MindHandHeart expected to improve access to resources

By Kath X

Mental Health and Counseling to improve access to resources

By Katherine Nazemzi

Freshmen will be able to sign up for MindHandHeart's initiative to improve access to mental health resources.

IN SHORT

Online registration for full semester classes is now open! Registration for freshmen must be completed by 5 p.m. on Thursday, Sept. 3. For all other students, complete registration by 5 p.m. on Friday, Sept. 11.

The annual Student Loan Art Program Exhibition and Lottery is open. View the collection at the List Visual Arts Center, and enter the lottery by Sept. 13 to borrow a work from the collection.

Lavender's has resumed normal hours, and is now open on weekdays from 9 a.m. to 4 p.m., every day of the week.

Regular dining hours will resume Saturday, Sept. 5 across all dining halls. Simultaneus Late Night will resume service after Labor Day.

Intramural Fall Registration opens Monday, Sept. 7 and closes Wednesday, Sept. 16 at 11:59 p.m. This year, hockey and basketball will be included in this registration block. Visit intramurals.mit.edu to check out which sports are offered and to register!

Student Support Services will hold additional walk-in hours starting Sept. 6. Stop by from 10-11 a.m. and 2-5 p.m. Monday through Friday.

Send news information and tips to news@tech.mit.edu.

New sorority opens on campus

Sorority will recruit members after formal recruitment

By Katherine Nazemzi

This semester, Delta Phi Epsilon will open a new chapter at MIT and become the seventh sorority on campus. Its recruitment will begin after MIT's existing six sororities have held recruitment events.

Lyndsey Karp, Coordinator of Newer Women at Delta Phi Epsilon's international headquarters, encouraged potential new members to go through formal recruitment for MIT's existing sororities first.

If they don't find their right fit through formal recruitment, Delta Phi Epsilon will be recruiting after that," she said. "You'll see us tabling on campus and holding information sessions as soon as September, and we will be continuing our recruitment until the end of September."

Recruitment will be run by staff members from Delta Phi Epsilon's headquarters, local alumni and alumna volunteers, and volunteers from chapters in the nearby area. They hope to recruit a chapter "of comparable size to other sororities on campus" — roughly 100 members.

"These members will ideally con- sist not only of freshmen, but upperclassmen as well. "We'll be offering membership to students of either gender," Karp said. "A lot of times juniors and seniors don't think they can join a sorority, but colonizing a new sorority is the perfect time for older students to get involved."

Delta Phi Epsilon hopes to acquire housing for its future members.

Nu Delta fraternity receives IFC sanctions

MIT fraternity Nu Delta faces two sanctions by the Interfrater- nity Council (IFC) after hosting an unregistered event last Friday that violated Pre-Orientation rules. Nu Delta has been prohibited from holding "jaunts," or off-camp events, this Sunday, and must also pay a fine of $1,000 to the IFC by Sept. 20.

Nu Delta is being held responsible for violating four Pre-Ori- entation rules and one Risk Management policy. Nu Delta was punished for allowing freshmen into the fraternity house, being near alcohol being served to freshmen, and holding an event during the Pre-Ori- entation period.

To avoid a potentially costly Judicial Committee hearing, Nu Delta admitted to violating IFC rules during an administrative resolution meeting with the IFC Risk Manager and IFC Judicial Committee Chairman.

By avoiding a formal hearing, the fraternity may have avoided even more severe sanctions: adminis- trative resolutions can often lead to less stringent punishments.

Oshai Onuma ’16, vice-presi- dent of the IFC, told The Tech.

—Ray Wang

PREPARED FOR THE EAST CAMPUS... by 10 a.m., roller coaster continued through Monday evening.

Rare hurricane hits Cape Verde

By Vince Agard

Although Tropical Storm Erka dissipated before coming close to the United States mainland, the Atlantic hurricane basin is not entirely quiet. Earlier this week, Hurricane Fred became the first known tropical cyclone to strike the Cape Verde Islands while at hurricane strength in over 100 years. Fred passed through the group of islands in the eastern Atlantic on Monday with sustained winds of 75 mph (120 km/h)—strong enough to be considered a Category 1 hurricane on the Saffir-Simpson hurricane scale. Thus, Fred became the first known hurricane to impact Cape Verde since 1916.

After yesterday’s high temperature of 96°F (35°C), a frontal passage this afternoon will bring temperatures back down to more seasonable levels for the weekend. A shower or thunderstorm is possible during the afternoon and evening as the cold front passes through from the northeast. Behind the front, temperatures will be moderated by the cooler air mass pushing in, and by a stiff northeasterly breeze coming in off of the 69°F (25°C) Massachusetts Bay. After a breazy, but mostly sunny day on Friday, things will calm down a bit, yielding sunny and pleasant weather for the remainder of the Labor Day weekend.

WEATHER

CORRECTIONS

An article about the closing of the Metropolitan Storage Warehouse printed in last week’s issue of The Tech said that customers were to move belongings from the building by Oct. 30; in fact, the majority of customers were not affected by the closing and do not need to move their belongings by that date. A brief in last week’s issue incorrectly stated that 14 projects were submitted for consideration for an MITx grant; in fact, 25 proposals were submitted.

