and began development of electric motors.

which time he made important improve-
ments in matters connected with electric
architecture.

In 1884 he exhibited a number of these at
the Electric Exposition in Chicago. This was
the first electrical exhibition held in the
United States. It was an immediate success;
not only because of the possibilities of the
new devices, but also because of the general
interest in the new field of electricity.

Mr. Sprague a Prominent Consulting
Engineer of New York.

Mr. Sprague had been an active participant
in the development of the electric trolley
system for many years. In 1883, he was
appointed consulting engineer for the
St. Joseph and China Railway in Missouri.

In 1887, he formed the Sprague Electric
Company, which became one of the leading
manufacturers of electric motors and
transformers. The company quickly grew
and became a major force in the electric
industry.

Mr. Sprague was also involved in the
development of the high-speed screw
elevator, which was introduced in 1887.

In 1892, he founded the Sprague
Electric Railway Company, which
provided a system of electric traction
for public transportation.

Mr. Sprague a Prominent Consulting
Engineer of New York.

In 1902, he was elected to the National
Academy of Engineering, recognizing his
outstanding contributions to the field of
electricity.

Mr. Sprague was a pioneer in the
development of electric power systems,
and his work laid the foundation for the
modern electric trolley system.

In 1911, Mr. Sprague was honored by
being selected as a member of the
National Academy of Engineering.

Mr. Sprague a Prominent Consulting
Engineer of New York.

In conclusion, Mr. Sprague was a
pioneer in the development of electric
power systems, and his work continues to
influence the field of electricity today.

SATURDAY, APRIL 8, 1911

The editor understands that there has been a separation between certain representatives of the Musical Club and the students interested in it. He wishes to state that there are two factions concerned with the defeat of the students in their variances and that it is necessary for them to unite to make the music as the second one is the larger and is the more logical. He is not sure that he will not change his opinion and possibly that of the Institute as well. He is not sure that the concert before the alumni will be the best ever.

COMMUNICATION

To the Editor of The Tech-

In the course of the communication column of The Tech has had letters from a number of the members of the Musical Club to the effect that they are not satisfied with the present state of affairs in the club. They are of the opinion that the officers of the club are not doing enough to further the interest of the club and that the officers do not care about the welfare of the club. In view of this I should like to say that I am completely satisfied with the officers of the club and that they are doing everything possible to further the interest of the club. I have been a member of the club for many years and I have always found the officers of the club to be highly efficient and to do everything possible to further the interest of the club. I am sure that the officers of the club will continue to do everything possible to further the interest of the club.
