

# THE TECH

VOL. XXX. NO. 102

BOSTON, MASS., THURSDAY, MARCH 9, 1911

PRICE TWO CENTS

## ELECTIONS OF M. E.

### SOCIETY TUESDAY

New Officers will be Announced at the Banquet at the City Club

### NOMINATIONS ANNOUNCED

Ballots at Cage Tomorrow for Men who have Signed Constitution

Friday morning of this week ballots will be left at the Cage for all men who have paid their dues and signed the constitution. Anyone failing to receive a ballot, after fulfilling the above requirements, should see Foster Russell, Secretary.

Men who are unable to attend the banquet at the Boston City Club on Tuesday night, may hand in their ballots at the cage before five o'clock that afternoon and they will be counted with the others at the banquet.

Ballots will be provided with blank spaces which may be filled in by the voter should he desire other candidates for any of the officers.

All the live ones will be present at the banquet for which an extra fine list of speakers has been provided.

Nominations for officers of the Mechanical Engineering Society are announced as follows.

Chairman	J. A. Noyes, 1912. C. B. Rowley, 1912.
Vice-Chairman	R. B. Brownlee, 1912. Hall Sargent, 1912.
Secretary	Ralph Ferry, 1912. Mitchell Coffin, 1912.
Treasurer	A. F. Kenrick, 1912. Louis de Florez, 1912.
Governing Committee (three)	C. H. Carpenter, 1912. L. L. Custer, 1913. E. W. DeWitte, 1912. R. H. Scanlon, 1912.

## RESEARCH WORK IN COURSES X AND XI

### Investigations Being Carried On As Thesis Work For Graduation

In spite of the fact that in Chemical and Sanitary Departments, there seems to be at present a lack of excitement, there is being done in these departments a good deal of interesting research work by the graduating students. Mr. M. R. Sharf, who is working for a degree of Master of Science, is now investigating the disinfecting value of ultra violet light in connection with the purification of water. Under the direction of Professor Phelps, Mr. P. K. Brown is carrying on an investigation of the aeration of sewages as a means of purification. Both sanitary engineers are doing joint research work on hypochlorite treatment of water. Among others carrying on research work are Mr. E. C. Howe, instructor, who is working on the classification of intestinal bacteria, and Mr. H. C. Holmes, who is investigating the effects of moles on timber.

Professor Earle B. Phelps has lately submitted to the city of New York a report of his investigation of the pollution of New York Harbor. Professor Phelps had been carrying on the work with the help of Gen. Wm. M. Black of the U. S. Army, and the investigations extended about one year. Because of the fact that the report has not yet been officially printed we are unable to publish the results of Professor Phelps' work.

## CORPORATION MEETING

### HELD YESTERDAY

Nominations Made for Life and Term Members of that Body

### NO NEWS OF NEW SITE

Location Not to be Announced Until the Middle of April.

At the meeting of the Corporations yesterday the following nominations were made by the Nominating Committee.

Dear Sir:  
In accordance with Section II of the By-Laws, the following candidates for life membership in the Corporation are presented by the Nominating Committee of the Corporation:  
T. Coleman du Pont.  
Arthur F. Estabrook.  
John M. Longyear.

In accordance with Section III of the By-Laws, the Nominating Committee transmits to you the names of  
Henry Howard, '89,  
Henry A. Morss, '93,  
Arthur Winslow, '91,

who we recommend for term-membership by the Alumni Association. Enclosed are brief statements about the nominees for term membership.

For the Nominating Committee,  
Francis H. Williams,  
Chairman.

### Nominations for Term Members on the Corporation

Henry Howard, '89. Special student in Chemistry. Vice-President, Merrimac Chemical Co.  
From 1889 to date with Merrimac Chemical Co., first as a Chemist, later as Assistant Superintendent, Superintendent and Vice-President.

