

THE TECH

VOL. XXX, NO. 124

BOSTON, MASS., TUESDAY, APRIL 4, 1911

PRICE TWO CENTS

INTERSCHOLASTIC DRILL

COMMITTEE MEETS

Committee on Prizes Appointed. Nearly Twenty High Schools Invited to Compete.

PRICE OF ADMISSION REDUCED

Banners to be Awarded as Prizes. One Banner to be awarded for Each Five Teams Entered.

At one o'clock yesterday afternoon the Interscholastic Drill Committee met in the office of Capt. Bookmiller and appointed a committee on prizes, consisting of H. U. Stewart, C. L. Smith, and L. W. Burnham.

The High Schools that have been invited to compete in the coming competitive drill are, the Boston High Schools, the Medford, Stoneham, Wakefield, Concord, N. H., New Bedford, Gloucester, Lynn, Methuen, Lowell, Hyde Park, Chelsea, Fall River, North bridge and the Brockton High Schools.

Each school that will be represented in the drill shall select eight privates to be commanded by a non-commissioned officer, and each squad shall drill in close and extended order formation for five minutes or more. The total number of squads entered will be grouped into teams consisting of five squads each and one squad out of each team will be awarded a banner.

It was decided to reduce the price of admission which had been set at fifty cents to twenty five cents.

The next meeting of the Committee on Prizes will be held in Capt. Bookmiller's office on Wednesday the 13th at four o'clock.

M. E. EXCURSION

THIS AFTERNOON

Excursion Leaves North Station at 2:09 P. M. Round-trip twenty cents.

At 2:09 o'clock this afternoon the M. E. Society leaves the North Station for an excursion to the Waltham Watch Factory. Round trip tickets may be purchased of the committee for twenty cents. Although this is an M. E. event, it does not exclude non-members of that society, for every man who is interested is urged to attend. An opportunity will be afforded to see a well arranged modern boiler and engine room, and also a variety of special machinery for performing the various operations on the world famous watch, which cannot fail to be of interest to every engineer.

Moreover, a fact which will doubtless attract many, there are about two thousand girls employed at the factory. Many interesting features will be shown to the party, which will have special guides, and it is hoped that a large number will avail themselves of the excellent opportunity afforded.

Granite Rocks that Yield Feldspar

The possibility of increasing the production of feldspar at the Stoneham and beryl in Maine is considered in a report on the "Geology of the pegmatites and associated rocks of Maine," by E. S. Bastin, which has been published by the United States Geological Survey as Bulletin 445.

BIOLOGICAL SURVEY OF ISTHMUS OF PANAMA

Smithsonian Institute has had an Expedition in the Field Several Months.

ENCOURAGING RESULTS

All Principal Branches of Natural Science Represented by Government Experts.

Recent reports from the great biological survey of the Isthmus of Panama show encouraging results, and are being watched with interest by the scientists of the world. This expedition, organized last winter by the Smithsonian Institute, consists of noted scientists representing all the principal branches, with seven experienced field naturalists, nearly all from various scientific bureaus of the Government service.

A peculiar importance attaches to this survey due to the fact that the completion of the canal will lead to sweeping changes in the life of the region, and also the species of that locality will be scattered broadcast through the world by the many ships passing through the canal. It is known that at present there is considerable difference between the types of life on the different sides of the Isthmus, and it is extremely desirable that the exact extent of this difference be determined before the canal causes all indications of it to be obliterated.

Furthermore, the exact geographical distribution of the various species is of great importance as an indication of the migration of the types of life between North and South America or vice versa, and much time will be spent on this phase of the work. On the completion of the canal and the forming of the great freshwater lake above Gatun Dam, many of the natural characteristics of the country as they now exist, will be destroyed, and many of the animals and plants inhabiting this locality will be killed. In this process certain existing species might become extinct, and remain undiscovered to science in the lack of this survey.

ORCHESTRA NEEDS MUCH MORE SUPPORT

Only three Rehearsals Remain before Performance at Technology Congress Smoker.

ATTENDANCE TAKEN AT REHEARSALS

A Larger Number of Men Needed to come out. Two Rehearsals at Symphony Hall.

But three rehearsals of the Orchestra remain before April 10, when the orchestra plays at Symphony Hall at the big Technology Congress Smoker. The rehearsals will come on Tuesday at 4:00 P. M., Saturday at 2:00 P. M., and Monday at 2:00 P. M. The first one, on Tuesday, will be held at The Union, while the last two will be held at Symphony Hall.

