M. E. EXCURSION TO WALTHAM-TO-MORROW

The Methuen Manufacturing Company will hold an interesting and instructive excursion to the factory in Waltham, Mass., to-morrow afternoon. The party will be divided into groups each having its own guide, and will inspect all of the departments of the factory.

The Waltham Watch Factory is one of the largest factories of its kind in the world. They employ over four thousand hands in the various departments.

The party will first visit the engine and boiler rooms which consist of three hundred and fifty thousand dollars invested in them. Then they will visit the boiler and engine rooms which are equipped with automatic machinery. One machine to be inspected by the party, performs over one hundred different operations on a watch in a few minutes, automatically computing the time of each piece and turning out the finished one. Much of their output is of a very high quality.

The party will leave the North Station at 2:45 P.M. and return at 7:45 P.M.

SPRING MEET TO BE HELD APRIL 15TH

This year's spring Meet, to be held on Wednesday, April 15, is the most promising one in years. It is said that we have in store for the party a much larger sight than ever before, because of the fact that it is only one hundred years and one month since the great track was opened to the public.

The party will leave the North Station at 2:15 P.M. and return at 7:15 P.M.

MONSTER CELEBRATION

Under the Auspices of the Electrical Society—Program is Being Arranged

By F. S. SPARGUE TO SPEAK

Definite Number of Tickets Printed makes it Imperative to Secure Tickets in Advance.

With the grand celebration of the professional societies under the auspices of the electrical engineering faculty but ten days away, it behooves members of said societies to purchase the necessary postage stamps which will enable the holder to the dinner and the speeches. The tickets are selling like the proverbial hot-cakes, and the committee are working day and night in the large Union dining room on the evening of April 12.

At a preliminary meeting of the presidents of the professional societies, together with the program committee of the Electrical Engineering Society, plans were completed for the affair. All of the other societies are enthusiastic over the proposed student celebration in memory of the granting of the Institute's charter, and each society seems to be trying to outdo the others in the matter of the largest percentage of tickets.

Special music is to be provided for the events of the evening, and the program committee has organized a number of musical societies to give full effect to the occasion. There will be a concert and singing as a feature of the evening.

President L. P. Ferris '11, of the electrical engineering left this morning for a flying trip to New York, and while there, he is to consult with Mr. Spagurne, the committee chairman.

Definite announcement regarding the number of tickets to be printed before they are made in the immediate future.

It is to be remembered that all who attend this celebration will have only the privilege and pleasure of knowing to President L. P. Ferris '11, one of the leading consulting engineers of the country. He is to leave the city for the west on April 12 to attend the annual meeting of the American Society of Electrical Engineers.

Monday, April 3, 1911

In another column of today's Tech, there appears a brief outline of the more important work of the Technology Christian Association this past year, and the plans for meeting the yearly expenses. These expenses can be met only by voluntary contributions. The Association is desirous to follow the only course open to it: the simplest course of soliciting contributions from the members of each class.

The books of the Association at present show a deficit which must be cancelled, and a surplus should be left in the treasury with which to commence an active campaign next year.

From all appearances, the students highly appreciate the hand books which they receive at the beginning of the year, and send them useful. The reception, too, which many of the most successful members of the class, from the Institute men together, is always successful. Good work is much more common in the society than a few years ago. It is desirable therefore to see that every man would be eager to show his appreciation in hearty form and thus insure the repetition of these events next year. It is always hard work financing a class line after it is past, but the success of this campaign determines the continuance of these classes in the future. Let us hope then that every man will dig into his pocket for the amount that he can afford and aid the Association to cancel the deficit of this year.

While we are speaking of the Association, there is another point of view which we would urge to be taken care of. The members have shifted their eyes from themselves, and many of them have been actively engaged in social work in the foreign settlements of the world. This is one of the most valuable fields of altruistic work which is open to the Christian Association.

There is quite a little claque or distinction to that Penins Society gather on the bulletin board of Roper's. The "Professional Society" dinner etc. announcements may have been confining. Freshmen are also invited to the affair. If you were stung on the Hook Night, Mental Night in the Union offers a chance to recoup one's fortunes and dignity.

The Tech's special issue on April tenth will be one hummer.

