BOSTON, MASS., SATURDAY, FEBRUARY 17, 1912

PRICE TWO CENTS

A. A. MERRILL SPEAKS BEFORE MECHANICALS

Expresses Original Ideas and Performs Experiments to Prove Them.

Last night, at 39 Boylston street, before the Mechanical Engineering Society, Mr. Merrill gave an instructive talk on "Aviation." He explained both by stereopticon views and experiments the common faults of all machines up to date. He proved both theoretically and practically that his inventions can correct these general faults. He criticised amateur experimenters and indicated their principal fallacies.

He explained bird-flight, its application to heavier-than-air machines, and gave all necessary qualifications for speed and lifting. He explained the principle by which Wright remained in the air five minutes without any power, and spoke on the future of mechanical stability. He also stated that the Wrights have already completed a device for mechanical stability which will be placed on their new models. The talk in general, because of its clearness and accuracy, was very forcible and instructive.

SECOND WORKOUT FOR SHOW MUSIC WRITERS

Manager Thayer to Talk to Men In Music Room of Union Today at 3.15 P. M.

This afternoon, at 3.15 P. M., the following men should report to Stage Manager Thayer in the music room of the Union for the second tryout for music for "Castles in Spain":

G. S. Stevens, L. Salomon, C. Edison, P. H. Taylor, A. E. Howlett, G. L. Uman, J. M. Hargrave, S. E. Clark, J. M. Hastings, F. H. Smythe.

Coach Sanger will be present and assist in choosing the most suitable music. It is very important that these men should be present because the men who are to write the remaining lyrics will be picked at this time.

SHOW STAGE DEPT.

Entries for Competition Among Freshmen Closes Today.

All those men who are desirous of entering the competition for the Freshman assistant of the State Department of Tech Show, 1912, will meet Manager A. R. Thayer in the Show office at 1 P. M. today. This is the last opportunity for men in 1912 to become connected with the management of the Show.

The work for the Freshman assistant is that which should interest any man. It is not difficult, does not take much time from school work in the Institute and is altogether a very congenial position. It is an opportunity to join in student activities in the Institute.

Last year a dozen men reported when the call came. This year it is hoped there will be as many, if not more. The greater the number of men the more interesting the competition, and the better the man who is chosen to do this branch of the show work.

CAPITAL'S PLACE IN THE BUSINESS WORLD

Civils Hear Mr. H. W. Stonemetz Explain Functions of Stock Exchange.

Mr. H. W. Stonemetz spoke yesterday before seventy members of the Civil Engineering Society on "Financial Problems." He first enumerated some of the recognized methods of borrowing money, and then explained the part that the Stock Exchange plays in securing capital.

He then emphasized the fact that a young man with big ideas has to have capital. He said that if the present attitude of the public toward capital continues that more and more will be withdrawn from active use, and that soon there will be a money stringency. He showed how unjust the attitude of the New England public toward the N. Y., N. H. & H. Railroad and the United Shoe Machinery Company is. The price of labor has gone up while its efficiency has not increased.

WALKING HOCKEY.

Yesterday afternoon the hockey team went to Amherst and tried to swim to victory over the drowning Mass. Aggies, but after twenty-five minutes of water polo before a Junior Prom audience quit burrowing for the puck. A regular game to take this one's place will be played in Boston.

ELECTRICALS' TRIP.

Society Goes to Gen. Electric Works February 19 and 28.

Two trips will be made by the Electrical Engineering Society to the Lynn works of the General Electric Company, Monday, February 19, and Wednesday, February 28. For the benefit of all concerned Mr. Fish of the General Electric, in giving permission for the trip, suggests having two parties to limit the number of men in the plant at one time.

The instruction in the Junior year of Course VI has covered most of the machines that are in course of construction there, and it is important that every Course VI man should see the plant at least once.

Both parties will leave the E. E. Library at 1.30 P. M., and if a sufficient number sign up for the trip a special car will be provided.

SENIOR PORTFOLIO.

All pictures that are to be printed in the Portfolio must be taken before Tuesday, and the committee in charge of the publication urges every man who has not attended to the matter to go up to Hearn's, 727A Boylston street, at once and get an appointment.

