Committee Requests that Men Sign up Promptly

Novety in Dance Orders, Preliminary

JUNIOR PROM

VOL. XXX. NO. 93
BERTON, MASS., TUESDAY, FEBRUARY 28, 1911
PRICE TWO CENTS

Leave suggestions for Selection of Dates at the Cage.

What may very well be called the leading social event of the college year, the Junior Prom, is to take place this year at the hotel, on the night of April twenty-first.

It is essential that the committee in charge of the details of the Prom know the number of men who will attend. It will then be able to look more comprehensively after the details of the affair. The Junior Prom Committee therefore requests that every man sign up as soon as possible.

The dance orders will be of leather and of such a character that they will prove permanent souvenirs to the owners. An Edison record is to be by the Wright company of Philadelphia. Preliminary orders will be out about March twenty-third, and the committee desires that booking be done as promptly as possible.

In order that the committee may get correct information as to the number of the Junior Class concerning selections for the dance, any 1912 man may leave the names and order of any preferences and list any additional city dances.

Preliminary orders will be out about March twenty-third, and the committee desires that booking be done as promptly as possible.

Ike stated that the function of the engineer in the Nineteenth Century was to acquire a knowledge of the engineering of the time, and that of the Twentieth it would become the duty of the engineer to begin with the construction of the military engineer, who was a man who had to begin with the construction of the military engineer, who was a man who had to know not only the science of his profession, but also some of the general work but also some of the most skilled work in the world. He also stated that the Engineer was not only the expert witness, but also the expert witness in many other fields.

In the Company's foundry the men have the opportunity to see the working and the machinery used in the factories. In the machine shop will be seen the rolls, and the utilization of the waste gases in generating steam, and the engine should be of great interest to the men.

In shipping, cooled and loaded on the cars. It is used in the manufacture of cutlery.

The heavy duty rolling mill engine will surely attract attention. The 2000 Horse Power Steam Engine was the largest of its kind, and is used in the manufacture of cutlery.

At the invitation of the E. E. Soc. to be held at 20 Eng. B, on March 3., at 2:30, the Society of Arts of the Institute announces two meetings in March. On this occasion the E. E. Soc. is to be represented by Mr. Waterman, who will address the society on "Stellar Photography."

The Council of the Alumni Association has appointed a committee of ways and means for the entertainment of the guests of the Institute and for the promotion of the Congress of Technology in April. The committee has been appointed by the Board of Directors of the Institute. The Council has also made a change in the name of the committee to the Alumni Association, and that will be known as the Alumni Association of the Tech Congress.

MEN TO MEET AT 20 ENG. B, AT 2 O'CLOCK.

G. W. Ritchey of the solar observatory of the Carnegie Institution, will speak on the "Physical Basis of Horology."

Allumni Association Making Preparations for Tech Congress.

It has been announced that Mr. Simon C. Keith, '93, has been appointed assistant professor of sanitary research laboratory at the Institute.

This laboratory, to which an anonymous donor has given $60,000, has been founded since its establishment in 1902 on one or another of the truck towers, at present near the pumping station in Dorchester, and has made a complete study of the sewage of the whole city. It is known that such a system, excellent as they were when completed, need modification to be in accord with the science of to-day, and it is important that the part of this laboratory has been to outline and develop plans for its future work.

The New England Water-works Association, which meets on Wednesday, March 6, at the Bronower, has its presence, Albert Hassen, an alumnus, extended to students of Tech extension to be present at the papers at 3:00.

The Student's Arts of the Institute announce two meetings in March. On Friday, March 3, E. P. Wilson, professor of zoology at Columbia University, will speak on the "Physiological Basis of Horology."

In order that the Committee may get correct information as to the number of the Junior Class concerning selections for the dance, any 1912 man may leave the names and order of any preferences and list any additional city dances.

CHIMICAL SOCIETY MEETING TO-MORROW

Dinner, Speaking and Mysterious Stunts Not Divulged Are Promised

To-morrow night the Chemical Society will hold a meeting in the Union somewhat on the lines of the dinner held a year ago. The dinner will commence at six o'clock and will be held in the upper dining-room of the Union. Professor Foy of the Industrial Chemical Laboratory and Professor Fox of the Analytical Department are to speak on whatever subject they choose, and they have not announced their subjects. The meeting really is to be in the form of a family party and the fun committee promises something of which, hush! You will find out if you go to the dinner.

