EMPLOYER’S RELATIONS TO HIS EMPLOYEE

Mr. George A. Flynn, Corporation Counsel For Boston, Will Speak.

AT CATHOLIC CLUB MEETING.

Subject of Industrial Accidents Being Studied With Great Interest by Seattle Labor Conference.

At the fifth regular meeting of the Catholic Club, which will be held next Wednesday, January 11, at 8 P. M. in the corporation counsel’s office, Mr. George A. Flynn, assistant corporation counsel of the city of Seattle, is to give a very interesting and timely lecture on “Industrial Accidents and the Rights of the Employer to Employment.”

This lecture will be of especial interest to us as the committee of the recent steps taken to bring the employer and employee into closer relations, and which has resulted in better protection for the employees.

This subject is being studied with great interest by all engineering corporations, and their efforts to treat their employees fairly is shown in the Massachusetts State Legislature this year. Mr. Flynn has made a special study of the liabilities resulting from accidents, and will, without doubt, give very interesting and most instructive lecture.

This meeting will be the last one before which the club will be held in Whitney Hall, Brooklyn, on February 8. It is, therefore, important that all members should attend. The district committee wishes to announce that anyone who wishes to have invitations sent to his friends must have in the names and addresses to A. J. Hersey, Box 30, Cages, Saturday, January 14th, at that latest. This is important as the invitations must be sent out next week.

CIVIL ENGINEERING

PINS HAVE ARRIVED

Long Delayed Pins Heartily Approved of by Society.

After some delay the pins and foils for the Civil Engineering Society arrived yesterday morning. For the past few years the society has been considering the question of pins, and at the beginning of this year a committee was appointed to look into the matter. Dean Burton and Professor Allen of the Department of Civil Engineering suggested a very good design which was approved by the society. The general form of the pin is a section of a level rod in silver, with a Boston target in red and gray enamel. On the target is the inscription: “Civil Engineering, Boston, 1911,” raised letters. The whole design is very encouraging to the management and is to be introduced in the Union, Mr. George A. Flynn, assistant corporation counsel of the city of Boston, said yesterday morning.

The pins will be very neat and represents very well the interest of the society. The pins will cost two dollars for the fobs. Some dissatisfaction has been expressed among the students on the price of the pin, but which is on the odds with their being mounted upon poor leather, and it is probable that they will be changed.

Are you a candidate for those theatre tickets this week? There is still plenty of time to start if you haven’t already.

Tech Show, 1911, is soon to issue a call for music writers.

VARSITY BASKETBALL TEAM.

TECH BASKETBALL TEAM PLAY BROWN

Harvard, Fast Game Expected On Saturday Night at the Gymnasium.

BROWN FAST TEAM.

Second Team Will Play the Boynton Five Between the Halves.

The next game on the basketball schedule is that with Brown University here in our own Gym on the 14th of January, next Saturday. The squad will be in fine condition for that game, and will in all probability play a better game than they have at any time this season. The Second team will go against the strong Boynton five, a local team with a good reputation at present.

Brown has always been a hard and energetic team, and the members of the Institute are always encouraged to attend these games, so the 1913 annual should be a very interesting and instructive lecture.

CARNEGIE TRUST

CO. WAS UNAIDED

Conservative New York Banks Seemed to Recent Coming of New Interests.

In regard to the closing of the Carnegie Trust Company the New York Commercial comments as follows:

When the run on the Carnegie Trust Company was started other banks and trust companies did not offer to come to its aid. The weakly bank statement yesterday showed a gain of $50,000,000 in actual cash on hand and a gain of $12,000,000 in surplus, while there is a decrease in bonds of $22,000,000.

When the president of one of the large banks was asked why the Carnegie company was not helped when the bank statement showed this condition, he said:“a farmer picks a bad apple out of a barrel to save the others”.

“Here the trouble of the Carnegie company and the danger that confronted the other institutions were laid in large part to jealousy. It was said that the old and conservative institutions in the financial district refused the coming to their field of a very encouraging to the management

MAN-FLYING KITES AS WIRELESS STATIONS

First Experiment Made in Los Angeles By S. F. Perkins of Boston. MAY BE USED AS TARGETS.

Sharphotipoles in Aeroplanes May Be Trained by Their Use.

In the future, the man-carrying kite is going to be one of the principal instruments of warfare if the experiment of Mr. S. F. Perkins of Boston at Los Angeles, lately, is any index of the matter. The principal reason for the use of this kite is its serviceability as a wireless telegraphy station. In the experiment in that is referred to the aerial was carried aloft several hundred feet, and it was easily expanded or damped quickly as an emergency wireless station could be established in time of war. Another use of the man-carrying kites is that of a target for the practice of sharpshooters carried in aeroplanes. The kites can be made to bob about so as to cause the sharpshooter to keep on the alert. Life-sized dummies are attached to the kites as a further target.

CAREER AS A BASKETBALL PLAYER

A farmer picks a bad apple out of a barrel to save the others. Here the trouble of the Carnegie company and the danger that confronted the other institutions were laid in large part to jealousy. It was said that the old and conservative institutions in the financial district refused the coming to their field of a very encouraging to the management

TECHNIQUE ELECTORS FOR 1913 ARE CHOSEN

Twenty-five Men Elected to Committee — Birchard Member Ex-Officio.

