MADERO SAYS HE IS PRESIDENT OF MEXICO

Toneon Reported Captured By Rebels—Chihuahua in Grave Danger.

MADERO ESCAPES RAIDERS.

Plot of Revolution Hatched in San Antonio Early in October.

In spite of all rumors, Mexican official reports steadily state that the Diaz Government has crushed the chief rebel forces and that order has been restored in nearly all of the cities.

The revolutionists, however, report some successful engagements, notably one in which Toneon had been retaken by Madero's forces. The situation at Chihuahua was exceedingly dangerous and an attack was looked for at any moment. Madero and the railroad running to that city are in the hands of the rebels, and fresh outbreaks have occurred in the extreme southern States.

During the night about 2000 rebels took possession of the river front opposite the city, and a small force of soldiers engaged them from the city. The revolutionists retreated toward San Pedro de la Colonia, pursued by a large force of cavalry.

It was reported that the rebels had driven the soldiers back into the city and had captured a number of them, but later it was claimed that no general attack had been made on the town. Telegraph employees say that Toneon is in the hands of the revolutionists.

The citizens of Chihuahua are all armed in preparation for a fight with the ten thousand Maderists who are gathered near that city. All the western towns on the railroad to Madero are said to have declared for Diaz, but wires are cut in many instances and definite information cannot be secured. It is known, however, that a bridge was dynamited and a train wrecked on the railroad.

All attempts to capture Madero have proved futile, and he has issued a proclamation calling himself "President of the Provisional Government of Mexico." He has also admonished his followers not to wrong Americans or other foreigners. "This movement is directed solely against the tyrant Diaz," he declared.

From San Antonio it is learned that Madero completed his plans for the present outbreak after his arrival in that city early in October. He came from Mexico disguised as a Peon and was immediately surrounded by revolutionary leaders. At that time Madero talked of his opposition to Diaz, but claimed that he was in favor of a peaceful solution of the trouble.

The arms necessary for the revolution were brought into Mexico by fording the Rio Grande on a remote ranch. Just before he left to join the revolutionists large shipments of arms to a friend of Madero's were seized, and it then became known that he was actively leading the revolutionists.

A student in the University of Michigan has just made the rounds of the different places where cigars, tobacco and cigaretttes are sold, and has found out that students at the university last year smoked 132,210 cigars, 33,130 boxes of cigaretttes, 52,000 packages of smoking tobacco, including 30,000 packages of cigarette tobacco; 7,000 packages of cigarette papers and 6,850 cubes of chewing tobacco.

COURSES IN FRESHMAN MILITARY SCIENCE ARE IN FULL SWING

Course Is Divided Into Two Parts—Course A for Men Who Take Actual Drill—Course B for Theoretical Instruction.

MUCH PROGRESS MADE.

Qualifications for Superiority at Prize Drill to Come at Year's End Outlined by Capt. Bookmiller.

That conditions are made to fit everybody and everything at the Institute has become a proverb, and the truth of this statement is enhanced when the provisions made for the Freshman course in Military Science are considered. Those members of the entering class who are at all able to drill become the men in Course A, Military Science, having a one-hour lecture and two hours of actual drill per week. This Course A battalion is split up into four companies, A, B, C and D. Each company has its officers and non-commissioned officers. The benefit and diversion created by the drill keeps every man's interest up and senses awake, and those who participate feel amply repaid.

For those who are unable, physically, to take the Course A work completely, form another course—Course B. The two courses in Military Science are the same as far as the one-hour lectures are concerned. But instead of performing the actual drill with arms, an additional one-hour lecture and partly recitation is given. Up to this time this additional lecture has been the only substitute for the two hours of drill of Course A. Very shortly, however, another hour per week may be devoted to a combined lecture and quiz. So far their progress has carried them through the School of the Soldier, and the School of the Squad. This class is very small, consisting of about ten men. There are no officers, and the instruction is under the supervision of Captain Bookmiller. The attendance has been very regular and most of the men take great interest in the work of the course.

As for the progress of the Course A men, rapid advances have been made and drilling with arms was begun over a week ago. It is not too early to look forward to the prize drill which comes about the end of the year. Apropos of this drill, Captain Bookmiller says: "The prize drill will take place as customary near the close of the school year. The best company in the battalion will be selected, not alone on its ability to drill, but on the conditions of the uniform soldierly bearing and attendance throughout the year." There is much in his remark for the members of the course to ponder over and absorb.

N. Y. STATE CLUB TO HOLD FIRST MEETING

All Men Eligible for Membership Cordially Invited to Attend.

