MOTION PICTURES OF ENGINEERING FEATS

Civil Engineering Society To Hold
Novel Entertainment In Hunt Hall

FRIDAY NIGHT

One Film Especially Imported From
Canada For The Event.

Following immediately upon the foot steps of their meeting of last week, the program committee of the Civil Engineering Society announced that the next entertainment provided for members of that body will be a moving picture show which is to be held in Huntington Hall on Friday evening, February 17th. The pictures shown will deal with engineering subjects, and are the best to be secured. Among the films shown will be one dealing with the building of the Grand Trunk Pacific Railroad of Canada, it being especially imported for this occasion. Other subjects to be treated of will be "The Birth of a Big Gun," "The Working of a Blast Furnace and Roller Mill," and "The Panama Canal."

This is to be a ladies night, and each member of the society is privileged to have four tickets of admission free of charge. The only restriction about the use of these is that no Course I or XI man who is not a member of the club will be admitted to the show. Tickets can be secured from any officer of the society or notes requesting them can be left at the cage for Mr. O. D. Powell, Secretary.

It is seldom if ever that such a group of pictures have been seen together in the past, this being a distinct innovation, and every man member of the society should be on hand. The third year Materials Class simply cannot afford to miss this opportunity, since the pictures offer a good course in Materials in themselves.

The committee urges the men not to be bashful and to be sure to bring out the ladies.

OLD ART MUSEUM TO BE

DEMOLISHED BY MARCH 1

Comparison of This Building With Modern Structures Made for Tech Men

Men who have been witnessing the tearing down of the old Art Museum will be interested in the following facts which were given to a Tech reporter by the official in charge.

As far as construction goes the old Art Museum was a thoroughly fireproof building which compared favorably with the best modern structures. The floors were very similar to those built today, but there is a marked difference in the steel work. In modern practise, the steel frame, well braced and riveted is put up, and the rest of the building is constructed around it. In the case of this building, however, the walls were built first, and then the steel roof-trusses were put on the tops of these. Furthermore the steel work was much heavier than modern practise demands.

The contract calls for the demolition of the building within seven weeks after the work began. This will be time enough for the contractor who expects to be through by March 1st.

The old coner stone, some of the cornices, and other parts of the structure have been taken to the New Museum, and the bricks which are being piled in one corner of the grounds are to be used in the construction of the New Copley-Plaza Hotel.

REPORT OF COMMISSION ON FACTORY INSPECTION

Committee Reports That There
Are Too Few Inspectors To
Handle Work Efficiently

DOCKING FACILITIES OF BOSTON

Highway Commission advocates Through
Highway From Boston To Canada.

The Commission appointed by the Massachusetts Legislature to investigate methods of shop and factory inspection, has turned in a report recommending considerable change in the present system. The chief defects of the present system according to this report are division of authority and limitation of inspectors. The reason for the first defect is that part of the inspecting is done by the State Board of Health and another part by the State Police; although each part is done well, the two do not wholly cover the field, and there is no co-ordination between them. In the second place the inspectors are too few in number, with no definite and logical division of responsibility, lack in many cases the requisite practical training, and often carry on private practice along with their public service.

The logical solution is the creation of a general department of inspection, of which the board of industrial inspection would form but one division; in this way the whole extensive work of inspection carried on by the State could be organized with definite assignment of powers and duties, and carried on most efficiently, both as regards expenditure and results. The excellent laws of this State regulating industrial and other business conditions should not be allowed to lose their effectiveness through ineffective inspection and enforcement. As a step toward this plan the legislative commission has submitted with its report a bill providing for the creation of a new State board, consisting of five members, to be known as the Board of Industrial Inspection; the members will serve without pay, and choose a commission of three to carry on the active work of the department.

At a meeting of the Massachusetts Highway Association of Thursday, Mayor Fitzgerald advocated a through highway from Boston to Canada to match New York's similar project. In view of the prospect of reciprocity with Canada, he urged that immediate steps be taken to perfect in each of the New England States organizations with this end in view.

