COURSES II AND VI

ARE SPEEDY

Mechanicals and Electricals Show the Rest Their Winged Heels

H. G. WATKINS, FIRST

Freshmen Show up in a Manner that Startles the Sophomores.

The momentous question is settled. Courses II and VI contain the fastest men at the Institute. Course X struggles to keep the pace but Course I makes small pretense of being speedy.

In the Inter-course race Saturday, Courses II and VI made the low score of 19; Course X, 26; and Course I, 33. Since Course I had only four men running, the scores were made by the first four men in each course.

The day was rather cool for a track costume and the course was muddy. A brook twelve feet wide and two deep presented a formidable obstacle near the start. Another heart-breaking disappointment was the fact that the gate just before the Larz Anderson hill was closed, which necessitated the climbing of a ten foot wire fence.

From the start H. G. Watkins and A. F. Nye led. Following them in Indian file were C. W. Brett, R. D. Bonney, E. E. Ferry, D. L. Sutherland, E. M. Newlin, and C. S. Lee. Several yards separated this first squad from the rest of the field. There were few changes in this order from the start to Larz Anderson's except that the bunch was strung out in a longer line. Watkins and Nye were increasing their lead right along. Just before reaching the hill, Bonney, feeling the lack of training weakened, and lost his grip on third place to which C. W. Brett succeeded. After striking the road beyond the hill, Brett was seized with a cramp and in turn passed up third place to E. E. Ferry. Ferry refused to pass this position along and held on to it until he finished.

The men were well strung out at the finish. E. M. Newlin and C. S. Lee furnished some excitement on the track. Theirs was the only close finish of the day, Newlin winning out by one second.

The men that took the prizes were H. G. Watkins, I; A. F. Nye, '14, IV; E. E. Ferry, '12, VI; D. K. Sutherland, II; E. M. Newlin, '14, VI; and C. S. Lee, '14, X. Watkins time for the four and a quarter miles was 24 minutes, 45 seconds, a very good time considering the weather and the condition of the road. The next ten men finished in the following order: Wilkins, '14; R. D. Bonney, '13; McDonald, K. S. Johnson, '14; C. W. Brett '13; E. N. Turner, '14; Dewitt; R. E. Nute, '14; R. M. Ferry, '12; W. F. Herbert

ORCHESTRA TO FIGURE

IN TECHNOLOGY CONGRESS

The Orchestra will enter prominently into the affairs of the Technology Congress at Symphony Hall on Monday night, April 10.

Among the selections that will be played are "La Traviata" and "Raymond". In conjunction with the Glee and Mandolin Clubs, the Orchestra will play several Tech Songs.

The leader of the Orchestra, Mr. Eksbergian, states that more material is needed, especially second violinists, and that new candidates will have sufficient time to prepare for the coming event.

New candidates for the Orchestra may apply to Mr. Eksbergian, the Conductor, A. M. Eisenberg, Concert Master, or to N. E. Brooks, the Manager.

FUNERAL SERVICES FOR MRS. ELLEN H. RICHARDS MONSTER CELEBRATION

HELD IN TRINITY CHURCH

Beautiful Floral Offerings From Countless Friends Give Silent Tribute to Mrs. Richards' Memory.

By O. B. D.

Impressive by their simplicity and singularly appropriate in their sincerity, the funeral services for Mrs. Ellen H. Richards were held yesterday afternoon in Trinity Church, Copley Square. The Episcopal order for the Burial of the Dead was read by Rev. Alexander Mann, D. D., rector of Trinity Church, assisted by Rev. Mr. Prescott of Brookline.

Beautiful floral tributes, banked effectively around the entire chancel and choir of the church, gave silent tribute of the esteem in which Mrs. Richards was held by her many friends and by the many societies with which she had been affiliated during her long life of active service. Among the floral tributes were a number from the undergraduate body of the Institute, as well as from the faculty and alumni.

Accompanied by the honorary pallbearers, Dr. Maclaurin, Prof. Henry Crafts, Dr. Roger S. Williams, Dr. Noyes, Dr. Talbot, Dr. Sedgwick, Dean Burton and Sec. Merrill, the body of Mrs. Richards, resting in a simple gray casket was borne into the chancel at the opening of the impressive services. Professor Robert H. Richards, together with other relatives and intimate friends of the family entered the church with the body.

