chicago's 2.5 million Catholics on the day of his death, Pope John Paul II said it was Bernardin's death "with great sadness" and "spoke of "the cardinal's noble soul" and his "dignity and hope in the face of the mystery of suffering and death.""

Court Upholds Baltimore's Bans On Alcohol, Tobacco Billboards

A federal appeals court has upheld Baltimore's bans on billboards advertising alcohol in most parts of the city, a ruling that could significantly bolster the Food and Drug Administration's efforts to keep alcohol and cigarette advertising out of view.

The ruling, issued Thursday in a 2-to-1 vote Wednesday, upheld the 1994 statutes -- the most restrictive of their kind in the country. The ruling said that alcoholic and tobacco advertising ads except on property adjacent to an interstate highway, in heavy industrial zones and at sports stadiums.

The appeals court said the city's ordinances unreasonably restrict advertising and could, in some cases, unreasonably restrict free speech and advertising in order to protect children from being exposed to this type of advertising.

Assistant Attorney General Frank W. Hurger said the Justice Department might not appeal the 2-to-1 ruling on the brief on behalf of the了吧 said, the ruling's impact extended beyond the Baltimore case. This "will further strengthen the ability of governments and governmental entities, such as the FDA, to keep alcohol and cigarette advertising away from kids," he said.

Clinton Expected to Announce U.S. Will Leave Troops in Bosnia

President Clinton Thursday prepared to announce U.S. willingness to participate in a new international peacekeeping force in Bosnia, a step that would reverse a longstanding commitment to keep U.S. troops home from the Balkans within approximately one year.

At a White House meeting with Clinton on Thursday evening, the president's top foreign policy advisers laid out the case for ordering the U.S. 4th Infantry Division to Beavercreek, Ohio, to deploy there by the end of September, just as the once-feared Soviet Union collapsed.

The meeting, according to one official who described the process of consultations with Congress on the shape of a new peacekeeping force.

White House spokesman Michael McCurry said the president still had a few questions that he wanted his advisers to address regarding the shape of the proposed mission. He noted, however, officials tentatively scheduled a presidential appearance in the White House briefing room for 10:30 a.m. Friday to outline the president's plans for the mission as the administration looks toward the upcoming U.S. national security strategy and the case for a new international peacekeeping force.

Weather Snow Now?

An embarrasing incident that spawned a furious bureaucratic tussle between the FBI and Justice Department may have cost the Clinton administration agreed Thursday to drop espionage charges against a Soviet defector because he was arrested in New York last month.

A federal appeals court thursday approved the Clinton administration's agreement to drop espionage charges against a Soviet defector because he was arrested in New York last month.

According to the FBI, the ex-spy was offered a plea deal to plead guilty and cooperate with investigators. The deal was rejected.

U.S. Drops Espionage Charges Against Forging Soviet Agent

By James Riener

WASHINGTON TIMES

In an embarrassment incident that prompted the FBI to re-examine its spying operations in the United States, the Justice Department agreed to drop espionage charges against a Russian defector who had been arrested in New York City.

The Justice Department agreed to drop the espionage charges against the defector, Vladimira Galkin, who had been arrested in New York City.

Galkin, 40, was the subject of an FBI investigation into his alleged involvement in the theft of classified information from the U.S. government.

The Justice Department said it had decided not to pursue charges against Galkin because there was insufficient evidence to prove his guilt.

The move, which came after a year-long investigation, was revealed in a statement from the Justice Department.

The statement said the department had determined that there was not enough evidence to support the charges.

The Justice Department had been investigating Galkin since 1992, when he was arrested at an airport in the United States.

Galkin had been working for the FBI and had been charged with stealing classified information.

The FBI had initially planned to charge Galkin with espionage, but later decided not to.

The FBI had also considered charging Galkin with conspiracy to commit espionage, but that charge was dropped when the FBI realized there was not enough evidence to support it.

The Justice Department's decision to drop the charges was made after a year-long investigation into Galkin's activities.

The investigation had prompted the FBI to re-examine its espionage operations in the United States.

The FBI had initially planned to charge Galkin with espionage, but later decided not to.

The FBI had also considered charging Galkin with conspiracy to commit espionage, but that charge was dropped when the FBI realized there was not enough evidence to support it.