MEETING THURSDAY AFTERNOON.

Very Good Material in 1913 From Which to Choose Technique Board.

President H. S. Birchard is a member of the committee-elect, and it is announced that he will call a meeting of the newly elected committee men for Thursday afternoon at 4 o'clock, in the Union. The men above named have in their hands the choice of those who will take charge of the 1913 Technique. The name of every man in the class is considered in this matter, and if a man to be considered is on the committee he has to leave the room, and his name is before the board. The class has an abundance of good material from which to choose the editors of its year book, so the 1913 annual should be a good one.

CALENDAR.

Tuesday.

1:00 — Tech Board Meeting (with lunch)—Union.
1:30 Union Committee Meeting—Dean’s Office.
4:00 — Gym Team Practice—Gym.
4:15 Gym Team Practice—Gym.
5:00 — Varsity Indoor Track Team—Union.
5:15 — 1914 Indoor Track Team—Union.
5:45 — M. T. A. A. Meeting—Room A, Union.
6:00 Union Dinner—Union.

Wednesday.

1:00 — Basketball Practice—Gym.
1:15 — Gym Team Practice—Gym.
5:00 — 1914 Basketball Practice—Gym.
5:00 — Hockey Practice—Area.
6:00 — Catholic Club Dinner—Union.

Thursday.

1:30 — Hockey Practice—Cage, Union.
4:00 — Tech Board Meeting—Union.
5:15 — Varsity Track Team Practice—Gym.
5:45 — 1914 Track Team Practice—Gym.

Friday.

4:15 — Gym Team Practice—Gym.
5:00 — 1913 Basketball Practice—Gym.
5:00 — 1914 Basketball Practice—Gym.
The Tech served at the Women's Association last Saturday must have been great—at least the chicken pie last night was extra good.

Save Saturday night for the Tech-Brown game at the Gym.

Six more days.

Have you as many exams as the rest of us? If you haven't you might give us a little dope for The Tech. It will be highly appreciated.

ALL FOOLS ARE NOT DEAD YET!

From one of the Boston Dailies.

It is a subject that is interesting chemists all over the world, and it is an exceptional chance for Institute men to enlarge their knowledge in that direction. Professor Jaeger's lantern slides are said to be much out of the ordinary, and this will add to the interest of the talk.

THREE KEYS

There appeared a forced method of selection which arose in front of their building last Saturday evening, when the forward wheels of an electric car started down Boylston street, while the rear wheels were headed in the direction of Huntington avenue. They cannot yet understand why, when the power was reversed and as an attempt was made to back the car, the rear wheels went forward. If the backing up process had been continued the car would have turned round in a circle.

FLUID CRYSTALS TO BE DISCUSSED

Prof. F. M. Jaeger of University of Groningen Will Lecture in Lowell Building.

Professor F. M. Jaeger of the University of Groningen, Holland, will give an illustrated lecture in Room 6, Lowell Building, at 8 o'clock on Thursday, January 12th, on "Fluid Crystals." This is a subject that is interesting chemists all over the world, and it is an exceptional chance for Institute men to enlarge their knowledge in that direction. Professor Jaeger's lantern slides are said to be much out of the ordinary, and this will add to the interest of the talk.

FOUNOES GLOVES

are service gloves—wear long and look well while they wear.

West, and that there was a determined new set of men from the trouble, it was generally believed to who was the person whose help it was. Nearly a year ago a committee was considering the organization of the New York Chamber of Commerce which was held last Thursday. There and their plan was presented to the establishment of a tribunal where business is no doubt, however, that the court desire a fair arbitration of their difficulties. It is recognized that there was a track meet on Saturday. He scored ten out of eleven tries. Just keep your eye on him Saturday. He scored ten out of eleven tries at Hanover in the Dartmouth game.

New York Chamber of Commerce
Is to Establish Court For
Honest Merchants.

The New York Chamber of Commerce is considering the organization of a court of commercial arbitration. Nearly a year ago a committee was appointed to investigate the matter, and their plan was presented to the chamber at their January meeting, which was held last Thursday. There is no doubt, however, that the court will be authorized at that meeting. The feature of the plan is the establishment of a tribunal where business men who desire to be honest and who desire a fair arbitration of their difficulties can secure a prompt decision.

ARBITRATION PROPOSED

COMMUNICATION.

Last Friday evening the Union Entertainments Committee arranged a very interesting and instructive evening's entertainment for the benefit of the undergraduate body. This meeting was addressed by a well-known lawyer who has traveled extensively and who is known by the subject. Must it not seem remarkable to a man of this type to be invited to speak before the students of the Massachusetts Institute of Technology at an entertainment, and at the hour not to find only fourteen men gathered to hear his discourse, this including several members of the committee? Does this not give the Institute a nice name in this man's world? Of course, we all realize that there was a track meet on Saturday. He scored ten out of eleven tries at Hanover in the Dartmouth game.

FATIMA

TURKISH BLEND

CIGARETTES

LAW

Judge Fatimas on merit and they'll acquit themselves well.

The college man's verdict is: "Distinctively individual." Therefore Fatimas are the favorite of students.

If you will try Fatima you will continue to buy them. Inexpensively packed and you get ten additional. 20 for 15 cents.