Last week’s Daily Cordination announced that FYRE results would be released at 2 a.m. on Wednesday. Sept. 2. In fact, those results were scheduled to be released at 3 a.m. in the morning.

Extended Forecast

Today: Morning sunshine with a chance of showers or thunderstorms in the afternoon. High 84°F (29°C). Winds E at 5-10 mph.
Tonight: Cloudy with a chance of showers or thunderstorms early, low 66°F (19°C). Winds NE at 10-15 mph.
Tomorrow: Mostly sunny, high 73°F (23°C). Winds NE at 10-15 mph.
Saturday: Sunny, highs in the mid 70s °F (24°C).
Sunday: Sunny, highs in the low 80s °F (28°C).

Sorority seeks house despite Institute’s Greek village plans

If necessary, will ‘enter the conversation’ on village

New Sorority, from Page 1

The search for a new sorority began in September 2014, when the MIT Panhellenic Council voted unanimously to open the campus to extension. Delta Phi Epsilon applied to be considered as an addition, presented against two other sororities, and were ultimately selected in mid-March 2015.

According to an email sent out at the time, Delta Phi Epsilon was chosen “because of the close alignment between their values and the values of MIT. As well as their strong emphasis on their members and their development.”

“We’re a nonsectarian sorority that believes in diversity,” Karp said, including “diversity of thought, diversity of background, diversity of what [members] are interested in.”

“A lot of our values and our mission would be relevant to any woman at MIT who wanted to develop into the best version of herself, and who wants a supportive group of women who will help her reach her goals,” said Karp.

Delta Phi Epsilon was founded at New York University Law School in 1897. The organization currently has 106 active chapters, including one at Concordia University in Canada, making it an international sorority. Notable alumnae include U.S. Senator Barbara Boxer and Judith Rodin, who became the first female president of an Ivy League school during her tenure at the University of Pennsylvania.

The sorority’s main philanthropic contributions are to the Delta Phi Epsilon Educational Foundation, the Cystic Fibrosis Foundation, and the National Association of Anorexia Nervosa and Associated Disorders. Its motto is “to be rather than to seem to be” and its mascot is the unicorn.

The Tech is looking for interactive graphic designers to join its online media team.

No experience necessary. We’ll give you the tools to get you started.

This is a great way to gain valuable job experience, build a strong web portfolio, and create designs that will be submitted for national awards.

For more information, email join@tech.mit.edu
HELLO!
WE MAKE THE TECH, MIT'S STUDENT NEWSPAPER!

If you like writing, graphic design, photography, business, technology, (or pretty much anything else)
there's a place for you here!

So if you think you might be interested, or even if you just want to see what we do, join us for dinner in our office on the fourth floor of the Student Center (W20-483) on Sundays at 6 pm, or email us at join@tech.mit.edu
"colleges and universities promote emotional wellbeing and mental health programming, reduce substance abuse, and prevent suicide among their students."

"This specific initiative was driven by a myriad of things," Barnhart said. "It is a continuation of our efforts on campus. That’s not to say that last semester wasn’t a really difficult one. One of the things we learned last semester is how many members of our community really want to help. In that way, it shaped the design of the initiative."

As part of MIT’s four-year commitment to the program, the Institute administered the Healthy Minds Study. The survey yielded a total response rate of 28 percent. While 17 other universities participated in the study this year, Barnhart said that their names are kept confidential. However, she stated that MIT’s peer schools were included.

The Healthy Minds Study reported that the majority of MIT respondents (77 percent undergraduate, 65 percent graduate) agreed with the statement: “At my school, I feel that the academic environment has a negative impact on students’ mental and emotional well-being.” In contrast, only 36 percent of undergraduate students and 38 percent of graduate students nationally agreed with the statement. An MIT undergraduate student was also considerably more likely to list “I question how serious my needs are” as a barrier to seeking help (49 percent MIT, 34 percent national).

Among other findings, the survey reported that over half of MIT students (54 percent) regularly sleep for eight or more hours each night, while another 27 percent sleep for at least seven. It also found that only 38 percent of MIT students (graduate and undergraduate) exercise for three or more hours each week, whereas more than half of national respondents receive the same amount of exercise.

"What we’re trying to do with the MindHandHeart Initiative is to help students manage stress, manage time, manage MIT, “ said Barnhart. "We are working to ensure that our support system is as strong as possible and that students have positive experience of an MIT as possible. I think our commitment to this and the general interest of faculty, students, staff — the full community — in working on this problem speaks to the nature of who we are."

summer

Photography by Tech and Technique staff photographers
The series was filmed on MIT’s campus and the setting has a sort of hackathon-project presentation feel to it. The story revolves around a mind reading device, and the qualms privacy advocates have with such a technology. The story follows Vivian (Sally Guthrie ’14), Melanie (Carolly Vasko), Daniel (Ari Smith ’14), and Wendy (Nicole Dalton). Vivian spends a good deal of the time trying to convince Melanie that the mind reading device will help humanity, and conversely, Melanie spends most of the time trying to convince Vivian that such a device is a huge breach of privacy (although Melanie’s feelings towards the device do seem to fluctuate between revulsion and mild interest). Overall, the series is a thought-provoking and humorous reminder of the morally gray areas that accompany cutting-edge technologies.

