Relay Team makes Remarkable Time of 3 min. 29 secs. in N. Y. A. C. Games

SALISBURY STARS

Passe Cornell Star Runner in Last Lap and Wins by Three Yards.

At the New York A. C., annual indoor track meet held in New York last Sat-day, Technology won the male college relay race from Cornell and Syracuse in 3 minutes, 29 seconds. Thompson of Technology made a fast start and in the first 25 yards gained a lead of 5 yards over McArthur of Cornell. He held this lead till the last few yards of his race, when he was run down by his rival as had been expected for the last 100 yards of the race. Nixson, Cornell's second man, was released only a yard ahead of White. At the end of the first lap and a half, White regained the place lost by Thompson and raced down a half lap abreast of Nixson. Unfortunately he was on the outside and homed pulled away from him and increased his former lead. White by this time had decreased this and touched off Garching with only a yards less. Gurther ran a fine race against Ford of Cornell, holding his own clear to the finish, relishing Salisbury's gain until he was passed by McArthur of Cornell.

As a matter of comparison it may be mentioned that on this meet the B.A.A. team was 3 minutes 30.1 seconds. The team started in a very slow game. The Institute team has shown itself to be very fast, and today the manager, H. K. Franzheim, said that the Free men will be beyond our reach, if we had in the past years neglected to learn our parts is important. This concert is of utmost importance and on these games will determine a future concert of the small floor and the easy passing of Tech. Dartmouth against Technology at The Gym to-night at night is the last and best game of the season. The Hanover Boys have arrived in town and are staying at the Copley Square; they have a band game with Tufts to-night and are in the pick of condition after their last game. They will take no chances of losing other of them if possible, but at the same time they realize that they are going after a tough proposition. The Institute team leaves this morning for their trip to Middlesex and they will not arrive in Boston again until shortly before the game Wednesday.

Last week both teams played games against strong teams; Dartmouth to lose to Williams and the Varsity to win from Tufts. Dartmouth got a worse beating on their own floor than the Institute team did in Williams town and still played a better game than any other that they have played this season. Tech on the other hand played Tufts to a standstill in a very slow game. The Institute team-work and almost stop the passing, it would seem that an injury to a varsity man would have less effect on the game than if a Dartmouth man should go out for the reason that all the men on the squad have played in a part of every game and all have done very good work on that they can change around without much trouble.

The preliminary game will be between the Freshman Sophomore teams and will be in itself full of class. The two lower class teams are both composed of men from the second squad and in practice they have shown themselves to be very nearly in the same class. The Freshman have played more games together and for that reason have their team-work perfected more highly but the Sophomores have the advantage of an extra year in college basketball and they are more accustomed to the Gym and team. Rules. Freshmen, you must show up at The Gym and lock your class against the Sophomores, as well as the Institute against the Green. Here is your chance to wipe out that disgraceful Field Day in so far as it is possible and YOU each代表大会, want to be on hand to cheer on your part in the good work.

The Alumni of both institutions will be well represented at the game for there has been a large number of special invitations sent to all those living in or around Boston by their respective managers. Manager Chandler says that there has been a generous response to his call and that there will be plenty of Old Tech men at the game to cheer on their Alma Mater. He seems to be optimistic about the outcome of the game and Captain Parker as well is full of enthusiasm and as good as his team beats lots of choices to win. He says that his team lost at Hanover largely because the small floor and the easy passing that Dartmouth was enabled to get. John O'neil of course will referee the game and that means a square deal for both teams and a game that will be kept moving all the time and for that reason much more interesting to the spectators. Everybody at the Gym Wednesday night to cheer The Team to victory.

The orchestra will hold a very important rehearsal this afternoon at 4:30 o'clock in the Union and member positively must attend this rehearsal in order to prepare for the concert at Somerville tomorrow afternoon. The union will go directly to the Somerville, V. M. C. a. To get there, take a High-land Avenue car and get off at City Hall. Those coming by other lines must take the number 18 car for the Somerville City Hall which is nearly adjacent to the Somerville YMCA. All men must be at the hall at 2 P. M. This concert is of utmost importance; as it will determine the amount of greater magnitude to be given by the Somerville Musical Club on March 5th. The Orchestra is under the direction of Professor Ashton of Tufts College.

The season of the Technology Combined Musical Clubs has been extremely successful and all the members have a feeling of even better times in the near future. There have been a large number of can- didates throughout the year and the competition has much good quality, and the Club audiences have ap- preciated this so well that each concert has been more largely attended than the work of previous years has ever warranted. Apparently the leaders are carrying on campaigns to make Technology as proud of its music as she is of that of "Tech Show" with its previous reputa- tion for being the best music in the country world. And why should this aspiration be beyond our reach, if we had in the past the musical talent necessary to produce the Stein Song? We hope that they will be the winners that a sub wo...

The rates of subscription are $2.00 a year, in advance. Single copies 2 cents.