The sign-up books are in the hands of the committee and they welcome early signatures.

Big time coming in the Union March 1st. More details coming every day in THE TECH.

Wanted, by the class, yourself, and the Portfolio Committee, your picture. Give the photographer a chance.

WRESTLERS MEET Y. M. C. U. TONIGHT

Men Have Been Training Hard and Even Matches Are Expected.

At eight this evening the wrestling team competes with the Y. M. C. U. in a dual meet in the Y. M. C. U. Gym. The Tech men have been showing up remarkably well of late, and Captain Smythe-Martin feels that the majority of falls will be credited to his men.

Although there are no light weights on the program the contest will not be without interest. Doble and Crowell represent the heavy weights from Tech, and although Crowell is a comparatively new man he has certainly opened the eyes of those who have watched him. Doble has been out of the game for some time with a broken toe, but since his return he has shown more speed than ever. Blodgett, originally a 137-pound man, is now in the 145-pound class, and still seems to be gaining. His work at Salem and subsequently has placed him among the best, and with this man and Andrews in this class something should happen. Treat, the man who put up such an excellent showing at Weymouth, is now wrestling at top speed and will be matched with Dr. W. F. Trovan, a man who has previously defeated him. This bout will, without doubt, be the feature of the evening. Means and Captain Smythe-Martin are both veterans of many battles and have yet to meet a real defeat. These men will weigh in at 137 pounds, and the Y. M. C. U. people admit that they have some doubts as to the outcome of the match.

The Y. M. C. U. has entered Green and Treto in the 125-pound class. They are both new men and rather slow, but still they are not what you would call also-rans. J. K. Jennette, in the 145-pound class, is a man of some reputation and usually holds his own with all comers. Dr. W. F. Trovan, 158 pounds, is the star performer of the Y. M. C. U. aggregation. Last year, in the New England championship bouts, he came very near winning the title and was defeated (Continued on Page 2.)

PROM POSTERS STOLEN.

Three of the posters submitted to the Junior Prom Committee in the competition have been stolen, but the committee has information which will probably lead to their return. In any case the loss will be more than made up soon, as since the close of the Show poster competition a number of good men have come out for the Prom poster competition. The competition will close March 20.

MUSEUM LECTURES.

The Art Museum announces the following free Sunday lectures for the ensuing month. These lectures occur at 2.30 o'clock.

February 18—Italy, Dr. R. Brindisi.
February 25—Norway and Sweden, Professor M. B. Perrin.

March 3—Greece, Dr. Arthur S. Cooley.

March 10—Poland and Lithuania, Dr. G. W. Tupper.

SENIORS PROPOSE NEW "CLASS FUND"

Original Idea Put Forth During Poorly Attended Meeting Yesterday Noon.

Just twenty-five per cent. of the members of the Class of 1912 gathered for the first class meeting of the year in Huntington Hall yesterday, at 1.30, to hear the preliminary plans for what will prove to be one of the wisest original moves ever made by an Institute class—the establishment of a Class Fund.

The first business on the list was the report of the Portfolio Committee. It was stated that less than half of the histories have been handed in up to date, and that there are still a large number of men who have not been photographed. Dean Burton's statement, that his pile of Portfolios is in constant use by men who wish to look up a Tech man before hiring him, should be merely an added inducement for the fellows to attend to the matter of getting their faces and records into the book.

Class Day Election.

The class voted to elect twenty-five men to the Class Day Committee with the understanding that they should select the three Marshals for the class at large. The Class Day ballots are to be distributed at the end of next week, and all voters must have paid all outstanding dues in order to have their votes counted.

Mr. Benbow, the Vice-President of the class, then took the floor to present the report of the Executive Committee on the new idea of having a Class Fund. He said in part: "Although the idea of having a Class Fund is new here, it has been used with great success in many other colleges to help the institution and to keep the class more closely united in the Alumni associations. The Fund will stimulate a friendly rivalry among the graduates which will be of great value to their Alma Mater." Then he presented the following report:

(Continued on Page 3.)

The Class of 1912 intends to be long remembered in the Institute.

