Athena clusters scheduled to be renovated or closed
IS&T seeking approval for renovation plans

By Rosa Ruiz

MIT’s Athena clusters, which have not seen a significant upgrade in the 26 years since their creation in the 1980s, will soon be receiving a long-awaited upgrade. Although construction in several buildings will lead to the temporary closure of some clusters and three will be permanently closed, there are plans to renovate the Student Center cluster and eventually, other public computing spaces.

In an interview with The Tech, Jonathan Reed, MIT Information Systems and Technology’s (IS&T) Senior Liaison to the students, described the upcoming changes. As Building 2 is being renovated, the clusters in 2-225 and 2-232 closed. 2-632 will reopen at the completion of construction (though slightly smaller, to make room for an elevator), but 2-225 will close permanently as the space becomes part of the Math Department.

IS&T is also investigating the possibility of renovating the nearby 4-367 cluster, making improvements to lighting and ventilation and adding a glass window to the corridor. If approved, the renovations would begin January 2014 and last five to six months. Building 37 is also undergoing renovation, and the clusters in 37-318 and 36-332 will close permanently when the rooms join Course 16.

The Student Center cluster (W20-575) will be receiving new tables and chairs over IAP. Reed estimated the furniture upgrade to cost between $100K and $120K. In place of the anchor pads that locked technology on “picture valuable when open to the tables, a cable will connect the computers to the desks, giving students more flexibility in arranging their workspaces.

The Student Center, along with a few other locations, will also feature a pilot project of mobile device charging stations.

The changes are intended to make the clusters more pleasant places to work, but some students are pleased with the current condition. “I like being a little uncomfortable — if it’s too comfortable, it makes it easier for me to fall asleep,” said Justine Jung ’17. Others, like Yongli “Jesy” Wu ’15, argue that the large windows and three will be permanently closed. Buildings will lead to the temporary changes. As Building 2 is being renovated, the clusters in 2-225 and 2-232 closed. 2-632 will reopen at the completion of construction (though slightly smaller, to make room for an elevator), but 2-225 will close permanently as the space becomes part of the Math Department.

Bexlians modify illustrations in new community space
Following CAC concerns of ‘offensive’ illustrations in Bexlians’ Pritchett space, drawings modified

By Austin Hess

Former residents of Bexley Hall had to modify illustrations in the Pritchett Lounge in Walker Memorial last week that were deemed offensive by the Campus Activities Complex (CAC). In August, the former Bexley residents were given use of the room in Walker Memorial, meant to serve as a community space, following the closure of Bexley in May.

According to an email from Campus Activities Complex (CAC) Director Philipp J. Will, CAC staff removed the room last week in response to a request from a former Bexley Graduate Resident Tutor (GRT) that a drawing be added to be the lounge. A number of illustrations, painted on large sheets of paper and taped to the walls, were deemed offensive by the staff and “in violation of the terms for the space.”

The regulations for the use of the space were sent by CAC when the former Bexley residents officially gained access to the space on Aug. 26. One aspect of these regulations state, “Any alteration or change in the physical environment should be done with advanced approval by ResLife and CAC. Creative expression though artwork and music playing is expected and will require communication and coordination during the early weeks of the program as procedures are established.” It also indicates that “CAC and Residential Life staff will conduct periodic tours of the space to insure its proper and safe utilization.”

Since the Pritchett Lounge is a part of an activity center and not a residence hall, Walsh said that the illustrations had to be removed immediately. The email included photos of the four offending posters but did not provide an indication of what part of the illustrations were in violation.

Two of the illustrations consisted of painted words describing generally sexual content. Another used vulgarity to describe the wall color of the Pritchett Lounge. The final one, a drawing of an octopus or perhaps a squid, was presumably deemed inappropriate due to its resemblance to male genitalia.

In an interview with The Tech, Jonathan Reed, MIT Information Systems and Technology’s (IS&T) Senior Liaison to the students, described the upcoming changes. As Building 2 is being renovated, the clusters in 2-225 and 2-232 closed. 2-632 will reopen at the completion of construction (though slightly smaller, to make room for an elevator), but 2-225 will close permanently as the space becomes part of the Math Department.

