GREAT SLIDE FILLS

CULEBRA CUT

500,000 Cubic Yards of Earth Slips Into Canal Without Warning

POSSIBLE REVISION OF PLANS

Much Extra Excavation May Be Necessary to Reduce the Steep Slopes.

Recent despatches from Colon in regard to earth slides in the Culebra Cut assume a seriousness which to those who heard Mr. Rourke's talk on the Panama Canal at the joint meeting of the professional societies last fall, may seem somewhat out of proportion. On the steep slope of Gold Hill, the eastern side of the great cut and directly across from the town of Culebra, a great mass of earth dropped into the cut, filling the drainage cut and swallowing up or obliterating a steam shovel, a locomotive, two trains of flat cars, and four railroad tracks. The obstruction was attacked immediately and with night and day work is being rapidly removed. This particular slide was remarkable in apparently disproving the theory generally held by the engineers—that the cause is always the lubrication of the sloping rock surface by soaking rains, aided by the disturbance of blasting in the immediate vicinity; in this case, however, there had been no rain for six weeks, and no work had been going on in the neighborhood for some time. Furthermore the impossibility of foreseeing and preventing these slides, has led to some rumors of revision of the original plans, even to the extent of removing enough material at the most troublesome points to make their occurrence an impossibility. Gold Hill in particular shows indications of continuing to disturb calculations, due to the looseness of the material and smooth, sloping rock faces; this one slide made up a twelfth of the total allowance of 6,000,000 cubic yards for excess excavation due to slides.

PRESIDENT WITHDRAWS

TIMBER LANDS

Fear that Congress May Neglect this Action.

The friends of Conservation are beginning to fear that in the haggling and bargaining over reciprocity the excellent and urgent suggestions of Pres. Taft in regard to disposition of the Government's coal and timber lands, especially in Alaska, will be lost sight of, and these important questions left unsettled. As the matter now stands, the natural resources of the nation have been indefinitely withdrawn from entry by the President, and they will continue so until the whole matter of leases, royalties, etc., has been settled by Congress. This state of affairs prevents the development of our resources, and also is disturbing to those who intend to invest in this direction. The President's recommendations include terms for leases limited to fifty years, with minimum royalties to be adjusted every ten years or so. Under the same general head comes the matter of regulation of water power sites. It was confidently expected that Congress would reach this question during the session, and that an adjustment would be arranged between State and Federal control, but hopes of this are now faint.

CIVIL ENGINEERS

MEETING MONDAY

Dinner Music, and an Address by F. H. Fay, Civil Engineer of Class of 1893

ADDRESS ON LEGAL ENGINEERING

Mr. Fay is Deputy Commissioner of Public Works in Boston.

The Civil Engineering Society will hold a dinner at the Union, next Monday evening at which Mr. Frederic H. Fay '93 will be the speaker. Mr. Fay is one of the foremost engineers of the city and is deputy commissioner of the Board of Public Works. He was graduated from the Institute in 1893 and during his senior year was president of the Civil Engineering Society. Mr. Fay has chosen as his topic for the evening, "Legal Engineering", giving the relation of Law to Engineering and as he is a very able speaker, the meeting will be of great value to those who attend.

The steward of the Union has promised an excellent dinner but to aid the digestion and furnish entertainment, the Tech Orchestra has been engaged for the evening. All members who have not secured tickets should do so at once at the Cage. A full attendance is desired.

PROF. JACKSON

PROMINENT FIGURE

As President Will Preside at Annual Social Affair of A. A. E. E.

On the evening of Tuesday next, February 28th, the American Institute of Electrical Engineers will hold its annual function at the Astor Hotel in New York. The affair is to be in the form of a dance and reception and promises to be the most interesting of the annual functions since the beginning of the association. All the past presidents of the association who are still living will be present. Prof. Dugald C. Jackson, of the Institute, who is the present president, speaks of the coming affair with much enthusiasm.

