A number of the various courses will in turn take charge of the third page of the regular daily issues where our friends, the local statisticians, may reach them.

The following courses will be given:

Course VII
Friday, Oct. 7
Course VI
Wednesday, Oct. 5
Course III
Saturday, Oct. 1

The third page will be given an account of the activities within the department and of students in the department. Although this will enable men to get a better notion of what is happening in their own course, the main idea of this third page is to let the rest of the Institute know what their colleagues are doing in the other departments.

Since the first conception of the Institute, the various branches have come more and more specialized and segregated, until now but little of the inner workings ever get over the border into any other course. This is the result of a new arrangement of small individual research rooms was made. It is carrying out an idea similar to that now in force in the laboratory of Physical Chemistry and in Engineering C where Prof. A. A. Noyes, it is very possible that research associates in Industrial Chemical Research will be appointed and that they will carry out many investigations in these branches.

A mercury blue-printing machine has been installed in the engineer's shop. It is a mechanical construction for making blue prints in one pass over 35 ft. 6 in. long. This does now what has been done with and combined with 35 in. A linear Engine. Printing: Assistant Professor F. J. Mure is to be Associate Professor of Organic Chemistry; W. C. Roy, Research Assistant, to be Assistant Professor of Physics; and A. E. Comstock, Assistant, to be Assistant Professor of Theoretical Physics: Dr. E. B. Spear, Instructor, to be Instructor in Physics; and Mr. David Carle, an assistant, to be Instructor in Chemistry.

Voluntary assistants made by the executive committee and approved by the Corporation include: Howard Arey, Louis D. Bowers, Ralph M. George, Fred R. Laffin, Frederick G. Perry, and Henry P. Thayer, assistants in the electro-chemical laboratory in 9 Walker, and a new source for the power department in the industrial laboratories.

A number of these rooms were not used after the winter holidays and the upper shelf of the Mendenhall Engine will be used for the same purpose.

The third page this year may not be as successful unless all cooperate. The course representatives will be ready to work as an index to their work. This will enable them to appreciate the relative importance or value of the different works being carried on by the rest of the family. All must keep busy in order to do this well. Some have a better over-all vision to publicity, but where the unity of the family is required, a real appreciation of each others' efforts, it is a part of their duty to offer their work to the attention of others.

Further notice: the following list of dates will be repeated every week:

Course I: Oct. 7, 14, 21, 28
Course II: Oct. 7, 14, 21, 28
Course III: Oct. 7, 14, 21, 28
Course IV: Oct. 7, 14, 21, 28
Course V: Oct. 7, 14, 21, 28
Course VI: Oct. 7, 14, 21, 28

A list of the representatives will be given as soon as it is completed.

The department of modern languages at the Institute comes in for its share of statistical interest. The attendance card is arranged for the student to give the necessary data.

As the government at Washington demands certain information in regard to our numbers, it is expected that the collection of statistical interest the attendance card is arranged for the student to give the necessary data.

The address card is used continually for the purpose of answering the questions that are being constantly asked by students and the faculty. The back of the card gives him the information that he needs for the future.

Besides these blanks required of all students, most students are asked to fill out the card bound for the Alumni Advisory Council on Athletics. This card gives much time and energy to the upkeep of wholesome athletics at Dartmouth, and it is the same card that is collected at the time of each year in making plans for the year.

(Continued on page 2)

CALENDAR

Tuesday, Sept. 27
12:00—Union Dining Room opens.

Wednesday, Sept. 28
10:00—Regular exercises begin.

Friday, Sept. 30
7:30—T. C. & A. Reception to freshmen at the Union.

Saturday, Oct. 1
6:30—The Tech freshman dinner at the Union.

Registration material at Tech may, at a glance, seem complicated, but with the intelligence that is assumed of its student body, the forms have been constructed with the teachers and the officers of the forms are readily understood.

Each year, the marks being sent in over the opening of the term and that the forms for records can be circulated among the teachers in ample time for the first intermediate examination records.

As the government at Washington demands certain information in regard to our numbers, it is expected that the collection of statistical interest the attendance card is arranged for the student to give the necessary data.

So far the school itself is concerned the attendance card is a petition to the Faculty on the part of each student for admission to the subjects desired by him. It is probable that students fail to present cards it is possible to print these petitions in a form that abridges the necessary writing to a minimum.

For the first time, this year, students will fill out the attendance card and use it for the first and the second terms. As the cards will be collected and the office at the busy time of examinations in January.

The Roll cards supplement the attendance card, giving the names of all the classes. From this the rolls and the blanks for records sent to teachers are made.