The plot includes several good examples of using mind reading with good intentions, and producing only mixed or negative results. For example, Vivian employs her device to help push along the romantic interests of her friends — while some parties appreciate the information gleaned from the mind reader, others are not so thrilled. The show also points out that a mind reading device is the only way people can divulge too much information — glossing already does a good job of this. One of the main take-home messages is that just because we have access to information, or the ability to share it, it’s not always a good idea to take advantage of the opportunity to do so.

I was curious about the web series when its release was announced on Facebook this summer. I vaguely remembered hearing about Radical Rat Studios during my freshman year, but hadn’t heard a lot since then — it turns out that creating a web series from scratch is a long and arduous task, and the group certainly seemed to have their hands full. Still, I was curious about how the Inmost Thoughts project came into being, and had the opportunity to interview Sarah Coe ’16 who spearheaded the project.

MIT Student Cable had been around for decades, but Radical Rat Studios was started by Coe in 2012 as an unofficial club, but then merged with MIT Student Cable and the group began to focus less on cable and more on creating content for YouTube and the internet.

Coe was inspired to take a stab at a making a web series since she had been watching The Lizzie Bennett Diaries (a YouTube web series retelling Pride and Prejudice in a modern setting) and reading about the behind-the-scenes work that went into its production. She revealed that, looking back, she had getting a more realistic idea of the work that would go into the project in order to get filmmaking experience, the group wrote and shot a film called Prototype and entered it into the Inmost Thoughts Film and Audience Festival. The film won Best Narrative and Audience Favor.

Even while filming Prototype, Radical Rat Studios continued to think about their ideas for a science fiction web series. The group brainstormed for a premise — their ideas ranged from Harry Potter to hacking to conspiracy theories, but they ultimately settled on mind reading. “We wanted the show to be enriched by the culture of MIT, and a big part of that is thinking about invention, and discussing the ethics of technology and changing the world. We decided that telling a socially awkward girl who, with good intentions, invents a mind reading device to try to help her navigate the world, revealed Coe. The group hoped to inspire discussion and reflection on the repercussions of such a technology, and after the first showing of Inmost Thoughts, people began to talk about it.

Even though the project took over two and a half years to complete, Coe mentioned that at the end the project felt like they were rushing through the project trying to complete everything (though I’d add that this didn’t appear to affect the quality of the webseries).

Soon after deciding that the show would be centered around mind reading, the club’s writers got to work crafting a plot and cast the show by the end of IAP 2014. The entire series was shot over a densely packed sequence of six day-long shoots, and the scenes were sometimes shot out of order (episode 9 is the first episode they filmed). Coe said that shooting for the first time “felt like when you’re telling a story with your friends, remembering being a shared experience, and people take turns jumping in and out of the scene. Since the team had already been meticulously pouring over the script.

The fall 2012/IAP 2013: Radical Rat Studios began to hold meetings to brainstorm ideas for the story. Summer 2013: The writers coordinated remotely to work on the story and to create characters. IAP 2014: The full first draft of the series was completed (foliowed by many exports of editing), and auditions were held to cast the show. Fall 2013: Made a practice film prototype for the CMS Media Spectacle to gain filmmaking experience. Fall 2013: Finalizing the plot and script and deciding on a shooting order. Spring 2014: Radical Rat Studios shot the entire series over six shoots (about one shoot per weekend). February 2015: Introduced a sound/music team from Berklee. Summer 2014: The group took a well deserved break from the action. Fall 2014/Spring 2015: Post-production work including editing, special effects, color grading, and visuals. June 2015: released the final cut of the series on Youtube. May 2015: Premiered a rough version of the series on campus to ~50 people.

This summer, the MIT Student Cable Club (Radical Rat Studios) put out an 11-part web series called Inmost Thoughts.
A glimpse behind the curtains

Inside the Musical Theatre Guild’s fall production of *The 25th Annual Putnam County Spelling Bee*

At the beginning of every fall semester, the MIT Musical Theatre Guild (MTG) takes the stage in Kresge Little Theater to deliver a charming musical performance. This summer, MTG has been working on a production of *The 25th Annual Putnam County Spelling Bee*, a musical comedy telling the story of six middle schoolers as they compete to become a spelling champion.

I've attended many MTG productions over my years at MIT, and I've always wondered about what goes on behind the scenes. Students run every aspect of the performance: the direction, acting, set building, lighting, publicity, choreography, and many other components of a theatrical production that I never even thought about before.

The thing that surprised me — and first time director Hubert Hwang '07 — most was that a ton of work goes into the show before auditions even begin. The directorial staff meets well before auditions to hash out their rehearsal by briefing the stage to “compete” in the spelling bee. It was hilarious and nerve wracking (I was asked to spell a word that I couldn’t even pronounce after hearing it twice). One advantage of producing *The 25th Annual Putnam County Spelling Bee* over other musicals is that the group has more of an opportunity to make the show their own — expect a touch of audience participation, and keep your ear open for many MIT related jokes.