Bill on regulating drug compounding clears Congress

A bill that would give the Food and Drug Administration more power to police compounding pharmacies passed its final hurdle in Congress on Monday, in what experts said was an important step to a safer drug supply in the United States. The bill, which cleared the Senate without opposition, stops short of giving the FDA complete authority over pharmacies that make mix- drugs for individual patients, a process known as compounding. But the bill still provides significant new safeguards, which have earned it the support of public health advocates around the country. "It has very sharp teeth," said Sarah Sellers, a drug safety consultant who has tracked the issue for years. Just over a year ago, tainted injectable drugs from a compounding pharmacy in Massachusetts caused a meningitis outbreak that killed 64 people across the country, according to the Centers for Disease Control and Prevention. The bill, which took shape in the months af- ter the outbreak, was designed to prevent such events. "This bill will bring oversight of high-risk drug compounding," said Sen. Tom Harkin, D-Iowa, who was one of the authors. Scores killed in tribal clashes in Darfur

KHARTOUM, Sudan — Nearly 200 members of two Arab tribes that signed a peace treaty in July were killed in fighting in south- west Darfur over the past three weeks, a local tribal chief said. "The total of dead from the past weeks of fighting has reached 139 from both sides," said the tribal chief, who spoke on the condi- tion of anonymity. "Add to that 53 who died Sunday night." U.N. officials in the area confirmed the fighting between the two groups. "We have received information of fighting between the Sala- mai and the Messeraya in the area of Umm Dukhun," said Ashraf Eissa, a spokesperson for the joint U.N. and African Union Mission in Darfur, known as UNAMID. He said that the fighting had affected the "feeding center" run by nongovernmental organizations had been burned down. Joint Sudanese-Chadian forces that patrol the border between their two nations "disengaged the fighting tribesmen," Eissa added. The tribal chief said, "Nine Sudanese soldiers were killed, and two Chadian soldiers were injured." Agence France-Presse report- ed that Chadian soldiers had died during the clashes, but did not con- firm how many. Sporadic fighting between members of the two tribes has led to the death of over 200 since the beginning of the year. Intermittent clashes and fighting between rebels and government forces in the troubled Darfur region have led to the displacement of 406,000 people this year, the United Nations said last week. "It's a time of war," said Isma'il Kushkush, The New York Times. Slowdown in carbon emissions worldwide

HONG KONG — If the initial summary of China's highly anticipat- ed economic policy plan dis- appointed analysts last week, the far more detailed plan that was re- leased by the Chinese authorities late Friday more than made up for it. The reaction among investors and analysts to the document of more than 31,000 characters — roughly the equivalent of 10,000 words in English — that laid out the Com- munist Party's decisions on how to overhaul the Chinese economy was overwhelmingly positive. "The breadth of the reform plan has certainly exceeded most expec- tations," said Wang Tao, chief China economist at UBS. China economists at Goldman Sachs said the document "showed high reform conviction and lifted reform expectations and targets." And Yao Wei, an economist in So- ciété Générale's office here, said "the new leaders really delivered and promised a number of concrete changes. China's reform boat has fi- nally set sail." The stock markets echoed the sentiment: On Monday, the Shanghai composite index closed 2.9 per- cent higher, while the Hang Seng Index in Hong Kong, where many mainland companies are listed, climbed 2.7 percent. On Friday, both had risen 1.7 percent in an- ticipation of more details about the meetings. In part, the cheer stemmed from the fact that the initial communiqué from the closed-door meeting of top policymakers released last Tuesday — about 5,000 characters shorter than the final "decisions" document — was vaguely worded, replete with short, platitudes, and detail- most bound to disappoint. The longer outline released three days later "swept away the haze of disappointing ambiguity" of that initial communiqué, said Zhu Haibin, chief China economist at JPMorgan. It addresses a wide range of is- sues — including changes to the longstanding one-child policy, land rights, price liberalization and the role of the markets in the largely state-dominated economy.
Republicans block another Obama nominee for judgeship

By Jeremy W. Peters THE NEW YORK TIMES

WASHINGTON — Senate Republicans on Monday denied President Barack Obama his third nomination in as many months to a federal appeals court, an extraordinary move that is more powerful and prestigious appeals court and insisted they would not back down, inflaming a bitter debate over a president’s right to shape the judiciary.

By a vote of 53-38, the Senate failed to break a filibuster of a federal judge nomination that senators, who were nominated to fill one of three vacancies on the U.S. Court of Appeals for the District of Columbia Circuit, fall short of the 60 votes needed.

Unlike previous fights over judicial nominees, this one is not driven by a high-profile division over big issues like abortion. Republicans have raised few objections to any of the candidates’ qualifications or political leanings.