Chairman of Executive Committee of the Manufacturing Chemists' Association of United States; chairman of the Committee on Public Utilities, and member of the Metropolitan Improvement Committee of the Boston Chamber of Commerce; member of the Commission on the Workman's Compensation, Commonwealth of Massachusetts; organizer and first chairman of the New England Section of the Society of Chemical Industry; member of the Institute of Chemical Engineers of the American Electro-Chemical Society of the American Chemical Society.

Treasurer of the Second All-Technology Reunion; chairman of the Committee on Aeronautics appointed by the Alumni Council.

Henry A. Morss, '93. Graduate in Electrical Engineering. Vice-President, The Simplex Electrical Co., and The Morss & Whyte Co.

On leaving the Institute immediately entered the employ of The Simplex Electrical Co., and in March, 1895, became Director, and in December, 1903, Vice-President of that company. In January, 1905, was made Director and Vice-President of The Morss & Whyte Co., and in January, 1906, became a trustee of The Morss Real Estate Trust; holds all of these positions at the present time.

Served as President of the class of '93 for two years, 1908-09; is a member of the Technology Club, and has been a member of its Council; member of the Committee on Aeronautics, appointed by the Alumni Council.

Arthur Winslow, '81. Graduate in Mining and Geology. Mining Engineer. President and General Manager of the United States & British Columbia Mining Co., of the Liberty Bell Gold Mining Co., and of other companies.

Since graduation has been continuously

## AERO CLUB HAS NEW

### MOTOR AEROPLANE

Members Working Saturdays To Complete The New Machines

### BOTH ARE BIPLANES

Home Made Propeller Shows High Efficiency In Tests For Thrust.

After the Aero Club's success with gliders last year it now has in addition to a glider, a regular aeroplane pretty well completed in which they will do some flying "without a string to it", as has been necessary while their only motive power was an automobile.

The club's flyers are both biplanes, the larger of which will be equipped with an engine. The other is a glider which they will use when teaching a novice to fly. The latter is a descendant of the last year model which was partially wrecked in a smash up, but the new one is built so that it will be much more satisfactory than its predecessor. The control is simpler and more natural for an inexperienced flyer, and the plane is expected to be more stable. Its upper surface projects considerably beyond the lower, as is the fashion of Farman's racing machines.

The club has two propellers that the members have made themselves. One of these when tested with a two horse power motor, gave fifteen pounds thrust per horse power—a very good showing, as it equals the efficiency of the propellers used by the Wrights. Their engine is a new one built especially for aeroplane use and delivers a great deal of power in relation to its weight. It is two cycle and has four cylinders, giving a power stream whose steadiness will be of much use in the air.

The machines are now in the Kearns Machine shop in Cambridge, just across the Harvard bridge. There the club members may be found at work every Saturday afternoon and night.

engaged in different lines of professional work. Was for some years Assistant Geologist of the Pennsylvania Geological Survey. Subsequently was engaged in private practice as Engineer and Geologist in the Southern States, which work included the examination of mines in Virginia and North Carolina. From 1887 to 1889, inclusive, was in charge of the coal fields of Arkansas for the State. Subsequently was State Geologist of Missouri for nearly five years. During the years 1894 and 1895 was in private practice as Geologist and Mining Expert in St. Louis. Since the beginning of 1896 has acted as Consulting Engineer and as General Manager and President of various mining companies. This work has included the examination and development of many different properties and the successful inauguration of operations at several mines. Is the author of a number of reports and publications on geology and mining subjects, published by different States and in the transactions and proceedings of scientific and professional societies. Has been one of the managers of the American Institute of Mining Engineers, and during 1902, President of the Colorado Mine Operators' Association; is a fellow of the Geological Society of America. Now makes his residence in Boston, with headquarters there for the direction of mining work.

The President announced through his secretary that there would be no definite plans for the new site at the meeting. The location of Technology's new home will not be made public until the middle of April.

## CHAMPIONSHIP RELAY.

### RACES NEXT MONTH

Pennsylvania to hold Seventeenth Annual Intercollegiate Relay Races

### ALL BIG COLLEGES REPRESENTED

Estimated That More Than 250 College and School Teams Will Compete.

