UNION DINING ROOM
TO OFFER PRIZE

A Week's Board Will Be Given Free to the Man Writing Best Criticism

INCREASED ATTENDANCE

is Especially Desired at Breakfasts and Dinners Last Week.

In order that the food and service of the Union dining room might meet with the approval of the whole student body, it has been frequently asked that complaints about specific troubles be left in the Union box. The committee has now announced its intention not only of seeking for helpful suggestions, but of offering a prize for ideas about the improvement of the dining room. They want as many as possible to write a non-technical criticism of more than five hundred words on the food and service in the Union, and offer a weekly prize to the best for the best papers. These writings should be, of course, unprejudiced, and should indicate the faults as well as the good of the dining room. The committee is especially anxious to increase the attendance at the small room upstairs in the Union. Therefore they wish to encourage students to go there. People may be induced living near the Institute to take these meals at the Union, All who are interested are invited. The Cage for the dining room committee not later than Saturday, December 3rd. The criticisms should be signed anonymously and the writer's name removed. The real name should be placed in a sealed envelope and left at the Cage for the dining room committee. In this way an absolutely fair competition will be maintained.

From time to time the better papers will be printed in The Tech.

The attendance at the Union last week was smaller than over the previous seven days. Financially, however, the week was not so successful—$8 of losses and one cent having occurred. This is the first time this year there has been a report of that nature.

The committee promises to give all who have noticed any improvements in the dining room. They will furnish refreshments, and a large reward is ready for the man who can accomplish either these, or any other thing that they think would be suitable members of the Union.

To Build Miniature Stations.

The committee of the Union will be open in the coming year to do considerable work on a quantitative scale such as the new member is to be filled at the coming meeting.

The estimate of the forest service, that we are consuming four times as much lumber as we did ten years ago, shows with what an accelerated rate the forests are being destroyed. Economists agree that the clearance of lumber per capita has been decreasing, due to the increased use of substitutes, such as concrete and iron. But the figures show an increase of 27 per cent. in lumber, and only an increase of 18 per cent. in the number of men working in the lumbering industry. What does this lumber go for? Is it wasted?

Although prices of lumber have increased from 35,000,000,000 to 45,000,000,000, the consumption of that of the opening period.

The committee now has announced its reports of two miniature stations. These will be filled at the coming meeting.

The society is now in possession of a complete set of standard receiving apparatus, and wire telegraphy is probably the best system as is shown by the report. The smallest being Kansas, with 5,000,000 feet. The committee promises to give all who have noticed any improvements in the dining room.

Wireless Society.

The society is now in possession of a complete set of standard receiving apparatus, and wire telegraphy is probably the best system as is shown by the report. The smallest being Kansas, with 5,000,000 feet. The committee promises to give all who have noticed any improvements in the dining room.

TUESDAY, NOVEMBER 22, 1910.

The Tech takes great pleasure in announcing the election of James Larned, also a Harvard man, who won for us the New England Intercollegiate tennis championship, the subject of such men taking an independent Maclaurin dwelt particularly on taking courses at the Institute, President Garrison speaking before men from other colleges now in their first year, even in their first year, even if they have not taken their proportionate number of seats will be given the fellows, and other college organizations.

The sale of tickets has been suspended except in certain isolated cases, and statistics show that more than two hundred men will be present.

As has been announced, special seats will be given the fellows, and these can be found on a bulletin which is to be posted in the Union before the dinner. The visiting professors will be in on with the students, so that the students may get to know them better than they now do.

Everyone is urged to be on hand at 6:30 sharp.

Arrangements have been made by the University Aero Club of Pennsylvania for a series of lectures on aviation to be delivered during the winter by members of the club, of the Faculty and of other college organizations.

Columbia has acquired a station of the United States Aeroplane Service which is to be used.

The University of California is to build a permanent track costing $20,000.

FOWNES GLOVES

mean right gloves—so buy Fownes and save trouble.