Rather, Republicans are trying to prevent Obama from filling any slots on the court, fearing that he will alter its conservative tilt.

On Thursday, the Senate voted 60-40 to advance at least one Obama nominee to a court that didn’t block by Republicans this year.

Obama’s choices for the powerful court blocked by Republicans this year ought to be spending its time dealing with a real crisis, not a manufactured one."

Republicans are making a bold gamble: Hold firm and allow no more judges to get through while hoping Democrats do not fill filibuster rules so the minority can no longer block judges. At times, they have openly dared Democrats to change the rules, saying that any move to stop filibusters will come back to haunt them if the Senate and the White House flip back to Republicans.

It is not a small matter for Democrats who instead Republicans have vowed to block any nominees for that court.

For a day at least, on Capitol Hill shifted away from the problematic efforts to carry out the president’s health care law, prompting Republicans to call an end to Democrats of trying to change the subject.

Unfortunately, the Senate will not be voting on legislation to allow Americans to keep their health insurance if they like it,” said Sen. Mitch McConnell, R-Ky., the minority leader. “Rather, we will be voting on an amendment if they like it, said Sen. Mitch McConnell, R-Ky., the minority leader. “Rather, we will be voting on an amendment if they like it."

"Failing, Wilkins became the fourth of Obama’s choices for the powerful court blocked by Republicans this year.

Dissents are the signed opinions of editorial board members choosing to publish their disagreement with the editorial.

Letters to the editor, columns, and editorial cartoons are written by individuals and represent the opinion of the author, not necessarily that of The Tech. Electronic submissions are encouraged and should be sent to letters@tech.mit.edu. Hard copy submissions should be addressed to The Tech, R.O. Box 397029, Cambridge, Mass. 02139-7029, or sent by interdepartmental mail to Room W20-483. All submissions are due by 4:30 p.m. two days before the date of publication.

Letters, columns, and cartoons must bear the authors’ signatures, addresses, and phone numbers. Unsigned letters will not be accepted. The Tech reserves the right to edit or condense letters, shorter letters will be given higher priority. Once submitted, all letters become property of The Tech, and will not be returned. Letters, columns, and cartoons may also be posted on The Tech’s Web site and/or printed or published in any other format or medium now known or later that becomes known. The Tech makes no commitment to publish all the letters received.

CORRECTIONS

The arts events calendar in Friday’s issue provided incorrect or incomplete information for four events. The Chamber Choir concert occurred twice on Saturday, Nov. 16, at both 2 p.m. and 4 p.m. The Ellipsis Trio’s Boston performance was on Sun-
day, Nov. 17, at 8 p.m., not 7 p.m. Mariel Roberts’ performance on Thursday, Nov. 21 was at 8 p.m., not 7 p.m. A review of Dallas Buyers Club also in Friday’s issue provid-
ed an incorrect rating. — the film is rated R.

OPINION POLICY

Editorials are the official opinion of The Tech. They are written by the Editorial Board, which consists of Chairman Sarah Ritter, Editor in Chief Anne Cai, Managing Editor Ian M. Gordorisher, Executive Editor Deborah Chens, and Opinion Editor Jacob London.

As for the rest of the menu, you should be singularly focused on the “Pasta & Polenta” section. Barbara Lynch has long received plaudits for her pasta at No. 9 Park, and she has certainly relished her talents to Sportello in this regard. Many view the North End as the city’s mecca for great Italian food, but I’ve never had pasta in the North End that has topped the offerings at Sportello. My favorite dish is the Potato Gnocchi with mushroom ragu, peas, and cream ($22). The gnocchi are light and delicate and nearly melt in your mouth while the fresh peas nicely balance the rich cream sauce. I also recommend the Strazzopretti with braised rabbit, olives, and rosemary ($24), a lighter and almost equally delicious option.

While those two are my favorites, every pasta I’ve tried here has still been outstanding; the Tagliatelle Bolognese ($24), Polenta with Porcini or lamb ragu ($23). Luckily, you might not have to choose just one. One of the best things about Sportello’s menu is that you can order any of the pastas as an appetizer portion, so you can try multiple dishes in a single meal if you (understandably) can’t decide on just one. Their menu also lists more conventional entrees that are available, like veal cheeks and skate wing, but why bother? They’re a bit more expensive, and from my experience entrees of this type and quality are more common and easier to find.