Notice has been sent to the college world of an event which will give Relay Racing and track sports new prominence. The University of Pennsylvania holds its Seventeenth Annual Relay Races this spring and they promise to be more important and interesting than ever before. All the big colleges including Harvard, Yale, Michigan, Chicago, Princeton and Columbia will be represented by fast teams. This guarantees a repetition of the magnificent racing that has made these carnivals for all that is highest class in field sports. Chicago will be represented by the wonderful runner Davenport, who holds the Western college championship for the quarter, and half mile, with the time of 48½ seconds and one minute, 56½ seconds respectively. Michigan will send on Craig, the Intercollegiate 220 yd. championship holder, who equalled the world's record 21½ seconds. Foster, the Harvard captain, the sprinting champion of 1909 will also run in the sprints.

Pennsylvania enters the Eastern Intercollegiate Champion, Burdick, against French, of Kansas, the Western Champion in the high jump.

Chisholm of Yale, the Eastern High Hurdle Champion, will meet Edwards, the Western Champion, and so it will be in all the special events namely, the 100 yards, 120 yards high hurdle, shot, hammer, discus, broad jump, high jump, and pole vault. The College Relay championships will, as usual, bring together the fastest teams of the season.

The success of Harvard and Cornell this winter together with wonderful running of the Western teams in recent sports, guarantee that Pennsylvania will have to do almost the impossible to retain the three championships she won last year. Yale of all the big colleges, seems the only one which has not at least one team up to championship calibre. Cornell, Harvard, Chicago, Michigan, Illinois, and Princeton have high calibre teams out for one or another championship.

By reason of the number of school and college teams that have already entered, it is evident that April 29th, will see more than 250 college and school teams in competition.

## CALENDAR

### Thursday—Mar. 9

1.00—Cross Country Mtg.—Room A—Union.  
5.00—Technique Board Mtg.—Union.  
4.00—Musical Clubs Mtg.—Union.  
4.30—Orchestra Rehearsal—Union.

THURSDAY MARCH 9, 1911

The Battalion Hop is only one day off and arrangements are completed for the best dance ever held under the auspices of the M. I. T. Battalion. The committee has spared no pains to make the affair a decided success and moreover of course assumes all financial liabilities connected therewith. At present it looks as if the expenses will not be intirely met by the sale of tickets. This fact alone should be enough to influence the freshman in doubt, even at this late moment, to go to the dance and thus support his own Battalion Hop.

### MINSTREL DOPE FOR TODAY

"Quit Your Kiddin' Kiddo!"

Thus runs the strain of one of the song hits last year's Tech Show. But, dear reader, it is no "kid" when I announce to you that the first appearance of the Chocolate Soldiers Minstrel company in this city will take place in our beloved Huntington Hall, instead of the Union. Think of it! Classic old Huntington Hall, with its memories of all the old traditions of the Institute, is again to be the scene of a big, honest-to-goodness minstrel show, such as was performed on its boards years ago.

From the interest that is being shown in the advance notices of the company's gigantic production, I am led to believe that there are slightly in excess of 349 "live ones" at the Institute, and "there are new ones born every day!" When I wired to the general manager of the company at his New York office, that I had engaged Huntington Hall for the performance, he wired back immediately: "Full strength of organization will be sent. Spare no expense in advertising."

That the forthcoming production by our company has excited the interest of the members of "Who's Who at the Institute"—meaning the faculty—is evidenced by the "special" interviews that I received

from a hasty canvass of the Sttae. I am using a few of these today for advertising purposes, any and all of which may or may not be subject to verification by interested parties.

Dr. Maclaurin is quoted as saying: "Splendid, simply splendid! Circumstances are now admirably suited for such a production. Here's success to the Chocolate Soldiers!"

Dean Burton is of the opinion: "I do hope I shall be able to attend this function, for really I am heartily in favor." (Note. All this was accompanied by one of his usual good-natured smiles.)