The association awards badges to all its members; and at this annual meeting it is to award special badges with the society's insignia elegantly executed upon them, to its past presidents. Professor Jackson will be the speaker of the occasion and will award these badges. Mr. T. C. Martin, the oldest of the living past presidents, a man well known in the technical world, will represent the former presidents with an acknowledgement of Professor Jackson's remark.

On the evening of this reception, the Hotel Astor will witness an assembly of the most distinguished electrical experts in the country. Among the living past presidents of the association, of which but three are deceased, is another Tech man, Mr. L. C. Ferguson, '88.

Mike was standing in a freight yard and saw a train pull out, the locomotive carrying two green flags. His curiosity was aroused and he asked one of the yardmen, why the engine carried the green flags. "Why", said the man, "That means that there is another section of the train,—there is more to follow!" "Hm," Mike mused, "Now I know, why my wife has green curtains on the baby carriage."

FASTEST GAME OF INSTITUTE

HOCKEY SEASON

Crescents Wins from Technology

SCORE; 64.

Brilliant Work For Tech on the Part of Ranney and Sloane. Crescent Stars, Percell and Hunter.

At the Arena last night the Crescent Hockey Club of Halifax, N. S., won a victory over the Institute Team by the score of 64, in one of the fastest games that have been played in Boston this winter. The Crescent team, really composed of the best men from the Crescent and the Wanderers teams, the two star teams in Halifax, was much heavier than the Varsity and their exhibition of speed and team work at times, was spectacular. They brought a large crowd of rooters up from home with them and the Institute team was backed by a strong cheering section which made things noisy, even to the extent of drowning that wonderful Arena Band. Capt. Palmer and Bull, the two fast Canadian forwards were kept out of the game to be in better shape for the Boston Hockey Club game tonight, but with these two men gone from their line-up, the visitors had it on the Tech men from the start. Capt. Gould's men showed the same clean consistent scrappy hockey that won so easily from Williams last week but they had more than found their match. Fighting to the last minute of play, they were at all times putting up a game that kept the Crescent goal in danger and the opposing players on the alert.

At the face-off at the beginning of the first half, the puck was carried down the ice speedy skating and clever passing to the Crescent goal and Heinie Stucklen scored the first point for Technology after two minutes of play. Then the Crescent team work began to show and Ranney was kept busy defending his goal. Shot after shot from the Crescent forwards was kept out of the goal by his clever work. Then Stucklen was ruled off the ice for one minute for checking and Hunter, the visiting centre, scored the first goal for the Crescents. At this tie in the score the banks of people went wild and the cheering became a continuous roar. The shooting on the part of both teams was erratic and the defence blocked perfectly with both teams evenly matched until Doc Sloane scored for Tech again after some very pretty team work. Almost instantly Scoville again scored for Tech and the half ended with the score 3 to 1 in favor of Technology.

Again Tech rushed the puck down the ice, but to no purpose. The play now became almost wholly around Tech goal, and Hunter scored twice in quick succession, to be followed by Condon and Grant, all the result of fast skating and pretty passing team work, and Sloane netted the puck again for Tech. The play became fast and furious with the puck forced from end to end of the big rink, by the clever team work of both teams. Ranny continued the brilliant exhibition until Grant succeeded in scoring for the visitors and the game was won with a victory for the Halifax team by a score of 64.

Between the halves an exhibition of Wright aeroplane was given on the ice.

Owing to an error, the credit for the song "Every Juliet has a Romeo" accepted by the Tech Show, 1911 was misplaced. The author is H. W. Barker, 1914. Mr. Barker is to be congratulated on having written two successful lyrics for this year's show.

BRITISH NIGHT

FOR COSMOPOLITANS

Extensive Preparations Made For This National Night

INTERESTING PROGRAM

Songs, Illustrated Talks on British Domains,—Also Maori War Cry.

To-night at the Union, the Cosmopolitan Club of Technology will hold a "British Empire Night". Great plans have been made by the committee in charge, to make this affair a very special one.