In the case that you haven’t “accidentally” ordered too much food and are left wanting something sweet, Sportello has you covered. I’ve tried their not-so-sweet olive oil cake and a slightly-too-sweet strawberry and pink peppercorn pavlova (both $8) off the dessert menu, but the real treats are in the bakery counter opposite the kitchen. In this glass case you’ll find a menagerie of cookies, cupcakes, cakes, pies, and pastries, all of which are as reasonably priced as they are delicious.

“Sportello’s cupcakes are superior to those at other, more hyped bakeries around the city (cough…).”

But it is with a heavy heart that I tell you about the bakery counter, as I have recently learned that it will only be around for a few more weeks.

As Sportello celebrates its fifth anniversary, it will be remodeled, and the bakery counter, panni, and less formal lunch options will be removed. These changes are scheduled to happen around Thanksgiving, so I suggest you stock up on Elvis cupcakes while you can.

access to the room modified rather than removed the posters. The modifications included the changing of certain words and, in the case of the octopus poster, drawings of additional sea wildlife to obscure the offending parts of the picture.

On Monday, Walsh emailed those with access to the lounge to report that the modifications solved the problem. In the message, addressed to one of the representatives of the former Bexley community, Walsh wrote, "You and others have done an impressive job of altering or modifying most of the posters into a non-offensive presentation. That is very much appreciated," adding, "It is a very impressive gallery of expression throughout Pritchett, and I’m pleased the space is becoming more active for your community."

Illustrations in Pritchett Lounge in Walker Memorial were edited by Bexlians after CAC expressed concerns about the "offensive" drawings. In August, former Bexley residents were given the lounge to use as a community space following the closure of Bexley Hall last spring.

Shoot for the Moon

A webcomic of romance, sarcasm, math, and language
by Randall Munroe

Students, shoot for the moon.

If you miss, shoot again.

Keep shooting and never stop.

Someday, one of us will destroy that stupid sky circle.

And—

...what? What are you all—

...it's right behind me, isn't it?

Shit. Everyone act casual.

A leg up on pants
Trousers add both comfort and style to your wardrobe

It is often believed that trousers are simply an alternative for jeans, which is not true. Trousers and jeans are completely different in terms of look and fabric. Trousers have numerous unique characteristics that jeans do not have. First of all, trousers are made with soft materials, such as cotton and wool, which give you maximum comfort and warmth, whereas jeans are made with denim, which is usually stiff and rough. Trousers are known for comfort and versatility, but not so much for fashion potential. However, I am sure that some of you jeans-guys will turn into trousers-guys after reading this.

I am sure that some of you jeans-guys will turn into trousers-guys after reading this.

Unlike jeans, trousers are very commonly manufactured with a variety of different colors. Trousers are able to pull off crazy colors fantastically without actually looking crazy. For instance, let's try to imagine a guy wearing a pair of yellow trousers with a shirt on. It looks alright. Let's imagine yellow jeans with a shirt on. It is a little bit weird, right? This is why guys who love color often go for trousers over jeans. However, if you can only afford one pair of trousers, then you can opt for beige or navy ones. I have both, and I love them equally.

Beige is better for casual styles, while navy is more formal. For example, T-shirts and casual shirts look great with beige, while oxford and brown loafers for a smart and dandy look, or a T-shirt, denim jacket, and white sneakers for a casual and naughty look. There are so many other ways to build your own style with trousers, so find something that flatters you the best!

It is often believed that trousers are simply an alternative for jeans, which is not true! Trousers and jeans are completely different in terms of look and fabric. Trousers have numerous unique characteristics that jeans do not have. First of all, trousers are made with soft materials, such as cotton and wool, which give you maximum comfort and warmth, whereas jeans are made with denim, which is usually stiff and rough. Trousers are known for comfort and versatility, but not so much for fashion potential. However, I am sure that some of you jeans-guys will turn into trousers-guys after reading this.

Trousers can be either flat-fronted or pleated. Flat-fronted trousers have no fold on the waist area, whereas pleated trousers have at least two folds on the waist area. If you are looking for a safe choice, I strongly recommend purchasing flat-fronted trousers since they are more versatile due to simplicity. Pleated trousers make you look bulky because they are made with more fabric. However, pleated trousers give a little more vibe of formality, so if you want to look a little formal, but not too much, they will be perfect for you.

