For the Union enter tonight with a big Democratic speaker talk at this meet-
ing, too, but the campaign committee said that they could not send a rep-
resentative till Saturday. On Saturday evening, therefore, the claims of the Democrats will be exploited by a man who has been given out.

The Union will now get a chance to hear either or both sides of the pres-
ent exciting political struggle ex-
plained, and get this information given to them by men especially sent for the purpose. It must be remembered that for educated citizens po-
litical knowledge is as valuable as any other, so a large audience should hear both speakers.

BALLOONISTS TO BE ROYALLY
CONTESTED FOR.

Allan H. Hawley and Augustus Post, the two balloonists, are to be royally entertained when they arrive in New York. All the aviators in that city will be present at the dinner given in their honor. These two men, after being given up for lost or mutely expired, were found and rescued by a flight of 1356 miles from St. Louis, Missouri.

Their late experiences were as ex-
cit ing as they were unique. On the 17th of this month they were forced to land because of the approach of a storm. After four days of hard wall-
ding, they landed near Weedsport, New York, finally met by some trappers. These men were delighted to take them back to civilization.

FRIDAY, OCTOBER 28, 1910.

The tech night at the Colonial Theatre is only one week away—the one night of a school year when all Tech students, undergraduate student body publicly celebrate the glory or defeat of Field Day. To the Seniors it is with dim recollection of bygone days; to the Sophomores with dim recollection of bygone days; to the Juniors a faded picture of a year in history; to the Freshmen who have yet to observe it, a bright, and a number of matches will be held with other colleges.

Among the exceptions to the ten point limit there is that the members of the teams, the athletic committee, which allows a man under nine points in one point to hold the captaincy of the athletic team, although it may mean that his points will average ten. Another modification is to the effect that the Executive Committee of the Institute Committee can be composed of men regardless of the number of points that they already have. There are some positions which are not rated at all, for example, the Senior Class Committee and the Technique Electoral Committee. This was done because it was thought that the class should choose the boys that had not to carry out these important class duties, and for the time the men are active on these committees, they are expected to lay aside their other activity work.

When nominations are considered by nomination committees, before the same goes to election, it is the custom for the committees to ask a candidate, who would be over points if elected, whether he would accept the position and resign another to bring his points to ten or below. This prevents difficulties after elections.

The point system ratings, with the latest corrections, are as follows:

OFFICERS ELECTED FOR RIFLE CLUB.

R. T. Portal 1913, was elected president; J. B. Rudolph 1913, vice-president; E. R. Brown 1912, secretary; W. W. Lang 1912, treasurer; W. A. Canady, executive officer, and H. H. Wilbur 1911, team captain, at the annual meeting of the Rifle Club yesterday afternoon, at 1 o’clock, in Room 33, Rogers Building. Every officer was elected unanimously, so there was no question in the minds of the members as to who should manage their club for this year. Before the election of officers the reports of the secretary and treasurer were read and accepted. It was announced by the chairman that if everything turned out as expected, the rifle team will hold a match with the team of the University of Boston, and if the match is arranged it will take place either one or two weeks from this coming Saturday. Each team will shoot on its own range, and the total score and the score of the highest man, supervised by an army officer who will be in charge, will be exchanged by telegraph at the end of the match. The conditions will probably be a hundred rounds of sighting shots and ten shots for record at one hundred yards, with six men on each team.

The party will leave Lowell Building at 12 o’clock, and take cars for Park Street, changing from there to Elevated railroad work, and a chance to inspect a typical gas engine plant.

The Electrical Engineering Society will take its second excursion trip of the year on Saturday, October 29th, to the Medford plant of the Boston Elevated Railroad Company. The trip will give an opportunity for all men who are interested in gas engines and their application to electric railroad work, and a chance to inspect a typical gas engine plant.

The party will leave Lowell Building at 1:30 P. M., and take cars for Park Street, changing from there to Haymarket square, and then to Elevated cars for Sullivan square, where the cars for Medford will be taken.

Excursion to Medford Gas Engine Plant.

Electricals Will See Large Station of Boston Elevated.

NEW YORK CITY
Registered to Technology men to know that experiments of this character with a like apparatus were carried on in the laboratory about seven years ago, and that for several years the apparatus has been kept up and shown regularly in the lecture room. The movement impressed upon the small suspended sphere in virtue of the gravitational attraction between it and the large lead sphere is evident to a class of some three hundred students.

Important extensions have been made in the equipment of the Electrotical Laboratories for the increasing number of students.

To provide the necessary facilities for the increasing number of students selecting work in the Laboratory of Applied Electro-Chemistry, a 5 kw. transformer has been purchased of the Pittsburg Transformer Company. A special switchboard to accompany this transformer has been designed by Professor Derr, by means of which voltage in steps of 10 volts, and extending from 10 to 250 volts, are available. A similarly designed switchboard has been in constant use with the 50 kw. transformer originaly installed in the laboratory, and has proved exceedingly advantageous in the handling of electric furnace operations.

To furnish the additional power now needed a 75 kw. transformer has been ordered for installation at the power house.

It has been found necessary to transfer a portion of the laboratory work to a specially designed for electro-chemical measurements.

Wellesley College girls are up in arms because a new rule has been adopted by the faculty which forbids athletics as a compulsory study in the college curriculum. At Radcliffe, where athletic sports are optional, the girls are enthusiastic about taking up outdoor sports, including baseball, and have produced some classy teams. The Wellesley girls point to Radcliffe as an example of the fact that voluntary participation in athletics is the preferable plan and are protesting strongly against the new system.
