Large Crowd Present at Hotel Somerset Taking Place at the Hotel Somerset on Commonwealth Avenue, Boston, April 12, 1913, was the last big affair of Junior Week, succeeded by the Spring Festivals and the commencement of charge at the arrangements. At eight o'clock, the crowd began to arrive. They filled the street for two over two and a half hours.

The beautiful ball room of the Hotel was a picture of youth and laughter. The color of the ladies' costume stood out charmingly from the black of the conventional dress suit. The orchestra played a lively set of music that went with the pretty scene. A dinner was served at a good o'clock.

The matrons beam upon the jolly throng from one end of the hall. They were Misses M. C. Maclaurin, Mrs. E. N. Parker, Mrs. George Wigglesworth, and Mrs. W. Murray Cranear.

The patronesses were Mrs. A. E. Burton, Mrs. A. L. Merrill, Mrs. F. H. Rand, Mrs. D. C. Jackson, Mrs. H. P. Talbot, Mrs. G. A. Sackett, Mrs. D. Upderry, Mrs. D. R. Dewey, and Miss C. M. Spooner.

The members of the Prom Committee were Moses, Montgomery, Balchow, Fox, Kemp, Shepard, Er., and Wallis. Prominent among the young ladies present were Miss Palmenteer of Oak-land, Cal.; Miss Doyle of Boston; Miss Hutchins of Brookline; Miss Allen of Arlington; Miss Foley of Palmer; Miss Hope of Shrewsbury; Miss May of Springfield; Miss Mendell of Mattapoiset; Miss Alps of Newton; Miss Mrs. W. Students of Civil Engineering

You should read the ENGINEERING RECORD in connection with your studies.

It describes engineering works which exemplify the best practice in design and construction.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to subects of interest to civil engineers.

Its volumes contain an immense amount of valuable technical and practical information on engineering work.

You should have this information on file for future reference. Some day you will need it in your work.

The Engineering Record is published weekly at $3.00 a year.

The Lick-Squire of Utah has posted an apron lien bill for building a gymnasium at the Utah Agricultural College. It took just $100,000 to build one that will house both teams, which probably is the need for a gymnasium was felt by the law-makers. This demand for erecting a gymnasium, conveyed to the legislature, a gift of $10,000 a year to be made by Thomas Sturgis, is to provide a gymnasium and a football field. It is said that over the years a building of this kind for the state university will be necessary.

BIG ANNUAL DINNER OF CHEMICAL SOCIETY

Nominations for next year's Officers due. Most Important affair of the Year.

On May 11, 1911, the Chemical Society will hold its big annual dinner. Many prominent speakers will participate and a large attendance is expected. This affair will be the biggest of its kind run by this society during the school year and a glorious time is expected.

No meetings will be held prior to this affair, and the dinner will be the last Chemical Society event of the year.

S. M. White, Secretary, states that nomination papers for next year's officers are due, and will be received at the Cape until May 6. Nomination papers for each candidate must be signed by five members of the Society. The following officers are to be elected:

President, Vice-President, Secretary, and one member of the executive committee.

Curious Action

Worms and larvae in sewage filters are said to clean the filter bed, and thereby clear away the solid material which accumulates during the colder months to such an extent that the normal color of the filtering material again becomes visible. Last summer birds, fish, and worms were collected in large numbers and devoured the worms and larvae when the latter were most likely in the filtering material. The result seems to have been that the filters have suffered from not undergoing the yearly flushing carried out by the worms.

FLOORING OF CONCRETE

A flooring for concrete buildings which has been used by the American Concrete Steel Company, of Nezark, N. J., is schoolhouses employing a one-inch layer of sand over the finished reinforced concrete floor slab. The floor is poured in the construction of the building itself diagonally on this sand layer and laid together as the edges and joints. This rough flooring is covered with rugs sized 6 by 7.8 in. in tape measure.