The Trinity Church vested choir of men and boys of fifty voices sang several hymns during the service, and an anthem was sung by Mr. Clarence Shirley. In accordance with a wish expressed by Mrs. Richards the services were made as simple as possible, there being only three hymns and an anthem in addition to the regular Episcopal service.

Special reservations were made in the

large church for Fellows, Faculty and instructing Staff of the Institute, with their families; the undergraduate body of the Institute; and the many societies and organizations with which Mrs. Richards had been connected. In addition there were present a large number of friends of Mrs. Richards, the church being completely filled.

The music rendered by the choir during the service was as follows:

Hymn "I Heard a Sound of Voices"..... Storer.

Hymn "Rise Crowned with Light"..... von Lwoff.

Anthem..... Mr. Clarence Shirley

Hymn "For All Thy Saints"... Barnby.

Following the services the body of Mrs. Richards was laid in state in the vestibule of the church. The body was then taken to Forest Hills for cremation, and burial will be in Mount Auburn cemetery.

The undergraduate ushers at the services included, Scott B. Putnam '11, Howard P. Ireland '11, Oliver D. Powell '11, John A. Urquhart '11, and Henry W. Van Hovenbergh '11.

Among the organizations which sent floral tributes are the following: Faculty, Corporation, Alumni association, Class of 1911, Chemical Society, Mining Engineering Society, Cleofan, American Home Economics Association, Association of Collegiate Alumni, New England Home Economic Association, National Educational Association, American Chemical Association, American Institute of Mining Engineers, Vassar Alumnae Association, Women's Association of the Massachusetts Institute of Technology, and the Women's Education Association. In addition to these there were a number of floral tributes from friends and relatives.

M. E. EXCURSION TO WALTHAM TO-MORROW

The Mechanical Engineering Society will hold an interesting and instructive excursion to the Waltham Watch Factory in Waltham Mass., to-morrow afternoon. The party will be divided into groups, each group having its own guide, and will inspect all of the departments of the factory.

The Waltham Watch Factory is one of the largest factories of its kind in the world. They employ over four thousand hands in the various departments.

The party will first visit the engine and boiler rooms which consist of three boilers of the B. and W. type, rated at 1500 H. P., and several 500 Kw. generators driven by compound engines of the latest type. The plant is also equipped with an Ingersoll Rand duplex air compressor and two Westinghouse automatic engines of 250 Kw. and 100 Kw. output.

There are many other interesting features which will be inspected by the engineering party. Several thousand watches are completed daily, and the rapidity of this operation is due to many delicate processes performed by automatic machinery. One machine to be inspected by the party, performs over one hundred different operations on a watch in a few minutes, automatically feeding in a solid plate of metal and turning out the finished one. Much of the work is also carried on by hand, and it is an interesting sight to watch these experienced hands at their work.

The party will leave the North Station on the 2.09 train and a large crowd is

SPRING MEET TO BE HELD APRIL 15th

This year's spring Meet, to be held Wednesday, April 15, is the most promising in years. It will be run on a very much larger scale than ever before, because of the fact that it is the only home meet and owing to the three meets away from town, the competition will be unusually close. Not only will the ring meet be of importance in itself but it will largely help to decide who will participate in the Brown and Dartmouth meets.

Men who come out for the weight events will have a very good chance to win a prize, for as yet, there are very few who signified that it is their intention to compete in these events. There is plenty of chance for Freshmen and Sophomores and it is hoped that a large number of them will come out; it is principally the lower classes who will make next year's teams. All '13 and '14 candidates should come out now, take part in the '13-'14 meet on April 8th and in that way get practice and experience in competition for the following week. The track is now coming into fine shape and by April 15 will be in splendid condition.

Cups will be given in three events, as follows: The Rockwell Cup, in the quarter mile; The Hurd Cup, in the 120 yard high hurdles; and the Batchelder Cup, in the mile run.

All the rest will be medals. The cups will be exhibited on the Union at an early date.

On the whole, the material out so far is quite promising and all signs point to the most successful Spring Meet ever held.