In 1910-1911 the address card was furnished to each student. This year, the cards are used continually as an index of the various blank cards and is the answer to the question when asked by students and the faculty. It is possible to print these cards in a form that abridges the necessary writing to a minimum.

Tuesday, Sept. 27, 1910.

Hello 1914! 1914, Jessie!
Rogers Steps show signs of life again.

Have you subscribed for The Tech yet?

The bursar's office is as attractive as ever.

Who's your favorite in the World's Series?

Welcome to all! Had a pleasant summer?
Lots of 1910 men are returning as assistants.

Remember that $3.00 fine for late registration.

I love (?) my drinking cup, but oh you wretched!

Have you paid your tuition? How familiar that sounds!

With the advent of new freshmen, that old idea, time-honored, if nothing else, comes around that it is up to the sophomores to make as big a ripple as they can in the equanimity of the initial meeting or dinner of freshmen; and the freshmen in turn are expected to make themselves disagreeable to the sophomores. But such attempts are always marked by such a lack of comprehension, general enthusiasm, or at least a realization that their discomfiture is evidently a matter of but a few years.

Why tolerate them any longer? If the Institute was in a little village where such attempts might prove effective, another line of attack might have to be followed to show how childish such antics are. But we are in a big city and all these attempts have results that do not at all improve us in the estimation of those upon whom we depend for our very existence.

Every one will say that such outbursts are good as reliefs from our fast-tamed solemnity, but is this necessary? How many have ever felt any real relief after a ducking in the frog pond, a bouncing down Rogers' steps, a cut from a barbed wire fence, or any other of these pleasant reminders that sometimes last weeks after the event in the shape of colds, or worse.

There is an event which serves admirably as a salutary outlet for these animal spirits, and that is the Field Day. Here is given an opportunity for both sides to be given an equal chance, on the blemchers as well as on the field and it has none of the evil effects upon the reputation of the Institute.

If the two lower classes start this movement to abolish this "rough-house" they will not be characterized as lack of spirit, but they will show that they have been able to rise above those incident, one-sided, childlike pranks that are far from the real Tech spirit.

REGISTRATION

(Continued from page 1.)

The part that each student contributes when he registers makes a great sense of material that is received at the office within a few days after the opening of the term. The collecting and sorting of this is a task which could not be performed within the necessary limit of time were it not for the devotion and loyalty to their work of the assistants of the office. They cooperate so efficiently that the work of the school goes on unhindered by any hitch in the program of the year.

WALTER HUMPHREYS, Registrar.

MANY CHANGES

(Continued from page 1.)

The executive committee in session since the June meeting of the Corporation has also made the following appointments, subject to confirmation by the Corporation: Henry H. Keith, instructor in Naval Architecture; Carroll R. Beaton, Walter J. Brownell, Egdon S. Clark, Ralph W. Horne, and John P. Wentworth, assistants in Civil Engineering; Leroy B. Briggs, Deen Peabody, Lawrence Chapman, Luke E. Sawyer, Arthur P. Truette and Chester W. Wilson, assistants in Mechanical Engineering; Harold S. Anderson, research assistant in Inorganic Chemistry; and Gordon G. Holbrook, assistant in Naval Architecture.

THIS WEEK AT THE THEATRES.

BOSTON—The Round Up.
BOSTON OPERA—The Bohemian Girl.
CASTLE SQUARE—When Knights Were Bold.
CASYNO—Star and Garter Show.

FOOTBALL OUTLOOK

While a few of the eastern college football elevens were tried out against opponents Saturday, the real beginning of the playing season will come this week.

Every team almost has been practicing at least a week, and besides getting the players into physical trim, the coaches have done a little experimenting with plays and formations under the new rules.

Quite as interesting, however, in the coming practice games, will be the methods of defence that will be shown by the teams, as will also be the new styles of attack. The offensive side of the game has been in the minds of the coaches ever since the new rules were framed months ago, but it will take actual practice on the field to determine the value of theoretical plays, and this value of course is finally settled by the defensive methods that develop.

While not enough football has been seen this fall to give any definite idea of how the play is going to develop, the forward pass plays should be simpler, and the running plays made easier for the people on the sidelines to analyze and understand. There will be confusion, at first, over some of the finer points of legal and illegal, and of fair and foul play, but, all in all, the players should find the observance of the new rules easier than the observance of the old ones, and the game surely should be more intelligently understood for the average spectator.

Among the schools there is sure to be much wider leeway on legal as well as ethical points of the game, so that there is more chance for trouble to come in the event of incompetency.

This is one of the reasons why the rules committee has asked for a fair trial. It will not take the public long to find the observance of the new rules easier than they have for years.