Men have been pretty lax in attending the rehearsals up to date. Now it is of the utmost importance that the remaining rehearsals should be attended, in order that the April 10th affair should be a success. Hence those men not present at all the remaining rehearsals will not be allowed to play at the smoker. Attendance will be taken.

Members of the orchestra do not take their work as seriously as they would if they were supporting other Tech activities, as The Show or Technique. The orchestra is in its infancy and therefore really needs much more support than any of the other activities. Much good work can be done by the members in "rounding up" other men and asking them to come around. The orchestra has not half enough men. There should be at least 50 or 60 in the organization, and at present there are but 30 on the roll. All new men will be welcome and may report to the leader, R. Eksergian, to the manager N. E. Brooks, or to A. M. Eisenberg.

TECHNIQUE READY IN TWO WEEKS

Annual Rush to be Held Tuesday April 18th. Keep this Date Open.

BEST EDITION IN YEARS

Only Short Time left for Signing up. Alumni to sign up at Technology Congress.

It should not be forgotten that the best TECHNIQUE in years is going to make its appearance in a little over two weeks.

If you want to know just what has been going on around the Tech during the last year, be sure and open up for a book; it will include everything from Field Day to the present moment. If there is a certain person you would like to know what you are doing, make her little heart glad by sending her a leather bound De Luxe TECHNIQUE, for she is bound to be delighted with it and think that you are quite a fellow. The plain cloth bound books will be very acceptable also for the library shelves in your home and you will find it handy a time it will come in very handy for reference or to show to your friends. The object is to give every undergraduate at least one opportunity to sign up so that if anyone has been overlooked he should come around to the Technique office any day this week between four and six, or see the man at the Union from 1:30 to 2:00. At the Alumni Congress the grads are going to sign up so that this week will decide the number that can be offered to the Alumni and there ore it is sincerely hoped that advantage will be taken of the first opportunity to sign up either a red or gray slip before they are all gone. It should be borne in mind that the Rush is scheduled for Tuesday, April 18th. The Technique editors would like to have the date kept open so that a large number of men will join in the fun.

CROSS COUNTRY PLANS CHANGED

No Hare and Hounds run over Tech Course Today.

Owing to a change in the plans of the management, those who were looking for a chance to prove that they could make a better showing than they did at the Intercourse Race, will be disappointed to learn that there will be no run today. Although there is no run every cross country candidate must report to Coach Kanaly at the Tech Field this afternoon and Thursday.

TUESDAY APRIL 4, 1911

Again our ears are smitten with stories of articles dis-unsolved appearing from the Union. Such stories not only injure our reputation, but are a real disgrace to conditions here. An overcoat disappeared not long ago, and it is said that the already diminished supply of Tech song books is approaching zero as a limit.

A distrustful attitude is in general an unfortunate one to assume, but in the present case it is advisable. If each man will take care to keep his eyes open and become a self-appointed Sherlock Holmes, we may soon solve the mystery and remove the cause of these unsavory rumors. There are probably only one or two men responsible for this petty thievery and if we can but locate these few men, a scandal which affects the entire Institute can be removed.

In reference to the communication in this issue, we should like to make a few suggestions. The list of members of the class who have not paid their dues should not be considered a list of "pikers" and we believe it is not generally so considered. The treasurer, however, might find it advisable to investigate the causes for such non-payment and exclude such names in order to avoid trouble. The class should be one of the very first organizations to be supported by a student and he should spare no pains to do his share.

IMPORTANT CREW NOTICE

Very important meeting for all interested in the crew to-day at 5.15 in Union.

A. G. Herreshoff,
Crew Manager.

Nature and Value of Pegmatites.

Pegmatites may be described as very coarse granites of uneven texture, which are quarried principally for feldspar, one of their constituents, though they also yield small amounts of commercial quartz and mica and contain valuable gems.

PROM

A little more than two weeks are left before Junior Week so you had better get over to the Union some day this week from one to two, and sign up. The desk is there now and the sooner you sign up the better seat numbers you will get.

If for any reason you desire extra programs, if you order them now you can get as many as you desire for a dollar a pair. They not only are useful souvenirs, but will make welcome gifts. Only those who have paid up can order extra programs.

No extra dances at all at the Prom so don't fill out any that are not on the preliminary dance order. This has been arranged this way to do away with the usual confusion attendant upon the insertion of these extra dances.

You can secure now at the Union your admission ticket and invitation upon payment of your subscription. About a week before the Prom, you can get your seat number and final program.