One thing that surprised me was that a ton of work goes into the show before auditions even begin. The directorial staff meets well before auditions to hash out their rehearsal by briefing the stage to “compete” in the spelling bee. It was hilarious and nerve wracking (I was asked to spell a word that I couldn’t even pronounce after hearing it twice).

One advantage of producing *The 25th Annual Putnam County Spelling Bee* over other musicals is that the group has more of an opportunity to make the show their own — expect a touch of audience participation, and keep your ear open for many MIT related jokes.

The group has a good deal of flexibility with this show, and it will certainly add comic effect that I’m sure the MIT community will appreciate.

In addition to Hwang, I met with Lindsey Wong ’16 (who plays Olive and is the Assistant Producer) and Carrie Fowler ’18 (who is the Assistant Director, Publicity Designer, and Choreographer). Because the group is entirely student run, members often wear a variety of hats for each performance (as you can see above). Since the shows demand a huge amount of work, and a variety of skills, students are encouraged to try new things. Fowler told me that just a few weeks ago, she picked up construction skills when on a whim, she decided to drop in on a set building session and ended up learning how to use power tools to build a structurally sound set of stairs.

Hwang revealed that he decided to try his hand at directing this particular musical because he thought many MIT students would relate to the characters and the situations they find themselves in. “The show is about failure and learning how to deal with it, and that is something every MIT student needs to learn.” I’m sure the average student here will see themselves in at least one of these characters — these were the kids in middle school who didn’t really fit in. As much as you want to root for all of them, only one can win, which is the tragedy of the show, but that’s life,” he said.

I witnessed only a brief portion of the show during the rehearsal, and I am really excited to see the full performance. In particular, I can’t wait to see how the audience members react to being called up to the stage to compete in the spelling bee alongside the actors. The show opens on Saturday, September 12, 10-12, 17-19 at 8pm, and September 6 at 2pm. Prefrosh get tickets at a 50% discount, so if you’re new to campus, don’t miss out!

Steve Jobs: A study in contrasts

The man with the focus of a monk, but none of the empathy

**Steve Jobs: The Man in the Machine**

Directed by Alex Gibney

Rated R

Now Playing

If you’re a fan of Steve Jobs, you probably won’t like this incredibly unfaltering documentary about the iconic tech innovator. For full disclosure, I’m typing this review on a Macbook Pro and I have an iPhone in my pocket, but after watching Steve Jobs: The Man in the Machine, I have to say, I sort of resent myself for purchasing them. To be fair, this documentary is incredibly opinionated, but after watching it you will certainly get a feeling that Steve Jobs was not a very nice person, to say the very least.

I was a little uneasy when I saw the two-hour runtime, but the documentary was incredibly informative and captivating, and I considered the experience a worthwhile.
Join The Tech’s Online Media department

We’re looking for students interested in:
• creating interactive data visualizations
• producing and editing video footage for the online platform
• developing The Tech’s online presence via social media

What you’ll get from the experience:
• thousands of people every day will see your work online
• a portfolio of projects and clips that will impress a future employer
• the use of professional software for free

No experience necessary. We’ll teach you enough to hit the ground running.
Email join@tech.mit.edu for more info.

Steve Jobs documentary depicts his harsh nature

The love expressed for Jobs upon his death was actually for the loss of his genius and future inventions, says director Gibney

Steve Jobs, from Page 15

while use of time. There was a nice balance of interviews, narration, clips from dispositions, and readings from news articles, which certainly helped to keep the viewer’s attention. Admittedly, I didn’t know a whole lot about Jobs before watching this film. I knew that he started Apple, that he was difficult to work with, and that he was known for stabbing co-workers in the back. Right now, I feel like I need to read a more moderate biography because my impression of the man is more negative than I would have ever expected. The documentary doesn’t seem to want for material, throwing jab after jab at Jobs. They include interviews with friends, past collaborators, and former employers (and even a monk who was his spiritual mentor) who illustrate just how difficult and cruel Jobs was as a boss (underpaying collaborators, manipulating workers, and ungraciously accepting resignations), as well as how much of a jerk he was as a person (his reluctance to pay a pittance of child support even though he was a millionaire and his insistence on parking in handicap spots). The documentary studies the contrast between the charismatic and iconic image Jobs emanated to the world, and the cold and manipulative demeanor known among those who actually met him (some claimed to have regretted taking a job with him within the first few days).

I was surprised to learn that Jobs aspired to become a monk. However, his mentor, Kobun Chino Otogawa, claimed that Jobs was “brilliant, but he [was] too smart,” and declined to train him as a monk. It’s ironic that Jobs held such spiritual aspirations because, as Gibney puts it, Jobs had the focus of a monk, but none of the empathy. Jobs found it hard to connect to others, but created technology that many claim connects us all (though others yet claim that smartphones and iPads only help to isolate us). Chrisann Brennan (Jobs’ high school girlfriend and mother of his daughter, Lisa) confirms the disconnect between his personality and his efforts to bring people together through technology when she states, “[Jobs] is a study in contrasts.” It isn’t hard to agree with her statement after watching the documentary.