PULL TOGETHER.

A class fund is the latest proposition. The description of the plan decided on by the Seniors is outlined in another column. It is decidedly a novelty and unquestionably should succeed. The only questionable feature is one of fact. Will it succeed?

The Editor will be condemned for taking a gloom view of the matter if the last statement be not qualified. The only reason for its possible failure

is the lack of interest that might be shown by the members of the class.

The idea of a class fund is one that ought to succeed. And, pessimistic as the above view has been, we believe it will succeed. But for this two things are necessary.—one, that a live and efficient man be chosen to raise and guard the fund, and the other that the class itself show that it has the germ of the true spirit in it.

In regard to the adoption of the idea by the other classes, we believe that it should henceforward be made a clause of the class constitutions. If every class will adopt this plan there will be created in a few years such a fund as the Alumni will be proud to give to the Institute. Each class, as it makes its returns, may feel that it has done immeasurable good for the advancement of the best for which the Institute stands. The motto for this plan should be "Pull together."

WORSE THAN EVER.

Sixty men at the Class meeting yesterday. Seniors, you should be ashamed of yourselves. The meeting was well advertised and it is you who should set the example to the others. But no, you had about sixty men at your meeting, no better than our youngest, the Freshmen, had. It is patent that the spiritless attitude pervades every class and station. For yourselves, for the Institute, and for the parents who want you to succeed, it is time that you all came to a belief that each of you is responsible for a little in life. Would you see class activity stopped? If you would send your belief to THE TECH, not forgetting your name. If you would not, and you are one who did not attend your class meeting, you are a member of the THEORETICALLY DEAD, a highly dishonorable society.

BEAUX ARTS PRIZE COMPETITION TODAY

Preliminary Esquisse Esquisse
Is Held at Institute—
Many Entries.

At promptly 9 o'clock this morning about twenty-five architects from the fourth and fifth year classes will start on the first preliminary competition for the celebrated Paris prize. This prize is awarded by the Society of Beaux Arts Architects. The winner of the prize will receive two and a half years of tuition at the Ecole de Beaux Arts, Paris, in addition to a "stipend" of one thousand dollars per year while studying. It is stipulated that he must spend not less than two and a half years in Europe and do a required amount of architectural work. To enter this competition the only requirement is that the applicant be less than twenty-seven years old and an American citizen. The competition is held at various points in the United States, and last year about six hundred of these "esquisse esquisses" were submitted.

The first preliminary competition which takes place today is to be of twelve hours duration, and for applicants in the vicinity of Boston will be held in room 43 Pierce Building. The finished renderings is sent on to a committee which considers them, their choice being manifested in the selection of five winners and two alternates.

The second preliminary competition takes place in New York. In addition to the five winners in the first preliminary competition fifteen previously qualified applicants who have been exempted from the previous competition are allowed to participate in this second test.

As a result of the second preliminary competition five winners and two alternates are chosen. These alternates are really the sixth and seventh men, who may replace any of the first five men in case of failure to be present at the final competition. The five men picked as winners then enter the final competition. The winner of this competition is the winner of the prize. The next four men, if their designs are approved as being creditable, are awarded one hundred dollars each.

GAME CANCELLED.

The strong Sophomore basketball team originally had a game scheduled with the Allen School at West Newton for tonight. Sometime during last week the manager of the High School team communicated with the Sophs' manager and among other things said the following: "It would be a slaughter of the innocents for us to play the game with you." Allen School laid down to the second team men as a result of the reputation for fast playing which the latter have gained.

WRESTLING MEET.

(Continued from Page 1.)
only on account of a severe strain in his left ankle. A. L. Ryan is in this class, but not much is known about him. Taken, all in all, the Y. M. C. U. men are a clever set of mat artists and will give Tech a good tussle.

Captain Symthe-Martin has arranged for two more meets in the near future, one with Tufts and the other with Amherst. These bouts will be of great importance in as much as the Tech men who come out winners will be entered in the New England championships.

The wrestling will begin promptly at 8 P. M., and every man should attend to help the good work along.

Here is hoping the Beaux Arts prize comes to a Technology architect this year.