Our The death of Mrs. Richards Severely yesterday came as a severe blow to all with whom she ever came in contact, and to more than her many friends here at the Institute. Though her interests were by no means limited to Institute affairs, her entire life was at all times intimately connected with the life of Technology. As the first woman to receive a degree from the Institute, as the most enthusiastic worker for the women students at the Institute, as the only woman instructor here, as the active and tireless worker in the Department of Sanitary Chemistry, as the author of text books, in college, Mrs. Richards life was closely bound to the Institute and the best part of her life was devoted to the interests of Technology. As the first woman to receive a degree from the Institute, she was destined to do things that Mrs. Richards has done for the Institute and its students, can not be shown that the warm place in Mr. Richards holds in our hearts. The studied invitations fromProfessor and Mrs. Richards to their students, gave many of us an opportunity to know them in their own home, and to realize more fully the love and devoted personality. Living her entire life uneasily for the uplift of humanity, her influence will always live as an example for us to follow.

We wish to thank the sincere sympathy of the student body to Professor Richards in her bereavement.

A THE TECH regrets that the Correction to the article in yesterday's issue headed "Fosse vs State Aid was incorrect and misleading. President Macalister called the attention of the Tech to the fact that the Governor's recommende payment of $25,000 to the Institute is merely a matter of the last payment to be made under the Act of Congress of ten years ago. The present time was entirely in misapprehension of the fact of the Governor's statement no statement whatever in regard to the desired grant of $100,000.

The Techie prints with a SOLID BREECH and Slide in one piece gives a solid support for the high-power cartridge used. If, through defective ammunition, a shell bursts, or excessive pressure is developed, there is no weak part in the way to give away. Everything can be blown back in the shooter's face; the Solid Breech is a shield.

The Chicago, Milwaukee, St. Paul and Pacific is ready to help you with the far eastern markets. The Chicago, Milwaukee, St. Paul and Pacific.

You take no chances with a 50 caliber COLT Automatic Pistol. It's sound in construction, safe to carry, reliable in use. There is a short breech bolt and Slide in one piece gives a solid support for the high-power cartridge used. If, through defective ammunition, a shell bursts, or excessive pressure is developed, there is no weak part in the way to give away. Everything can be blown back in the shooter's face; the Solid Breech is a shield.

The COLT is flat, compact and powerful; perfectly balanced and fits the hand.

If your Dealer does not sell COLTS, send your order to us.

Important Work of
T. C. A. to be Financed
Campaign to Raise Funds to Cover Expenses of Hand Book and Reception

Active Year Anticipated
With Graduate Secretary, Association Expects to have Banner Year of Usefulness.

It is customary for the Christian Association to solicit from students enough money to pay current expenses of the year. These subscriptions pay for the reception to the new men in the beginning of the year and also to cover a portion of the expenses of the annual T. C. A. Year book. This year over a thousand handbooks were delivered, and almost an equal number have been handed out every year. The work of getting these out has been done by the Christian Association and the Boston Y. M. C. A. and the expense has been borne by them. The books seem to be very much appreciated and are very useful to all the students at the Institute.

The annual reception to the new men at the beginning of the year is open to all the students at the Institute. It is the opening for all branches of student activities.

In the years future a number of men will soliciting subscriptions and any help will be very much appreciated and will be very useful in getting into shape for next year.

The Christian Association is planning to have a graduate year next year with a graduate secretary. A few students have been teaching English to foreign students and next year an opportunity will be taken to as many as can give up the time. It is hoped that in a few years, the Association will be permanently located in a dormitory of its own, and plans are being considered at present.

Technique Sign-up Slips Issued
Plans for Rush Soon to be Announced Book to be Best Ever

Technique sign-up slips are being circulated all over the Institute in order to give everyone an opportunity to obtain a book. This will practically be your last chance to obtain a book this year and every book will probably be accounted for before the rush, with the exception of the books used in the rush.

One of the books will be given an opportunity to get books which are not spoken for by the under graduates, which means that unless every man intends to get a book sign up now, he will have to take his chances of getting one in the rush. The place where the books will be held will be definitely announced upon the opening for all branches of student activities.

All in all, it is a well rounded out book and it believes every man, who wants one to make a book sign up. The book is now in the press and will go to the binders in another week. Several new features are incorporated this year and a well-balanced color scheme is followed throughout the book. The art work is artistically done and the cover design is the best ever. All in all, it is a well-rounded out book and it believes every man, who wants one to make a book sign up. The book is now in the press and will go to the binders in another week. Several new features are incorporated this year and a well-balanced color scheme is followed throughout the book. The art work is artistically done and the cover design is the best ever.

Continued from Page 1.

Every track man owes it to himself and the Institute to come out and at least enter the event or the fifteen. On account of the large number expected to attend, grandstand seats will be sold. M. E. Exc. Continued.

He who builds wisely builds well. An old verb but it's true. There's correct positive in the constructing Fatima Cigarettes for the "line" or "angle" at them. They're built of rare tobaccos cured and blended "squared" by experience. We haven't expensive packages and you get 24 cigarettes for $1.00.
