GEOLOGISTS TAKE TRIP TO SOMERVILLE QUARRIES

Interesting talk on formation of Locality given by Professor Daly

FOSSIL HUNT

Prize of fifty dollars offered to one who should find a fossil. All search in vain

Yesterday afternoon, the members of the class in geology took a trip to the Somerville quarries. On arriving, Prof. Daly sent the men around by themselves to observe the various formations, and then situating himself on one of the huge boulders in the centre of the quarry, he began his detailed discussion of the origin and structure of this section.

The country was originally beneath the sea and on the sea floor a series of sedimentary rocks were formed; this series consisting mainly of shales and argillites. At a little later period, this series was intruded by an igneous sheet of basalt, called a sill, which by cooling was changed to trap. This series was then in Paleozoic times domed, or subjected to orogenic mountains building and was thereby forced above the level of the sea; this doming may have been formed by a baccolith intruded in this formation. Then a number of contemporaneous dikes were forced up through this series, cutting across everything in its path; these dikes which are from five to ten feet thick have about the same dip and strike and cut across the argillite beds and the sill, showing that it was younger than these other formations. The entire zone shows considerable faulting and shearing. This is shown by the mashing of rocks, striations and the slickenside. These dikes themselves are faulted considerably and show numerous fractures, filled with veins of calcite and in some places quartz; these veins are in undetermined relation to the faulting. Mineral formations are due to this large rearrangement.

Erosion then attacked this country in the Cretaceous period and it was penetrated to the North. In this part the land was tilted and uplifted. About the Tertiary period the valley between the dome and the highlands was cut out. This valley contains a large mud flat which is the product of erosion of the highlands and the dome.

Glaciation then attacked this region and venerated the entire country with a layer of till. This material is formed by the grinding together of the different kinds of rocks and differs entirely from clay. By the process of weathering the iron has been leached out of the rocks and has stained a greater part of the formation.

Since the glaciation period the till has been covered by muds of tidal origin; but in the high exposed places, the till is still prominently in view.

In the North quarry, the famous Cambridge slate can be seen. Here also is seen the same even granular, dense dikes, which are probably a continuation of the dikes in the other quarry.

In this quarry an anticline could be distinctly made out. This determines the original shape of the dome and marks one of its terminations. An enormous dike running N 40 degrees E and cut by a vein of quartz was very prominent.

In closing, Prof. Daly stated that he would give fifty dollars to the man finding a fossil in the sedimentary rocks, for he believed that that discovery would determine the age of that famous formation. This discovery he concluded would startle the geological world. The men were prompted to look for fossils but found it a difficult and arduous proposition.

INTERSCHOLASTIC DRILL TOMORROW AFTERNOON

Tickets to be on sale in front of Armory at two o'clock. Price twenty five cents

SQUAD DRILL

School representatives expected to arrive at two-thirty. Attendance in uniform required

The Annual Interscholastic Drill, held in the Irvington Street Armory by the Tech Battalion will be given Wednesday afternoon at three o'clock. In previous years individual men, three from each school, have met in competition for the prize, their drill consisting mostly in the Manual of Arms, but this year, each school will be represented by a full squad. The exhibition will contain marching evolutions as well as the manual and should prove more interesting than ever.

In addition to the school representatives, four squads—one from each company, of the local battalion will enter the drill. The first hour will consist of the usual weekly drill work, while the school representatives are expected to arrive at half-past two and be ready to begin the competition at three o'clock. Attendance in uniform is required at two as on ordinary Wednesdays.

ANNUAL DINNER OF CHEMICAL SOCIETY

To be held on May 11. Nominations for officers will be received until May 6.

The annual dinner of the Chemical Society will be held this year on Thursday, May 11. It will be not only the next meeting of the Society regularly scheduled but it is also the last that will be held this year. It is planned to have some prominent men to speak to the members and, being the big annual meeting, there will of course be an attendance of about all the members of the society.

It had been intended to have the nominations for next year's officers for the Society in at the last meeting on April 14, but it was not sufficiently announced and so the secretary, S. M. White states that nomination papers are now due and will be received at the Cage until May 6. The following are the officers to be elected: president, vice-president, secretary, treasurer and one member for the executive committee. Nomination papers for each candidate must be signed by five members of the Society.

Further plans for the dinner will be announced in a short time.

M. E. SOCIETY TRIP

NEXT MONDAY

Excursion to "Robb Boiler Manufacturing Co." of South Framingham. All students invited to go.

