HARVARD WINS HOCKEY GAME AT THE ARENA

Crimson Victory Due Mainly to Superior Individual Playing of Men

SCORE: 4 TO 3.

Technology Plays Up Plucky Game and Shows Splendid Team Work.

The Technology seven was defeated last evening in a most closely contested game by the Harvard hockey team. The game was watched by a score of 5 to 1 in favor of the Crimson players, but in the second half, the Tech team played such excellent hockey that the game closed with a 3-2 score in favor of Harvard.

During the early part of the first half, Technology played the offensive game and Harvard was very busy defending their goal. Within the first three minutes Hurlburt was enabled by good work to score on the first try. The Harvard players had attempted shots for goal, but the Technology men had not been enabled to score a point. Harvard had never scored against Technology and was shortly afterwards taken out of the game by a Publications error. By some clever play the puck was again forced toward the Technology goal, and Hurlburt scored. The second period ended with the puck at the Harvard goal. The Harvard team was now removed several of their most effective players, with the result that the Crimson Victory was due mainly to the play of the Winter Hillers.

The next game that Tech plays will be against Tech on March and April. During the early part of the first half, Technology played the offensive game and Harvard was very busy defending their goal. Within the first three minutes Hurlburt was enabled by good work to score on the first try. The Harvard players had attempted shots for goal, but the Technology men had not been enabled to score a point. Harvard had never scored against Technology and was shortly afterwards taken out of the game by a Publications error. By some clever play the puck was again forced toward the Technology goal, and Hurlburt scored. The second period ended with the puck at the Harvard goal. The Harvard team was now removed several of their most effective players, with the result that the Crimson Victory was due mainly to the play of the Winter Hillers.

Carnegie Donates to Peace Movement

A Scientific Study of Causes of War and Their Prevention to Be Made.

An address by Mr. Andrew Carnegie, so well known for his widespread charities, has, for the past few years been greatly interested in the development of the "Universal Peace" idea. He has already donated more than a million dollars for the erection of the Peace Palace at The Hague, and now proposes to give eleven millions more to found an Institute for the study of the movements of the world. His gift is intended to pave the way for a thorough scientific investigation and study of the causes of wars and the necessary means to prevent them. One of his plans is to institute an "arbitral court of justice," giving the world an international judicial body capable of judging cases arising in states of war or other controversies incident to war. Favorable replies from several leading nations have already been received by Secretary Knox; even the President declares that there is reason to believe that the success of such a court is more than a possibility.

PROVIDENCE ALUMNI

PLAN TECH LUNCHEONS

Invitations Have Been Sent Out Asking Men to Meet on Thursdays.

The following interesting announcement reached The Tech office yesterday. It serves to show some college spirit among Tech alumni:

EVERY THURSDAY
M. I. T. men will lunch at Brucker's Hotel, 317 Westminster street, at 3 P.M. on each Thursday.
You Lunch on Thursday?
Then why not join and get waked up?
Lunch served promptly. Cost, 50 cents, to be paid at the table.
In order that the committee may make their arrangements you are requested to mail the enclosed postal promptly, stating whether you will be present at the first gathering, Thursday, December 15. After the first bunch no notice will be sent—just drop in. The secretary will answer any questions you want to ask in regard to the pictures. Telephone number, Union 2160.

Thursday, December 15, 1910.

The Tech wishes to announce the election of Percy LeRoy Flansburg, 1912, to the Board of Editors, and the election of permanent officers, but it was found advisable to postpone the regular practice which had been held Tuesdays and Fridays from 4:30 to 6:30, at the Tech tank, corner of Wattliter and Cabot streets. The tank will be available.

LATEST DEVELOPMENT IN MOVING PICTURES

Kinematograph Process to Be Demonstrated Before Appalachians.

There will be a meeting of the Appalachian Mountain Club in Huntington Hall on Friday, December 16th, at 9 o'clock, for the demonstration of the Kinematograph moving pictures in the colors of nature. Mr. C. P. Willard, of the class of 1891, formerly an ill-digger at the Institute, has written that this exhibition will be of remarkable interest, and the students here will undoubtedly find it so.

The inventors of this process were Charles Urban and George A. Imich of England, their process consisting of reducing the number of ray filters from three to two, being red and green. The pictures are taken with the ordinary moving picture machine, but twice as fast as usual, with the black and white system. The film used is much more sensitive than those used in ordinary work, a secret agent being employed to make the negative extremely sensitive. The effect of this process is to give a most life-like color to the pictures.

SUCCESS OF WINTER CONCERT ASSURED

Many Tickets Already Sold - Time for Dancing May Be Extended.

Unless something most unexpected happens between now and Friday evening the winter concert will be a great success. The number of seats already sold makes it certain that there will be a large attendance, and that must of itself encourage the players to put forth their best efforts. That the result of this will be laudable, and in every way worth while, to represent the institute, no one who has heard any of their rehearsals can doubt for a moment.

Where there is going to attend will do as well to be informed. The concert will be entirely too good for anyone having a seat to afford to miss any of it. It is due to begin at eight sharp, and assurance has been given by those interested that it will start exactly on the stroke of the hour. There have been typographical errors made on some of the reserved seat tickets, but the correct time is eight o'clock.

If the plans of those in charge of the affair work out as is expected and hoped, the dance which will follow the concert will be a very large line of imported Pictures and Bronze Novelties. The STEVENS No. 335 Shotgun is strong, sure, and reliable, and is why, when they decided to equip some troops with repeating shotguns, they selected the Winchester. The U. S. Army authorities know a gun; that's why, after submitting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it safe, sure, strong and reliable. This is why they felt the President Maclaurin.

Winchester Repeating Shotguns
USED IN THE U. S. ARMY.

The U. S. Army authorities know a gun; that is why, when they decided to equip some troops with repeating shotguns, they selected the Winchester in preference to all other makes. The experts of the U. S. Ordinance Board also know a gun; that's why, after submitting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it safe, sure, strong and simple. If you want a shotgun—buy the one whose strength and reliability led the U. S. Army authorities to select it—and the U. S. Ordinance Board to endorse it—that's the Winchester.