The investigation had prompted the FBI to re-examine its espionage operations in the United States.
India Crash Brings Attention To Dated Air Traffic System
By Barry Bearak
L A N G U A G E:

NEW YORK TIMES

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

The Army has chosen to file charges against a captain accused of raping, forwarded to those branches.

One complaint each against them include blacks and whites.

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

When you are working on just a single individual in the United States and narrowing the search down to a small town, noted Kurtz, who is assistant clinical director of the Washington Post.

A total of 1,205 randomly selected adults who said they voted on Nov. 5 were interviewed Nov.-10 for this survey, which included questions asked in a companion poll in September among registered voters who said they were "certain" to cast ballots in the November elections. The margin of error was plus or minus 3 percentage points.

Speaking to reporters on the front lawn of his home and surround- ed by family members, Doman, a nine-term representative, spoke of his opponents, Doman all but conceded the race.

Descent Theory of Birds From Dinosaurs Being Challenged
By Chris Kras

To most modern paleontologists, fierce Tyrannosaurus Rex looks like the quintessential example of evolution's most famous theory: "Descent with modification." That is, they see to many unnatural similarities among living things that would have come to believe birds descended from dinosaurs.

But controversial new research is challenging that view. In Friday's edition of the journal Nature, a team of scientists described a series of fossils from northeast China that may be part of an evolutionary link between dinosaurs and birds.

Some foreign pilots say they have had no problems flying in India, however, refer to the airspace here as "the black hole" and bemoan the low quality of communication service that they receive.

There's a whole host of reasons they will be able to devote to the project, he added.

Middle Easterners are among the world's most avid air travelers. "I was learning about altitude, direction, and speed. But you didn't worry too much, there was a chance of a midair collision practically every time you got airborne," said a Gulf pilot.

After hundreds of millions of dollars in campaign spending, countless news stories, three nationally televised debates, and hours of advertising on television and radio, Americans knew no more about Bob Dole and the issues to make an informed choice on Election Day.

Down by nearly 1,000 votes, Doman all but conceded the race Wednesday morning as his opponent fielded congratulatory calls from the White House. "It's not that I am going to capitalize on this. The sky's the limit," he said.

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

While the president of the NAACP branch in Harford County, where Aberdeen Proving Ground is located, held a telephone interview that the three accused instructors were being used as racial scapegoats.

Grant said sexual misconduct between black soldiers and civilians is more widespread at Aberdeen, but the Army has chosen to file charges against them include blacks and whites.

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

Historically, when black men are involved with white women, the black people have been wrongly accused.

At least one complaint each about the Navy and Air Force were forwarded to those branches.

It is an exciting moment, but it is really only a beginning," said Dr. Wyman Chandra, the company's top scientist.

President Kweisi Mfume, a former congressman who said he had to leave office because of "a personal tragedy" and bemoan the low quality of advertising on television and radio, Americans knew no more about Bob Dole and the issues to make an informed choice on Election Day.

Most Americans know about public affairs.

The Army has filed criminal charges against a captain accused of raping, forwarded to those branches.

We are eager to say I told you so, making India's air traffic system appear increasingly ripe for a major dodging ball.

Contributing Editors: Gibor Casnay, G. Thomas R. Kobb '94 has commented that the endowment is too small for an institution of MIT's caliber. I am not at all surprised, because personally, I have no intention of giving MIT one red cent until I see some sign that undergraduate education is looked upon as just as valuable and just as important as the graduate education. A good start would be to grant tenure to professors based on their teaching merits, not just their research prowess. But it needs to go deeper than that. Professors and their departments need to wake up and take stock of whether their policies and actions are merely expedient, or whether they are in the very best interests of the students and the world that those students will one day help to shape.

When I was a freshman, President Charles M. Vest assured us that we weren't at MIT by mistake — we weren't the only students feeling inadequate, the only ones who thought that they have somehow slipped by the admissions screen that筛 all those "smart people, but should have rejected us. Well, that's probably true — the admissions office didn't make a mistake in offering me early admission. But I can't help asking myself if I made a mistake in accepting.

