TROPICAL STORM IS SWEEPING SEA-COAST

Many Large Southern Towns Cut off from all Communication with North

The Eastern coast of the Atlantic is now being swept by one of the most terrible tropical storms that it has ever experienced. The extent of the damage done in that city to be enormous, and the number of deaths caused by this storm will be very great. The wind in some parts of the coast has reached a speed of 100 miles per hour, and the waves have been seen to reach a height of 50 feet. The storm has caused great damage to property in the area, and the government has declared a state of emergency. The situation is expected to worsen in the coming days. (Continued on Page 3)

THE OASIS.

Our Work

About seventy-five new men from other colleges gathered at the house of the Technology Club by the time Thursday night, in response to the kind invitation of the members of that organization.

Mr. Underwood, the president of the club, welcomed the visitors, begiing them to make themselves at home in the club, and then introduced President Macaulin.

President Macaulin explained that the occasion was one of cementing old friendships and making new ones for the men, and said that this was an ideal way of spending an evening.

Technology, he continued, began about fifty years ago as a protest against the existing type of education, planning to give less time to the classics and more time to the sciences. Gradually both classes of students were caught up, the Catholic, the college men from other places.

The special week of college trained men at the Institute, declared the president, is to help toward making everyone with whom they come in contact broader and more liberal in their views, and to help create an interest in politics, philosophy, art, religion, and the like, as well educated men should have.

He urged his listeners not to spend all of their time here in study, but to take an interest in the different societies and institutions.
THE TECH

Published daily, except Sunday, during the college year by students at the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 29, 1910, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

THURSDAY, OCTOBER 20, 1910.

The term is already one-fifth over, and yet nothing has been heard of 1913 class elections. Nominations in senior class are now open, but the juniors apparently have not yet thought of organizing for the coming year. Is it not about time?

The Tech prints today the retraction of a mistaken statement which appeared in its issues. It is very hard to get all the news and to be sure of entire accuracy. Inaccuracies are largely avoided and the Tech be materially aided in its work if the secretary of each organization should leave an outline of meetings in the upper office of The Tech.

1911 ELECTIONS.

The election of 1911 officers for the coming year is to be held soon, and for this purpose nomination must be handed in by members of the class. The following are president, vice-president, secretary, treasurer, clerk, two members of the Institute Committee, and two directors. All these together compose the Board of Directors of the class. There are also five members of the Athletic Association to be elected. Nominations must be signed by ten men, no man to sign the nomination of more than one man for the same office.

The selection of officers in the junior class is very important as these remain the permanent officers of the class. This is especially true of the president and secretary.

Nominations are now open and will remain so until Wednesday, October 26, at 4 P. M.

There will be no rowing for varsity or freshman crews at Yale on Saturdays during the fall. Training sail is the explanation.

Gym classes at 8.30 A. M. is the announcement of the gymnastic department at Syracuse. They last until 10 A. M.

Steps are being taken by the faculty of Columbia to organize a student forum for the expression of undergraduate sentiment.

M. E. SOCIETY.

This evening the Mining Engineer Society held its first meeting of the year at 7.30, in the small dining room of the Union. Professor Rich- ards, the head of the Mining Department, has consented to speak on Mexico. His address will be illustrated by lantern slides prepared from photographs taken by him during his travels in that country. This talk should prove most interesting, describing as it does a country which claims so many Course III men after graduation.

A cordial invitation is extended to all Course III men to come to this meeting. Sophomores are particularly invited to be present, and it offers an opportunity for freshmen intending to take the mining course to meet the professors and upper classmen.

ESPERANTISTS TO HOLD MEETING.

The New England Esperanto Association is to hold its annual meeting in Boston this Saturday. Members will leave Pierce Building at five square, at 3 P. M., to take an "Esperanto walk" in the suburbs. At 5.30 P. M. is the business meeting, adjourning at 6 for supper. At 8 P. M. there will be an open meeting in the Public Library Lecture Hall, opened by an address by O. B. Williams, a delegate to the Esperanto Congress and progress of the international language. Then will follow selections from "As You Like It,"rendered in Esperanto, and a half-hour first lesson in Esperanto, to be given to the audience.