Now that final returns of the sale of tickets have been made it appears that the societies other than the Civics have not taken their proportionate share of interest in this gathering. Somewhere in the vicinity of two hundred tickets have been sold, and of these about 96 per cent. were taken by members of the Civil Engineering Society, while the others took the remainder. Just because this idea was inaugurated by the Courses I men is no reason why a majority of the men of the other professional societies should not support such a gathering, especially since the lecture is to be on a subject of such general interest.

The Mechanical and Electrical Engineering Societies have nearly as many members as the Civics. They ought to send nearly as large delegations to the dinner tonight.

LARGE ATTENDANCE AT DINNER

Sale of Tickets Now Closed—Committee Now Arranging Seats.

Everything is now in readiness for Technology's first joint meeting of the professional societies which is to occur at the Union tonight at 6:30 o'clock. A good dinner, music by the new orchestra and the best of arrangements have been made to make a combination that assures one of the best evening's entertainments ever given at the Institute.

"Say, I saw Cupid on the street to-day," remarked Dick as the quartette of Tech men walked into the Hornet's Nest last night.

"He got his S. B. last year, didn't he?" asked the Sophomore.

"Yes, his degree was Shark at Bridge," replied Billiken. "They didn't put a statue in the Union till last night. The committee thought that only permanent fixtures was enough, and Cupid filled the bill all right."

"It's a pity we Freshmen can't have a joint meeting of the Processional Societies," said the Sophomore. "Why, didn't put a statue in the Union till last night.

"Oh, I was over at the Technology Club watching Professor Alum shooting transition curves on a billiard table," replied the Senior. "Who wanted to see you?"

"Somebody about some tickets to this joint meeting of the Processional Societies. Have you gone up-lating?"

"Nope, but I sold my tickets, I think we'll have a good crowd out."

"I wasn't there," retorted the Sophomore."

"It's a pity we Freshmen can't come," put in the representative of the class of 1911.

"Oh, that's all right," said Cad. "You fellows did your share the other evening when you said you were going to have a few fellows at the Union for dinner, and held a regular banquet with speaker and flash lights and a few other decorations."

"Well, you ought to have been there. You don't get many chances to get something for nothing," imitated the Sophomore.

"Oh, come off, Cad," remarked Dick. "You didn't go to the meeting of the Commodore's alumni Club not long ago, and they gave something for nothing, all right."

"You fellows ought to give this little brotherly love stunt in the next Tech show," said the Billiken. "Why, it was one of the best things we've had at the Tech show," said the Sophomore.

"It certainly looks bunsinesslike to me for the management not to even have a coach after the date when the name and author of the play ought to be known."

"For goodness sake, shut up," replied the Senior. "I've got to do some work.

"Try some thoughtful lines of thinking," suggested the Sophomore as he and his roommate left the room.

TECHNOLOGY NOW HAS DORMITORY

Alumni Have Furnished a House to Be Rented to Students—A Comfortable Home.

At last there has come an answer to the long heard cry that "Technology has no dormitories."

Graduates of the Institute have secured a house at 211 Tremont streel, and it is now ready for fellows to move in. The house has been completely renovated, new furniture has been secured, a matron is in charge, and all that could be done to provide a comfortable home has been provided for. It is not the purpose of the alumni to make any money from the house, and it if barely pays expenses they will be satisfied. Board will be furnished, and prices for this as well as for the rooms is expected that the house will rapidly be filled.

INTERCOLLEGIATE NEWS.

The Academic Credit Committee of Columbia University is investigating the question of giving credit for extra curriculum activities, especially debating and literary work.

The University of California is preparing to establish a school of journalism. This department will give especial attention to the training of practical newspaper men.

The case space at Princeton was taken by the Sophomores. The Freshmen failed to capture a single case. Minnesota is in the midst of a small pox scare.

FATIMA TURKISH BLEND CIGARETTES

GRAMMAR

Ungrammatically written but correctly said: Fatimas are the "most different" cigarettes in every way.

A "capital" smoke far ahead of their "period."

The cool, sweet smoke of a Fatima forms ‘11111’ of goodness, pleasure and complete satisfaction.
