SOCCER FOOT BALL GAME
FIELD DAY FEATURE
Base Ball Game Open to any and Everybody. Report Early at the Field

WAKE UP ON MONDAY
Blow your Own Horn, Cheer Sing and Do Anything to Make a Big Noise.

With the 50th Anniversary Field Day, but a few days off, plans are being rapidly forwarded and a big day is promised. The baseball game is assured and the Committee requests that everyone, who desires to play in this game, report, at Monday, at 1:30, in P. M., for gloves, bats etc. Two picked teams will start the game, and is planned to give everyone an opportunity to play.

A tug of war will take place between teams from the Students and Schoolmen, and a team composed of Juniors and Freshmen, with a prize for the winning team. This will give a feature of the afternoon. The four classes will be represented and a track meet in the Institute will commence. The race will consist of a man running twenty two yards, the second man a quarter mile, the third man a half mile, and the last a full mile. Here is the chance to show your class spirit and help your team.

A soccer football game will furnish another event of the program. It is hoped that all who desire to take part in this game and all who have played and gone before will see "Jimmie" White 1911 at once. It may be that there are enough Englishmen in the Institute, who have played soccer to make up the teams and if so, a classy article of ball will be served. Various articles will be scatter ed throughout the afternoon. Men desiring to partake in such, oblige us by leaving their names at the Cage for the Committee at once. Everybody enjoy this game and let us make the day a success of the class spirit.

TECH SHOW SCORES
ALMOST DESTROYED
Early Morning Fire in Building of Music Publishers

Scores for Harvard Opera "Candide" Also in Danger.

Music scores for the tech show, "French," and the other that almost destroyed, Harvard Opera "Candide," were reported as intact after the fire which caused a damage estimated at $7000 in the building occupied by the White-Smith Music Publishing Company at 62-64 St. Stephen street, Back Bay, Monday morning. The company's president and owner of the building, said that the damage would be working into a week.

The building and contents were fully insured. The theory is advanced that the fire was some way between the second and third floors, caught the paper stock. It was said after an inspection of the interior that the music was intact as well as most of the tools although many of the wooden handles of the lutos.

The foreman in charge of the press eta opera "Candide," was delivered tonight when the first performance would be given to the great public. The plates are said to have been saved.

The tech show plates and the first section of the scores were placed in the vaults and under the protection of the temporary offices of the company will be the place." The building is owned by Daniel L. White president of the company.

John Colton, foreman on the fifth floor fifth floor in charge of the new building, the St. Stephen Press, with 140 men and Mrs. Hollis Alice MacDonald and Mary Haley. This is a very manly business, the fire being confined mostly to the paper stock. The fire will be last night at 3:30 a.m., and the clock of the sheet street street and from the year at first across the tracks of the "Waltham Watch Co.", and the railroad tracks of the Back Bay station. The tech show plate was held for half an hour on the outmost. In the run down the coast from which most interests them. The shipbuilding company. Three 15 1/2 m. was taken on the Bridge circuit line was held 30 minutes and the 8:10 for Albany 15 minutes.

Traffic in Columbus avenue was held up between Berkeley and Dartmouth. The avenue cars were sent via Dartmouth street, Huntington and Boylston avenues. 

NEW SCOUT CRUISER "WALKE" TESTED

The U. S. Scout cruiser "Walke," recently constructed for the Boston Shipbuilding Co., at Quincy, was tested on Monday in the Charles River, and with only part of her power plant working attained a speed of 18 knots. The primary object of the run was to test the torpedoes with which the ship is provided and the resulting figure of 15.25 pounds per square inch at the required requirement of 16 pounds.

The fire of the ship was taken as the test the torpedoes with which the ship is equipped. The test was successful and the result of the test was that the 15 pounds weight under the vessels was under the vessels, the ship could make a speed of 16 knots and in addition to this, the constant power output of 12,000 horse power will easily.

LATEST NEWS FROM THE FRONT

(Special wire from Fort Worth)

The base ball game at Fort Worth between "Jake's Jugglers" and The Tech team was one of the best that have been played on the diamond this season. The Tech won by a single run and they left for (this) Brewster on the special with all who are in the finest condition. They have been having the best of weather on this trip and they have shown up all that they have in each game. Their season's record is 0-0 at the 19th of April.

The Tech team will leave the hotel to-morrow, to play out the remainder of the preliminary games under the captain's eye, while plans are being carried forward for the use of the field during the entire playing season. They will be seen by the old squad, where all the fans are planning to give them the网站地图 in their honor. On their return from their long training trip, the left field umpires and the stand behind the back have been approved with lowest point, while the pit for the players back of third base has been improved by the addition of a pin, with all the latest methods for cooling the men when they come in from the hot sun in the outfield.

A commission of experts, consisting of H. L. Gantt, Harrington Emerson, and Charles Day, has been appointed by Secretary of the Navy Meyer to study the agency of introducing the principles of scientific management into the work of the navy yards. The commission will visit the principal eastern yards and make an exhaustive study of present methods and the opportunities for improvement. They are now witnessing the target practice of the fleet on the southern drill grounds in order to get a clear idea of the problems of the navy yards in operating and maintaining the war vessels under battle conditions.

In cooperation with this commission, a board of naval officers will visit the industrial establishments of the country where scientific management has been applied, and by working in cooperation with the civilian commission, work out a method by which these same principles may be adapted to navy yard conditions.

With each package of Cigarettes you get a per- sonal gift of a "Fatima" which scores a hand- some new collapsible match box (15c each)