On Friday morning a committee of three business men, representing the Boston Chamber of Commerce, attended the hearing before the legislative committee on Metropolitan Affairs and urged the immediate development of the docking facilities in Boston Harbor. The Government has expended \$8,000,000 in dredging a channel that will accommodate any steamships afloat, but despite this Boston loses a great deal of her rightful foreign trade through inadequate docking facilities. This committee urged that the \$3,000,000 appropriated last year be relieved of the present restrictions, and that immediate alleviation of present conditions be secured through its expenditure in bulkheads, sheds, and such necessary accommodations. They also showed that the Cunard Line was on the point of leaving Boston, when the Boston and Albany Railroad came to the rescue by constructing a pier and elevator where they could be accommodated; that the White Star Line is seriously dissatisfied with its present facilities; and that a thorough equipment of dock, sheds, and warehouses on the waterfront of Boston would be of great advantage to the whole Commonwealth.

BATTALION DANCE AT HOTEL TUILLERIES

All Institute Men Invited to
Important Social Affair
of Military Department

FRIDAY MAR. 10

Complimentary tickets sent to High
School Battalions in the
Vicinity

At the meeting of the dance committee of the M. I. T. Battalion held in the Union yesterday afternoon it was decided to hold the dance in the Hotel Tuilleries instead of Howe Hall as had first been intended. Furthermore the date has been changed to Friday March 10. The music will be furnished by Alexander's Orchestra. Lt. F. B. Morton who is Chairman of the committee is also to be Treasurer and is prepared to receive money for tickets now, and the tickets will be ready for distribution next Wednesday. The price of tickets is \$.75 and the committee wishes specially to point out the fact that it is not solely a freshman dance but that all men in the Institute are invited to come. It is the only dance of its kind held here and with the exception of the Junior Prom. and the Musical Clubs' dances it is the only important Tech dance.

All men in the battalion who attend are requested to appear in uniform and as most of the uniforms were bought new this year the effect made by a number of them will be pleasing. Complimentary tickets will be sent to the following high schools: Lynn English, Lynn Classical, Mansfield, Stoughton, Wakefield, Reading, New Bedford, Medford, Hyde Park and Gloucester. Some of these high schools have girls' battalions, which will much improve the attendance, and make a very pleasant evening.

COSMOPOLITANS TO HAVE BRITISH NIGHT

Next Meeting Of Club To Be Held
On Saturday, February 25

A week ago last Saturday, the Cosmopolitan Club began its series of National Nights, the affair being in charge of the Latin American members. The program committee has now announced the complete set of entertainments for the year, they being as follows:

British Night.	Feb. 25
Chinese Night	March 11
American Night	March 25
French Night	April 8
Japanese Night	April 27
German and Ottoman Night	May 13

The Britons are making great preparations for their evening. Slides have been secured showing views from various parts of the Empire. Good Speakers and music are to be furnished, and to make things more realistic several men will give some of the famous Maori war cries.

The meetings will be held in the Union, the club having given up its quarters on Boylston Street, and about half of them will be ladies nights. In this way both the fussers and the stags will be satisfied.

The University of Michigan has announced through a resolution of the Board of Regents, that analyses of drinking water and such laboratory work in the interests of public health and safety for state institutions and public corporations will hence forth be done without the previously customary charge of ten dollars for each test.

TECHNIQUE TO APPEAR TUESDAY, APRIL 18

Slips For Signing Up For Books May
Be Obtained From The Board

MORE GRINDS NEEDED!

A Special Feature To Be Introduced;
Will Be Announced Later.

Technique meetings will be held, hereafter, twice a week on Mondays and Thursdays at 5 o'clock. Approximately one half of the book is now ready for the final printing and the rest is coming along in fine shape. The art work, which greatly surpasses that of last year, is being turned in large quantities. The grind department requires many more grinds and requests every man in the Institute, to write up, or suggest the subject for a good grind. Remember that this is the department in which you may knock whom and what you will and that it closes the 20th. Cartoons are very acceptable.

Slips are now in the hands of the Board for fellows to sign up in for books, and only those signing up will be able to get any books.