If the documentary’s goal is to make you hate Steve Jobs, it is pretty darn successful. It was an incredibly emotional film to watch. The film opens with scenes depicting a worldwide wake for Jobs, depicting people laying flowers and lighting candles in front of Apple stores and YouTube clips of mourners’ reactions to his death. Though we might believe that these images show expressions of love for Jobs, Gibney suggests that it is really his products that we love and are mourning the loss of future creations—a reminder of our international addiction to Apple.

During one of the most heart-breaking and memorable scenes, Bob Belleville, who was the Director of Engineering at Macintosh from 1982-85, revealed that with the stressful work conditions and long hours, he lost his family while working for Jobs. To make things worse, Belleville still praised Jobs for his accomplishments. With tears in his eyes and his voice breaking, Belleville read something he wrote about Jobs, “[His] was a life well and fully lived, even if it was a bit expensive for those of us who were close.”
Solve will inspire extraordinary people to work together to solve the world’s greatest challenges.

The MIT Campus; Cambridge, Massachusetts
October 5-8, 2015
Fraternity, Sorority, and Independent Living Group Rush 2015

Welcome to the Daily Confusion for FSILG Rush 2015!

Greek and IGL life are huge on MIT’s campus, and while they may not be right for everyone, many people cite their affiliation as a key piece of what makes their MIT experience so fun and valuable.

To apply to rush, all FSILGs have created application processes on theMIT Rush Portal. To see a list of all the FSILGs and for more information on how to apply, visit the Rush Portal.

Fraternities

Alpha Delta Phi
Are you interested in meeting new people and getting involved in the social scene at MIT? Then come to the Alpha Delta Phi Rush Chair’s Social! We will be providing food and drinks, as well as an opportunity to meet our brothers and learn more about our fraternity. We cannot wait to meet you!

Chi Phi
Chi Phi is the second largest fraternity on campus and we welcome you to come and meet our brothers on Rush Day. We will be serving food and drinks, as well as providing information about our brotherhood and the Chi Phi experience at MIT. We encourage you to try us out! You won’t be disappointed.

Phi Delta Theta
Phi Delta Theta Rush Chair will be hosting a fun and exciting event on Rush Day where you can learn all about our brotherhood and meet our brothers. We’ll also have food and drinks. Come out and see what we’re all about! We hope to see you there.

Sororities

Sorority Recruitment

According to the MIT Panhellenic Association, 30 percent of MIT women belong in a sorority. Formal recruitment begins on Saturday, September 5, 2015. Registrations and applications can be found at http://panhel.mit.edu/recruitment-registration. The official schedule can be found at http://panhel.mit.edu/recruitment-schedule.

MESSAGES FROM FRATERNITIES

Alpha Delta Phi

Are you ready to clench your teeth while jet skiing, fear for your life while indoor skydiving, or live like royalty while eating a steak and lobster meal? Then come to 351 Massachusetts Ave in Cambridge, a home and where we congregate to eat delicious and fun food, and have lots of fun!

Chi Phi

The brothers of Chi Phi strive for excellence in everything we do, whether it be in the classroom, or in the boardroom. A group diverse in our nationalities, interests, and activities, the main goal of any Chi Phi brother is always success. However, the bonds shared between members transcend the common goal of success, as our brothers come together while living, working, and partying at our beautiful home located in Beacon Hill. As members make the most of our time at MIT, we develop bonds that last not just for years, but for life.

Chi Phi Rush Chair’s Social

Phi Delta Theta

The brothers of Phi Delta Theta pride themselves in excelling in all aspects of life. Our fraternity boasts varsity athletes, budding entrepreneurs, DFS, and scholars from a variety of courses. We are a diverse group of individuals that strive to be the best people that we can be. We have exceptional alumni who are proud that Phi Delta Theta is an experience that will change your life for the positive.

Vandaan Guarang, Technician Tricklee

Phi Kappa Theta

Phi Kappa Theta brothers are some of the most interesting guys at MIT. You can find varsity athletes, entrepreneurs, breakfasters, devoted coders, poker sharks, and more within the walls of our historic brownstone house. PKTs spend their summers in a variety of ways, from working at Google and Jane Street, to traveling across Europe, to building motorized skateboards. Though our backdrops and interests are diverse, we are united by our shared brotherhood activities.

MESSAGES FROM INDEPENDENT LIVING GROUPS

Epsilon Theta

ET is a dry, co-ed MIT listing group made up of about twenty humanities (known as ‘Thetas’). We’re known for our friendliness, quirky sense of humor, and kindness for baby ducks. On a typical afternoon at ET, you can find us playing board games, swinging a playground across the street, shooting each other with Nerf guns, playing video games, watching bad sci-fi, and enjoying a meal prepared by our cook. Look for the yellow duck in Lobby 7 at the times listed. Check us out at et.mit.edu! —Big Duck

Fenway House

Fenway House is a co-ed living group located in the Fenway-Kenmore area of Boston. Our eighteen humans and one cat share a five-story brownstone featuring musical instruments, bathrooms and bedrooms with custom lots and strange back stories, a library decorated with dangerous wallpaper, a cozy music room with comfortable couches and a projector, a mysterious dungeon filled with hidden treasures, and shockingly affordable rent. We welcome members from all over the world with a variety of passions. Our close-knit community is based on anarchic principles and mutual respect. We’d love to give you a house tour!