Walter Humphreys, erstwhile Technology student and now registrar, opines: "Minstrel show? What do you want me to do? . . . Oh, do I think it's a good stunt? Assuredly yes, if proper registration for the production is made in my office."

Prof. Jackson, head of the electrical department, was heard to voice the opinion: "Er-ah-er, yes. I guess it's a good plan. Ah-er, surely I approve. Yes, I expect to attend."

Prof. Lanza, of the mechanical department, laid particular stress (that's just the word) on the comedy features of the production, saying: "Huh? It's a good thing. Certainly. Fine!"

Our old friend "Blackie" was most profuse in his admiration of the project, saying: "Ah, zee grand Moosick Show. Ah-ha, I like it! It ees good."

So much for the faculty opinions—but goodness, here I am grooling along, and forgetting that there are other "stories" to be set up for today's issue. Just one important announcement in closing.

Listen! I've got an idea! Marvellous—an advance agent with an idea! Remember our old friend "Charles" Sawyer, who used to discuss old guns and incidentally to teach freehand drawing,—well, as he would say "Gentlemen, we still have thirty seconds left."

So with one statement, wich for emphasis, I am asking to have set up in bold type I will leave you until the morrow—for Shakespeare once said "The morrow surely cometh after the night fleeth!"

**THE PRICE OF ADMISSION HAS BEEN REDUCED TO TWENTY-FIVE CENTS!** Remember only "two bits" to see the best minstrel show that ever was put across the boards. Get your tickets, gents!

Nuf Ced,  
The Advance Agent.

### IN THE LIMELIGHT

Be sure to wear your sidearms to the Hop on Friday.

All ready for the Minstrelsy denouement?

Have you heard about Mr. Carb's new play?

TECH HAS CLEW TO CHOCOLATE SOLDIERS

Identity of Advance Agent Nearly Disclosed by Telephone Yesterday

ALL "CENTRAL'S" FAULT

Anyway Chocolate Soldiers will Hold Show in H. H., Instead of Union.

Editorial note:—Owing to lack of time on the part of the night editor we are printing merely our acoustiphone record of this conversation.

"Hello—is this Bates?"

"Yes,—who's this?"

"The Advance Agent."

"Who?"

"The Advance Agent."

"Well who in time is he?"

"Why say do you ever read that paper of which you are General Manager?"

"Oh so you're the chap that's writing all this dope about the Chocolate Minstrels are you?"

"Yes that's me, and say I've got some good stuff for Thursday's Issue and I want you to be sure to leave me plenty of space on the second page, second column—see?"

"All right I'll do that, but who do you think you are anyway ordering the General Manager of *Tech* around just like you would order an errand boy?"

"Come now old man, don't get sore; you should be mighty glad that I'm sending in this daily dope. Think of all the space it takes up and of all the work it saves the News Staff."

"My dear Mr. Advance Agent, ever since your Minstrel Dope first appeared the whole office force have become amateur detectives and they swear that they will be able to disclose your identity before the end of the week."

"Well they won't, so don't let that worry you. Just tell everybody to read column two page two, tomorrow. By the way you might also say that owing to the big bunch of fellows who are going that we have decided to hold the big show in Huntington Hall instead of in the Union. Of course it won't be quite the same atmosphere that the Union offers but everything considered we think it is better to change. Besides a lot of the Profs. have gotten real excited about it and they want it held in H. H. so that they can come. That's all. Good Bye."

"Hey: hold on a minute:—Say for the love of Mike tell me what your name is, will you?"

"Yes, my name is \_\_\_\_\_"

To late—Central had broken the connection, or else the Advance Agent had hung up his receiver, and so the shroud of mystery still surrounds the "Ad Man" of the now famous "Chocolate Minstrels."

The seniors of Course III have recently made tests on classifiers of minerals. The tests were very extensive and proved most satisfactory. S. A. Guthrie, 1911, is making tests on the classification of lead, as part of his thesis work.