The annual rush is to be a big feature of Prom Week, and will start the weeks festivities. The Book will appear on Tuesday, April 18 and it will be one that every Tech man will be proud of. A special feature is to be included in this years Technique which will be of vital interest to every student.

TECH B. B. TEAM TO PLAY TUFTS FRIDAY

Hart, One Of The Tufts Back In-
jured But May Play

The Tech Basket Ball Team will play Tufts in the gym. next Friday. A return game, will be played at Medford February 28, which will be the end of the Tufts schedule. Hart, one of the Tufts backs, was unable to play in the Union game last week, on account of an injured knee, but it is expected, that he will be able to play Friday.

CALENDAR

TUESDAY

1.30—Union Com. Mtg.—Dean's Office.

TUESDAY FEBRUARY 14, 1911

Some of the freshman have been heard to complain about the admittance of onlookers to the floor of the armory, during drill sessions. In want of a better place to leave their wraps, the freshmen are accustomed to lay their coats and hats upon the benches along the sides of the room. Some of these coats contain articles of value and some of the coats themselves, are of no small personal and intrinsic value. Visitors, it seems, have often gained admittance to the ground floor with no opposition on the part of those in charge of the hall. By a single nifty act, one of these coats might be taken without arousing suspicion until too late. There seems to be no excuse for admitting spectators to the ground floor, while there are sufficient accommodations provided for them in the balcony. The freshmen ask for a safe place to leave their coats and for them we suggest, that the general public be denied admittance to the main floor.

More music for the Union! The Committee is doing all it can to make the Union a homelike get-together place for us. What a pity some of us still haven't the decency to recognize the nature of the Union, and acknowledge the purpose of the Alumni, who made the Union a reality! A man wouldn't think of keeping on his hat in his home nor in the rooms of self respecting clubs. Then why make an exception of the Institute living room? It seems strange that a few should still have to be reminded that the Tech man should always be a gentleman. Hats off!

VALENTINE PARTY OF ELECTRICALS

Supper in Union Tonight, Followed By Address By F. P. Valentine

This evening will be held in the dining-room of the Union, at 6.30, the Electrical Engineering Society's Valentine Party. Mr. F. P. Valentine, of the N.E.T. & T. Co., will be the speaker of the evening and he will speak of the Boston Exchange and the proposed new rates,—in short he will give a rather general talk on telephony in Boston. The toastmaster will be Mr. L. P. Ferris the president of the Society. Tickets are \$5.00, and already about sixty have been sold.

This affair is somewhat of innovation, and the committee decided to make it come on Valentine's night, on account of the speaker's name. Something in the line of comic valentines, hitting the various members, may be expected. The menus will be in line with the spirit of the evening. During the evening, the new pins of the Society will be distributed to those who have ordered them. Following the custom set some time since, the excursion will be held on Thurs. and Friday, to the Fort Hill Exchange, for all men of the Society who sign up on the bulletin board in Lowell.

ARCHITECTURAL SOCIETY

HOLDS SMOKER TO-NIGHT

Mr. Hugh Cairns will speak on
Sculpture and its relation
To Architecture

At the Architectural Society smoker to-night, Mr. Hugh Cairns of the Fenway studios will give a talk on Sculpture and its Relation to Architecture. Mr. Cairns, because of his prominence in the world of sculpture is particularly well-fitted to speak on the subject he has chosen. He will illustrate with models that he will make of clay during his talk.

To this event are invited the first year Course IV students. It will be held in room 42 Pierce at eight o'clock. Refreshments and "smokes" will be provided and a good time is promised to the large number who will be present. The tickets are thirty cents each.

The team that will represent the United States at the Fifth Olympic Games at Stockholm, will, of course, have its expenses paid by the Olympic Committee, as usual, and the committee to ask for contributions for the record as favoring the project and contributing, is the Amateur Athletic Union. President Everett C. Brown of Chicago, has notified Secretary James E. Sullivan to take a mail vote of the board of governors authorizing that the sum of \$1,000 be contributed by the Amateur Athletic Union to the treasurer of the Olympic Committee to start the fund that is to be raised to send the team of 1912. This proposition was presented to President Brown by the New York members of the A. A. U., who felt that the Amateur Athletic Union should take the lead.

