TECH DEFEATS CORNELL

AND SYRACUSE

Relay Team makes Remarkable Time of 3 min. 29 secs. in N. Y. A. C. Games

SALISBURY STARS

Passes Cornell Star Runner in Last Lap and Wins by Three Yards.

At the New York A. C., annual indoor track meet held in New York last Saturday, Technology won the mile college relay race from Cornell and Syracuse in 3 minutes, 29 seconds.

Thompson of Technology made a fast start and in the first 25 yards gained a lead of 5 yards over McArthur of Cornell. He held this lead till the last few yards of his race, when he was passed by his rival as had been expected for the latter was reported to be Cornell's fastest man. Nixon, Cornell's second man, was released only a yard ahead of White. At the end of the first lap and a half, White regained the place lost by Thompson and raced down a half lap abreast of Nixon. Unfortunately he was on the outside and his man pulled away from him and increased his former lead. White by a fine exertion decreased this and touched off Guething with only a yards loss. Gurthing ran a fine steady race against Ford of Cornell, holding his own clear to the finish, releasing Salisbury, the last man. For a whole lap Salisbury ran even with Eisenhardt. Then with a lap to go he made his try and with a fine piece of skill and running he shot by his man, who was running wide, to the pole and amid a surprised silence increased his lead and crossed the line three yards to the good. When the crowd realized that the race was won the applause was deafening. At the announcement of the time 3 minutes 29 seconds, the Technology Team received still more cheers and applause. As a matter of comparison it may be said that the time made by the crack N. Y. A. C. relay team when it defeated

BASKET BALL TEAM

DARTMOUTH PLAYS TECHNOLOGY ON THE HOLIDAY

1913 vs 1914 AT THE GYM.

Dartmouth against Technology at The Gym to-morrow night at eight o'clock in the last and best game of the season. The Hanover boys have arrived in town and are staying at the Copley Square; they have a hard game with Tufts tonight and are in the pink of condition for these games. They will take no chances of losing either of them if possible, but at the same time they realize that they are going after a tough proposition. The Institute Team leaves this noon for their trip to Middletown and they will not arrive in Boston again until shortly before the game Wednesday. Last week both teams played games with strong teams; Dartmouth to lose to Williams and the Varsity to win from Tufts. Dartmouth got a worse beating on their own floor than the Institute team did in Williamstown and still played a better game than any other that they have played this season. Tech on the other hand played Tufts to a standstill in a very slow game. The Institute

team-work and almost stop the passing. It would seem that an injury to a Varsity man would have less effect on the game than if a Dartmouth man should go out for the reason that all the men on the squad have played in a part of every game and done very good work so that they can change around without much trouble.

The preliminary game will be between the Freshman Sophomore teams and will be in itself full of class. The two lower class teams are both composed of men from the second squad and in practise they have shown themselves to be very nearly in the same class. The Freshman have played more games together and for that reason have their team-work perfected more highly but the Sophomores have the advantage of an extra year in college basket ball and they are more accustomed to the Gym and the rules. Freshman, you must show up at the Gym and back your class against the Sophomores, as well as the Institute against the Green! Here is your chance to wipe out that disgraceful Field Day in so far as it is possible and YOU, each and every one, want to be on hand to do your part in the good work.

The Alumni of both institutions will be well represented at the game for there have been a large number of special invitations sent to all those living in or around Boston by their respective managements. Manager Chandler says that there has been a generous response to his call and that there will be plenty of Old Tech men at the game to cheer on their Alma Mater. He seems to be optimistic on the outcome of the game and Capt. Parker as well is full of enthusiasm and speaks as though his team had lots of chance to win. He says that his team lost at Hanover largely because of the small floor and the easy passing that Dartmouth was enabled to get in. John O'Reilly will referee the game and that means a square deal for both teams and a game that will be kept moving all the time and for that reason much more interesting to the spectators. Everybody at the Gym Wednesday night to cheer The Team to victory.

RELAY TEAM

the B.A.A. team was 3 minutes 30 1/2 seconds Syracuse was never in the reckoning, scarcely ever being within ten yards of either of the other two. The race between Technology and Cornell afforded all the enthusiasm and excitement. It was a wonderfully clean race, for there was not a foul or a collision from the beginning to the end.

HOPES FOR ANOTHER RELAY VICTORY

To-night the two-mile relay team leaves for Troy New, York, where they will race Cornell. The team leaves the North Station at midnight. It will be composed of P. D. White, E. T. Marceau, R. D. Sampson, and E. B. Germain. We hope that they will be the winners in the race.