Velvet

THE
SMOOTHEST
TOBACCO

SKATING in the keen air
—the companionship of a
pipe—the pleasure of a tobacco
such as Velvet!

Velvet is the best leaf—aged over two years in the warehouse—a slow, silent transformation from harsh leaf to a mellow smoking tobacco. Time gradually evicts the bite—matures the good qualities of the leaf—a flavor unusual—good—wonderfully good!

Such a tobacco takes time to produce—extreme care withal, but this is the smoke we all want—so why not?

At all dealers.

1915 TRACK MEET.

Freshmen Compete With Medford in Gym This Afternoon.

This afternoon the Freshman track team meets the Medford High School team in a dual meet in the Gym. From the present outlook the competition should be very keen. The Freshmen have had up to the present time suffered only one defeat, and that was at the hands of the Scops, who had several Varsity men working for them. Medford has, as usual, a good team, with plenty of material for all events, while Tech, although it has a sufficiently large number of men, is greatly handicapped in not having different men for each event, although the men are, for the most part, sure point winners.

O'Brien is the star performer for Tech, having taken more firsts than any other man on the team at the Lowell meet. Captain Teeson has been topping the bar very creditably, and his performance tomorrow afternoon will be watched with interest. Barry, who is entered in the 35-yard dash, the 300 and the relay, is regarded as one of the mainstays of the team, and if he fails to bring home several points all the dopsters will be very much surprised.

(Continued on Page 4.)

WELLESLEY CONCERT.

Tonight the Musical Clubs will hold a concert in Wellesley, leaving Trinity Place at 6.24 o'clock, and will come back on the 11.50, which the management has arranged to stop especially for the clubs.

CLASS FUND PROPOSED.

(Continued from Page 1.)

Class Fund.

Art. 1.—That the Fund be created by subscriptions from members of the class after graduation.

Art. 2.—That the Class Day Committee be empowered to submit three names to the Class before graduation, and that the man receiving the highest number of votes in a regular election be given the position of Treasurer of the Class Fund.

Art. 3.—That the Treasurer receive a salary of \$10 per year.

Art. 4.—That the Treasurer send copies of an itemized financial report to each subscribing member of the Fund, at least once a year.

Art. 5.—That the Treasurer of the Fund be removed from office by a three-fifths vote of the subscribers to the Fund, in which case the Fund shall be cared for by a Board of Directors until under their management a new Treasurer is elected by the subscribers.

Art. 6.—That the President of the Senior Class, the Graduate Secretary, and the Class Fund Treasurer form a governing board for all Class Fund business.

Art. 7.—That the governing board determine what per cent. of the existing Fund shall be spent for the Five-Year Reunions, in order to further the attendance of the Reunions, and also to assist in making it possible for all subscribers to the Fund to enjoy to the same degree the events of the gatherings.

Art. 8.—That an appeal for subscriptions be made twice a year.

Art. 9.—That the Fund be deposited in a well-established bank.

Art. 10.—That it be forbidden for anyone to invest any of the money of the Fund.

Art. 11.—That all money received and expended by the Class as a member of the Alumni Association should go to and come from the Class Fund.

Art. 12.—That, after a period of 25 years from its creation, the Fund be given to the Institute with no restrictions.

After considerable discussion on the part of the class it was decided to embody this in the Class Day Ballot and have a majority vote declare whether or no the class was in favor of making this radical move. One of the points brought up by President Kebbon was the absolute necessity of having the support of the entire class if the proposition were once started.

A "long M. I. T." followed by three "Twelves," brought the meeting to a close just before 2 o'clock.

ONE PIECE HAMMER IN THE NEW MODEL

Ithaca

If you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods, and hammer stirrups and cock the gun direct from toe of hammer. OUR hammer travels less than half an inch, taking only 1-625 of a second to operate. STUCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent shifting and spreading. THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically oil-proof, and will last you a lifetime if you take care of it and a good many years if you don't.

CATALOG Free; 18 grades, \$17.75 net to \$400 list. OUR 1-4 lb. 20 bore is a hammer-be down-to-date and shoot one.