MIT Shows Disdain for Undergraduates

Guest column by Michael J. Kobb

"Happy Students Also Make Happy Alumni" by A. Arif Hussain '87 from the Oct. 29 issue of The Tech couldn't have been more on the money. While Hussain is a soon-to-be-alumnus, I'm a recent alumnus (graduated in 1994), so I was a student, I was often party to strategy sessions where friends and I figured out how to best steer our way through a packed few weeks of exams and projects, to do an "acceptable" job on all of them without incurring any terminal damage to our GPAs. There was never enough time to do the assigned work, well, to achieve a level of excellence that would have made me proud. One could argue that such an experience builds skills needed later in life (critical thinking, decision making, analysis, etc.), but it does so at the expense of other skills even more needed later in engineering life (mathematics, algorithms, data structures, etc.).

I have colleagues and friends who are engineers who went to other good schools. They have almost as a rule, more practical engineering training and expertise than I got out of MIT, and as far as I can tell, they got that training at less expense — monetary, emotional, spiritual and physical. It's just not natural for a 21-year-old to start getting gray hairs from stress and exhaustion, but I have friends who had exactly that happen at MIT. How many first-class institutions of higher learning have "HTTP" as a slogan among the student body? Do all college undergrads know a couple of people who have committed suicide while in school?

I recently received a phone call from a sincere-sounding sophomore, soliciting contributions for the annual Alumni Fund fundraiser. I thought of telling him to drop the phone and escape while he still could, but I resisted. I thought, maybe he'll go on to graduate school, where the Institute actually starts caring about and taking care of its students.

Don't get me wrong here. I had some excellent professors and a wonderful, caring advisor during my time at MIT. But select professors do not an Institute make. As outstanding as some of the faculty are, in my opinion, MIT is crippled as an undergraduate learning institution by a culture of "survival at the expense of excellence." When confronted with an overwhelming workload, really smart people figure out the ways to more effectively cut their losses and get by with the requirements. But this leaves no room for exploration, no room for deep learning, no room for excellence.

Chairman of the Corporation Paul E. Gray '54 has commented that the endowment is too small for an institution of MIT's caliber. I am not at all surprised, because personally, I have no intention of giving MIT one red cent until I see some sign that undergraduate education is looked upon as just as valuable and just as important as the graduate education. A good start would be to grant tenure to professors based on their teaching merits, not just their research prowess. But it needs to go deeper than that. Professors and their departments need to wake up and take stock of whether their policies and actions are merely expedient, or whether they are in the very best interests of the students and the world that those students will one day help to shape. When I was a freshman, President Charles M. Vest assured us that we weren't at MIT by mistake — we weren't the only students feeling inadequate, the only ones who thought that they have somehow slipped by the admissions screen that筛 all those "smart people, but should have rejected us. Well, that's probably true — the admissions office didn't make a mistake in offering me early admission. But I can't help asking myself if I made a mistake in accepting.

Revised Policy on Incompletes Takes Effect Starting This Term

By Carina Fung

Students will begin to see the effect of the new, stricter incompletes policy in coming weeks as its first term in effect draws to a close. Among other things, the new policy imposes deadlines on whom incomplete grades may be resolved.

The new policy states that incomplete grades must be completed by the Add Date of the following term. However, the policy allows the instructor to grant additional time if there are extenuating circumstances.

If student does not complete the missing work by the deadline, the instructor must submit a final grade based on the work the student turned in.

An additional provision grants seniors receiving incompletes in the semester in which they plan to graduate permission to graduate and prevents students from graduating with incompletes on their transcripts.

Changes follow discussion

The new deadlines come as a result of almost two years of discussion by members of the Committee on Academic Performance and other faculty committees, said J. D. Nyhart, chair of the CAP and acting registrar. The changes reflect the committee's concern that students take their academic commitments seriously, Nyhart said. "What also bore on the CAP's mind was the lack of fairness in students who draw out the time in which to complete work," Nyhart said.

Some students continue to "work on a basis of incomplete," while other students complete their academic commitments on time, Nyhart said. Some students thought that the problem of dangling incompletes had to be remedied, he said. The CAP felt that the previous system allowed students to accumulate incompletes which they could complete later in a leisurely manner, if at all. The old system allowed students to get higher grade point averages by temporarily eliminating "problem" subjects with an incomplete grade, he said. "Some students seemed to be taking the incompletes policy too casually and felt that they could always petition the CAP for an incomplete," said Associate Registrar Elizabeth C. Bradley.

"Sometimes they did not finish their work until two years later," Nyhart said. "Students would leave MIT and years later want to clear their records, though by that time they had completely forgotten the nature of the assignment which they were supposed to complete," Nyhart added.

