EGGS! EGGS! EGGS! MILLIONS CONSUMED

Quincy Market Warehouses

EGGS! EGGS! EGGS!

First, the party went through the fish freezing room and saw the different parts of the refrigerating rooms.

Among various things of interest they also saw tremendous quantities of cheese that had been frozen. In another room were treasured apples and oranges. A film of ice always left by the processes was always kept at a temperature of about 15 degrees.

This was an interesting and educational tour for the students.

ENTERTAINMENT IN UNION LAST NIGHT

Music and Drama

The New Tech Musical Club gave a concert of music and drama, and the performers were exquisite. The program included songs, recitations, and a play

CREW CANDIDATES CALLED FOR MONDAY

Manager to Arrange for Use of B. A. A. Boathouse for Practice.

BIG PROGRAM FOR CIVILS THIS WEEK

Committee of E. E. Society Have Three Meetings and One Trip Planned.

The Electrical Society has a program planned for the coming week that will be of great interest to all members.

Electrical Meeting

Eminent English Engineer to Address E. E. Society.

Mr. W. L. Sangster, the famous English engineer, will be addressing the E. E. Society on the subject of "Engineering and Science in Modern Times."

GOOD WORK OF 1905 MEN.

A new scheme for meetings is to be given its first trial by the Electrical Society in the form of a dinner meeting on Tuesday evening. The program will include a talk on electrical engineering by Dr. H. C. Edmunds, a graduate of the University of Illinois, who has been associated with the Institute in a prominent capacity in recent years.

A new scheme for meetings is to be given its first trial by the Electrical Society in the form of a dinner meeting on Tuesday evening. The program will include a talk on electrical engineering by Dr. H. C. Edmunds, a graduate of the University of Illinois, who has been associated with the Institute in a prominent capacity in recent years.

The complete program was as follows:

- Take Me Back to Tech.
- Song by all standing.
- Pink Lady Whales.
- Sweet Corn.

(Continued on Page 2.)

To Unveil Portrait

Mrs. Rogers Bequeathed It

Professor Sedgwick will be the speaker at the unveiling Monday evening in the Institute Hall. The portrait of Mrs. Rogers is to be unveiled at a special meeting of the Institute.

Some of last year's show men were scheduled to attend, but in the event of their absence, they are also principals in this year's show, which necessarily takes up a large portion of their time. The idea is that they could well afford to give an extra evening performance. However, we may hear from them later.

The complete program was as follows:

- Take Me Back to Tech.
- Song by all standing.
- Pink Lady Whales.
- Sweet Corn.

(Continued on Page 2.)

ICEBERG LECTURE

Dr. W. L. Johannsen, of the University of Illinois, will deliver his lecture on the subject of "The Iceberg Problem."

Dr. Johannsen is a member of the American Society of Civil Engineers and has made many valuable contributions to the field of marine engineering.

ICEBERG LECTURE

Dr. Johannsen is a member of the American Society of Civil Engineers and has made many valuable contributions to the field of marine engineering.

CALENDAR

In Charge of S. T. Taylor, 1914.

Saturday, March 2.

1:15—Notman's, 6 Park St.—1914 Football Match.

Monday, March 4.

2:00—Huntington Hall—Convo.

8:00—Pierce Hall, Cambridge—Quebec Bridge Lecture.

(Continued on Page 2, Col. 4.)
THE TECH, BOSTON, MASS., MARCH 2, 1912

COMMUNICATION.

We invite communications from all men in the Institute on important subjects. We take no responsibility for the views expressed, and do not agree to print them unless they may come in, whether they are signed or not.

To the Editor of THE TECH: I would like to make a few comments on the views expressed in yesterday’s issue. The two features of the proposed Fund, as mentioned by him, are truly enough, the distinctive points of the operation. However, what I think is the relative importance which he gives to the two features.

The Class Fund idea was first started as a result of two desires:

First, to give the Institute material help as a class; second, to furnish the class, as a part of the Alumni Association, an object on which to concentrate its attention for the next twenty-five years.

