The Varsity basketball squad has been put through some hard practice in the last week. Captain Parker has had them on the floor, and he keeps the fellows working to the last whistle. The work has concluded tonight, and the men are expected to have their picked fives. In this way the whole squad can be worked to the best advantage, and everyone gets a chance to show what he can do.

The men have gotten their eyes on the big game with Yale, and the shooting is remarkably good for this early part of the season. L. Palmer, 1911, is one of the men most frequently noted for his clever shots, and he is shooting faster. He also said that these matches have been the most exciting of the season, and while it is a whole month away from the big game, the men are working hard.

Professor C. M. Soppford, of the Civil Engineering School, spoke to the Civil Engineering Society, which is open to all men in the school and the rest will play with the Second team.

W. B. Hargraves, who is assisting Captain Parker, is that this year will be heavy, but above all, very fast. He also said that their qualities in addition to their ability to shoot, will make a combination hard to handle. The men all seem to feel confident of a successful season, and are working regularly and working hard, with a spirit that has never been found on an Institute team. The old men as a whole are in better form than at this time last year, and the new men are coming along just as fast.

The management is working on the Second team schedule, purposing to give them some good light, and the last series of games around Boston, if possible. The Varsity and Second squad games are to be kept entirely separate this year, in that the Second team play none of the Second squad, and the only men will be the unknown quantity which it has been in years past. The Second team will be arranged with local teams which it is hoped will get the squad into shape by Christmas week and the New York trip. Boston College will be the real start of the season, and come as it does just before the season, it will give the Institute a chance to show the book that will be the first real chance to get a line on the team, and as it is the only game in the city, it will be data. The schedule is about as follows: Boston College, Wednesday, November 22.

The final orchestra rehearsal for the concert after the dinner Tuesday night will be held at the Union. 4.45 M. Concert will follow directly after rehearsal. First opportunity of playing, and as it is a home after, it will give the orchestra the experience which is absolutely needed for outside public concerts. It is desired that all members who are COUNTED ON should absolutely be present. There are others who wish to join the orchestra for coming public concerts and are interested.

Repeating Shotguns

USED IN THE U. S. ARMY.

The U. S. Army authorities know a gun; that is why, when they decided to equip some troops with targetfiring shotguns, they selected the Winchester in preference to all other makes. The makers of the United States Board also know a gun; that's why, after testing every Winchester Repeating Shotgun to all sorts of tests, they pronounced it the most accurate and simple. If you want a shotgun—buy the one whose strength and reliability led the U. S. Army authorities to select it and the U. S. Ordnance Board to endorse it—that's the Winchester.

ELECTRICALS TO VISIT

L STREET STATION

Those Who Did Not Go Last Thursday Expected to Go Today.

The Electrical Engineering Society will hold its second excursion to the L Street Station of the Edison Electric Company this afternoon, leaving the Lowell Building at 1:45 P. M. The party which made this trip last Thursday afternoon found it very instructive, and it is hoped that all members of the society who did not go then, will take advantage of this second opportunity. It is expected that the committees will arrange to make a second try at inspecting the equipment of the Boston Opera House within a short time.