Mr. Isaac Hansman '11 has been called to Hartford on some expert testimony work.

Now, do you know about the Art Museum?

Those Civil Engineering Posters are thrillers. Wonder if we can go to the show?

The Tech Show is booming this year.

One holiday next week, thanks to George Washington. You easiest day, eh?

The Tech men who were at the concert at Wellesley Saturday claim that they had it all over our Cambridge neighbors.

The Lowell Institute Lectures dealing with the subject of "The Ocean" have been indefinitely postponed owing to the illness of Sir John Murray.

Freshman! All Course IV fourteens out for the smoker tonight—Be careful of your first cigar.

TEN YEARS AGO TODAY, THE TECH PUBLISHED THE FOLLOWING NEWS ITEMS

Surely the Tech man can no longer complain of short and infrequent vacations. They are things of the past—to be forgotten. Next year the whole system will, in all probability, be revised perhaps divided so as to bring the semi-annual examinations, just before Christmas. Nothing definite has been decided however, and the matter is too far in the future to comment.

The B. A. A. annual winter meet in the Mechanics Building is close at hand, and Technology is to be represented by four or five men.

A society has been recently formed, consisting of the senior class in Chemistry and Chemical Engineering. It is to be known as the "Senior Chemical Society" and informal meetings will be held monthly at the residence of Mr. Samuel Cabot on Commonwealth Avenue.

Professor William Z. Piple has gone to Washington, having been appointed expert in transportation to the United States Industrial Commission.

The "Inauguration number" of the Technology Review, the issue for January, is full of interest to both graduates and undergraduates.—The main part of the Review, is given over to a full report of the speeches of Mr. T. H. Livermore, ex-president Crafts, Senator Lodge and President Pritchett, given at the inauguration of Dr. Pritchett.

Professor Alfred E. Burton, who was elected President of the Bowdoin Alumni Association, February 6, presided and also officiated as toastmaster at the dinner that evening.

All Institute men interested in Christian Science are requested to hand their names to F. E. d.

The annual handicap games of the B. A. A. will be held in the Mechanics Building next Saturday evening. The two mile run claims such men as Alex. Grant, Taylor Carter and Williams of Harvard; *THE NALY OF CAMBRIDGE-PORT.*

FATIMA

TURKISH BLEND CIGARETTES

MINING
 A good prospect is soon discovered to be a rich find if you start smoking Fatimas. When assayed they reveal only rare tobaccos blended to produce a distinctly "different" taste. Come fellows, get rich quick, dig up some silver and buy gold, for Fatimas are nuggets of intrinsic value. And their goodness is surprising.

They cost only 15 cents for 20, which gives you 10 additional.

THE AMERICAN TOBACCO CO.

With each package of Fatima you get a pennant coupon, 25 of which secure a handsome felt college pennant (12 x 32)—selection of 100.

WILLIAMS VS TECH

On Thursday evening at the Arena
the Institute Hockey Team goes agains
the fast Williams team for the first time
this year. Williams has a team, that
has given a good account all during the
present season, and they will be able
to play a speedy game in the Arena for
they have a new rink in Williamstown
which gives them place to practise and
which is very similar to the Arena, and
they will not be lost Thursday night,as
some teams have been. The Team,
played very good at Providence, but
they were under the disadvantage of
playing in a small rink. The man are
in good condition and are putting in
some hard practise with the purpose
of taking this game from the Berkshire
College.

NOTICE

Students desiring to do stenography
or typewriting in spare hours are re-
quested to see the President's Assistant,
10 Rogers, Office hours 8:30-9:00 and
12:00-1:00 daily and 4:00 to 5:00 Tues-
day, Wednesday, and Thursday.

1911

A list of all men eligible to be placed
on the ballot for Class Day Committee,
will be posted on the bulletin in the
Union about February 13. If your
name is not on the list consult with
any of the Class Officers at once, as
after March 1, no name will be added.
H. F. Dolliver, Clerk.

TO LET

Two double rooms with board. Apply
to 16 St. James Ave., Boston. (77-7f)
