M-I-T: "Bah, Bah, Bah!
M-I-T: "Bah, Bah, Bah!

TECH SONGS.

No. 1.
The Stein Song.
Words by R. Hoary. 
Music by F. P. Bussard 1887.

Give a rose then in the May-time,
For a lift on the wave of cheer.
Turn night-time into day-time
With the stein of the M-I-T.
For its always fair weather
When good fellows get together,
With a stein on the table
And a good song ringing clear.

Chorus.
For it's always fair weather
When good fellows get together,
With a stein on the table
And a good song ringing clear.

Oh! we're all frank and twenty
When the spring is in the air;
And you're wearing the Red and Gray.

Do your best, we are all behind you,
Our colors high will ever fly,
And when the battle's over,
Our voices all will 'hear;
Our colors hight will ever fly,
And when the battle's over,
Our voices all will 'hear;
For dear old M-I-T.

One hundred and fifty men listened to the addresses of the various student interests made last night in the Union at the annual reception to new men.
W. H. Warner, president of the Christian Association, introduced each speaker with little comment of his own that coming from one not in the acti-
tivities, was particularly interesting to the guests and to the audience.

The first of the speeches was largely addressed by W. H. Warner, who started the talk with a discussion of the new gym-
nastics and field games. He outlined the scheme of points on contests, a more de-
tailed accounting of which will be later.

One of the speakers who spoke regard-
ing athletics was Captain Saltzburg 1913 of the football team. He did more than help the fellows' activities in athletics-

No. 2.
Dear Old M.I.T.
The words and music by H. S. Vonson 1907.
The year 1861 was hallowed
Sing the sky's dull gray.
The glory of the sunset
Up on the ridge.
While here beneath our crimson
And a heart without a care.
And though we're far apart
Our boys are fighting onward,
While here beneath our colors,
The sun with glowing crimson.

Our boys are fighting onward,
While here beneath our colors,
The sun with glowing crimson.
For dear old M-I-T.

It was held at the Tech Show, 1910.

No. 4.
The Cardinal and the Gray.
Words by G. B. Bryant 1897.

The team is out, all singing and shout.
Do your best, we are all behind you.
And you're wearing the Red and Gray.

Fight on boys, we are cheering for you,
For we want you to win today;
Our boys are fighting onward,
With the stein on the table
And a heart without a care.

Chorus.
Fight on boys, we are cheering for you,
For we want you to win today;
Our boys are fighting onward,
With the stein on the table

was unfortunate enough to witness the unutterable death of another Bolling the same college friend of mine and had interested me greatly in his work.

"Indeed, what struck me as particularly noteworthy was the interest in aviation taken by the country at large. The people there do not regard aviation merely as a fad, but as an important branch of science, particular-ly the military people. I imagine that in our country the advancement of aviation is the next few years will be made largely by the government along military lines.

Tech Men on The Cymric.

"On my homeward journey on the Cymric, I was particularly interested in a number of Tech men who had been abroad all summer. These young men who had worked their way over on a labor boat down to us to have done fine, sensible thing. That little trip, using them but badly, is undoubtedly one of the most valuable parts of the whole education.

"There is a number of Institute graduates on the Cymric, and I enjoyed frequent proof in the problem of success.

Professor Despicore of the architect-ural department was also on board.

"Just a word about the local customs office. I have been much about the unknown customs officials—not here, but in other parts of the country.—that I was greatly pleased with the treatment accorded us by the local officers. None of that disagreeable attitude, which I know by experience exists elsewhere, notably New York. was evident. Their did their duty quickly and with as little bother as possible. One thing, however, as it must strike all who pass through the local office, and that is the lack of proper facilities.

Warming to Tech Crew.

When questioned regarding the Tech crew, Dr. Macalurin said, "I hope that the men on the crew will not lose their heads. Their resources are limited and they should not think that they can compete with Cornell, Harvard and the big colleges which have been in this kind of business for years and have united funds at their disposal. However, if they can take the work coolly it will be of great benefit to them. The usual trouble with youth is over-ambiti-ous. One thing struck me. The people there do not regard aviation taken by the country at large.

The Institute is a school of great tradi-tion and it is not the sort of work which can be done hastily. The faculty with youth is over-ambitious. One thing struck me. The people there do not regard aviation taken by the country at large.

SOPHOMORE FOOTBALL

"Tommy" Matters Rejoins Team As Coach

Work has begun earnestly by the sophomores football squad under the direction of Captain Bichler. Every
night now the fellows practice at the oval and the men are kept hard at work for an hour or so. Manager Falban,
the star quarterback of last year's team, has arranged an attractive schedule for the season.

First joy was shown by the squad at the arrival of coach "Tommy" Matters in the oval just before the close of last
night's practice. Matters has again been engaged to coach the fellows and this means that the team will develop rapidly
in the next few days.

The season opens next Tuesday when a game will be played with the High school of Commerce team on the Ameri-
can League grounds. Pinnock, 1913; H. C. Frisbee, 1911; E.

THE TECH, BOSTON, MASS., SATURDAY, OCTOBER 1, 1910.

The purpose of the work this fall is to interest the candidates, particularly new men, and keep them in training. An
effort will be made to develop the men individually, rather than as a crew.

Financially, the crew's prospects are good. The Alumni have agreed to the crew on a firm financial footing, in-

COMMUNICATION.

To the Editor of The Tech:

Very Truly,

ARCH RICHIE.