— Kabbaah the Cat

pika

We are a continuing experiment in cooperative living. We cook together, clean together, and make all house decisions by consensus. There’s art on every wall, instruments everywhere, and spontaneous amateur parties in the kitchen. Our pantry tells if you leave it open, there’s a three-story firepole right above our chicken coop, and our rooms have bizarre names. We’re immensely difficult to summarize – if you want a place that is weird and wonderful, that loves roast- ing vegetables, that’s sex positive and queer friendly, independent and thirsty, artsy and nifty, we might be the place for you. Give us a visit.

— JudJud

Student House

Welcome to MIT Student House! We are a non-Greek co-ed Independent Living Group (ILG) at Kenmore Square, Boston, across the Charles River from MIT. Consisting of 22 undergraduate students, we are a sup-portive, friendly, close-knit community. We are perhaps the most diverse group at MIT, with members from more than 15 countries majoring in variousCourses. As a community, we enjoy delicious home-cooked din- ners together every Sunday to Thursday. We have weekly social nights and movie nights, in addition to organizing our Thanksgiv- ing Formal and Spring Formal.

Women’s Independent Living Group (WILG)

The Women’s Independent Living Group (WILG) is one of the few all-female housing options at MIT. We’re an independent living group just a 5-minute walk up Mass Ave that houses about 40 residents. WILG was founded with the belief that a group of hard-working women can manage their own house, and we’ve been doing just that for over 30 years. Upperclassmen who join WILG can move in immediately, and Fresh- men can become non-residential members before moving into the house Sophomore year! Check out our rush event schedule at wilg.mit.edu/rush.

— Wilma Wilg and Honey Wilfred, our stuffed bear

You’ll find a variety of personalities at Sigma Nu including movie aficionados, athletes, weightlifters, poker players, and aspiring bartenders.

Whether you’re grabbing a bite at the famous Boston Burger Company or catching a Red Sox game at nearby Fenway Park, there’s always something to do near Sigma Nu. Stop by and meet the brotherhood!

— Daniel Lesser

Tau Epsilon Phi

Tired of campus? Want something different? Have we mentioned that we’re a co-ed fraternity? The rules we follow are the rules we choose ourselves. It’s a lot of responsibility to govern yourself, but hell, you’re an adult, and we’re sure you can handle it.

dsp is many things to many people, but for all who live here it’s first and foremost a home, which doubles as our culinary re- search lab, covert operations center, artistic studio, and philosophical playground. It’s not right for everyone - nothing is. Some, though, find a family where they can thrive as never before.

— TEP Brothers

Independent Living Groups

Women’s Independent Living Group (WILG)