Class funds have been established in other colleges for many years, Harvard being the best example in close proximity. Last year the Class of 1886, Harvard, turned over to the University the sum of $100,000. While the hopes for our Fund do not reach as high as that, its possibilities cannot help be attractive to every man in the Institute as the most desirable way of aiding the Institute in the future. This is the feature that justifies the oppositions of all others in considering the establishment of the Fund, but it is to be noted that the Institute will never be on the part of any one permanently by the Fund.

The classes, after graduating, do not have any definite aim with which to hold the class together when they become alumni. Reports indicate that the following classes following will also adopt the idea and friendly competition which is hoped to exist between classes having the same object in view, should hold a class together, much better than it has ever been held together before. Tech spirit is an increasing thing and this fund would help it still more on the upward road.

The part of the proposed Fund to which the writer of yesterday took exception is the class of the Board of Directors, to apply some percentage of the money toward possible a larger attendance at 1912 men at the big five-year reunions. First of all, the class permits the Board of Directors to do this, it does not require them to. If the Board of Directors deem it advisable that some part of the Fund be expended to increase the attendance at a reunion, the class makes it legitimate for them to do so. Resolutions that the next five-year reunion of the Alumni Association will be held in 1914, is it not possible that a regard for expense by a man who has been cut of the Institute will cause a few men to remain away from the reunion and thus save the money toward the traveling and reunion expenses? This seems to be beyond the next reunion, in 1913, there will be no occasion for such assistance, except possibly in making the class outing a more elaborate affair. Again, in rendering assistance to that manner, no discrimination is to be made.

The classes, after graduating, do not have any definite aim with which to hold the class together when they become alumni. THE 1914 FOOTBALL PICTURE.

Members of Team Be at Notman's Promptly at 1:15 Today.

Arrangements have been made for photographing the 1914 football team at 1:15 P.M. today. The photographer will be Notman, at Park street. The men of the team are to hold their football costumes, and in particular, their jerseys. The picture will include the following 1914 men, who will report promptly at the above place and time: Sorbo, Mackension, Hines, Duffield, Brown, Hardy, Ruoff, Thompson, Morgan, Mitchell, Williams, Merrill, Rogers, Fox, Van Etten and Benjamin.

T. C. A. SOCIAL.

Pres. H. L. Southwick Will Read "The Rivals."

Saturday night, March 23, the Christian Association is to have another social, to which all members are invited, similar to the one held in the Union last month. This date is three weeks from tonight, and the selection is given thus far so all everyone will have a fair chance to know about it and to keep the date open.

President Henry Lawrence Southwick of Emerson College will give the Sheridan's play, "The Rivals," famed for its character, Mrs. Malaprop.

EGGS AND EGGS.

(Continued from Page 1.)

Whether in use in the ammonia plant, there are 12,210,000 dozen there this year. In that reason the temperature is kept at 10 deg., and besides the necessity for a constant low temperature, the humidity is most important. They will rot if it gets dry and mold if it gets too damp.

Finally they went through the power plant, where there is a 100-ton compressor in use in the ammonia plant, and there is at the same time work going on preparatory to the installation of a thousand-ton compressor, designed by their own Chief Engineer and being built in Providence. The concrete for the concrete is in place and suspended from the staging are the bolts that will fasten the machine down, which will be buried in the liquid when it is poured, so it will not have to be dug away later.

To mention a few satisfactions, the storehouses of the company are 3 and 10 stories high and have 50 electric elevators. The company generates its own power by two Westinghouse-Turbo generators delivering current at 460 volts. Steam is supplied by a battery of four Scotch boilers and is cleared for a group of Sterling's.

Student: What is a logarithm?

The instructor: It is a number which shows the power which a number must be raised in order to be equal to another number near it.

Student: Why, a lager rythm is a classy hockey team next year. Aren't better than this year's.