CROSS-COUNTRY.

Arrangements Completed for Harvard Event.

Arrangements have just been completed for the annual race between the Harvard and Technology cross-country teams. The race will be run over the Harvard course on Saturday, October 29. This course is five miles long and finishes on Dunster Road, Chestnut Hill. Last year the race was run on Field Day over the Technology course, and was won by Tech with the score of 37 to 52. Trials for the men will probably come some time next week. Each team will enter ten men and score six of them.

Relay Race Shows Up Defect in

Thompson and Trull, two Sophomores, last Monday did not show up, so of the men who qualified at the trials, only those who qualified at the trials last Monday did not show up, so of the men who qualified at the trials, only two entered in the race. There were two entrants in the race, Thompson and Trull, who started for 1914. Thompson passed to Trull, who made up this handicap and gained ten yards. C. N. White held this lead and passed Ollisah, who lost twenty-five yards. Blackles then took the lead and gained a few yards, passing to Tulewski, who pulled up a bit more. Tulewski fell in passing to McCullough, who kept his own pace, and Wyman gained steadily, passing to Callahan, who 'lost twenty-five yards. McCullough held his own in the distance runs, finishing but ten yards behind. Thompson and Trull, however, depend entirely upon the faithful practice of the men and the interest and support of the student body.

Fall Handicap Meet.

Attention is called to the fact that all entries for the Fall Handicap Meet must be in tonight. Books are hung up at the Field, in the union, and in the Gym. The full fourteen events are to be run: 100 yards, 200 yards, 400 yards, half-mile, mile, two miles, high and broad jumps, pole vault, long and low hurdles, shot-put, javelin, hammer and discus.

No Kanily warns all candidates for either Freshman or Sophomore relay teams not to enter any of the distance runs.

Correction.

The Tech within is correct a mis-statement appearing in yesterday's issue. G. E. Rorach, 1912, has not resigned the position of Editor-in-Chief, as the Tech within states. Mr. Rorach resigned his position as Junior Editor. A successor to Mr. Rorach will probably be elected at the meeting of the Technique Board next Monday, and assistants in the art department will be discussed.

NOTICES.

MINING ENGINEERING SOCIETY MEETING Thursday, October 29, in the Union at 7:30 P. M. The members will give a talk on Mexico, and important business will be up. All Course III men are urged to be present.

H. S. STORY, Curator.

British Empire.

All new students from any part of the British Empire are requested to leave their names at the Cage for The Chairman, British Empire Association.

ART MUSEUM.

Free tickets of admission to the Museum of Arts for the year 1910-1911 will be issued to students upon application at the ticket office at the entrance to the Museum.

ART MUSEUM.
FREE TICKETS.

Miners who have failed to meet me at their appointments for physical examinations must call and arrange new dates. The Tech, F. E. Saturday, October 22. All examinations, including those of upper classes, must be finished by October 28, 1910.

P. KANALY.

Uniforms will be issued to the members of the Battalion at South Armory on Wednesday, the 19th. Those desiring to join should do likewise, but must be finished, by October 28, 1910.

C. E. SOCIETY.

Engineering instruments and calculating instruments used by engineers will be the topic of the lecture to be delivered by Mr. A. L. Wardell to the Civil Engineering Society this afternoon in E. Lawe.

Mr. Wardell is connected with the London and South Company, of Hoexter, N. J., manufacturers of engineering supplies. He will speak of the recent resources of this firm to draw upon. Slide rules, reckoning machines and triangle calculators will be shown, as well as the usual engineering instruments.

It is claimed by the experts that engineers are general, while familiar with the use of instruments, have only a very slight knowledge of the mechanical side of them. Mr. Wardell will speak of surveyors' instruments from the manufacturer's standpoint, and will explain the methods of construction and the reasons for the various forms, taking up the instruments in their component parts.