Unlike jeans, trousers are very commonly manufactured with a variety of different colors. Trousers are able to pull off crazy colors fantastically without actually looking crazy. For instance, let's try to imagine a guy wearing a pair of yellow trousers with a shirt on. It looks alright. Let's imagine yellow jeans with a shirt on. It is a little bit weird, right? This is why guys who love color often go for trousers over jeans. However, if you can only afford one pair of trousers, then you can opt for beige or navy ones. I have both, and I love them equally.

Beige is better for casual styles, while navy is more formal. For example, T-shirts and casual shirts look great with beige, while oxford and brown loafers for a smart and dandy look, or a T-shirt, denim jacket, and white sneakers for a casual and naughty look. There are so many other ways to build your own style with trousers, so find something that flatters you the best!
Philippines sees widespread hunger, displacement

Haiyan leaves about 2.5 million in need of food aid following worst typhoon in memory

Philippines, from Page 1

food,” he said. Basey’s mayor, Junji Ponferrada, 43, estimates that this storm dam-
aged or destroyed the homes of one third of the population of this city of 51,000 in Samar province. He strug-
gles to feed and house them all.

“People are saying, ‘We don’t want a message of hope. We want food,’” he said.

The Basey District Hospital, which sits on a hill in the city facing the church, suffered extensive dam-
age in the storm. But a few rooms survived, allowing the primary care hospital to provide basic services like delivering babies and treating diarrhea caused by unclean water, said Dr. Jessamine Elona, 33. A team of Japanese doctors has helped treat cuts and wounds caused by flying debris during the storm.

Tallado, the governor of Camarines Norte province, which was provid-
ing the aid.

“We weren’t given a specific time, we were just told to wait,” said Victoria Cajara, 51, a Magallanes vil-
lage councilor who had been by the roadside for four hours.

Ponferrada said other towns and provinces have been the chief suppliers of aid to Basey, where 291 died in the storm and 39 were still missing. In the basketball stadium, a medical team from Camarines Sur province offered medicines and mi-
nor surgery. A group from the city of Valenzuela in Metro Manila, which arrived Monday after driving five days, scouted how to distribute its five truckloads of goods and where to station five doctors.

As Ponferrada cleaned mud and trash from his waterfront office, four trucks from the Japan International Cooperation Agency arrived with 77 bundles of plastic, each 165 feet long, for building basic tents. A few hours earlier the trucks would not have been able to squeeze onto the narrow waterfront drive, which had only recently been cleared of debris.

The church’s corrugated metal roof, with detailed murals showing the Tower of Babel, Catholic saints and a scene from Revelations, has been riddled with coin-sized holes and a stained-glass window in the south wall of the chancel. It lies toppled over, the leading holding together its colored panes.

The church is willing to house the homeless. But he sounded a note of frustration. He said many of the churches’ new tenants slept through the daily 6 a.m. Mass.

“They’re welcome to stay, but we ask them, if they’re able to start rebuilding,” Cabujat said. “We can’t start rebuilding until they leave.”

At the church, a runners club from Samar handed out 6.5-pound bags of rice, crackers, and bottles of water to a line of people that streamed out the front door.

The Rev. Gil Cabujat, 44, says the church is willing to house the homeless. But he sounded a note of frustration. He said many of the churches’ new tenants slept through the daily 6 a.m. Mass.

“They’re welcome to stay, but we ask them, if they’re able to start rebuilding,” Cabujat said. “We can’t start rebuilding until they leave.”

The force of the storm blew out a stained-glass window in the south wall of the chancel.

Outside, food is cooked over open fires, clothes dry on lines hugging between palm trees, and piles of bot-
tles and trash climb high. The bath-
room is a wall in the church yard.

The Rev. Gil Cabujat, 44, says the church is willing to house the homeless. But he sounded a note of frustration. He said many of the churches’ new tenants slept through the daily 6 a.m. Mass.

“They’re welcome to stay, but we ask them, if they’re able to start rebuilding,” Cabujat said. “We can’t start rebuilding until they leave.”

MIT closes out 2013 season with a win over Coast Guard, 48-31

By Phil Hess

MIT closed out its 2013 football season in fine form this afternoon as the Engineers churned out a school record 577 yards of offense that helped them overcome three first half turnovers in a 48-31 victory over the U.S. Coast Guard Academy. Justin R. Wallace ’15 rushed for over 200 yards for the first time in his career, finishing with 215 and a pair of scores for MIT. The triumph gave the Engineers six wins in a season for the first time since 1999.

