SOCIETY OF ARTS
LECTURE THIS EVENING

Prof. Jagger and Spofford to Speak On "The Costa Rica Earthquake of 1910."

527TH MEETING OF SOCIETY.
Lecture to Be Similar to One Given Before the Combined Professors Societies.

The Society of Arts will hold their 527th meeting at 8 o'clock this evening, in Huntington Hall. The meeting will be open to the public. Professors Thomas A. Jagger, Jr., in charge of the Department of Geology, and Professor Charles M. Spofford, professor of Civil Engineering at the Institute, will lecture on "The Costa Rica Earthquake of 1910."

A lecture similar to this was given by the same three professors last March at the meeting of the combined professional societies in November, and proved to be of great interest to all.

Professors Jagger and Spofford may be identified as the men who have been America last summer in order to investigate the effects of the recent earthquake at Caragua, May 4th, which caused considerable destruction of property and human life. The purpose of the trip was to gain information on the geological causes of the earthquake and to study the geological causes of the earthquake and show some remarkable and interesting seismographic views.

He will also describe the valuable research work which the Institute is about to undertake on the geology of the famous volcanic oval of the Hawaiian Islands, by the aid of the Whitehead fund and gifts from friends in Honolulu and Boston.

The discussion of the report will be followed by a brief report on the results of investigations that the wooden buildings and their resistance to the shock being offered by the question. The case will be about to undertake the great earthquake at Caragua, May 4th, which caused considerable destruction of property and human life.

The building at the Institute is about to undertake the change of the colors being left to the management and they will go against the name of the Winchester Independent. This is a team that has played together for three years on the high school team, and after graduation they organized an independent team. They had a fine record last year and should be able to make the Senators holistic to get away with the game.

Johnson, the star center of the Valley Independent, is again up again, and will have a good bunch of players who have had credit to their game. He is just the man to put up against Duggin, the crack college back. The contest between two such players should be interesting in the extreme.

MATHMATICAL-PHYSICAL SOCIETY.

There was a meeting of the Mathematical-Physical Society in the Alumni Building Tuesday night.

A report of the results of the report is that the Alumni Fund gave $46,944.15 for special purposes, and $2,000 contributed for special purposes. As pointed out by Mr. Thurber, the Alumni Fund is at present being used for the benefit of the students during the five years of its existence. The following are the special purposes from this Alumni Fund amounted to $39,620.

The Walker Memorial Fund now amounts, with accrued interest, to $1,910.61. For the sharing of the money, the amount of $2,000 contributed for special purposes.

As pointed out by Mr. Thurber, the Alumni Fund is at present being used for the purpose of aiding the students during the five years of its existence. The following are the special purposes from this Alumni Fund amounted to $39,620.

The Walker Memorial Fund now amounts, with accrued interest, to $1,910.61. Which $46,944.15 was received during the past year.

The annual Treasurer's report, presented at the meeting of the Institute this month by Treasurer Wilson, shows that the property of the Institute at the present time is valued at $10,601.91, which is $2,000 more than the $8,601.91 shown in the last report. This is due to the increase in the value of the property and the increase in the value of the property.

Among the most important gifts for special purposes were the following:from estate of Charles Choate, $7,149.54. Among the men who have been America last summer in order to investigate the effects of the recent earthquake at Caragua, May 4th, which caused considerable destruction of property and human life.

Among the men who have been America last summer in order to investigate the effects of the recent earthquake at Caragua, May 4th, which caused considerable destruction of property and human life.
About ten days ago The Tech published a short article which mentioned the growing interest in wrestling at the Institute. The managers were interested in coming out to a meeting and was called for the election of a captain and manager. Owing to a serious illness in Coach Mathers' family and his subsequent inability to be present at the initial practice of the wrestling squad, no formal meeting was held. It has been decided to postpone the election until the coach is able to attend.

At the present time twelve men have signified their intention of taking up the sport, while about ten more are interested, who at present find it impossible to come out regularly. The following men are reporting to the gymnasia at least twice a week for wrestling practice:

- A. K. Adams
- A. G. Herreshoff
- E. B. Blunt
- H. M. Hodges
- D. J. Guy
- P. W. MacNelly
- R. H. North
- P. H. Hussey
- H. R. Kennedy
- R. H. Smith
- A. H. Means

There are many men at Tech who would like to come out for wrestling and learn something about it. Those who remain from doing so because they have never had any coaching or experience. In this they are making a great mistake. It is impossible to come out for wrestling practice, but they have raised the important question of what is involved in the sport.

The cover for the mats which is printed centres, each 12 inches long, for the mats is screwed on the nut, the want without risking the loss of a few square inches of skin at each effort.

FOWNES

**1914 TRACK TEAM PRACTICE REGULAR**

Candidates Showing Up Well in the Majority of Events.

The Freshman track team practice has brought out many valuable men in the various events, and all the candidates are working hard, although very few shot-putters, hurdlers and pole vaulters have reported.

The team to represent the class will be selected from those who show up well in the Freshman track meet, which will probably be held January 7, so any one intending to enter should not delay in reporting at once.

A practice schedule will be arranged for the team, and their first taste of competition will be in the meet against the Sophs, February 4. A meet will probably be arranged with the strong Boston English High School team.
CIVIL ENGINEERS
WILL HAVE LECTURE

Mr. F. C. Pillsbury Will Speak On Road Construction and Maintenance.

This week, Wednesday, at 4:15 P.M., there will be a meeting of the Civil Engineering Society in Room 11, in Eng. B. F. C. Pillsbury of the Boston Division of the Massachusetts Highway Commission will be the speaker, and a most interesting lecture is promised. The topic to be discussed is: "The Principal Methods of Road Construction and Maintenance," and the various points will be illustrated by blackboard diagrams. Mr. Pillsbury will answer any and all questions which may be raised by the members.

The necessity of raising the standards and pay of the workmen employed in highway construction is a pressing one, because at the present time the public is asking for new high standards in roads.

The chief business of the society will be to elect a new vice-president. The sample of the Civil Engineering Society pin has arrived, and the whole order is expected to be here by Thursday. Ninety-seven orders for pins were received and the committee ordered an even hundred. The pin is of a very pretty design, and the committee expects that after the men have seen them they will have to order a second lot.

With each package of cigarettes you get a Civil Engineering Society pin. 25 of which secure a handsome felt college pennant (12/62) — selection of 100.