PLANS MATURING

Under the Auspices of the Electrical Society—Program is Being Arranged

F. J. SPRAGUE TO SPEAK

Definite Number of Tickets Printed makes it Imperative to Secure Tickets in Advance.

With the grand celebration of the professional societies under the auspices of the electrical engineering society but ten days away, it behooves members of said societies to purchase the necessary pasteboard strips which entitle the holder to the dinner and the speeches. The tickets are selling like the proverbial hot-cakes, and all indications point to a record crowd in the large Union dining room on the evening of April 12.

At a preliminary meeting of the presidents of the professional Societies, together with the program committee of the Electrical Engineering Society, plans were completed for the affair. All of the other societies are enthusiastic over the proposed student celebration in memory of the granting of the Institute's charter, and each society seems to be trying to outdo the others in the matter of the largest percentage of tickets.

Special music is to be provided for the evening, and it is planned by the program committee to have organized cheering and singing as a feature of the evening. Here again rivalry between the various societies is bound to spring up, as each is anxious to outdo the other in the line of cheers and songs.

President L. P. Ferris '11, of the electrical engineering left this morning for a flying trip to New York, and while there, he is to consult with Mr. Sprague, the guest of the evening, regarding a subject.

Definite announcement regarding the subject of the evening will therefore be made in these columns in the immediate future.

It is to be remembered that all who attend this truly student celebration, will have not only the pleasure and privilege of listening to Mr. Frank J. Sprague, one of the leading consulting engineers of the country, but will also be privileged to hear President Maclaurin, Dean Burton and Bursar Rand speak.

Remember the date—April 12.

MONDAY APRIL 3, 1911

In another column of today's Tech, appears a brief outline of the more important work of the Technology Christian Association this past year, and the plans for meeting the yearly expenses. These expenses can be met only by voluntary contributions, so the Association is obliged to follow the only course open to it; the unpleasant course of soliciting contributions from the members of each class.

The books of the Association at present show a deficit which must be cancelled, and a surplus should be left in the treasury with which to commence an active campaign next year.

From all appearances, the students highly appreciate the hand books which they receive at the beginning of the year and find them useful. The reception, too, which is one of the most successful meetings to bring Institute men together, is always attended in goodly numbers and is met with enthusiasm on the part of the student. It should therefore seem that every man would be eager to show his appreciation in monetary form and thus insure a repetition of these events next year. It is always hard work financing a thing after it is past, but the success of this campaign determines the continuance of these customs in the future. Let us hope then that every man will dig into his pocket for the amount that he can afford and aid the Association to cancel the debt of this year.

While we are speaking of the Association, let us correct a wrong impression that seems to be current. Although the Association has held very few meetings during the year, it has not been as dead as might seem to be the case. The members have shifted their eyes from themselves and many of them have been actively engaged in social work in the foreign settlements of the greater city. This is one of the most valuable fields of altruistic work which is open to the Christian Association.

There is quite a little clarification or distinction to that Perian Society poster on the bulletin board of Rogers!

The "Professional Societies" dinner etc. announcements may have been confusing. Freshmen are also invited to the affair.

If you were stung on Hook Night, Musical Night in the Union offers a chance to recoup one's fortunes and dignity.

THE TECH'S special issue on April tenth will be one hummer.

A fellow lost a book, put an ad. in the TECH, and got his book back. Advertising certainly pays.

Our Severe Loss The death of Mrs. Richards yesterday came as a severe blow to all with whom she has ever come in contact, and to more than her many friends here at the Institute.

Though her interests were by no means limited to Institute affairs, her entire life was at all times intimately connected with the life of Technology. As the first woman to receive a degree from the Institute, as the most enthusiastic worker for the woman students at the Institute, as the only woman instructor here, as the active and tireless worker in the department of Sanitary Chemistry, as the co-author of text books, in daily use, Mrs. Richards life was closely bound to the Institute and the best part of her life was devoted to the interests of Technology.

The mere cold recitation of the many things that Mrs. Richards has done for the Institute and its students, can not begin to show the warm place that Mrs. Richards holds in our hearts. The kindly invitations from Professor and Mrs. Richards to their students, gave many of us an opportunity to know them in their own home and to realize more fully the sweetness as well as the strength of her character, and to appreciate her wonderful and inspiring personality. Living her entire life unselfishly for the uplift of humanity, her influence will always live as an example for us to follow.