The New York State Club will hold its first meeting of the year Tuesday evening, November 29th, at the Union. Invitations have been sent out to all men who were members last year. All new men who desire to become members and all eligible who have not received invitations are cordially invited to attend. It is planned to hold a dinner later in the year.

SECOND CONVOCATION AT HUNTINGTON HALL

Pres. Jordan of Leland Stanford to Speak on "The Blood of the Nation."

TWO O'CLOCK TODAY.

Dr. Jordan, College President for 20 Years, Has Been Holder of Many Offices of Public Trust.

At 2 o'clock today, in Huntington Hall, the second convocation of the year will be held. The speaker will be Doctor David Starr Jordan, President of Leland Stanford University. Dr. Jordan, who is called the Dr. Eliot of the West, is one of the country's best known citizens. He has an M. S. degree from Cornell University, an M. D. from Indiana Medical, a Ph. D. from Butler, and has been awarded the degree of LL. D. by several colleges. Dr. Jordan has been President of Leland Stanford University since 1891. He was co-operating assistant to the United States Fisheries Commission from 1877-91, and 94-99, U. S. Commissioner in charge of the fur seal and salmon investigation, and has been International Commissioner of Fisheries since 1908. He is the author of many able books, of which one—"The Blood of the Nation"—was published in 1902. The book title is the same one which the speaker has chosen for his subject today.

The President asks a full attendance.

FRESHMEN, WAKE UP!

When You Take Part in The Tech Activity You Not only Help Yourself, But Also Your College, the Greatest Institution of Its Kind in the World.

The Freshman class this year is, in one activity, at least, making a rather unpleasant reputation for itself. The first appointments of candidates for the news and business staff of The Tech takes place within the next fortnight, and at present there are a remarkably few number of 1914 men who are taking the usual interest in this publication. In previous years the number of Freshmen who reported as candidates for the various positions on the paper was extremely large and the men took a sincere interest in the work. This year matters are unfortunately different. What is the trouble? We hesitate to accuse this year's incoming class of poor spirit and a lack of appreciation of the opportunities offered in this line.

As a matter of fact, The Tech offers a chance to gain the most valuable experience. In the news department, for example, the coming into contact with prominent men about college and about the city as well, cannot fail to be of great value to the average student. In the business department it is self-evident that the training is exceptionally fine. It brings one into direct contact with leading business men of the city. The regular office work also counts heavily in the learning of practical business methods.

So, Freshmen, wake up! Why should your class be the poorest in its support of this, perhaps the leading activity of the Institute Committee. Come on. Make the most of this opportunity.

WIRELESS SOCIETY ELECTS OFFICERS

First Meeting of Year Held at Union on Wednesday Afternoon.

E. M. SYMMES, 1911, PRESIDENT.

Committees Appointed to Look After the Club's Interests—Plans For Work.

The first meeting of the Wireless Society of the present year was held Wednesday afternoon in the Union. A large number of new men attended, in spite of the fact that the time of meeting was unavoidably set for a somewhat inconvenient hour, the Freshmen having had drill the hour immediately preceding, and the Course VI men Electrical Lab.

The meeting was called to order by Vice-President Ellis shortly after 4 o'clock, and the business of nominating officers for the coming year was at once begun. Mr. Symmes was unanimously elected President to fill the place vacated by the non-return of Mr. Guilford; and Mr. Mason and Mr. Flansburg were elected respectively Treasurer and Secretary, to fill positions vacated by Mr. Woehling and Mr. H. W. Hall, by resignation in conformity with Point Committee rulings. Mr. Fish, 1912, was unanimously elected a member of the Board of Directors to succeed Mr. Symmes, who resigned in order to accept the presidency.

Following this the plans of the society for the coming year were discussed, a room committee consisting of Mr. Mason and Mr. Ellis was appointed and the committee on a sending station was instructed to be ready to submit a report at the next meeting of the society. It was suggested that a custodian of instruments be appointed but the matter was laid on the table until the next meeting.

It is desired that all men wishing to join the society, but who were unable to attend the present meeting, should leave their names at the Cage for Mr. P. L. Flansburg as soon as possible. The number of new men who attended the meeting was particularly gratifying to the older members of the society, and a vigorous and energetic year's work seems assured. The proposed plans will give ample opportunity for all the members of the society to do a large amount of interesting and valuable work, and to become experienced in the less known, but more important, scientific side of the subject.

At the Rugby football game between California and Stanford the streets near the campus were converted into an automobile park, and the machines of spectators at the game were guarded by six mounted policemen.