The CAP receives approximately 75 petitions each year asking for permission to resolve incompletes that have gone beyond Institute deadlines.

Prior to bringing its proposal for a new policy on Incompletes to the Faculty, the CAP examined the incomplete policies of other schools, including California Institute of Technology, Harvard University, and Stanford University.

None of these schools allows incompletes to remain on students' records, and most of them require students to complete missing work within a very short period of time from their receipt of an incomplete.

Margaret E. Devine, assistant to the chair of the CAP, said that additional information on the new policy is available through her in 7-104.

Drop Date This Term Moves to Wednesday

By Carina Fung

Drop Date this year is on a Wednesday instead of on a Friday as it has been in years past. The move will put Drop Date at its intended three weeks before the last day of classes of this semester.

"Drop Date has always been three weeks prior to the end of classes. This is according to faculty policies and procedures, rules, and regulations," said J. D. Nyhart, acting registrar and chair of the Committee on Academic Performance.

The term always ends on a Wednesday, which dictates that Drop Date fall on the Wednesday exactly three weeks before the term ends. However, in previous years, Drop Date was sometimes moved to the Friday before the third week because the Wednesday it would have fallen on was just before Thanksgiving vacation, Nyhart said.

The faculty always decides such deadlines, like the deadline for Add Date and Drop Date, said Associate Registrar Elizabeth C. Bradley. The registrar just enforces the policies and deadlines, she said.

Rules are similar for Add Date as well, which falls on Friday, Oct. 4 this year, Bradley said. "Add Date falls on the end of the fifth week of term; unless the class is to be added begins after the normal first day of classes," she said.

"If a student shows up late on Add Date and was unable to find his advisor to sign the form, we tell them to make every effort to find any professor in the department to sign it," Bradley said. Then the form may be handed in no later than noon one working day later, she said.

"The two-day 'grace period' that many students seem to think they have to hand in their forms does not reflect practice," Nyhart said.

Just because something is old doesn’t mean it isn’t valuable.

I can relate to that. Maybe that’s why I’m never in a rush with these old guys. Sanding out a dent here and there, restoring the gears... soon I’ll have all the time in the world for them, just like they have for me. That’s the beauty of retirement. And now that it’s almost here, I’m grateful that I started planning early — with U.S. Savings Bonds. I started buying Savings Bonds when I got my first real job, through a Payroll Savings Plan. I put aside something every payday. And little by little, it really added up. Bonds are guaranteed safe, too, and earn interest up to 30 years.

In a few more years, you’ll find me out here in the workshop more and more, fixing a hinge or polishing a case. I know that there’s a lot of life left in these old guys. I can relate to that, too.

### Many Urge Changes in Safety Measures On Amherst Corner

Accident, from Page 1

at that corner as well as at 77 Massachusetts Avenue is a definite necessity, Murphy said. "There are just as many violations at 77," he said. "Many pedestrians are struck there. It's a hazard."

UA Council may make suggestions

Stephanie M. Zielenski '97, Interfraternity Council representative to the Undergraduate Association Council, called Cambridge City Hall after the accident to make suggestions for stepping up safety at the intersection and may urge the UA to do the same at Monday's UA Council meeting.

"I live in Ashdown House, and people run that light all the time," Zielenski said. "That intersection is a general mess."

Zielenski suggested installing a left turn signal for the light at the intersection and increasing enforcement against people who run red lights there.

"Safety is an issue, especially in a city like this," Zielenski said. "As the UA Council, we have a responsibility. I will personally bring it to the discussion of the Council if there is a need."

"I think a left turn signal would be a very good idea," Crowell said.
Better than Ezra: Friction, Baby
Better than Ezra, a Boston band at heart, releases a disappointing follow-up to their hit album Deluxe. They explore more mellow songs in this album, making it excellent background music, but it doesn’t have any songs with the power of “Good.” There are some quality songs on the album — like the radio hit “King of New Orleans” and “Normal Town.” The latter is a song referring to Boston in several parts. They show more funk than Better Than Ezra displayed in their previous album. Coming off their very strong first album, Better than Ezra couldn’t repeat. —John J. Rae and Roy Emanuel

J.J.R. and R.E.