In the case of house parties, other groups, and men wishing adjoining seats at the Prom, it will be necessary that application for same be sent in at once in order that provision may be made.

Now is the time to get in line and have your name registered for the Prom. There are a lot of loose dances floating around the State, and no one should feel that it is too late to sign up.

The desk in the Union is there for the special purpose of handing out information concerning Prom. Come around and let us know that you are not a dead one. You don't have to have five dollars to come and talk things over.

COMMUNICATION

Editor-in-Chief of the Tech:

I see in recent issue of your paper, that at certain dates the names of the class who have not paid the class dues are posted on the bulletin boards of the different Institute buildings. May I question, please, the authority of the men who propose to do this thing? Have they the right, legal or moral, to hold up to public scorn, men who are not able to or will not pay this arbitrary assessment upon them. Men and particularly college men have an abnormal dislike to being called "pikers". Many a man is there here who lives at a starvation point because he must "throw a front". Now then, to avoid being posted, tagged, numbered and condemned, a man's dues must be paid. If he can't pay his dues it makes no difference, he is forced to do so or be regarded as a "piker". Is this not coercion!

Respectfully,
T. I. M.

Students of Civil Engineering

You should read the ENGINEERING RECORD in connection with your studies.

It describes engineering works which exemplify the best practice in design and construction.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to subjects of interest to civil engineers.

Its volumes contain an immense amount of valuable technical and practical information on engineering work.

You should have this information on file for future reference. Some day you will need it in your work.

The Engineering Record is published weekly at \$3.00 a year

AERO CLUB LOCATES AT ATLANTIC
Gliders Moved there Saturday. New Launching Device to be Used

Last Saturday, the Aero club moved two of its gliders from Cambridge to the Harvard Aviation Field, making the trip on the Institute auto truck. One of the machines was the small glider used last fall, and the other was constructed during the winter and is a much larger machine. Both machines will be overhauled and made ready for the coming Intercollegiate gliding meet to be held next May.

The Harvard Aeronautical Association has under construction at the field, a launching device which is expected to greatly aid in the use of the gliders. This device consists of a platform, twenty feet high, from which the aviator and glider slide down an inclined track. When sufficient momentum is thus attained, the glider rises in the air.

The Technology Aero Club has recently been loaned a specially constructed ten horse power motor, which will be installed in the largest glider.

'THE GONDOLIER' TO BE PRESENTED JUNIOR WEEK

'Lend a Hand Dramatic Club' to Present Gilbert and Sullivan's Opera. Get tickets from D. A. Tomlinson 1912.

During the progress of the Annual Junior Week festivities at the Massachusetts Institute of Technology, the "Lend a Hand Dramatic Club" will present at Jordan Hall, one of Gilbert and Sullivan's Operas entitled "The Gondolier". This Club is composed entirely of young ladies and was formed by Edward Everett Hale. This performance is of course not as elaborate as the Tech Show, but coming at the time that it does, it will give a fine chance to make a comparison of two productions, one staged entirely by men, the other by girls.

The tickets for this show will be placed on sale at M. I. T., Harvard, Tufts, Wellesley and the other colleges around Boston. As the number of tickets allotted to the Institute is limited it would be well for those who desire to attend to consult D. A. Tomlinson 1912 at once as he has charge of the sale of tickets here.

CROSSING THE ST. LAWRENCE WITH HIGHTENSION CABLES

The high-tension transmission lines of the Canadian Light and Power Company are to extend from St. Timothee, Que., to Montreal, a distance of about twenty six miles. With the exception of certain points, where greater height is required, these lines consisting of eight cables, are to be carried on steel towers fifty-two feet high, spaced at intervals of 500 feet. The crossing at the St. Lawrence River was, by necessity, one of these special points. The river at this point is about 3,400 feet wide, the water at its deepest point being about thirty feet deep, with a current of seven to nine miles an hour. The crossing was made by means of erecting on each shore of the river two steel towers approximately 130 feet in height, and building at the center of the river two concrete piers extending about fifteen feet above water level, surmounted by a steel tower of 150 feet in height. The span of the cables from the Caughnawaga side the river piers will be 1,600 feet, and that from the river tower to the Highlands shore approximately 1,800 feet.

IN THE LIMELIGHT

Keep your eyes peeled for the improvements in the dining room. They're acoming.

Cheer up! There are only three more weeks of Gymnasium.

Time to pay up for those Show Tickets! They are ready.