Printed by Croke Printing Co.

FRIDAY, NOVEMBER 25, 1910.

The Tech is in receipt of a letter from J. N. Stephenson, 1909, a former editor of the paper and member of the cross-country team. We print below an extract which we believe represents the opinion of many of our Alumni who are most deeply concerned in the interests of Technology:

"I think the cross-country team did fairly well at Princeton, and let me say, very emphatically, that it was

not the fault of those who were on the team, but of a lot of lazy, thoughtless or disloyal men at the Stute who did not even try for the team, that Technology was not first or second. The apathy of some men around Tech is a disgrace to themselves and the Institute as well. I know a big Sophomore up there who should have been 'anchor' on his tug-of-war, or been on his football team. He is good enough for Kanaly to make a sure point winner out of in the weight events, which, by the way, can be practiced all winter without going out to the Field. I saw this man's name once as a candidate for the crew. He is not the only one. There are just about THIRTEEN HUNDRED others. Oh, it's a shame!

"The Freshmen are doing the right thing in keeping up their distance work. I hope they lick the Sophs in the Spring and have at least two men on the team next year. The other classes would do well to hold practice in conjunction with 1914."

PREDICAMENT OF A TECH GRAD.

We note by a Philadelphia paper that Mr. R. L. Dodge, 1910, while at work with a Bell telephone inspector in that city, was seized by two of the company's detectives on the complaint of a householder that he was a suspicious character. Mr. Dodge was released with apologies when the inspector with whom he was working appeared on the scene.

The State Universities of Arkansas, Louisiana, Mississippi, Tennessee and Texas, have organized a pentagonal debating league.

Football men at the University of Oregon carry a demijohn of pure water on their football trips.

The Y. M. C. A. at Kansas fed 800 men at their Hollowe'en banquet. Two hundred gallons of cider were provided.

At the Senior smoker held at Wisconsin, the feature of the evening was the tenor solo by a Boer from South Africa.

A homelike, first-class hotel, proud of New England traditions, dating from Gen. Warren, yet newly furnished with every comfort & convenience. Long distance phone and hot and cold water in every room. Kept constantly clean by our vacuum plant. Rooms \$1.00 a day and up.

THE HORNETS NEST

"Well, I'll be dog-goned," groaned Dick as he walked into the room where the rest of the hornets were spending a quiet Thanksgiving plugging.

"What's the matter, Dick?" asked the Freshman.

"Aw, I wanted to hang around the Union this aft, and the darn thing was locked. It was locked this morning, too, and I had to go to the Dairy Lunch for breakfast. Did you notice this beautiful coffee stain on my coat? Cast your eyes also on this beautiful splash of egg. This is the way a man starts on the downward path. Soon I'll be traveling to some of these restaurants to be beguiled by the blary music and flirtaceous waitresses instead of going to the Union." The Junior had become eloquent.

"You could get free feeds for a week if you wrote this to the committee," spoke up Bill. "What do you think of allowing smoking in the dining room?"

"Not on your life," said the Sophomore. "The upper rooms are bad enough. Everything would taste and smell of tobacco. How would you like Scream of Tomato Soup a la Stogie? Say, I heard there were a lot of Tech men giving Tech yells at a school football game today."

"What?" interrupted the Billiken. "Which yell did they give?"

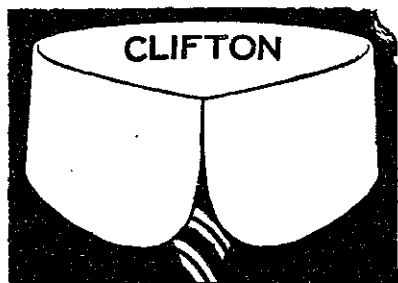

"We are children. Sure as hell T-e-c-h sure does spell Ba-b-y," said Cad.

The meeting broke up in wild disorder.

CORRECTION.

An unintentional inaccurate statement regarding a new Tech Dormitory was made in our issue of the 22d. The house at 211 Newbury street has not been taken by the Alumni for a dormitory, but a very satisfactory arrangement has been made with Mrs. Bowie, who with her family occupy the first two floors, for renting to students for lodging only, rooms on the two upper floors. No board will be furnished, and the part of the house available for students is limited to the two upper floors. It has been conveniently arranged so that the Bursar, Mr. Rand, can assign rooms and arrange and collect the rentals. Any further information can be secured from him.

