Western System of Mine Leasing

Minning Engineering Society Hear Mr. Livermore, a Practical Engineer

Recently of Telluride, Colo.

Has had Several Mines under his Charge and been Successful

On Wednesday night at 8 o'clock, in the Union, Mr. Goosenman could get away from his duties as Secretary of the Mining Society to order and introduced Mr. Livermore to the society, and the-inline Mine Leasing. Mr. Livermore received his degree in mining engineering both at Harvard and at the Institute, and since the inauguration of this line of work, he has been interested mainly in the mine leasing.

After a few introductory remarks on the line of work which he had experienced, Mr. Livermore related what a graduate should expect after getting into the field. He stated that the graduate is small and one must not expect to be a John Hasen Hammond's New York or even a John Green in the first year.

During the first year at work, the graduate should attempt to find out his environment. Mr. Livermore mentioned methods for doing this. The graduate should start out with a mine and get to know it. He should be advanced and, his salary undoubtedly will be small, his work course perhaps, but he should work hard and live up to his salary. He should not be like the men who went to Hales from California and then sent home for a Blunder.

Secondly, the graduate may begin as a mining engineer, opening up an office as a consulting engineer.

Lastly he may attempt to operate for himself in the leasing business. Here he can gain very valuable experience with little or no capital. In this business the first thing one must do is to procure a good mine. There are many mines in the West which are given up. The Stratton & Hins Street Mine has, in the past, been a failure. It has been abandoned because the ore was not good and the company was not able to pay for it. The Stratton Company is now a good business. With his experience the man can start his own business and take care of all the business in the mine. The man who can start his own business and take care of all the business in the mine is worth a million dollars.

IS At the next meeting of the IT Institute Committee an important resolution is to be brought forward regulating the conduct of freshmen. This resolution is said to have been adopted by the Committee and will be acted upon. In past years, the Class Day Committee has included members who have no intention of graduating with their class. The question to be voted upon is whether this custom is to be continued in the future, and whether this is a good line of business. It seems to the editor most inopportune for a man to be on the committee in charge of a Class Day not his own. A man may not be in a position to attend the class which he graduates, but he is by role-call and so does not appear eligible to positions on committees of other classes. Moreover, the Class Day brings out the best of the seniors, and every other member of the class should be left in the hands of men not candidates for the degree any more than the junior Prom should be left in the hands of drop-back juniors or sophomores. Let us hope that the Institute Committee will think over the question and decide, that its members will consider it impartially and without regard to personal results, and that in this way the right custom will soon be inaugurated as a precedent to future classes.

THE TECH SHOW CELEBRATES

Traced the history of the Show and introduced in this way, Mr. Rowe, another old Show man. Mr. Rowe brought out the point that the Tech Show is not a club affair, not a Tech affair. The history of the Show was most commemoatable, he said. Publicity manager, Woolfing, expressed his gratitude in the record of this year's Show. Business manager, Lenarts stated that "Fennell French" cleared about $850. Mr. Bredine kept the guests in the gait of laughter with his inimitably humorous remarks. Dolly Carter, he said, had almost turn his family ties upside.

Then followed a real old, hot old time in which all the "ladies and gents" took part.

M. T. CHESS CLUB TO MEET HARVARD

Saturday afternoon, the Sophomore baseball team suffered a bad defeat at the hands of the Cushing Academy team at Ashburnham. The final score was 7 to 0.

SOPHOMORES LOSE BASEBALL GAME

Saturday afternoon, the Sophomore baseball team suffered a bad defeat at the hands of the Cushing Academy team at Ashburnham. The final score was 7 to 0.

TECH UNDERGRADUATE IS PLAYWRIGHT

Tomorrow, Sunday evening was the scene of a very interesting little play given by the Tau Delta Upsilon fraternity at the Tech. The play was a club affair, well directed, and the scenery very effective. The play was called "The Denial of God," and the acting was excellent. The play was a real success, and the audience was thoroughly riveted.

MEN'S TRUNKS—Steamer Trunks made of the best quality Basswood, canvas covered, very strong hardware and thoroughly riveted. 13.50 to $21.00.

Three Quarter Trunk of same good make $15.50 and $17.25.

MEN'S TRAVELING BAGS: made in all the wanted shapes and leathers. An exceptionally good one of Cowhide, fine quality, russet color, waterproof. $8.50, $9.00, $9.50.

Dear sir:

To the Chairman of the Election Committee of the Civil Engineering Society.

It is with some regret that I write to you in behalf of the society this past year. I only regret that I was not notified in time to present my nomination for the office of President of the society. I am, therefore, writing to let you know that I am interested in the well-being of the society.

I have been a member of the society for the past four years and have served as a member of the executive committee for the past two years. I have always been active in the affairs of the society and have contributed many ideas and suggestions that I believe would benefit the society.

I am interested in the future of the society and I am sure that with my experience and knowledge, I would be able to make a valuable contribution to its development.

Thanking you for your kindness, I am,

Sincerely,

Gerald M. Keith '12.

Is data on mines which had failed.
The last mine, Mr. Livermore, had
been at the Telluride Mining camp, where
the ore was of a low grade. He went
very deep into the details of his method
of mining at this place. Many men were
employed and a larger tonnage of ore
was taken out than for years. In this
way, he and his partner earned a sufficient
profit.
In conclusion, he stated that to-day,
the mining system gives an opportunity
to one to obtain a world of experience
with a little capital, and gives him a
chance to become the manager.
Refundments were served and the mem-
ers adjourned to the next meeting which
will probably be the last of the year.

By applying at 16 Rogers Seniors may
obtain any papers written by them and
now in charge of the English Department.