Team started the game with very little speed and played better every minute of the game, finished in a whirl wind of speed, scoring and passing at will all over the floor. Tufts didn't seem to be able to do any thing to stop the passing and the last ten minutes of the game were played in championship style. To-night at Medford, Dartmouth will face Tufts while the Varsity is playing in Middletown, and on these games will hinge the outcome of the big game, to a very large extent. A man laid out or injured even slightly will make a great difference for the teams, on paper at least, are very evenly matched and the loss of one of the regulars would mean that a sub would go in and slow up the

WELLESLEY CONCERT AND DANCE TONIGHT

New Tech Song to be First Number on Programme

NORTHAMPTON TOMORROW

Musical Clubs Give Out Report of Un-usual, successful Season This Year.

The season of the Technology Combined Musical Clubs has been extremely successful and there is much promise of even better times in the near future. There have been a large number of candidates throughout the year and the competition has much good quality, and the Clubs' audiences have appreciated this so well that each concert has been more largely attended than the work of previous years has ever warranted. Apparently the leaders are carrying on campaigns to make Technology as proud of purely musical productions as she is of "Tech Show" with its envious reputation throughout the college and university world. And why should this aspiration be beyond our reach, if we had in the past the musical talent necessary to produce the Stein Song?"

But we need not look to past years and graduates' work because two Seniors, Vose and Denison, have just written a new Technology song sure to fire a spirit that sometimes seems to glow pretty faintly. The song is new in both words and music and is now being practiced by the Glee Club. It will be the first number on the Northampton and Wellesley programs.

Financially the clubs are doing unusually well, and hope the Spring Concert receives the patronage the members deserve. The Winter Concert turned over a profit—an unheard of occurrence, and today the manager, H. K. Franzheim, '13 reports a surplus. Forty-seven men will be taken on the coming trips. This means that a weeding out of those that have neglected to learn their parts is necessary. Last week the clubs had rehearsals five days and have practiced every day this week. The Mandolin Club of twenty-three, shows fine work, as does the banjo quintette. The Glee Club has accomplished a lot of work on new songs and is sure of an ovation to-morrow night. Its quartette is especially good.

IMPORTANT ORCHESTRA REHEARSAL

To be Held in Union at 4.30 O'clock This Afternoon. Every Member Must be Present

The orchestra will hold a very important rehearsal this afternoon at 4.30 o'clock in the Union. Every member positively must attend this rehearsal in order to prepare for the concert at Somerville to-morrow afternoon. Members will go directly to the Somerville Y. M. C. A. To get there, take a Highland Avenue car at Sullivan Square Terminal and get off at City Hall. Those coming by other routes should take a car for the Somerville City Hall which is nearly adjacent to the Y. M. C. A. All men must be at the hall at 2 P. M. This concert is of utmost importance as it will determine a future concert of greater magnitude to be given by the Somerville Alumni under the direction of Professor Ashton of Tufts College.

TUESDAY FEBRUARY 21, 1911

The communication by "Prac" in today's issue is too true to be comfortable. Every example which he cites, we understand, is an actual specific case which has come under his observation. The Union Committee has discovered that a number of volumes in the Cilley Library in the Union are missing. These books have probably been borrowed by students with the very best intentions of returning them, but the fact remains that they have never been returned and are not accounted for. Another recent example of warped conscience was the cause of the sudden disappearance from THE TECH office of a drawing submitted in the Show poster competition. This poster represents hours of work and thought which give it a personal value to the artist not to be reckoned in terms of intrinsic value. Parenthetically, the identity of the man who now has this poster in his possession is known to a number of THE TECH board and he is advised to return it before things are made more uncomfortable than necessary. That such loose consciences should be evidenced by men at the Institute is lamentable and by no means excusable because so apt to occur in any large body of men. Any man who borrows a book should remember that it is as much dishonesty to fail to return it as it would be to deliberately pick his neighbor's pocket. Let us remember that a single careless act not only injures ourselves, but also throws discredit upon the type of the Tech man.

The basket ball team leaves Back Bay station at 2.04 this afternoon to play Wesleyan. We want to win that game. We cannot many of us go to the game and root for the team, but we can all do the next best thing—give the team a ROUSING SEND-OFF. Everybody tune up your vocal organs, get down to the station on time, and show the team that we are back of them EVERYBODY OUT! GIVE THEM A ROUSER!