The Tech wishes to voice the sincere sympathy of the student body to Professor Richards in his bereavement.

A CORRECTION THE TECH regrets that the article in yesterday's issue headed "Foss vs State Aid was incorrect and misleading. President MacLaurin called the attention of The Tech to the fact that the Governor's recommendation of the payment of \$29,000 to the Institute is merely a matter of routine business, it being the approval of the last payment to be made under the grant of ten years ago. The person who wrote the article was entirely in misapprehension of the facts of the case, for the Governor made no statement whatever, in regard to the desired grant of \$100,000.

The **AUTOMATIC**

PISTOL

with a

SOLID

BREECH

You take no chances with a .32 caliber COLT Automatic Pistol: it's sound in construction, safe to carry, reliable in use.

Forging the Breech-bolt and Slide in one piece gives a solid support for the high-power cartridge used. If, through defective ammunition, a shell bursts, or excessive pressure is developed, there is no weak part to give way, nothing

can be blown back in the shooter's face; the Solid Breech is a shield.

Rapidity of fire depends only on quickness of shooter's finger. The COLT has proved quickest by actual tests—full magazine fired in 1 3-5 seconds. Every shot under control; every shot accurate.

The COLT is a HAMMERLESS Automatic Pistol with no projecting parts to catch in the pocket; no working parts exposed to become clogged and disable the action; cannot be accidentally discharged.

The COLT is flat, compact and powerful; perfectly balanced and fits the hand.

Catalog E mailed free.

IMPORTANT WORK OF
T. C. A. TO BE FINANCED
Campaign to Raise Funds to Cover Expenses of Hand Book and Reception

ACTIVE YEAR ANTICIPATED
With Graduate Secretary, Association Expects to have Banner Year of Usefulness.

It is customary for the Christian Association to solicit from students enough money to pay current expenses of the year. These subscriptions pay for the reception to the new men in the beginning of the year and also to cover a portion of the expense of the annual T. C. A. Year book. This year over a thousand handbooks were delivered; and about an equal number have been handed out every year. The work of getting these out has been done by the Christian Association and the Boston Y. M. C. A. and the expense has been borne by them. The books seem to be very much appreciated and are very useful to all the students at the Institute. The annual reception to the new men at the beginning of the year is open to all the students at the Institute. It is the opening for all branches of student activities. In the near future a number of men will solicit subscriptions and any help will be very much appreciated and will be very useful in getting into shape for next year. The Christian Association is planning to have a successful year next year with a graduate secretary. A few students have been teaching English to foreigners and next year an opportunity will be open to as many as can give up the time. It is hoped that in a few years, the Association will be permanently located in a dormitory of its own and plans are being considered at present.

TECHNIQUE SIGN UP.
SLIPS ISSUED

Plans for Rush Soon to be Announced
Book to be Best Ever

Technique Sign-up slips are being circulated all over the Institute in order to give everyone an opportunity to obtain a book. This will practically be your last chance to sign up as the edition is limited this year and every book will probably be accounted for before the rush, with the exception of the books used in the rush. The alumni will be given an opportunity to get books which are not spoken for by the under graduates, which means that unless every man who intends to get a book signs up now, he will have to take his chances of getting one in the rush. The place where the rush will be held will be definitely announced within a couple of days and if present plans materialize it will prove to be a very popular place which will allow everyone to see the strenuous endeavors of the contestants. The book is now in the press and will go to the binders in another week. Several new features are incorporated this year and a well balanced color scheme is followed throughout the book. The art work is exceptionally good and the cover design is the best ever. All in all, it is a well rounded out book and it behooves every man, who wants one to make sure that one will come to him. If you do not see any of the Beard in your building during the next week, the Technique office is open from four to six every day.

Continued from Page 1.

Every track man owes it to himself and the Institute to come out and at least enter the events on the fifteenth. On account of the large number expected to attend, grandstand seats will be sold.

M. E. Excursion Continued.
expected to be on hand, as everyone is invited. The trip will be obtained at reduced rates if tickets are bought of the committee.