The program of the proceedings of the affair to-night has been drawn up and is as follows.

1. Introductory Remarks by President L. M. Sandstein.
2. A talk on Ranching Experiences in Australia by Mr. L. H. Lehmaier.
3. Song by Mr. H. R. L. Fox.
4. An Illustrated Talk on England by Mr. E. W. Mason.
5. A violin solo, by Mr. S. R. Morash.
6. Experiences of Health Officers, by Mr. S. M. Gunn.
7. An Illustrated Talk on New Zealand, by Mr. Hurst.
8. The "Maori War-Cry" by Messrs. Sandstein, Lehmaier and Hurst.
9. A Song by Mr. H. R. L. Fox.
10. Canada (illustrated) by Mr. B. H. Morash.
11. A Violin solo, by Mr. S. R. Morash.
12. An Illustrated Talk on Newfoundland, by Mr. R. J. Murphy.
13. An Illustrated Talk on the Fiji Islands, by Mr. L. M. Sandstein.

When the program is concluded, refreshments will be served.

Flowers as decorations for the dining-room tables of the Union? Why not? We understand that the management considers it a risky venture but we believe that if a sign like "Gastronomically unfit for food" were tied to the flowers, they would be safe.

Haw! Haw! And haw! again, 'We are almost out of breath, but we still snicker. The cub reporter who wrote that "A Song in fifteen minutes" story has been transferred to Dr. Cook's Vaudeville circuit'.

SATURDAY FEBRUARY 25, 1911

Some years ago it was the custom to hold semi-annual prize drills in our cadet corps, followed generally by an informal dance. This custom was discontinued, however, when prize drills were held only annually. Three years ago the battalion officers inaugurated a military hop which they intended to be an important Tech social affair. It was looked on, however, by the upper classmen as a strictly freshman event, with the result that, while the dance was a success socially, the fosterers of the idea lost money. Last year this hindrance was overcome by having the non-commissioned officers join with the others in running the party, which much improved the success. This year it is the intention of the sponsors, as indicated recently in the news columns of *The Tech* to make the dance a really student affair, to which all Institute men are welcome. As there is no other Tech dance this term with the exception of the Musical Clubs' dance and the Junior Prom, it seems as if the students should respond to the idea of broadening the scope of the affair. It certainly would be unfortunate if the dance should prove a failure financially if run on this basis. So, upper classmen, think of the days when you once drilled and turn out at the military hop.

A vitally important Orchestra rehearsal will be held in the Union to-day at 2.30. It is imperative that every individual member show up, without fail. This far the rehearsals have been extremely unsatisfactory. Whether or not to hold outside concerts—at Wellesley, for instance,—depends upon the way this afternoon's future rehearsals are attended. Don't pay the piper—be one on the Tech-

nology orchestra. Come out to-day. If you have any ability, hope of ability, or enthusiasm, quit being bashful—we want you now.

There will be a concert Monday night at the Civil Engineer's dinner. The orchestra will help the gaiety along upstairs, when they will play an introduction to Mr. Fay. It will also probably play Hook Night.

Auspicious plans may materialize if the men will simply take a more lively interest in the organization. There are only a very few concerts left, and those that are yet to be given are the ones that are the most important.

—"Rowdy actions always arise from brutish instincts. While it must be admitted that individuals of depraved instincts often gain admission into even the smaller universities and colleges the representative college man is a fairly respectable example of God's handiwork. Instead of possessing the personality caricatured in the Sunday supplement—a creature of effeminate affectations, loud clothes, disreputable hat, and the proverbial cigarette, the average college man is every inch a gentleman and a true sportsman."—Purdue Exponent.

HYDROPLANES FOR BOSTON

Model Used by Curtis Under Construction by Burgess Company

Aeroplanes built after the model used by Glenn H. Curtis in his recent successful trials on the Pacific coast, are being built by the Burgess Company in Marblehead and may soon be seen in the air and on the water near Boston.