Recovering the Satellite
Counting Crows returns strong with their follow-up to their hit first album August and Everything After. Adam Duritz (lead vocals and songwriter) expands on the mellow sound of “The River Knows” and adds more upbeat kind of country songs (“Stickshifts and Safetybelts”). The Refreshments: Fizzy, Fuzzy, Big, and Buzzy
The Refreshments are excellent in this album. They have a south of the border pop style that might be called “salsa pop.” The songs are funny in their meanings but have an extremely catchy beat. This album contains radio pop songs like “Bandito,” humorous songs like “Blue Collar Suicide” and “European Swallower,” and overpowering songs like “Melon.” This is a must for any alternative junkie or anyone who is looking for catchy, fun music. The Refreshments are coming to Boston sometime soon, and if their show is half as good as the album, it is definitely a must see. —J.J.R. and R.E.

Weezer: Pinkerton
Weezer is the kind of band you listen to and want to see live. They sound like a garage band who just happen to be on stage. The Refreshments: Fizzy, Fuzzy, Big, and Buzzy

Pinkerton

Rusted Root: Remember

The new album has something to please everyone from Richie (“Why Bother?” which is about getting dumped repeatedly) to the Fonz (“Tired of Sex,” no explanation needed). The album is worth getting, and if you’re going to be here the Tuesday before Thanksgiving (11/26) check them out at Avalon (Ticketmaster, 911-2000). —J.M.R.

Various Artists: Safe and Sound
On Dec. 30, 1994, two women were shot and killed while working at health care clinics in Brookline. In response, there was a week-long series of concerts last February called Safe and Sound. Kay Hanley from Letters To Cleo suggested continuing the cause with an album, and here it is, an impressive bunch of Boston indie bands. Playing previously unreleased material, the bands include Letters, Morphine, The Mighty Mighty Bosstones, Antone Mann, Juliana Hatfield, Belly, Trace Bonham, Deluxx Fold Implosion, Jennifer Trynin, Gigolo Aunts, Mary Lou Lord, Scarce, Fuzzy, Kevin Salem, Mung, and Bill Janovitz of Buffalo Tom. The songs sound heart felt, as they really are playing for a cause. Regardless of political agendas, the album is a great sampler of local bands. The fact that it is for a good cause should just be another reason to get it. —J.M.R.
University Park to Be Built Partly with MIT Funds

By Douglas E. Heimburger

The Cambridge City Council's current plans for a hotel and conference center are the latest in a long series of developments that go back for more than two decades. Early 1970s: MIT enters purchasing small parcels of land including the former site of the Simplex Wire and Cable Company. Almost 40 acres in the Cambridgeport area are eventually purchased. 1983: MIT chooses Forest City Development from 25 companies to develop on the land. MIT grants Forest City a 75-year lease on 27 acres of the 40-acre site. 1986: Forest City Development begins renovating a turn-of-the-century manufacturer building into a research and development space. Cambridge forms the "Blue Ribbon Committee" to investigate University Park development and review a master plan. 1987: The Cambridge City Council approves a master plan for the University Park project over the opposition of many community leaders. The Council rezones the area from industrial, which prohibited housing, to mixed-use and requires 10% of the total square feet to be affordable housing. October 1987: Activists protest on the "Simplex Site," as the development was known then, against the University Park development by staging an overnight "tent city" rally. Many homeless people camped out on the site and stayed after the demonstration. 1987: November: Campus Police evict an estimated 10 homeless individuals who had been living in the tent city for over a month. The Cambridge City Council condemns MIT for arresting homeless and decides to review the project. December 1987: The Jackson Building at 61 Landsdowne Street opens in a renovated manufacturing building. The 100,000-square-foot building is leased to tech companies. February 1988: The Cambridge City Council again approves the project and requires Forest City to make 400 units of housing available in the complete project instead of 100 units. The council also limits the total space in the facility to 2.3 million square feet instead of the 3.5 million requested by Forest City and adds height restrictions. 1989: April: The Richards Building at 129 Franklin Street opens: The renovated bakery and factory contains 142 units of housing available in the complete project. Instead of 100 units, the developer contracted to manage the new 209-unit suite hotel on Sidney Street. 1990: March: MIT moves two housing buildings with a total of only six units to their new location in University Park. June: Forest City announces an agreement with the Sheraton Hotel Corporation to build a five-story hotel at 64 Sidney Street. Because of the economic recession, the hotel is never built. 1991: March: Construction is slated to begin on the new hotel at 64 Sidney Street. 1996: Construction is slated to begin on the new hotel at 64 Sidney Street.
"D. E. Shaw & Co. is the most intriguing and mysterious force on Wall Street."
— Fortune