Next monday afternoon the Mechanical Engineering Society will hold an excursion to the "Robb Boiler Manufacturing Company" plant in South Framingham. This plant produces every type

COSMOPOLITAN CLUB TO HOLD "JAPANESE NIGHT"

Japanese Members of Club to furnish entire entertainment next Saturday Night

OPEN TO ALL

An Excellent Program Arranged including Japanese Wrestling and Fencing

The Cosmopolitan Club of M. I. T. will hold its last "National Night" of the year, next Saturday in the Tech Union at 8 p.m. The Japanese members of the club will furnish the entire entertainment and members will be allowed invite ladies. Also owing to numerous requests, this night will be made an open night. That is, any student in the Institute will be welcome.

The provisional program is as follows: Introductory remarks...Ewazo Suzuki Bushido, the Soul of Japan...K. Goto Samisen Music...S. Tsubouchi Illustrated Lecture...E. Suzuki Buva Music...K. Goto Views of Japan...Eawzo Suzuki Jiu-jitsu and fencing...Messrs. Ito, Goto, Kageyama, and Miyoshi

Mr. Ito was formerly instructor in Jiu-jitsu of the Metropolitan police force of Tokio. Many other novelties will probably be introduced the exact nature of which has not yet been decided upon.

CONFERENCE ON SCIENTIFIC MANAGEMENT

Will be held at Dartmouth Next October; Many Experts will speak

To Dartmouth College belongs the honor of calling the first general public conference on scientific management. It is planned to hold this important event at Hanover next October under the auspices of the Tuck School of Administration and Finance, and some of the great efficiency experts of the country will be present. In order to present the question in such a way as to be interesting to the public at large the gathering will not be technical in nature as practically all preceding conferences of the kind have been. The definite purpose in view is to give manufacturers and business men a clear insight into the need of running machinery with the greatest possible economy. The program includes a complete presentation of the subject by addresses and papers, and also discussion of its applicability to the various classes of business in which those who attend the conference may be interested.

of boiler except the marine, and the men from courses II, VII, and XIII who accompany the party will have an excellent opportunity to get a good review on boilers. Several of the professors of course II will go along, and will be willing to answer any questions asked. The superintendent of the works will probably conduct the party. Further details will be arranged, and will appear in *The Tech* sometime this week. Students from all courses are cordially invited to take the trip.

TECH SHOW IN MALDEN, TOMORROW

Frenzied French makes final Appearance at Malden Auditorium, Wednesday Night

LAST CHANCE TO SEE IT

Train for Malden leaves North Station at seven thirty-five, tomorrow night

Tech Show has played in Boston but there is still the chance to see it in Malden. "Frenzied French" is to make its final appearance of this season in the Malden Auditorium on the evening of Wednesday, April 26th.

It would be superfluous to say anything about why all those who have not already seen one of the performances should take advantage of this last opportunity this year. Nearly everybody in the Institute who has witnessed one of the productions realizes what a good thing they have seen, and is ready to tell those who have not yet seen it just what they are missing. The general verdict seems to be that Tech Show 1911 is one of the best shows the Institute has ever seen—some even go so far as to say that it is the best amateur college theatrical that they have attended. Would not this be enough to make anyone want to take the seven thirty-five train from the North Station for Malden on Wednesday?

The same show is to be given in Malden as was produced in Boston on last Thursday and Friday. All of the scenery and stage settings are to be taken along, the same orchestra will be at hand the cast and chorus will be exactly the same. Smyth and Hodgman will again be the pretty heroine and the troubled hero respectively, de Florez and E. G. Brown will again play opposite one another as the chauffeur and the butler, Faunce will again give his rendition of "Mr. Sherlock Holmes" and Hastings and Wetherald will once again prove that "Every Juliet has a Romeo." But these are only a few of the many attractions that everybody connected with the Institute must have heard of by now, for all have been talking of nothing but the Show lately, the newspapers have all had lengthy reviews and just yesterday morning there appeared in the Tech a long and very favorable review by Mr. Sydney Gunn which anyone will do well to read.

This, then, is the last opportunity to see "Frenzied French." Unless you want to miss it, get tickets for Wednesday night at the box-office of the Malden Auditorium.

T. C. A. The Technology Christian Association is holding its annual NEXT YEAR election of officers this afternoon and every man in the least bit interested in the Association should make an extra effort to be present. An attempt was made to hold such a meeting last Tuesday, but the proposed meeting was not sufficiently advertised and as a result only three were present.

It is essential that the right men be elected to the officers for next year in order that the Association may reach its greatest usefulness and efficiency. An active year is planned for next year and every Tech man who sincerely believes in the possibilities of usefulness open to the Association should consider it his duty as well as his privilege to do what he can to make next year such a year.

Some men are under the impression that the membership in the Association is limited and that they are therefore not members entitled to vote at this meeting. Sudiis not the case. Any Tech student believing in the purpose of the Association and interested in the furtherance of its influence is entitled to cast his ballot at the elections.