While the hydroplanes used by Mr. Curtis were only rough models, the ones now being built in Marblehead will be finished in the best possible manner. The hydroplanes are to be 23 feet long, 14 inches wide and 10 inches deep. They are to have double planking, of white cedar on the inside, mahogany on the outside, with sized and waterproofed silk layers between. A sectional view of the hydroplanes shows a semi-spherical outline with slightly flattened sides, not unlike a section through an egg. At the forward end of each hydroplane is a transverse stationary steel plane, to prevent too sharp a dip into the water.

These hydroplanes weigh seventy pounds each and 140 pounds is the weight of the complete equipment.

We note this in an old "Technique". Since this night have happened yesterday, we reprint it:

Old Lady (reading from "Tech")—"I did not know that "Tech was such a religious school. I see that your Christian Endeavor and Methodist Episcopal Society have dinners at the Union next week".

Visiting Tech man (seeing the C. E. and M. E. Society notices)—"Er---eh, yes.!

COMMUNICATION

Editor *The Tech*:—
I should like to supplement Mr. Ferris' idea of having a banquet in the second week of April, by suggesting to the entire student body a torchlight parade either before or after the dinner. The Institute Committee might appoint a Sub-Committee to arrange the matter, or the four classes might each, through their Presidents send delegates to a meeting to arrange the affair. Whatever is to be done however, should be done so as to surely find the co-operation of the whole student body, and to be worthy of Technology. There will be hundreds, perhaps thousands of old Tech men here, and we want to show to them, that we, too, hold our Alma Mater as high in our regard, as they did in their days. Therefore let Boston be in the sign of the "T".
P. M. S.

COMMUNICATION

The Editor of *The Tech*:
Dear Sir:—
Because of several questions which have been asked me I wish to correct the impression of some fellows that the incidents mentioned in the communication of *Prac.* in Tuesday's issue were not actual cases. All incidents there mentioned were actual cases. Only five Tech Song Books can be found in the Union and those are in very poor condition. Seventy-five or more have been stolen (an ugly but true word.) From the December Century an important article of several pages length was torn out. It has been found inadvisable for the House Committee to furnish blacking in the Union, because of the continued sudden disappearance of full boxes. Even the brush and comb in the lavatory have been taken. Likewise the whisk-broom and the inkwells in the writing room.
The only way to stop these petty thefts is by the co-operation of all honest undergrads. It is hoped that any witnesses of dishonest acts will report the same to the proper officials, as it is for the welfare of the Institute that the perpetrators be discovered and punished.
Honesty.

FIRE VIEWED BY TECH STUDENTS

Last evening a few minutes before seven o'clock a big fire broke out in the building numbered 222 Marlboro Street. The flames spread with such rapidity that it was found necessary to ring in a second alarm. At moments the flames broke around the corners of the fifth story with a very spectacular effect. A large crowd collected, among whom were a number of Technology students. The sight was fascinating to the outsider, but the residents made every preparation for a hurried exit, picking up their valuables, and indeed it is well that they did so for the fire rapidly spread downward from above, by way of the shaft. The cause of the fire could not be ascertained.

TO-DAY'S JOKE COLUMN

The president of a Western college, at the opening of the first Sunday service of the first term, read the number of the new students and remarked that it was the largest class the college had ever had. Directly afterwards he read the epistle of the day, as follows: "Lord how they have increased that trouble me!"

It was during the Math. Exam. The student sighed and sighed again. What would he not give to know that formula. "How time doeth fly" he remarked philosophically, as he looked at his watch, under the desk. Then the Prof. jumped to his feet and cried: "Sir, I insist upon seeing that watch!" "Yes Sir, with pleasure," the other said, as he handed it over; and as the Prof. snapped open the case, he read just one word: STUNG!!!

The Tech is considering a \$35,000 joke contest for new and original jokes. Among the other prizes it might offer lodging for disabled jokesters for what remains of their natural lives.