MADERO SAYS HE IS PRESIDENT OF MEXICO

Toneon Reported Captured By Rebels—Chihuahua in Grave Danger.

MADERO ESCAPES RAIDERS.

Plot of Revolution Hatched in San Antonio Early in October.

In spite of all rumors, Mexican official reports steadily state that the Diaz Government has crushed the chief rebel forces and that order has been restored in nearly all of the cities.

The revolutionists, however, report some successful engagements, notably one in which Toneon had been retaken by Madero's forces. The situation at Chihuahua was exceedingly dangerous and an attack was looked for at any moment. Madero and the railroad running to that city are in the hands of the rebels, and fresh outbreaks have occurred in the extreme southern States.

During the night about 2000 rebels took possession of the river front opposite the city, and a small force of soldiers engaged them from the city. The revolutionists retreated toward San Pedro de la Colonia, pursued by a large force of cavalry.

It was reported that the rebels had driven the soldiers back into the city and had captured a number of them, but later it was claimed that no general attack had been made on the town. Telegraph employees say that Toneon is in the hands of the revolutionists.

The citizens of Chihuahua are all armed in preparation for a fight with the ten thousand Maderists who are gathered near that city. All the western towns on the railroad to Madero are said to have declared for Diaz, but wires are cut in many instances and definite information cannot be secured. It is known, however, that a bridge was dynamited and a train wrecked on the railroad.

All attempts to capture Madero have proved futile, and he has issued a proclamation calling himself "President of the Provisional Government of Mexico." He has also admonished his followers not to wrong Americans or other foreigners. "This movement is directed solely against the tyrant Diaz," he declared.

From San Antonio it is learned that Madero completed his plans for the present outbreak after his arrival in that city early in October. He came from Mexico disguised as a Peon and was immediately surrounded by revolutionary leaders. At that time Madero talked of his opposition to Diaz, but claimed that he was in favor of a peaceful solution of the trouble.

The arms necessary for the revolution were brought into Mexico by fording the Rio Grande on a remote ranch. Just before he left to join the revolutionists large shipments of arms to a friend of Madero's were seized, and it then became known that he was actively leading the revolutionists.

A student in the University of Michigan has just made the rounds of the different places where cigars, tobacco and cigaretttes are sold, and has found out that students at the university last year smoked 132,210 cigars, 33,130 boxes of cigaretttes, 52,000 packages of smoking tobacco, including 30,000 packages of cigarette tobacco; 7,000 packages of cigarette papers and 6,850 cubes of chewing tobacco.

COURSES IN FRESHMAN MILITARY SCIENCE ARE IN FULL SWING

Course Is Divided Into Two Parts—Course A for Men Who Take Actual Drill—Course B for Theoretical Instruction.

MUCH PROGRESS MADE.

Qualifications for Superiority at Prize Drill to Come at Year's End Outlined by Capt. Bookmiller.

That conditions are made to fit everybody and everything at the Institute has become a proverb, and the truth of this statement is enhanced when the provisions made for the Freshman course in Military Science are considered. Those members of the entering class who are at all able to drill become the men in Course A, Military Science, having a one-hour lecture and two hours of actual drill per week. This Course A battalion is split up into four companies, A, B, C and D. Each company has its officers and non-commissioned officers. The benefit and diversion created by the drill keeps every man's interest up and senses awake, and those who participate feel amply repaid.

For those who are unable, physically, to take the Course A work completely, form another course—Course B. The two courses in Military Science are the same as far as the one-hour lectures are concerned. But instead of performing the actual drill with arms, an additional one-hour lecture and partly recitation is given. Up to this time this additional lecture has been the only substitute for the two hours of drill of Course A. Very shortly, however, another hour per week may be devoted to a combined lecture and quiz. So far their progress has carried them through the School of the Soldier, and the School of the Squad. This class is very small, consisting of about ten men. There are no officers, and the instruction is under the supervision of Captain Bookmiller. The attendance has been very regular and most of the men take great interest in the work of the course.

As for the progress of the Course A men, rapid advances have been made and drilling with arms was begun over a week ago. It is not too early to look forward to the prize drill which comes about the end of the year. Apropos of this drill, Captain Bookmiller says: "The prize drill will take place as customary near the close of the school year. The best company in the battalion will be selected, not alone on its ability to drill, but on the conditions of the uniform soldierly bearing and attendance throughout the year." There is much in his remark for the members of the course to ponder over and absorb.

N. Y. STATE CLUB TO HOLD FIRST MEETING

All Men Eligible for Membership Cordially Invited to Attend.

