PHANS COMPLETED FOR "KOMMERS" DINNER
Several Old Showmen and the Alumni to Be Present.

FRESHMEN INVITED.
Numerous "Stunts" From Old Tech Shows Will Be Given After the Dinner.

Plans for the fifth annual Kommer dinner of Tech Show 1911, are now completed, and a good time is guaranteed to all who attend. Several old showmen and alumni have assured Toastmaster I. W. Wilson that they will be present. Tech Show is given entirely by the men, and it is therefore up to Tech men to support it. The good time alone should be sufficient inducement to be present. A

DESIGN OF KOMMERS TICKET.

"KOMMERS" Dinner is the last chance to learn the ground course will be held. The threatening weather last Saturday prevented a large squad on the first run, but if the conditions are better a good crowd should run over the course, since this is the last chance to learn the ground before the race on November 15.

The three cups which are annually given for first, second and third prizes in this race have on exhibition above the Technique case in the main lobby of the Union.

CUPS NOW ON EXHIBITION.

New Military Policy and Sweeping Reforms Will Be Inaugurated.

F.R. BURTON ADDRESSES ARCHITECTS

European Trip Described—Problem in Design Discussed.

At a well attended meeting of the Architectural Society last evening, F. R. Burton, an interesting address on his recent trip through Europe, was less than outlined his travels, starting from Paris and different points of interest in Italy, Switzerland, and England, and form a new and closer relation with the German and Austrian States. Such a move, should it occur, would mean a certain show of military policy, and a distinct blow to the peaceful intentions of Great Britain, France and Russia.
THE TECH

Published daily, except Sunday, dorm-
day, by students at the Massachusetts Insti-
tute of Technology.

Entered as second-class matter
at the post office at
Boston, Mass., under the Act of Con-
gress of March 3, 1879.

G. M. Keith 1912-................Editor-in-Chief
S. E. Bates 1911 ............Managing Editor
P. M. Tyler 1912.............Athletic Editor

gress of March 3, 1879.
Boston, Mass., under the Act of Con-

THURSDAY, NOVEMBER 10, 1910

The Tech announces the election of
A. L. Myers, 1911, to its board of
associate editors.

What do you know? More than half of
the Senior class have not yet called for
their ballots, and elections close this
afternoon. This is their last year, and the
time of the annual balloting. There is no
election at the Cape for every man who has paid his dues, and
there may yet be time to cast a vote.

A REGULAR M. I. T. FOR CROSS-
COUNTRY.

All out to give the cross-country
team a good send-off!

Where?
Back Bay Station.

Everybody out!
The cross-country leaves for Pninc-
town to run in the Intercollegi-
ates. Although twice defeated recen-
tly, our outlook for this year is by no
means so dubious as might appear.
In fact, our team is actually stronger
than last year and cannot be judged
by the recent scores. The present
strength of the team lies in its team
power to the real cosmopolitans.

More Summer Experiences.
I. P. Morrison spent the summer
months getting experience in struc-
tural work. He was with J. W. Worsca-
son & Co., consulting engineers, lo-
cated in Boston.

H. R. Habsbatt was also engaged in
structural work, but was in New York City.

T. K. Parker and R. C. Boyden were
engaged in plane table work in New
Hampshire for Bresd & Barrows, con-
sulting engineers.

H. L. Robinson was doing general
engineering work in Maryland.
H. P. Dolliver was engaged on the double track work of the Pennsyl-
vania Railroad at Hartford City, In-
diana.

George Fuller was in the New York
State Highway Commission service on
the work of road resurfacing.

G. N. Harequist was with the Metro-
politan Water Commission of New
York City.

P. A. Rideout did street railway sur-
yeying work in and around South Braintree, Mass.

(Continued on Page 3.)

THE COURSE I AND XI NEWS

Third and fourth year students in
the departments of Civil and Sanitary
Engineering are now finishing up the
several half-term subjects that occupy
them the first seven weeks, and will, this
week, enter upon those subjects sched-
uled for the last seven or eight weeks.
The Seniors in Course I are complet-
ing the course in Foundations, and
the students in Sanitary Engineering
work coast through with Bridge De-
sign.

For the Juniors, the Heat lectures
will be completed next week, and
many of the men have finished the
required number of experiments in the
laboratory course. Professor
Frazee's course in Highway Engineer-
ing will commence Thursday after-
noon at 3 P.M. After next week the
exercise of problems will come in the
hours left open by the finishing of the
Heat course. Highway Engineer-
ing is required for the Juniors in both
Civil and Sanitary Engineering.

