Banjo, Mandolin, and Glee Clubs will help make occasion a success.

LIST OF MATRONES
First appearance outside of Institute in six years.

DIFFICULT TO PICK

Of but one Western player, but this is of weight in aggressiveness and speed.

his Crimson rival. Fisher, however, was prominent. Of the two, Benbrooke, of West Point, Scully of Yale and Withington of Harvard, are the regulars. Withington is 6 feet 3 inches of height, and McKay has a working knowledge of the position and for the first time, quickly acquired a position in the lineup. "Johnny" Kilpatrick of Yale. In him as the premier end of the season position he starred in that he was the most valuable man on the field, despite the recent formation of an Alumni Council, because of the admirable results which it has accomplished in the past, and because of the keenness of its nature and achievement of ample work for both organizations. A further reason for the continuance is the necessity of undergraduate classes, each class having its "Secretaries" so that they can get in touch with the actual work being done by the alumni.

Several changes in the by-laws were suggested by the committee and adopted by the Association with slight changes. Membership in the Association now consists of all the graduates, the President of the Alumni Association, a representative of the Committee on Publication of the Technology Review, the Secretaries of the four undergraduate classes, the President of the Institute and the President of the Institute's Corresponding Class Secretaries.

The following officers were elected for the two-year term: General Secretary, Frederick H. Fay, 1893; Assistant General Secretary, A. W. Snow, 1894; Treasurer, W. L. Snow, 1894; Executive Committee, J. A. Rockefeller, 1893; W. J. Neal, 1900, and R. R. Patch, 1896.

SOUTHERN CLUB MEETS AT TECHNOLOGY CLUB
Successful Dinner Held—Plans for Musical and Dance Discussion

Thirty men were present at the dinner of the Southern Club at the home of the President of the Club on Monday night. The meeting being one of the most successful ever held by that organization. After dinner plans for the rest of the year were discussed, and those entertainments already decided upon pronunciation. The reason for this reduction in the estimates is due to the economic reforms being made in the country and the war.

Germany has eclipsed the United States; while today England, the recognized leading power on the sea, is being hard pressed by Germany for that title. The reason for this reduction in the estimates is due to the economic reforms being made in the country and the war.

Germany makes enormous gains in naval strength.

Far in advance of United States in the construction of warships.

This country still second.

Naval estimation for 1911-1912 is $99,000,000.

During the last year Germany has made marked improvements in the development of her navy. Although the American navy still stands second among the powers, the Germans have constructed four battleships, the United States, England, Spain, and Japan, which were in different stages of construction at the time the American budget was presented to Congress.

The reason for this reduction in the estimates is due to the economic reforms being made in the country and the war.

Small Party Inspect Ships in Various Stages of Construction.

The members of the Association present last night were: R. H. Wilson, chairman of the Banjo, Mandolin and Glee Clubs, and W. L. Snow, who is to present "Sweet Heart," a musical comedy, to the Union.

Twelve members of the Electrical Engineering Society visited the works of the Fore River Yards last night, and were given a working knowledge of the position and were a tour to opposing kickers. Dozens of West Point, St. Paul of Yale and Paul of Yale are also in the lime light.

The picking of guards is a comparatively easy matter, since the work of the Harvard and Yale teams. Benbrooke of Michigan, with his 6 feet 2 inches of height, and McKay has a working knowledge of the position and for the first time, quickly acquired a place in the lineup. "Johnny" Kilpatrick of Yale. In him as the premier end of the season position he starred in that he was the most valuable man on the field, despite the recent formation of an Alumni Council, because of the admirable results which it has accomplished in the past, and because of the keenness of its nature and achievement of ample work for both organizations. Tess. has identified himself accord- ing to the rules of The Tech, and if you will make yourself known to the General Manager or the undersigned, your latest offer WILL be published. The General Manager can be found in the upper office at noon, and the undersigned from 4:45 to 9 A. M., and from 1:30 to 2 P. M. daily.

MANAGING EDITOR THE TECH.

FIRST ENTERTAINMENT

OF YEAR TONIGHT

Vice-Pres. Humphrey of Technology Club to speak on "Messina and French Africa."

That the entertainment committee has started the year's work in earnest is evidenced by the fact that they have secured for the meeting tonight a speaker as interesting as Mr. R. K. Humphrey. Mr. Humphrey is Vice-President of the Technology Club, and is a man who is deeply interested in all that concerns the Institute. He has had a most wonderfully eventful career and is also an inventor of some renown.

Last year, after a tour of a portion of Africa, he consented to tell the members of the Technology Club about his trip. This account of his journey through Africa proved to be so interesting that he was asked to talk again this Fall about a trip that he had recently taken to Spain. This latter talk was given on Saturday night. Recently he gave this talk on "A Trip Through Spain" before the Biological Society and made quite an impression on his hearers.

The subject he has chosen for tonight is "Messina and French Africa," and lantern slides will be used to illustrate the talk. Everyone should turn out and give a boost to the Friday night entertainments.