The New York State Club will hold its first meeting of the year Tuesday evening, November 29th, at the Union. Invitations have been sent out to all men who were members last year. All new men who desire to become members and all eligible who have not received invitations are cordially invited to attend. It is planned to hold a dinner later in the year.

SECOND CONVOCATION AT HUNTINGTON HALL

Pres. Jordan of Leland Stanford to Speak on "The Blood of the Nation."

TWO O'CLOCK TODAY.

Dr. Jordan, College President for 20 Years, Has Been Holder of Many Offices of Public Trust.

At 2 o'clock today, in Huntington Hall, the second convocation of the year will be held. The speaker will be Doctor David Starr Jordan, President of Leland Stanford University. Dr. Jordan, who is called the Dr. Eliot of the West, is one of the country's best known citizens. He has an M. S. degree from Cornell University, an M. D. from Indiana Medical, a Ph. D. from Butler, and has been awarded the degree of LL. D. by several colleges. Dr. Jordan has been President of Leland Stanford University since 1891. He was co-operating assistant to the United States Fisheries Commission from 1877-91, and 94-99, U. S. Commissioner in charge of the fur seal and salmon investigation, and has been International Commissioner of Fisheries since 1908. He is the author of many able books, of which one—"The Blood of the Nation"—was published in 1902. The book title is the same one which the speaker has chosen for his subject today.

The President asks a full attendance.

FRESHMEN, WAKE UP!

When You Take Part in The Tech Activity You Not Only Help Yourself, But Also Your College, the Greatest Institution of Its Kind in the World.

The Freshman class this year is, in one activity, at least, making a rather unpleasant reputation for itself. The first appointments of candidates for the news and business staff of The Tech takes place within the next fortnight, and at present there are a remarkably few number of 1914 men who are taking the usual interest in this publication. In previous years the number of Freshmen who reported as candidates for the various positions on the paper was extremely large and the men took a sincere interest in the work. This year matters are unfortunately different. What is the trouble? We hesitate to accuse this year's incoming class of poor spirit and a lack of appreciation of the opportunities offered in this line.

As a matter of fact, The Tech offers a chance to gain the most valuable experience. In the news department, for example, the coming into contact with prominent men about college and about the city as well, cannot fail to be of great value to the average student. In the business department it is self-evident that the training is exceptionally fine. It brings one into direct contact with leading business men of the city. The regular office work also counts heavily in the learning of practical business methods.

So, Freshmen, wake up! Why should your class be the poorest in its support of this, perhaps the leading activity of the Institute Committee. Come on. Make the most of this opportunity.

WIRELESS SOCIETY ELECTS OFFICERS

First Meeting of Year Held at Union on Wednesday Afternoon.

E. M. SYMMES, 1911, PRESIDENT.

Committees Appointed to Look After the Club's Interests—Plans For Work.

The first meeting of the Wireless Society of the present year was held Wednesday afternoon in the Union. A large number of new men attended, in spite of the fact that the time of meeting was unavoidably set for a somewhat inconvenient hour, the Freshmen having had drill the hour immediately preceding, and the Course VI men Electrical Lab.

The meeting was called to order by Vice-President Ellis shortly after 4 o'clock, and the business of nominating officers for the coming year was at once begun. Mr. Symmes was unanimously elected President to fill the place vacated by the non-return of Mr. Guilford; and Mr. Mason and Mr. Flansburg were elected respectively Treasurer and Secretary, to fill positions vacated by Mr. Woehling and Mr. H. W. Hall, by resignation in conformity with Point Committee rulings. Mr. Fish, 1912, was unanimously elected a member of the Board of Directors to succeed Mr. Symmes, who resigned in order to accept the presidency.

Following this the plans of the society for the coming year were discussed, a room committee consisting of Mr. Mason and Mr. Ellis was appointed and the committee on a sending station was instructed to be ready to submit a report at the next meeting of the society. It was suggested that a custodian of instruments be appointed but the matter was laid on the table until the next meeting.

It is desired that all men wishing to join the society, but who were unable to attend the present meeting, should leave their names at the Cage for Mr. P. L. Flansburg as soon as possible. The number of new men who attended the meeting was particularly gratifying to the older members of the society, and a vigorous and energetic year's work seems assured. The proposed plans will give ample opportunity for all the members of the society to do a large amount of interesting and valuable work, and to become experienced in the less known, but more important, scientific side of the subject.

At the Rugby football game between California and Stanford the streets near the campus were converted into an automobile park, and the machines of spectators at the game were guarded by six mounted policemen.