The Seniors are now ready to,
getting ready for their thesis work,
some of them having already finished
collecting their data. The taking of
theses which are being worked upon
will give you an idea of what is
being done by this year's graduating
class, and more will be published
later.

The question of the abolition of
grade crossings at Oak Grove, Mass.,
will be voted upon and vacancies
will be filled for the Board of
Supervision.

Water Power Development in New
Hamphire by J. K. Campbell and P.
L. Caswell, and in Rhode Island by
H. L. Robinson and J. K. Campbell,
is being studied by W. J. Simmonds
of the State Highway Commission.

An investigation of the crazing of
Concrete Surfaces was begun by a
student at the Tech, but has been
abandoned.

An Investigation of the Crazing of
Concrete Surfaces is the title of the
thesis which S. E. Bates and Isaac
Morrison are working up.

(Continued from page 1)

A business session will also be held,
at which time candidates for member-
ship will be voted upon and vacancies
in several offices filled.

The Cosmopolitan Club is in a most
flourishing condition this year. Over
a hundred students of foreign birth are
enrolled as members, and there is a
long waiting list of American appli-
cants. These latter men have been
voted upon, while foreigners do not.

The number of American students in
the club is limited to one-third the total
membership. This gives the balance of
power in the real cosmopolitan club.

The club rooms are cozy and well
kept. Various papers and magazines
are on the tables, and there is a sup-
ply of genuine Chinese tea and cake
on hand, which may be used by mem-
bers at any time.

The entertainment committee has
promised to do its best in making
things interesting for the members,
and they have started excellently.
I

To the Editor: I have often heard it said that the compressed air tunnel work at Cambridge, Mass., during the summer was not a popular one. A. F. Lecuy had, perhaps, the most adventurous experience, having crossed the Atlantic on a cattle boat as members last year have not yet had a chance of seeing Europe.

W. O. Orchard saw something of compressed air tunnel work at Chelsea, Mass., and spent the summer seeing something of Europe.

News of the Society.

At the meeting of the Civil Engineering Society last week, fifty members were ito the society and will become regular members by paying the initiation fee of one dollar, plus the yearly dues of seventy-five cents, and by signing the constitution of the society.

Many members who were accepted as members last year have not yet had their names enrolled as members, because they have failed to sign the constitution. It is from this list of signatures that the names of members are furnished for the page in Technique, and all those members who want their names to appear in the list of members in Technique 1912, should take pains to sign up at the next meeting.

At the end of the business meeting last week the meeting was addressed by Mr. D. C. Churchill, M. T. 1909. Mr. Churchill is one of the members of the American Board of Foreign Missions. He spoke of the meeting on the "Progress of the natives under the American Board of Foreign Missions." He gave a talk on "The Progress of Engineering in India," with which Mr. Churchill has been in India since November, but as yet no speaker has been decided on, although the management has several in contemplation.

(Continued from Page 1.)

Societies for a joint dinner. There will be a candidate for graduation in June, 1911.

A. L. Merrill, Secretary of the Faculty.

The Gymnastics classes in Physical Training begin this week, according to the Tabular View. The attendance at the classes this week was very poor, and a large number of men have one absence against them already. There are only four pairs allowed during the year, and much must report at this station in order to obtain a clear record in that subject.

LOST—A Slide Rule, in leather case. Finder return to Cage for L. R. Deveraux.

A COLLEGE DANCE will be given on November 21, at Temple Israel, Commonwealth Avenue, for Jewish college students whose homes are not in Boston. Invitations will be sent to all such who will leave their names at the office of the President's Assistant, 19 Requests, before Thursday afternoon, November 12. (4, 5, 6, 7, 10)

CANDIDATES FOR GRADUATION.

November 7, 1910.

Notes in regard to status with reference to graduation have been sent to Fourth Year students. Any student who has not received a note should consult me if he expects to be a candidate for graduation in June, 1911.

A. L. Merrill, Secretary of the Faculty.

The hour for Course B in Military Science will be Wednesday, 45, in Room 22, Rogers.

WALTER HUMPHREYS, Registrar.

WINCHESTER

Repeating Shotguns

USED IN THE U. S. ARMY.

The U. S. Army authorities know a gun; that is, when they decided to equip some troops with repeating shotguns, they selected the Winchester in preference to all other makes. The experts of the U. S. Army know a gun; that is, why, after submitting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it satisfactory. If you want a shotgun—buy the one whose strength and reliability have been decided by U. S. Army authorities to select it and the U. S. Ordinance Board to endorse—that's the Winchester.