D. E. Shaw & Co., L.P. is a small (around 350 employees and rapidly growing), highly capitalized (with equity capital of over 750 million dollars), very successful Wall Street firm specializing in various aspects of the intersection between technology and finance. We are now aggressively seeking exceptional candidates in a variety of fields for positions in our offices in New York, Boston, London, Tokyo, and Hyderabad, and are prepared to compensate highly talented individuals at a level exceeding that of the market.

Please contact Career Services or send your résumé with your GPA and SAT scores to:

Suit not Required
While you’re collecting seashells, your after-tax annuity could be collecting returns.

And that’s just what you want: an annuity that works harder than you do.

TIAA’s Teachers Personal Annuity® is specifically designed to provide tax-deferred growth potential to people who are already contributing the maximum to before-tax retirement plans, or who currently have after-tax money in taxable savings or investments. With TIAA’s long-term, after-tax savings annuity, you can take advantage of the security of the Fixed Account, the growth potential of the variable Stock Index Account, or a combination of the two accounts.

You also benefit from:
- Low initial investment requirements
- The convenience of making regularly-scheduled deposits to your account via Electronic Funds Transfers
- No current surrender charges
- No-fee transfers between Teachers Personal Annuity accounts
- The flexibility of having no minimum withdrawal requirements at age 70½
- The retirement expertise of the largest pension system in the United States (based on assets under management).

If you’re looking forward to collecting seashells, now is the time to request a free information packet. Call 1 800 842-1924, Dept. 85K. Also, look for TIAA on the Internet: http://www.tiaa-cref.org

For more complete information about the Stock Index Account, including charges and expenses, call 1 800 842-1924 for a prospectus. Please read the prospectus carefully before you invest or send money. The variable component of the Teachers Personal Annuity contract is distributed by Teachers Personal Investors Services, Inc., a wholly-owned subsidiary of Teachers Insurance and Annuity Association.

For more information, call 1 800-425-2345.

EATING RIGHT CAN HELP REDUCE THE RISK OF CANCER. It can also help you reduce your weight.

Eat plenty of fruits and vegetables rich in vitamins A and C—orange, cantaloupe, strawberries, peas, broccoli, cauliflower, squash, brussel sprouts, carrots, garlic, red cabbage, cauliflower. Eat a high-fiber, low-fat diet. Include whole-grain breads and cereals, low-fat milk products, nuts and seeds, dried fruits, fresh and dried beans, and whole wheat. Eat lean meats, fish, skinless poultry and low-fat dairy products. Drink alcoholic beverages only in moderation.

Where in tarnation did I get these FREE Movie Tickets?

The last thing I remember was getting home about 45 minutes after I was supposed to call Jan. I was definitely in the doghouse. But I had used up my change trying to remedy a laundry fiasco where all of my tightie-whities were dyed pink by a single red sock. I couldn’t even call her to patch things up.

So I stopped at the store and bought a NYNEX Prepaid Calling Card. There were FREE movie tickets in the package. Then it hit me: Not only could I use my Prepaid Card to call and beg her forgiveness, but I could take her to a FREE flick, too. I knew I had thought up something brilliant to win her back. I just couldn’t remember what it was. Hope she likes pink.

NYNEX Prepaid Calling Cards (with FREE movie tickets) are available at convenience stores near your campus.

*Some restrictions apply. Tickets valid through November 1997.

© 1996 NYNEX Corporation
Rand, from Page 1

The audience, which consisted of a mix of MIT students and faculty and design students from as far away as Rhode Island and New Hampshire, laughed when the octogenarian Rand started his talk with the observation that he’s “waited 82 years to get to this place.” Rand used to be a professor at Yale University and currently teaches summer classes there.

The first portion of the talk dealt with the issue of what constitutes design and how it relates to art. “There is fundamentally no difference between the designer and the artist. In dealing with the subject of design, knowledge of the history of art and design is just as indispensable as the language of art,” Rand said. In his handout, Rand described how “among the many aspects of form, problems pertaining to the principles of proportion, for example, are significant. The rules of proportion apply equally well to the Parthenon or to a can of Campbell’s soup.”