MIT (6-3, 4-3 NEFC) took the opening kickoff and started moving down the field, gaining the Coast Guard side of the 50-yard line on a 19-yard completion from Peter J. Williams ’15 to Bradford L. Goldsberry ’15. But three plays later Williams was accosted by Evan Rothfield, and the Bears turned around and marched all the way to the MIT 23 before the Engineers could halt the drive. Tyler Henning came on and put Coast Guard in the lead with a 42-yard field goal. MIT forced a three and out on the next play with his run into the end zone.

Other than the three turnovers, Coast Guard could not contain the MIT offense.

Wallace started the next MIT drive with a 22-yard carry and the Engineers went on to complete an 18-play, 75-yard drive to begin its comeback. With 10:18 left Williams took it in from three yards out to cut the Coast Guard lead to 10 points. The Bears missed on a 44-yard field goal attempt on their next possession, giving MIT the ball on its own 47. The Engineers put together another scoring drive and when Williams hit sophomore Nathan H. Varady ’16 in the back of the end zone with 12 seconds left in the half, the lead was down to three.

MIT forced a three and out on the first Coast Guard possession of the second half and then marched down the field again as Williams accounted for all but 14 yards of a 65-yard drive that finished with a Williams to Esparrago 15-yard scoring toss to give the Engineers their first lead of the game at 28-21. MIT then picked up a turnover of its own as Jacob N. Laux ’14 fumbled on a lose ball at the Coast Guard 30. The Engineers turned that miscue into points as Tucker T. Cheyne ’17 hit a 30-yard field goal to make it 31-24.

Coast Guard came back and tied things up on its next possession as Jake Wavryniak took it over from the one with 2:46 left in the third, but MIT came right back and returned the favor with an 82-yard drive. Williams was sacked for a six-yard loss on a third and one at the Coast Guard 41, but came back on fourth down with a 21-yard completion to Christopher G. McPherson ’16 and Wallace finished it on the next play from six yards out to make it 38-31 with 13 minutes to go.

Coast Guard could not come up with a response for the rest of the game, however, as the MIT defense held the Bears to a total of nine yards on their final three possessions. The Engineers offense continued to eat up yards and clock and they added a 26-yard Cheyne field goal and a four-yard touchdown run by Wallace to 2:15 left to ice the win.

Other than the three turnovers, Coast Guard could not contain the MIT offense. The Engineers held the ball for 44:45 and converted 17 of 21 third down attempts. Williams had his best passing day of the season, completing 23 of 31 for 283 yards and three scores. Esparrago grabbed six of those passes for 108 yards and a score while Goldsberry also had six catches, totaling 72 yards.

Victory completed 20 of 35 attempts for 209 yards for Coast Guard, with Os- wald catching six for 109 yards and Col- lin Brown eight more for 82 yards. The MIT defense, led by Brent M. Johnson ’14’s eight tackles, held the Bears to just 40 yards rushing.

Summer Study in The Hague

Scope
Spring semester in preparation for a faculty supervisor, followed by summer in The Hague, Netherlands

Who may apply?
MIT students may apply no later than the Palitz application date in their junior year. For eligibility requirements and other details, visit shass.mit.edu/palitz

Research areas
Any aspect of painting, history, or culture in the Dutch and Flemish Golden Age, e.g.: the art market; economic history; history of science, horticulture, or cartography; the technologies of print making and book production

Application process
Application contents include transcript, resume, research proposal, letters of recommendation. For full information and instructions see shass.mit.edu/palitz

Apply by January 9, 2014

SPORTS SHORT
Openweight Crew finishes 8th in Novice 8 Event

Closing out the fall season on its home river, the MIT openweight crew team took part in the Foot of the Charles competition today on the Charles River. The Engineers saw their best finish in the Novice 8 event where the A boat finished eighth in a 10-team field.

In the Novice 8 race the MIT A crew finished the course in 14:25.8 to claim the eighth spot, placing ahead of openweight and a lightweight crews from Radcliffe. The Engineers were 27 seconds behind the next highest finishing crew from Northeastern. MIT’s B entry was 12th in 14:58.5, edging out the Boston University B team by five seconds.

MIT also had three crews in the Varsity 4+ competition. The A crew had the best outing, turning in a time of 15:03.8, while the B boat was 28th with an effort of 15:48.4. A field of 47 crews turned out to claim the Varsity 4+ title with 2:15.55 to replace the winning MIT entry of 2:15.55.