COMMUNICATION

Through the courtesy of the Editors, I hope to bring to your mind a growing evil and ask your aid in crushing it. Almost every family has its "black sheep" and the family of the Institute is no exception. They have not become accustomed to the spirit here. We are here presumably to learn principals and truths. Three years ago the Class of 1907 gave to the Union one hundred Song Books and today there are less than five. There was not an over large amount of principle shown by this act. To cut an article from a Union magazine, the December Century—and to get away unseen may have been a clever trick. Some of the later readers might easily convince this brilliant person that he was not doing just right. It is the duty of every man to watch for those who may forget themselves, and to try to straighten these easy leanings toward dishonesty before they become well stiffened crookednesses. The little thefts in the shops, the gym and the classrooms of a quarter, a fraternity pin, a book, etc. are becoming more common. Let every man do his best to check this evil, to corral the "black sheep", and help them wash white again.

Sincerely,
Prac.

1911 CLASS DAY

PLANS DISCUSSED

Class Now Has a Balance of Over Two Hundred Dollars in Treasury

At one o'clock yesterday afternoon, in Room 11 Engineering B, President Don R. Stevens presided over a meeting of the senior class.

The names of all men who have paid their class dues, and of those who pay before a certain date, will appear on the class day ballot; and the twenty-five men receiving the highest number of votes will serve as the Class Day Committee. On a second ballot containing these twenty-five men's names, three men will be elected for the First, Second, and Third Martials. The First Martial, in addition to his other duties, will act as chairman of the Class Day Committee. Mr. Merrill, of the Portfolio Committee, in a brief address spoke of the necessity of the class support of the book, and urged all the men who have not had their pictures taken to appear as soon as possible for their sittings at Notman's. The class voted to support the Committee.

The Treasurer was called upon to read his statement, and credit balance of over two hundred dollars was showed. A list of men who have not paid their dues will be posted soon.

You can pay the price of

BIOLOGICAL SOCIETY

TO HEAR H. W. CLARK

Talk on Purification of Water And Treatment Of Sewage

Membership Open to All Course V, VII and XI Men, Associate Membership Open to All Men

On Thursday evening at 6.30, Mr. H. W. Clark will address the members of the Biological Society at the Union, at their first dinner of the present term. Mr. Clark is chief chemist of this state and director of the famous sewage experiment station at Lawrence, Mass. His subject is to be chosen from his varied experience in practical work and promises to be one of the best of the season. In expectation of this, a large crowd is turning out to make this a record mid-season meeting. The address will be interesting from a Biological point of view because of its intimate association with work in bacteriology and the practical benefits derived from bacteriological results. The Sanitary Engineers are greatly anticipating a description of the latest methods of water and sewage treatment by a pioneer, which no text book can give them.

The Noise Committee will be on hand in full force with one of their famous original stunts. They are particularly fortunate to have a member of last year's notorious committee to lead them this time. It is very promising for an entertaining, instructive, and "Biological meeting."

The Biological Society changes officers twice a year. It is the particular aim of the second term officers to increase the roll of the society in order to anticipate the loss of the present senior member. Active membership in the society is open to students in courses V, VII, and XI, and associate membership to others. Anyone desiring to become a member should leave a note at the cage for the secretary, Mr. H. S. Babbit. Since the continued life of the society is dependent on the members of the Sophomore and Junior classes, an increased number of members must be obtained from them. It is the aim of the society to be more of a social organization than the larger professional societies and to this end the Noise Committee has been created. All meetings are livened up and made more sociable by their antics. The social part is not as important however as the mental improvement. Frequent meetings are held at which prominent graduates and others address the society on important subjects relating to Biology and Sanitary Engineering. Excursions are occasionally taken to various points of interest such as water works, sewage disposal stations, breweries etc. Every student in the Institute connected with courses V, VII, and XI should become a member of this society as it is here only that the members of these smaller courses can meet for a more social gathering combined with addresses or excursions of great benefit.

TECHNIQUE COVER

DECIDED UPON

At the meeting of the Technique Board yesterday afternoon, the principal business was the discussion of the cover for the Technique. The one decided upon will be a "dandy" and will surpass all previous covers.

About one half of the book is already finished and is at the printers, awaiting final touches.

It is announced that the number of grinds that have been received for the Technique is comparatively small and on that account, the competition has been extended for a week so that those fellows who were unable to pass their grinds before the twentieth will have a further chance to pass them in to the Technique Committee.

WIRELESS CLUB

HOLDS MEETING

At a wireless club meeting held yesterday afternoon it was announced that preparations will be begun this week in fitting up the room in Lowell Building recently allowed the society for its use exclusively.

A new aerial will be strung from the top of Pierce Building to the skylight of the room. All apparatus will be located in this room. A two kilowatt Clapp-Eastman transformer has been donated the use of the society by H. S. Busbee, 1914. Dr. Pender is in charge of the affairs of the club and will be its adviser in all matters. A course in wireless at the Institute would be of some value to the club so it is believed, although a theoretical course in Hertz waves is given in alternate years by Professor Cross.