Maeda then asked Rand how he got started in design work. The audience chuckled when he paused for a few seconds and then said, “I just designed. It isn’t something you do intuitively. You just do it.”

The rest of the talk was a narrative slide show, which drew heavily from two books by Rand that were being read at the time. The slides concerned art and design in general, with examples ranging from the Leaning Tower of Pisa to still lifes by Cezanne. Rand then proceeded to describe the process of developing logos and corporate identities for companies, the work which has contributed most to his fame. He explained how it is critical to have a “client who is receptive.” Rand spent a considerable amount of time chronicling the development of the logo for Next and how he worked closely with Steve Jobs during the process.

In dealing with the subject of design, knowledge of the history of art and design is just as indispensable as the language of art.
—Paul Rand

He characterized the logo finally decided upon as “complete abstraction,” and he expressed his amazement at how it appealed to people. In Design Form and Chaos he says, “a black cube has a certain visual presence and is easy to remember.”

Other companies whose logos Rand discussed were those for IBM (perhaps his most famous design), UPS, and The Limited, for which he observed that it is important to recognize that every letter but the last from and design students from a far away had been organized yet. Rand said that Rand

Groups, Dean's Office Agree Party Policy Needs to Be Revised

Parties, from Page 1

...dancing is far less dangerous than a rock concert. "We want to follow the policy, but we also recognize that we need some flexibility," Glavin said.

Wyatt suggested that the policy be rewritten to allow for such exceptions and that it include examples of what events had received such exemptions in the past. "Groups look at the policy, and they don't know what to think," he said.

Associate Dean for Residence and Campus Activities Margaret A. Jablonski agreed that the policy should be rewritten with the help of students. She requested that some of the student group leaders present volunteer to work on the new policy statement. "It's very important that we get student input on this," she said.

Another issue of concern was the scheduling of metal detector events now that Walker is no longer available as a venue for most activities. Dean for Student Life Margaret R. Bates said that she was pleased that all groups that wanted parties had found dates for them, but she understood that some groups were disappointed with the process and the facilities they had received.

"We don't have a problem on one level, in that everyone has found a date, but we'd like to be able to do it with less pushing and pulling," she said. Bates also acknowledged that some groups might have trouble fitting their parties into the two rooms available in the Student Center, Lobdell and La Sala de Puerto Rico.

Because of the demand by groups to reserve the limited number of facilities that are suitable for large events, CAC and RCA have instituted a new rule effective December that groups may request no more than three dates per term in any of the major facilities, like Lobdell, La Sala, and Walker. Requests for consecutive weekends or multiple locations for the same date will not be granted either.

If groups fail to cancel a reservation for a large event in one of these facilities at least two weeks in advance, they will incur a fine of $50.00.

Tumultuous Week 10
Upsets NFL Leaders

Browns, from Page 20

Falcons. Take Carolina.

Detroit is favored over Seattle. Whatever. Take Seattle.

Houston is not better than Miami - period.

- If Indianapolis does not beat the Jets, the NFL has resolved to revoke any bragging rights the Colts may have thought they acquired for beating Dallas.

- Look for Kansas City to start winning big as they try to catch Denver. Take the Chiefs over da Bears.

Minnesota has basically squandered a perfectly good NFL season. But it got cold and I have to wear my Vikings jacket. Take 'em over the Raiders.

Big Time Showdown: The Philadelphia Eagles versus the Washington Redskins. The Eagles already beat the 'Skins once this year, and both teams are coming off disgraceful losses. Both teams are tied to lead the powerhouse of the NFL: the NFC East. This is a big game. Washington will be looking for the luck of the Irish. Take the 'Skins in a close one.

Pittsburgh, no longer mystified by the Cincinnati factor, will dispatch of the Jaguars.

San Diego over Tampa Bay. Tampa got lucky last week — in overtime. It ain't gonna happen again.

Although Steve Young is questionable, I don't think the Ravens can cut it. Do you?

Monday Night Special: This pallet in comparison to the Philly-Washington game, but it should be good nonetheless. It's in Dallas, and if Dallas can pull it off, they will be tied for second in the NFC East. They won't.