As last year's meeting was a big success and the number of tickets already sold indicates a large crowd this year a good time may be expected by all of the chemical men. Tickets for the dinner are seventy-five cents, and may be obtained from any of the society's officers.

Orchestra May Play Hook Night

Short Rehearsal Friday at 4.30 P. M. Programme Cut Short at C. E. Dinner

Next Friday evening at Hook Night the Orchestra expects to give the following selections: the Raymond Overture, the Egyptian Ballet, the Chocolate Soldier and, if requested, several Tech Songs. A short rehearsal will be held Friday at 4.30 P. M. and members must be on time.

Last night at the C. E. Dinner the Orchestra was to have played the Raymond Overture, the Egyptian Ballet, and the Chocolate Soldier, but on account of a rearrangement of the plans by the C. E. Society the Raymond Overture was the only selection rendered.

TECHNIQUE 1913

At a meeting of the 1913 Technique Electoral Committee, L. C. Hart was elected Chairman to take the place of H. S. Birchard who resigned the Presidency of his class, and C. F. Cairns was elected Vice Chairman. There will be another meeting Friday afternoon and the new members of the committee will probably be announced then.

ANNOUNCEMENT

Mr. A. G. Morse, formerly of Morse & Henderson, is prepared to receive his customers at his old address, 18 Boylston Street, Room 14, where he will display selected importations in cuttings, overcoatings, etc. He has secured the services of Mr. C. B. Allen, who, for thirteen years, has been cutter for H. B. Curtis, Tremont Building.

Mr. Morse believes that in Mr. Allen he has a competent cutter, informed with the latest principles and ideas in the art of cutting.

Your patronage is solicited.

NEW AERIAL FOR WIRELESS

SOCIETY

Increase in Receiving Radius Expected Transformer to be Installed later.

Under the direction of S. W. Seanyan '14 and H. B. Richmond '14 the new aerial for the Wireless Society has been installed. Both of these men have had a large amount of experience in this kind of work and have lived the society group in giving their services. The new aerial has a span of over three hundred feet, stretching from the top of Pierce Building to the further end of Lowell, and it consists of four strands of braided copper wire. It is expected that with this the receiving radius of the station will be greatly increased and that the long wave length thus made possible will enable transmitting to be carried on without interference with the commercial stations. At a later date a new transformer will be installed.

THE EVEN DOZEN

A New Club Organized by Twelve Juniors, Meeting Tonight

Twelve members of the Junior Class have organized a society called the "Even Dozen" and through they will hold their first dinner at the Union. President Montgomery will give a short talk and a good time is assured. Each member has been asked to bring a friend with him. Everything is open and there is nothing secret about the society, which was insituted for the purpose of having a good time.

C. E. LEMILIGHTS

That beer went begging. Might be well to substitute cigarettes. The Orchestra added a great deal of life to the meeting. Why don't the other societies follow the example? Too bad there was such a small attendance. Hope Mr. Fay will give the same speech again as it is well worth repeating.

COLLEGE NOTES

This year Yale will lose ten football men by graduation, while Harvard's loss is six and Princeton's two.

The University of Missouri is to have a new stadium, the plans for which are being drawn by the architects in the engineering department.

Pennsylvania has a baseball schedule comprising thirty five games this year. Eighteen will be played out of Philadelphia, among those is one with Harvard in Cambridge, on June 7.

An American University Club has been opened in London. Minnesota has dropped Michigan from their football schedule. A price of $5000 has been offered to Yale students by Mr. Frederick Thompson—a big man in New York theatre affairs—for the best play by an undergraduate.

IN THE TECH

New Tech yell? Try the Maori war cry.

Got your entry in for Hook Night?

One of our editors went yesterday to the Senate Chamber on Beacon Hill in the expectation that the Tech appropriation bill would come up for consideration, but nothing happened.

Have you heard of the Tech pennants on the stage at the Colonial in the "Girl of My Dreams"?

Some leader that the orchestra has.

Dartmouth's football schedule was announced yesterday. The Green will play 10 games, the season opening Sept. 27 and closing with the Harvard game Nov. 18.

M. D. Vail, guardkeeper of the American Hockey team, has been elected captain of next year's team at Cornell.

FATIMA

TURKISH BLEND

CIGARETTES

LANGUAGE

Some cigarettes may be Greek to you but in plain English—Fatimas are Good.

No language can quite describe them—can quite describe that "distinctly different" taste.

But college men have a language of their own and their appreciation is expressed in the number of Fatimas they smoke.

20 for 15 cents. Packed inexpensively, and you get 10 additional.
