B. T. Ross Elected to Position Has Large Scope in Overseeing General Management of the Book

Editor's Note—Those just entering the Institute have been hearing of committees, commissions and eyes not that exist around the Institute. To explain a few of them to these men, and to introduce the committee of the rest, the Tech will publish from time to time articles on these various institutions.

When the class of 1892 first conceived the idea of an Institute Committee they had high hopes of its possibilities. Starting from a committee that was purely social, the work many marked changes came in the year of 1894, the time articles on these various institutions, to compare it with their own experience. They have in brief the powers to force the faculty for reforms in the present time. To ask the faculty for reforms in the present time. To ask the faculty for reforms in the present time.

Those purposes are more or less the same as those of the present committee, as it is in fact the case with every committee, does, depends so much on its ideals as upon the ideals and energy of the members composing the committee. The present year of 1907-1908, largely through the efforts of the committee, the Hoops, 1898, who was then Editor-in-Chief of The Tech, was re-elected, with results that are common enough to us now. As for ex-committees, the organization of the boards, the Point System and the present time, were all put on an up-to-date base during the year, but they did not escape criticism. The committee have in brief the powers to force the faculty for reforms in the present time.

The letter which President Hausman sent to the members of the class of 1892 was printed in the Tech of that year. It was then Editor-in-Chief of The Tech, and was re-elected, with results that are common enough to us now.

The positions of some of the well-known men are published today, and more will be given out at the next issues of the Tech (Continued on Page 3.)

BIOLOGICAL SOCIETY

Prof. Sedgwick Tells of His Recent Trip Abroad—Professor Porter Speaks

With an attendance of forty-five men at its dinner last night, the Bio-technic Society started its yearly work.

Early in the evening Messrs. Rabbit and Sphincter, which has been the best press so that everyone would know that everyone presents. Witty remarks in many cases helped to create a spirit of informality.

Professor Sedgwick was the first people whose元件 was not turn for his subject a description of his recent trip abroad. He had with him that night the glasses which the Professor Sedgwick started from New York, and the last sound of the Professor Sedgwick from the name of the Tech at that point, was heard. The Tech has given by some institute men. The first stop on the journey was at Maderia—a island that looked beautiful enough from a distance, but quite a good deal. The Professor Sedgwick's trip started from New York, and the last sound of the Professor Sedgwick from the name of the Tech at that point, was heard. The Tech has given by some institute men. The first stop on the journey was at Maderia—a island that looked beautiful enough from a distance, but quite a good deal.

In the month of September the Professor Sedgwick went to Gibraltar, which does not look like the beautiful enough from a distance, but quite a good deal.

Advisory Council on Athletics in the Freshmen should get together and ably bought more tickets than the class which is taking any interest in the matter, and this class has probably not been assured. TheColonial Theatre reports very sat-

The baseball nine of the University of Chicago, at present playing a series of games with Keis and Waseda Universities of Tokyo, Japan, has won two from Waseda and one from Keis University. The team visited Japan on a challenge from Waseda University, and the games are said to be exciting much interest and enthusiasm on the part of the Japanese.

Two prizes have been awarded for two designs, out of a hundred and fifty which were submitted for a new seal for Cornell University. The commit-

Naval Arch. Society

The first regular business meeting of the Naval Architectural Society was held at 4:15 yesterday afternoon, in Flag Building C. There was a discussion regarding the plans for meetings and entertainments for the rest of the year, and a motion was passed to hold a dinner, at which the new men of the course would meet for the first time. It was decided to have a committee of three appointed by the President, Mr. W. P. Allen, to obtain speakers for the dinner, and accordingly Mr. R. W. Cornell, Mr. A. R. Hurthoff and Mr. Roberts were appointed. Several new men of the society were also elected to the officers of the society.

Iowa will introduce inter-depart-mental football this year. Director E. Schroeder says that many football players of good caliber are brought under the eyes of the coaches that way—players who might never attempt to play the game at all.

Fatima TURKISH BLEND CIGARETTES

What beautiful precision—what certainty of action and result governs every movement in Physics.

We really know of no suitable comparison except in Fatima Cigarettes—where our infinite knowledge of tobacco blending makes certain your enjoyment of all the rare qualities possible in a cigarette.

They act like a lever in elevating your taste. And if you are inclined to plain packages you'll rise to the occasion—Get 20 for 15 cents.