Last week: 5-9 (Author's note: this is my first big time screwup, and I don't want to hear about it. I mean six upsets — come on).

Season record: 69-50.

teams that were upset last week. Virginia will try to regroup from last week's loss to Clemson at home as they play host to the seventh-ranked North Carolina Tar Heels. It is time people gave UNC the respect they deserve, with their only loss of the season being a hard-fought game against third-ranked Florida State.

The big game tomorrow features the two most disappointed teams with only two losses: Penn State and Michigan. Both came into the season as national championship and Rose Bowl contenders. Now the loser will not go to the Rose Bowl, and neither will the winner.

However, it is still a classic Big Ten matchup in the cold of the Midwest. I see Michigan pulling it out if they stop complaining that Penn State had an extra week to prepare. That is not an excuse, since it looked like Michigan took the week off as well against Purdue.

Finally, Wyoming followed in the footsteps of West Virginia, Alabama, and Brigham Young by waking up last week, losing to San Diego State for their first loss of the season. Now the only undefeated teams are the top four ranked teams, but Army. Let's wait until the season is over before we debate who is better, Army or Florida.

And I cannot leave without mentioning the other surprises of the last week. The Cincinnati Bearcats are ranked first in the AP basketball poll, and Evander Holyfield put his faith in God and beat Mike Tyson. Faith is a wonderful thing, huh?

**Everything Falls Apart During 10th Week of the NFL**

By Chris Brocrouw

Pittsburgh and Houston are going to be fighting to the wire. Sure, many feel that it's too late to catch Detroit, but the truth of the matter is that the Lions are 1-9 and haven't won since their 54-23 romp over Arizona. The Lions will need a miracle or two to catch the Bears, who are 9-3 and have taken a firm control of the NFC Central. But even if the Lions can't catch the Bears, they still have a shot at the playoffs with five games remaining.

Games Including Three Games of 40-14, in a Series of Thrilling Upsets, it's clear that the NFL is not the same old league anymore. Some possibilities for the playoffs now include the Lions, the Chiefs, the Eagles, and the Bills. The Lions have been riding a wave of momentum, and the Chiefs have been playing well under their quarterback, Brees. The Eagles are a force to be reckoned with, and the Bills are a team on the rise. It's going to be a battle of the titans as we head into the final stretch of the season. The NFL is definitely more exciting than ever before.

**Undefeated Teams Could Face Off in Rose Bowl**

By Chris Lin

Going into last Saturday, you needed a microscope to find a big game in college football. But just as Walt Williams can score 34 points in an NBA game, anything can happen.

Purdue beat then ninth-ranked Michigan 9-3 for their first victory against the Wolverines since the Tigers won the World Series in 1984. It marked the second straight year Michigan has failed to score a touchdown against Purdue, although last year they scraped out a 5-0 win. This year they were not as lucky.

Michigan's defeat is significant. Now the Ohio State Buckeyes need only to beat Indiana tomorrow to go to the Rose Bowl, the first time since the Cold War, Michigan and Ohio State have met in the championship game. A clear-cut national championship game.

If the Rose Bowl does indeed get these two undefeated teams, they will at least be second and third in the national rankings. It will also be the only bowl game with undefeated teams. A cut-out national championship game.

These two teams have handily beaten Nebraska, Penn State, and Notre Dame. People have forgotten that Arizona State deserved respect not only for shutting out Nebraska but also for taking care of the rest of their games.

Meanwhile, Florida built a 22-point lead and then held on to win 28-21 over Vanderbilt (2-7 overall). However, I don't think that Florida should be penalized for the close game. Near upsets are not worth talking about, or else this would be a three-page feature on victories at Northwestern. I think Florida's stature was affected more by the happenings in Tennessee.

The SEC upset that materialized last Saturday was the 21-17 shock that Memphis gave then sixth-ranked Tennessee. Memphis, in second to last place in the weak Conference USA, had been 26-point underdogs to the Volunteers, who must now fight for an Alliance Bowl slot. It was their second loss of the season. The other was to Florida, whom it dragged down with them in credibility.

Tomorrow's big games feature

**UPCOMING HOME EVENTS**

Friday, Nov. 15
Men's Swimming vs. Springfield College, 6 p.m.

Saturday, Nov. 16
Men's Ice Hockey vs. Lyndon State College, 5 p.m.