The Women’s Independent Living Group (WILG) is one of the few all-female housing options at MIT. We’re an independent living group just a 5-minute walk up Mass Ave that houses about 40 residents. Sorority Recruitment
Saturday, September 5, 2015
12:00 PM - 2:00 PM Phi Kappa Theta Roostdeck BBQ. Here at PKT, we like to start things off right. Come enjoy burgers, hot dogs, and cold drinks on our rooftop overlooking the Boston skyline.
12:15 PM - 5:00 PM Chi Phi Chi Phi Open House and Barbecue. Come meet the brothers of 32 Her- feld St. and tour our house. Enjoy freshly smoked ribs, pulled pork, coleslaw, and homemade cornbread.
12:15 PM - 3:30 PM Sigma Chi Erotic Meats BBQ at Sigma Chi. Come over to 532 Beacon St. and try some exotic meats like alligator or ostrich. You will also be able to meet some of the brothers along with taking a tour of the house.
1:00 PM - 5:00 PM Theta Delta Chi TDCarnival. Join us in our courtyard for a tour of the house. We’ll have all your favorite old-TDCarnival. Join us in our courtyard for a tour of the house. We’ll have all your favorite old-ve-stories! We’ll have all your favorite old-
2:00 PM - 4:00 PM WILG Minute To Win It! Compete with your friends in ridiculous and fun 66-second challenges! Do you have what it takes? Maybe you’ll win some awesome prizes.
2:00 PM - 4:00 PM Alpha Delta Phi Soda! Satisfy ALL YOU CAN EAT AND FREEEEEE!!!
2:30 PM - 6:00 PM Phi Kappa Theta Smoothies, Wings, and Games. Who doesn’t love fresh smoothies and delicious wings? Take a tour of our awesome house, meet our brothers, and enjoy in-house entertainment!
3:00 PM - 3:00 PM - 6:00 PM Theta Delta Chi TDCram Smash. Keep the energy going after orientation and get hyped for classes next week by smashing an old car to pieces with a sledge-hammer. If you can tear the piece off the car, it’s yours to keep.
3:30 PM - 6:00 PM Sigma Chi Sigma Chi House Tours. Grab some food off the grill and take a tour of the newly renovated Sigma Chi house at 532 Beacon St. Come meet some of our brothers and learn about our history.
4:00 PM - 4:15 PM - 5:15 PM Tau Epsilon Phi Bleached T-Shirt Design. Make your own stenciled and bleach-washed shirt. Caution: Odorizers (but...) 6:00 PM - 6:00 PM Phi Delta Theta Juicy Steak and Fresh Lobster: Dinner at PhiDelt. Fill up on the finest meats and seafood Boston has to offer and visit our five-story mansion in Kenmore Square, minutes from Fenways Park.
6:00 PM - 7:00 PM Alpha Delta Phi The Original Steak and Lobster: Traditional ASPI style. You’ll love it.
6:30 PM - 8:30 PM Sigma Chi Kappa Theta Lobster and Clam Chowder. Our chef serves up authentic Boston “chowda” and juicy lobsters cooked to perfection. Enjoy a classic dinner with Boston’s finest seafood!
7:00 PM - 7:15 PM - 8:15 PM Tau Epsilon Phi Spice Cream. Spice Cream: Final Showdown. Which spice is best in ice cream?
8:00 PM - 10:00 PM Sigma Nu Bacon and Chocolate. Tired of eating steak and lobster all day? Come clean your palate with some good, “fashioned bacon and chocolate”
9:00 PM - 11:15 PM Tau Epsilon Phi ROBELEC. 1000 pounds of non-Newtonian fun! Towels and spare clothes provided.
10:00 PM - 2:00 AM Chi Phi White Out Party. MIT’s biggest rush event for the past 15 years. Come listen to the DJ Scuba drop the beats all night.
10:00 PM - 2:00 AM Sigma Chi Sigma Chi-Lighter Party. Come to S52 Beacon for as DJ’s Dom and Matt bring down the house for our first party of the semester.
10:00 PM - 11:45 PM Phi Kappa Theta PKT Midnight Beach Party. You won’t want to miss our kick-off party. Sick beats, tropical drinks, and one of the hottest DJs in Boston.
10:00 PM - 10:00 AM Alpha Delta Phi Building 7: Underground CITe MIT has endless miles of tunnels underneath campus. Zoom around underground and demolish the opposition in the largest event of Rush.
Sunday, September 6, 2015
1:00 AM - 3:00 AM Phi Delta Theta FIFA and Wingo. Come try and beat us at FIFA. Even if you can’t kick back and enjoy endless wings, ca-
tered from the finest local cuisine.
10:00 AM - 10:00 AM - 2:00 PM Chi Phi F1 Racing with Chi Phi. America is all about speed. Hot, nasty, bad ass speed.
10:00 AM - 4:00 PM Sigma Chi Salisbury Beach: Sigma Chi Beach Trip. Join the brothers of Sigma Chi for our annual beach trip. See if you can beat Spiderball world champi-
on Ryan and Nato. Breakfast will be provided before we embark for the beach.
12:00 AM - 12:00 AM Phi Delta Theta TDCombat: Cardboard and Cate-
push. Help us build a trebuchet dur-
ging the day and then test it at dusk. Doned in cardboard armor we will begin battle and test our new ma-
chine. Expect to be `Doc`ed in cardboard armor.
1:00 PM - 6:00 PM Phi Delta Theta Skyventure NH: Indoor Skydiving. Experience the sensation of drop-
ing thousands of feet through the air in a state-of-the-art wind tunnel. No parachute required.
1:00 PM - 6:00 PM Phi Kappa Theta Boston Paintball: Cheeked Paintball with PKT. Come join us for an immense all out war on the battlefields of PKT. Just don’t get shot.
2:00 PM - 2:00 PM - 3:00 PM Sigma Nu Water Balloon Capture the Flag. Tired of playing your boring, everyday sports? Come play Capture the Flag with a unique twist.
3:00 PM - 7:00 PM WILG Henna, nails, and crafts. Get INKED! (just for -two weeks.) get crafty, or get an amateur mani-
cure from a WILGlette at this classic and laidback WILG event.
4:00 PM - 5:00 PM Alpha Delta Phi Charles River: Pirate Battle on the Charles. Take to the seas and engage in water warfare and have boatloads of fun on the famous Charles River!
5:15 PM - 6:15 PM Tau Epsilon Phi McDermott Dot (in front of Green Building) Steal Balloon Battle. No parachute required.
7:00 PM - 10:00 PM Phi Kappa Theta Poker Tournament. Every PKT has the hottest poker tourna-
ment, run by the founders of MIT PokerBots. Be the last standing and take home an Apple Watch!
8:00 PM - 9:00 PM WILG Cheesecake & A Cappella. Enjoy a live performance from the BU All-
10:00 PM - 10:00 PM Theta Delta Chi Dance Lessons. Give us two hours of your time and you’ll be able to do things you never thought you could.
10:00 PM - 10:00 PM Theta Delta Chi Latex. As you indulge in one of the delectable flavors of WILG’s signa-
ture homemade cheesecakes.
10:00 PM - 10:00 PM Sigma Chi TDCarnival. Join us in our courtyard for a tour of the house. We’ll have all your favorite old-TDCarnival. Join us in our courtyard for a tour of the house. We’ll have all your favorite old-ve-stories! We’ll have all your favorite old-
10:00 PM - 10:00 PM - 10:00 PM Chi Phi 3D Dodgeball with Chi Phi. Come see if you have mastered the five DJ’s at SkyZone’s indoor trampoline park in one of the most competitive events of rush.
11:00 PM - 11:00 PM Phi Delta Theta Skyventure NH: Indoor Skydiving. Experience the sensation of drop-
ing thousands of feet through the air in a state-of-the-art wind tunnel. No parachute required.
11:00 PM - 11:00 PM Phi Kappa Theta Boston Paintball: Cheeked Paint-

MIT football team excels in school and on the field

Martinovich discusses challenges faced by players when balancing their activities

Football, from Page 11

 requirement of an excellent academic record?