The names of all men who have paid their class dues, and whose pictures have not been taken before a certain date, will appear on the class day ballot; and the twenty-five men receiving the highest number of votes will serve as the Class Day Committee. On a second ballot containing those twenty-five men's names, three men will be elected for the First, Second, and Third Marchals. The First Marchal, in addition to his other duties, will act as chairman of the Class Day Committee. Mr. Merrill, the President of the Corporation, in a brief address spoken of the necessity of the class support of the book, and urged all the men who have not had their pictures taken to appear as soon as possible for their sittings at Notman's. The class voted to support the Committee. The Treasurer was called upon to read his statement, and credit balance of over two hundred dollars. A list of men who have not paid their dues will be posted soon.

TUESDAY, FEBRUARY 21, 1911

The communication by "Prae" in today's issue is too true to be comfort- able. Every example which he cites, we understand, is an actual specific case which has come under his observation. The Union Committee has discovered that a book has been borrowed by students with the very best intentions, but the fact remains that they have never been returned and are not accounted for. Any borrower who has borrowed a book with the intention of returning it, and not getting Fowne, should be evidenced by men at the Institute and not by no means excusable because so apt to occur in any large body of men. Any man who borrows a book should remember that it is a quick disposition to fail to return it as it would be to deliberately pick his classmate's pocket. Let us remember that a single careless act not only injures ourselves, but also throws discredit on the type of the Tech man.

The basket ball team leaves Back Bay station at 2:04 this afternoon to play Woonsocket. We want to win that game. We cannot of us go to the game and for the game, but we can do all the next best thing,—give the team a ROUSING SEND-OFF. Everybody tune up your vocal organ, get down to the station on time, and show the team that we are all behind them. EVERYBODY OUT! GIVE THEM A ROUSER!

BIOLOGICAL SOCIETY

TO HEAR H. W. CLARK

Talk on Proximation of Water And Treatment of Sewage
Membership Open to All Courses V, VII and XI Men, Associate Membership Open to All Men

On Thursday evening at 6.30, Mr. H. W. Clark will address the members of the Biological Society at the Union, as their first dinner of the present term. Mr. Clark is chief chemist of this state and director of the famous sewage experimental station at Lawrence, Mass. His subject is to be chosen from his varied experience in practical work and promises to be one of the best of the season. In expectation of this, a large crowd is turning out to make this a record mid-season meeting. The address will be interesting from a Biological point of view because of his intimate association with work in bacteriology and the essential benefits derived from bacteriological results. The Sanitary Engineers are greatly anticipating a description of the latest methods of water and sewage treatment by a pioneer, whose work has been so beneficial.

The Noise Committee will be on hand in full force with one of their famous original stunts. They are particularly fortunate to have a member of last year’s notorious committee to lead them this time. It is very promising an entertaining, instructive, and ‘Biological’ meeting.

The Biological Society changes officers twice a year. It is the particular aim of the second term officers to increase the roll of the society in order to anticipate the loss of the present senior members. Active membership in the society is open to students in courses V, VII, and XI, and associate membership to others. Anyone desiring to become a member should leave a note at the cage for the secretary, Mr. H. S. Babbit. Since the continued life of the society is dependent on the members of the Sophomore and Junior classes, an increased number of members must be obtained from them. It is the aim of the society to be more of a social organization than the larger professional societies and to this end the Noise Committee has been created. All meetings are livened up and made more sociable by its antics. The social part is not as important however as the mental improvement. Regular meetings are held at which prominent graduates and others address the society on important subjects relating to Biology and sanitary engineering. Excursions are occasionally taken to various points of interest such as water works, sewage disposal stations, breweries etc. Every student in the Institute considers courses V, VII, and XI should become a member of this society as it is here only that the members of these smaller courses can meet for a more social gathering combined with addresses or excursions of great benefit.

TECHNIQUE COVER

DECIDED UPON

At the meeting of the Technique Committee yesterday afternoon, the principal business was the discussion of the cover for the Technique. The one finally adopted will be a "steady" and will surpass all previous covers, About one half of the book is already finished and is in the printers, awaiting final touches.

It is announced that the number and variety of girls that have been received for the Technique is comparatively small and on that account, the competition has been extended for a week so that those fellows who were unable to pass their grinds before the twentieth will have a further chance to pass in them in the Technique Committee.

WIRELESS CLUB

HOLDS MEETING

At a wirelesshub meeting held last Sunday afternoon it was announced that preparations will be begun this week in setting up the room in Lowell Building, recently secured for the society for its use exclusively. A new aerial will be strung from the top of Pierce Building to the skylight of the Union. All apparatus will be located in this room. A two kilowatt Clapp-Thomas transformer has been donated to the society by W. C. Clay, 1914. Dr. Powder is in charge of the affairs of the club and will be its adviser in all matters. A course in wireless at the Institute would be of some value to the club so it is believed, although a theoretical course in Hertz waves is given in alternate years by Professor Cross.