Let us hope that the undergraduates will show thier appreciation of the good work which may and hould be done by the Association next year by attending the meeting this afternoon in goodly numbers and let us hope that those present will show encouraging enthusiasm over the possibilities for next year.

COMPANY At the prize drills, the ATTENTION! freshmen are not often much more careful of their appearance

than they are in their regular drills. and perhaps this is stating the state of affairs bluntly enough. Tomorrow, representatives from a number of preparatory schools will be here to gain their impression of the Institute. Let us make sure that their first impression will be favorable and that they may find in the personal appearance of our cadets no faults incompatible with the ideals of a self-respecting gentleman.

"Les Travailleurs de la Mer," by Victor Hugo, edited by Professor Langley

Professor E. F. Langley of the Department of modern languages has recently completed work on a new edition of "Les Travailleurs de la Mer" ("The Toilers of the Sea") by Victor Hugo. The book is one of the three greatest among Hugo's works, and though the others, "Notre Dame de Paris," and "Les Miserables" have been accessible in convenient editions this has not, and should be unusually welcome. Much needless technical detail, with which the original is encumbered, has been omitted.

The full title of the book, which has just been published is:—"Les Travailleurs de la Mer," by Victor Hugo Abridged and edited with introduction and notes by E. F. Langley, Professor of French, M. I. T. Pages 306. D. C. Heath and Company, Boston.

Students of Civil Engineering

You should read the ENGINEERING RECORD in connection with your studies.

It describes engineering works which exemplify the best practice in design and construction.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to subjects of interest to civil engineers.

Its volumes contain an immense amount of valuable technical and practical information on engineering work.

You should have this information on file for future reference. Some day you will need it in your work.

The Engineering Record is published weekly

at \$3.00 a year

Over 2000 Pages of Reading Matter Per Annum

Special Student Rate, \$2.50 a year

**RAILROAD CONSTRUCTION
IN MAINE THIS SUMMER**

**Bangor and Aroostook Plans to build
One Hundred Miles of New Track
Through Wilderness**

This coming summer, Northern Maine will be the scene of greater activity in railroad building than any other section of New England. It is well understood that the Bangor and Aroostook is planning to begin construction on the proposed Allegash Extension through the forests to the northern border of the State, and that the road expects to have one hundred miles of new line completed by winter. The Allegash Extension calls for an estimated expenditure of \$7,750,000 for 157 miles of new track. It will traverse the heart of the Maine Woods and open up a great area of virgin territory.

The Bangor and Aroostook was granted charter rights of great significance by the last Legislature. These rights authorize Mr. Gould and his associates to build a line from tidewater at St. John, New Brunswick, diagonally across that province to Andover Parish on the St. John River, thence to Presque Isle and Washburn, the last-named section being already completed and in operation; thence, due west across the State of Maine and the Province of Quebec, reaching the St. Lawrence at the new Quebec Bridge. By this route the journey from Quebec to St. John will be only 375 miles as against the 578 miles by the Intercolonial.

The new road will be unique in that it will be one of the longest railroads in the world operated by electricity. This step is necessary because of the opposition of the timber owners to having their valuable holdings exposed to the excessive fire risk occasioned by the operation of steam locomotives through their lands.

**TECHNIQUES ON
SALE AT OFFICE**

Limited Number of books on hand.
May be obtained at Technique
Office daily

All those who did not get their Techniques but who signed up for them may obtain them any day this week from 1.30 until 2.00 and from 4 until 6. The men who received the first five books in the rush may receive their money back during these same hours. There are a limited number of books left for those who have not as yet signed up but they are being rapidly spoken for and every one who wants a book now must show signs of life and come around early. The leather bound editions are nearly all gone for they proved extremely popular. So many good things have been said about the book that we need not here describe it but we do want everyone to procure a copy of what is considered the best TECHNIQUE ever printed.

TECHNOLOGY CHRISTIAN ASSOCIATION MEETING

Annual Election of officers to be held
The Technology Christian Association will hold its annual election of officers, on Tuesday, April 25, 1911, at 4.30 p.m. in 5 Engineering Building B. The Society demands the presence of every member. This meeting will be one of the most important of the year and should interest every member.

TRACK TEAM DINNER CALLED OFF

Due to lack of interest of students. Money refunded to those who have bought tickets
Owing to the small number of students who have signed up, and to the general lack of interest shown, the Track Team Dinner which was to be held this evening has been postponed indefinitely. The price of the ticket will be refunded to those men who have already purchased one, if they apply to the management. There has been no decision made as to whether the Track Team will hold another dinner this year, but it is safe to state that unless more co-operation is given there will certainly be none.