CM: It is difficult and time-consuming. We have to cast a very large net to gather as many names across the country as we can. The good thing is because of our national academic reputation, the qualifying students are definitely interested especially if they have a passion for mathematics and science. So, we have to identify the students among them who can really excel on the football field. Those kids are out there and we have been having some success in finding them and that has helped us to be competitive as a program.

TT: On one hand there are obvious challenges student athletes’ face, such as taking a regular dose from the fire hose and being up for the challenge come game-day, but do you notice any advantages of having such bright, motivated students on the team?

CM: If you talk to any of them, most of them will tell you that they do better academically during the season than they do in the off season because they have to be much more regimented and structured with their schedule. They have to really be good at their time management skills. They have such a limited amount of time allotted to attending classes, studying for tests, doing the p-sets, practicing and studying films and doing the things they need to do on the football field. That makes them very disciplined and regimented. In the off-season when we are not practicing everyday, they are lifting weights and doing off-season training and have more free time. When 18-21 year olds have more free time, do you think they study more or procrastinate? They procrastinate. It’s human nature.

TT: Being an elite academic institution, how difficult is it for the student athletes to balance academics with the grind of a football season? You have a mentoring system that includes something called “life scheduling” — could you please elaborate?

CM: We help the freshman especially to make the transition from high school to MIT, which is tough. They were one of the smartest students in the class if not the smartest in high school. Once they get to MIT, they realize, they are one of many and they are going to be challenged at everything.

One of the things we try to get across to them is it is okay to ask for help. You need to be able to collaborate with other people while studying and doing p-sets and so on because that is the MIT way. We are helping develop the future leaders of the world and the only way the world’s problems get solved is when great minds collaborate.

I have freshmen plan out all 7 days a week. For the 5 weeks till the red flags go out, they hand me a life schedule at the begin of the week, where they have planned when they are going to class, study, solve p-sets, go to practice, watch film, sleep, eat, and call home. That way you have less stress and yet are able to accomplish everything.

TT: Going back to last season in that crucial playoff game, you were down 3 points down with 48 seconds to go and no time-outs left. Was that the most thrilling point of the season? Can you take us through the play calling and that experience?

CM: That scenario was something we work on a regular basis. We work on two minute-drills both offensively and defensively. So we knew what type of calls we like to help us get the ball down the field. With no time-outs remaining, it is important to be able to run our field goal unit to kick the field goal. That is something we work on every Friday, just for that scenario. I have been coaching for 22 years now. That’s the first time that a scenario played out in a game. We have practiced that scenario every Friday each of the six years I have been here. It came to fruition. It worked.

TT: What is off-season like for coaches? What do you do to improve your skill set?

CM: You are either getting better or getting worse. You never stay the same. My staff and I are trying to improve ourselves as coaches through different professional development programs or by going to clinics put on by other coaches. Several of us travel to the American football coaches’ convention every year. All premier coaches from all different levels are there speaking on an assortment of topics. If somebody has success doing something a certain way then we try to see if it is a fit for what we do. The off-season for the staff is split between professional growth and recruiting. 75 percent of the time goes into recruiting. Recruitment is a year-long process at the college level now.

TT: Have you noticed a change in perception since the historic last season? Do you feel an increased level of excitement on campus or in perception since the historic last season?

CM: I think so, it will be interesting to see once classes start again. I think more people on campus at least know we have a football program whereas when I first got here 7 years ago, I am willing to say there were a lot of students on campus who did not know MIT had a football program. We have turned the page from last year. We keep it simple We have a process and it has been successful the last few years. The standard is much higher for our play- ers. They have higher expectations from themselves and hold each other accountable. We shall see how it goes. A big part of it is staying healthy which is not something we can control too much.

TT: Wish you all the best for a new-season ahead. Hope you win the division and embark on a play-off run? Do you have any message for folks on campus, particularly the freshmen?

CM: To the non-varsity athletes, I encourage you to come out and support the varsity athletes. They are just like you and they work very hard at what they do just like you. Work very hard at what you do no matter what. We encourage our athletes to go and encourage teammates outside the football field. It will be great if this campus became more of a family and sup- ported each other in everything we do outside of academics.

It would be great to come together for positive things and sup- port each other whether it be a game on Roberts Field or a play in Kresge Auditorium or some event on East Campus. I would love to see that kind of support across the board from the student body.
Photography by Robert Busch — The Tech

On Sept. 1, East and West Campus took to Killian Court in the Great Water War of 2015. The two sides lined up with their water guns, balloons, and cannons, as well as with their brightly painted shields and bodies. The two sides charged valiantly into battle to engage in fierce close combat, pool noodles flailing wildly. In the end with both sides drenched, all joined in chanting MIT and met in the center to shake hands.

Water Wars!
