MADERO SAYS HE IS PRESIDENT OF MEXICO
Tomeo Reported Captured By Rebels—Chihuahua in Grave Danger.

MADERO ESCAPES RAIDERS. Plot of Revolution Hatched in San Antonio Early in July.

In spite of all rumors, Mexican officials report steadily that the Dictator Government has crushed the chief rebel forces and that order has been restored in nearly all of the cities.

The revolutionists, however, report several small outbreaks, notably in the towns of Real del Monte and Balsas, where fresh outbreaks have occurred in the extreme southern States.

During the night about 2000 rebels took possession of the river front opposite President Madero's ranch. Just before he left to join the revolutionists, he planned to hold a dinner later in the evening, November 29th, at the Union. Invitations have been sent to become members and all eligible to the Institute.

Second Convocation at Huntington Hall

The Freshman class this year is, in practicality, at least 80% larger than last year. The Freshman course in Military Science is directed solely against the tyrant and his followers not to wrong Americans even though his mission was only to drive the soldiers back into the city. The revolutionists retreated toward the railroad running to that city are in the hands of the rebels, and fresh outbreaks have occurred in the extreme southern States.

The revolutionists say he is in the hands of the revolutionists of the Provisional Government who have seized, and it then became known that some successful engagements, notably Freshman course in Military Science at Chihuahua was exceedingly grave. The citizens of Chihuahua are all the revolutionists when the provision made to hold a dinner later in the evening, November 29th, at the Union. Invitations have been sent to become members and all eligible to the Institute.

The Tech is in receipt of a letter from J. N. Bauphase, 1909, a former editor of the paper and member of the cross-country team. We print below an extract which we believe represents the opinion of many of our Alumni who are most deeply concerned in the interests of Technology.

"I think the cross-country team did fairly well at Princeton, and let me say, very emphatically, that it was the fault of those who were on the team, but of a lot of lazy, thoughtless or disloyal men at the State who did not even try for the team, that Technology was not first or second. The apathy of some men around Tech is a disgrace to themselves and the Institute as well. I know a big Sophomore up there who should have been anchor on his tug, but was on the football team. He is good enough for Kanasy to make a sure point winner out of in the weight events, which, by the way, can be practiced all winter without going out to the field. I saw this man's name once as a candidate for the crew. He is not the only one. There are just about THIRTY HUNDRED others. Oh, it's a shame."

"The Freshmen are doing the right thing in keeping up their distance work. I hope they lick the Sophs in the Spring and have at least two men on the team next year. The other classes would do well to hold practice in conjunction with 1914."

PREDICAMENT OF A TECH GRAD.

We note by a Philadelphia paper that Mr. R. L. Dodge, 1910, while at work with a Bell telephone inspector in that city, was seized by two of the company's detectives on the complaint of a householder that he was a suspicious character. Mr. Dodge was released with apologies when the inspector with whom he was working appeared on the scene.

"Well, I'll be dog-goned," groaned Dick as he walked into the room where the rest of the hornets were spending a quiet Thanksgiving plug-

"What's the matter, Dick?" asked the Freshman.

Toneon Reported Captured By Rebels—Chihuahua in Grave Danger.

MADERO ESCAPES RAIDERS.

Plot of Revolution Hatched in San Antonio in October

In spite of all rumors, Mexican official reports steadily state that the Ilan Government has crushed the claims on revolution, and that order has been restored in nearly all of the cities.

The revolutionists, however, report some successful engagements, notably one in which Toneon had been reported by Mader's force. The situation at Chihuahua was exceedingly dangerous and an attack was looked for from the railroad in front of that city, and a small force of troops engaged them from the city.

A student in the University of Michigan has made the rounds of the different places where cigars, tobacco, and other articles are sold, and has found out that students at the university are purchasing cigarettes, 32,180 packages of cigarettes, 25,000 packages of chewing tobacco, and 5,000 packages of cigarette papers, and 4,850 cubes of chewing tobacco.