COURSE XI EXCURSIONS.

On Thursday, December 8, the Juniors in Course XI will make their first excursion of the year to Worcester to investigate the sewage plant at that place. This plant is under the charge of Mr. L. P. Hinestini, 1875, who is director of the Department of Chemistry at Worcester Polytechnic Institute at that place.

A week later an all-day trip will be made to Providence, where both the water and sewage systems will be investigated. Here the men will be conducted around by Messrs. F. O. Clapp, '89, of the Sewage Company, and G. H. Pratt of the Water Analysis Department. The parties will be under the charge of Mr. Gilbert of the Water Analysis Department.

At a recent Glee and Mandolin Club concert at Central the entire house was sold out in half an hour.

dissertation should be ad-

istributed to the proper departments.

Subscriptions $1.00 per year in adv-

Single copies 20 cents.

Subscriptions within the Boston PostaI District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

FRIDAY, DECEMBER 2, 1910.

We wish to call special attention to the communication in this issue regarding the elections of the Junior Prom. Committee. There ought to be a maximum interest shown by a class in the choice of its representatives. Nominations close Monday, and by that time every member of the class who has the requisite ability for the position, and is not already occupied in some other line of work of great responsibility, should be on the list of nominations. The management of the Junior Prom. calls for men on experience and business ability as much as any position among Institute activities, and the class of 1913 should see to it that the best available men from the class fill the positions on the committee.

COMMUNICATION.

The attention of the student body and especially to the members of the class of 1913 should be called to the nominations of members of this year's Prom. Committee. Little spirit has been shown so far as this most impor-
tant matter. The Prom. seems a long way off, but work must be done, so let us show our interest and put men on the job who will do it well. "Technique" and "The Tech Prom." do more toward making the name of a class socially than everything else put together, and to leave the manage-

ment of these activities to indifference is a great mistake. The 1912 Technique Board is working well and promises the best "Technique" ever. Why not the best Prom. ever? Why not the greatest financial and social success? 1912.

COMMUNICATION.

To Mr. S. P. N.

The last communication, was pub-

lished by mistake, as we print nothing of the sort without the writer identifying himself to the Editorial Board. Your most worthy opponent, Mr. Deni
Professor Jackson to Entertain Members at Dinner Tonight.

All members and associate members of the H. E. Society will be the guests of Professor Jackson at a bunch to be given this evening in the Union. This dinner is intended to be an informal affair, and a large attendance is expected.

The special guest and speaker of the evening will be Mr. J. W. Lieb, Jr., Vice-President of the N. Y. Edison Company. Mr. Lieb is, without doubt, one of the most distinguished electrical engineers of today. He is also President of the American Institute of Electrical Engineering, and a most interesting speaker. His topic will be "Engineering Ethics."

Professor Jackson particularly desires a large attendance and much enthusiasm.

The time originally set for the dinner was 7 P. M., but it has been found that 6:30 is a much more convenient time for most of the men, so the hour for the dinner has been changed to 6:30 P. M.

ORCHESTRA TO PLAY AT WINTER CONCERT

Full Membership Is Now Assured—Concert With Wesleyan Musical Clubs.

Although orchestras have been organized at the Institute in past years, this season has witnessed the first real attempt to form a musical club modeled after one of the typical and very few symphony orchestras of Boston. This orchestra was started about a year ago, with the addition of a French horn to the "The Bohemian Girl," "The Double Bass has been hired. This, of course, makes a double bass has been hired. This, of course, makes the orchestra a double bass has been hired. This, of course,

ORCHESTRA TO PLAY AT WINTER CONCERT

Full Membership Is Now Assured—Concert With Wesleyan Musical Clubs.

Although orchestras have been organized at the Institute in past years, this season has witnessed the first real attempt to form a musical club modeled after one of the typical and very few symphony orchestras of Boston. This orchestra was started about a month ago, with a membership of twenty men, and has steadily grown until last Tuesday night, when thirty performers were present. Money has now been provided for new music, and a double bass has been hired. This, with the addition of a French horn and three cellos, has assured a satisfactory bass for the club.

The music practiced so far has consisted of "The Bohemian Girl," "The Chocolate Soldier" and "The Red Mill," it being believed that more satisfaction is attained by constant hard practice on a few numbers than by attempting a large repertoire. Later, when more musicians and occasional numbers will be tried.

Encouraged by the success attending its appearance at the joint society dinner, plans have been made to give a few independent concerts in the suburban towns, but a better opportunity has presented itself in the shape of playing at the musical club concert on December 15th. This will mean much for the orchestra, and every man should work hard at the remaining rehearsals, because new pieces are to be learned.

Included in the future plans of the club is a joint concert with the Wesleyan Musical Clubs in New York City during the Christmas vacation, but the purpose of the organization is to play at Tech functions, and this aim will not be lost sight of.
